**1. Accounting policies**

Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with applicable Accounting Standards. The financial statements are prepared in accordance with the Financial Reporting Standards for Smaller Entities (effective June 2002).

Turnover

Turnover is the total amount, excluding value added tax, receivable by the company for goods sold and services provided and relates to continuing operations.

Deferred Taxation

Deferred taxation is provided on all timing differences. The provision is calculated on the liability method at corporation tax rates ruling at the balance sheet date.

Leased and hire purchase commitments

Assets held under finance leases, which are those leases where substantially all the risks and rewards of ownership of assets have passed to the company, and hire purchase contracts are recorded in the balance sheet as fixed assets. Depreciation is provided on these assets over their estimated useful lives. Further obligations under finance leases and hire purchase contracts are included in creditors, net of finance charges. Payments are apportioned between the finance element, which is charged to the profit and loss account as interest, and the capital element, which reduces the outstanding obligations.

Rentals payable under operating leases are charged to the profit and loss account as incurred.
