LEE WATTS CONSULTANCY LIMITED

NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 31ST AUGUST 2014

1. ACCOUNTING POLICIES

Basis of accounting

The accounts have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover is the total amount receivable by the company for services provided, excluding value added tax.

Depreciation

Depreciation is calculated so as to write off the cost of an asset over the useful economic life of that asset as follows:

Motor Vehicle	-	20% straight line
Computer Equipment	-	20% straight line

Hire purchase agreements

Assets held under hire purchase agreements are capitalised and disclosed under tangible fixed assets at their fair value. The capital element of the future payments is treated as a liability and the interest is charged to the profit and loss account on a straight line basis.

Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different to those in which they are included in the company's accounts.

Deferred tax is provided in full on timing differences which result in an obligation to pay more or (less) tax at a future date, using the tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws.

The deferred tax charge has not been discounted.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
