### **Notes to the abbreviated accounts for the Year Ended 30 September 2009**

#### **1 Accounting policies**

##### **Basis of preparation**

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

##### **Turnover**

Turnover represents amounts chargeable, net of value added tax, in respect of the sale of goods and services to customers.

##### **Goodwill**

Goodwill is the difference between the fair value of consideration paid for an acquired entity and the aggregate of the fair value of that entity's identifiable assets and liabilities.

Positive goodwill is capitalised, classified as an asset on the balance sheet and amortised on a straight line basis over its useful economic life. It is reviewed for impairment at the end of the first full financial year following the acquisition and in other periods if events or changes in circumstances indicate that the carrying value may not be recoverable.

##### **Amortisation**

Amortisation is provided on intangible fixed assets so as to write off the cost, less any estimated residual value, over their expected useful economic life as follows:

Goodwill	20% straight line
----------	-------------------

##### **Depreciation**

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows:

Plant and machinery	25% reducing balance
Motor vehicles	25% reducing balance

##### **Deferred taxation**

Deferred tax is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes, which have arisen but not reversed by the balance sheet date, except as required by FRSSE.

Deferred tax is measured at the rates that are expected to apply in the periods when the timing differences are expected to reverse, based on the tax rates and law enacted at the balance sheet date.

##### **Financial instruments**

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
