Notes to the Accounts

1) Accounting Policies

The following accounting policies have been applied consistently in dealing with items considered material in relation to the company's financial statements.

Basis of Preparation

The financial statements have been prepared under the historical cost accounting rules and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Depreciation

Depreciation on fixed assets is provided at rates estimated to write off the cost or revalued amounts, less estimated residual value, of each asset over its expected useful life as follows.

Plant & Machinery	20% reducing balance per year
Goodwill	10% straightline per year

Taxation

The charge for taxation is based on the profit for the period and takes account, at current tax rates, material amounts of taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Provision is made for material amounts of such deferred taxation only to the extent that it is probable that no actual liability will crystallise in the foreseeable future.

Cashflow Statement

Exemption has been taken from preparing a cashflow statement on the grounds that the company qualifies as a small company.

2) Turnover

Turnover represents the amounts excluding value added tax derived from the performance of the company's principal activity. In accordance with UITF 40 incomplete service contracts are reviewed at the end of the financial year. Where material and there is a non-contingent right to receive consideration turnover includes unbilled amounts relating to service contracts calculated by reference to the stage of completion of the contract at the financial year end and valued at estimated realisable value. Such amounts less any payments on account received are shown in debtors under the heading amounts recoverable on contracts.
