ACCOUNTING POLICIES – Year ended 31 January 2012

BASIS OF ACCOUNTING

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards

GOING CONCERN

The financial statements have been prepared on a going concern basis. The directors have prepared trading and cash flow projections for the period to 31 July 2013 and, based on these projections, are confident that the company can continue to meet its liabilities as they fall due.

INCOME RECOGNITION

The turnover of the company is calculated by reference to the total income generated by all the company's activities and includes income derived from members' annual subscriptions and entrance fees. Subscription income is recognised on a straight line basis over the subscription period. Other income is recognised as it arises. Subscription income relating to future periods is disclosed in accruals and deferred income.

DEFERRED TAXATION

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable surplus and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.
