and equipment - 0% - 100% Reducing Balance

1.3. Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at

the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions: Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of

fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance

sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and

charged to tax only where the replacement assets are sold;

Provision is made for deferred tax that would arise on remittance of the retained earnings of overseas

subsidiaries, associates and joint ventures only to the extent that, at the balance sheet date, dividends

have been accrued as receivable;

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than

not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
