#### 2. ACCOUNTING POLICIES - continued

#### Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

During this accounting year, the Director has considered the suitability of the accounting policy applied to the depreciation of the boat owned by the Company. Previously the boat has increased in value, the Director therefore considers it appropriate to include no depreciation for the boat.

The director considers that this accounting policy results in the accounts giving a true and fair view. Depreciation is only one of many factors reflected in the valuation and the amount which otherwise may have been shown cannot be separately identified or quantified.
