NOTES TO THE 2007 FINANCIAL STATEMENTS

1 ACCOUNTING POLICIESa) Basis of Accounting

These financial statements are prepared on a going concern basis, under the historical cost convention and in accordance with the Companies Act 1985 and applicable UK accounting standards. The directors have reviewed the Company's existing accounting policies and consider that they are consistent with last year. The principal accounting policies are set out below.

b) Reporting Currency

The principal currency affecting Rio Tinto's international operations is the US dollar, and all financing provided to / by the Company is denominated in the US dollar. Accordingly, the directors regard the US dollar as the principal currency affecting the Company's own cashflows. As a result, the financial statements are presented in US dollars. The year end exchange rate was US\$1.99 / £1 (2006 \$1.96 / £1).

c) Taxation

The Company does not pay for, or receive payment for, any group relief claimed from, or surrendered to, other Group companies.

d) Deferred Taxation

Full provision is made for deferred taxation on all timing differences that have arisen but not reversed at the balance sheet date, except that deferred tax assets are only recognised to the extent that it is more likely than not that they will be recovered. Deferred tax is recognised on an undiscounted basis.

e) Dividends

Final dividends are recognised when the obligation to make payment is established. Interim dividends are recognised when paid.

f) Investments

Fixed asset investments are valued at cost less impairment provisions. Investments are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable. When a review for impairment is conducted, the recoverable amount is assessed by reference to the net present value of expected future cash flows of the relevant income generating unit or disposal value if higher. The discount rate applied is based upon the Company's weighted average cost of capital, with appropriate adjustment for the risks associated with the relevant unit.

g) Group Financial Statements

Group financial statements have not been prepared as the Company is itself a wholly owned subsidiary of another company incorporated in England and Wales. In the opinion of the directors, the aggregate value of the assets of the Company consisting of shares in, and amounts owing from, its subsidiary companies is not less than the aggregate amount at which those assets are included in the balance sheet.

INVESTMENTS IN SUBSIDIARY UNDERTAKINGS (continued)

During the year the Directors have reassessed the carrying value of the company's investment in Rio Tinto Brasil Limitada, in light of the Groups plans for its mining projects which are pursued by that company. As part of the annual planning process the group has updated its net present valuation based on Rio Tinto Group's approved planning assumption. This exercise has indicated that the NPV of Rio Tinto Brasil Limitada is in excess of the historical cost investment in this activity and as such impairment provisions recognised in prior years of \$260,380,000 have been reversed in the 2007 profit and loss account.
