### **Notes to the financial statements for the year ended 30 June 2023 (continued)**

#### **1. Accounting policies (continued)**

##### **Basis of accounting (continued)**

##### **Going Concern**

The directors have conducted a rigorous and proportionate assessment of the Company's ability to continue in existence for the foreseeable future. This has been reviewed during the financial year and the directors have concluded that there are no material uncertainties that may cast significant doubt on the Company's ability to continue as a going concern. The financial statements have been prepared on the going concern basis which the directors believe to be appropriate for the following reasons. The directors are confident the Company currently has no cash flow requirements and accordingly the directors of the Company continue to adopt the going concern basis in preparing these financial statements.

##### **Critical accounting estimates and judgments**

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about the carrying value of assets and liabilities which are not readily apparent from other sources.

Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods. The directors do not consider there to be any critical accounting estimates or judgements.

##### **Trade and other receivables**

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established based on an expected credit loss model (general or simplified approach as detailed under impairment of financial assets). The amount of the loss is recognised in the income statement.

When a trade receivable is uncollectible, it is written off against the impairment provision for trade receivables. Subsequent recoveries of amounts previously written off are credited to the income statement. Short-term trade receivables do not carry any interest and are stated at their amortised cost, as reduced by appropriate allowances for estimated irrecoverable amounts.

##### **Investments in associated undertaking**

The Company's interest in associated undertakings is accounted for as an investment on the balance sheet.

#### **2. Employees and directors**

The Company had no employees during the year (2022: none). Management services are provided by the directors. The directors did not receive any emoluments from the Company for their services during the year.
