**1 Accounting policies**

**a) Basis of financial statements**

**b) Turnover**

Turnover comprises the invoiced value of goods and services supplied by the company, net of Value Added Tax.

**c) Depreciation**

Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.

**e) Deferred taxation**

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider it more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.

**f) Foreign currencies**

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the Balance Sheet date. Transactions in foreign currencies are translated into sterling at the rate ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.
