f) Deferred taxation

Deferred tax is provided in respect of any material tax effect of all timing differences that have originated but not reversed at the balance sheet date

A deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on a non-discounted basis, at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date

g) Investments

Investments held as fixed assets are stated at cost less provision for permanent diminution in value. Those held as current assets are stated at the lower of cost and net realisable value
