Notes to the Abbreviated Accounts

For the year ending 31 March 2010

1 Accounting policies**Accounting convention**

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents net invoiced sales of goods and services, together with amounts receivable and accrued under maintenance contracts. Incomes from maintenance contracts are apportioned over the length of the contract on a straight line basis.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2004, is being amortised evenly over its estimated useful life of ten years.

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and the profits stated in the financial statements that arise from the inclusion of amounts that are taxable or upon which tax relief is claimed in the amounts assessable to taxation and which have not been recognised in the financial statements in the same period. Deferred tax is measured at the average rate of tax that the company is expected to pay in the future when the timing differences reverse and without discounting the provisions.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.

Depreciation

Depreciation has been provided at the following rates in order to write off the assets over their estimated useful lives.

Plant and machinery	15% on reducing balance
Computer equipment	20% on reducing balance
