1 Accounting policies

The principal accounting policies are summarised below. They have all been applied consistently throughout the year and the preceding year.

Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standards for Smaller Entities (effective January 2007).

Turnover

Turnover represents amounts receivable for goods and services provided in the normal course of business, net of trade discounts, VAT and other sales related taxes.

Patents, trademarks, licences and concessions

Patents, trademarks, licences and concessions are included at cost and amortised in equal annual instalments over their estimated useful economic life. Provision is made for any impairment.

Tangible fixed assets

Tangible fixed assets are stated at cost or valuation, net of depreciation and any provision for impairment. Depreciation is provided on all tangible fixed assets, other than investment properties and freehold land, at rates calculated to write off the cost or valuation, less estimated residual value, of each asset over its expected useful life, as follows:

Plant and machinery etc	25% on reducing balance
-------------------------	-------------------------

Taxation

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred taxation is accounted for at expected tax rates on all differences arising from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in the financial statements. A deferred tax asset is only recognised when it is more likely than not that the asset will be recoverable in the foreseeable future out of suitable taxable profits from which the underlying timing differences can be deducted.
