STRATEGIC REPORT

30 September 2017

The directors present the Strategic report of the Company for the year ended 30 September 2017 in accordance with Companies Act 2006, section 414C.

Business Model and Strategy

INTL FCStone Ltd is the main non-US operating entity of INTL FCStone Inc ("Group") offering regulated as well as unregulated financial products and services to customers in the European, Middle Eastern, and African time zones from London.

The Company is authorised and regulated by the Financial Conduct Authority.

The Company provides a range of services:

- The global payments division delivers 138 currencies to more than 180 countries for aid agencies and banks:
- It is a category 1 member of the London Metal Exchange (LME), and a member of ICE Futures Europe, LCH Enclear, Euronext, the European Energy Exchange, Eurex, and Norexco. Through its affiliates, IFL provides customers with access to various other global exchanges, focusing on providing hedging services for customers in base metals, soft, agricultural and other commodities;
- It acts as broker in foreign exchange, oil, and precious metals, acting as principal and intermediary;
- Provides hedging and physical trading services in precious metals, being a member of the London Bullion Markets Association and the London Platinum and Palladium Markets Association and
- It provides hedging advice to clients in the area of agricultural, energy, and dairy sectors.

In providing these services the Company makes markets in currencies and certain financial instruments but does not take proprietary risk as a matter of policy.

The Company operates in close concert with Group entities especially in New York, Chicago, Singapore, Dubai, and Hong Kong. Specifically it:

- provides clearing services to US, Latin American and Far Eastern affiliates;
- receives trading services from New York, Chicago, Singapore and Hong Kong;
- provides operational trade support for precious metal trading activity to Singapore and Dubai.

Business review

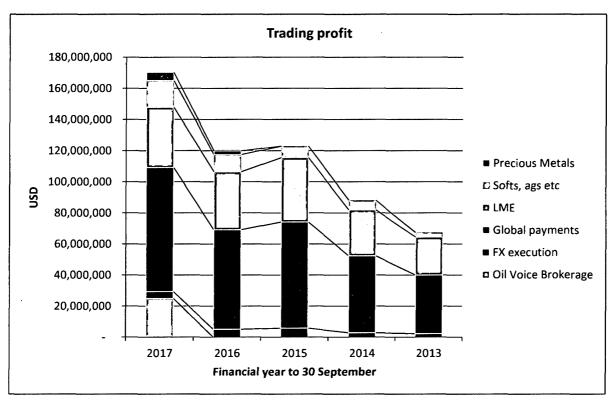

The Company's main activities (profit centres) are:

- Global Payments Services (non-derivatives);
- Clearing and execution services on the London Metal Exchange
- Clearing and execution services in connection with agricultural and soft commodities, and energy on European and, via affiliates, US exchanges for clients in agricultural and soft commodities;
- FX Prime Brokerage (execution) services;
- Trading in precious metals.
- Oil voice brokerage

STRATEGIC REPORT

30 September 2017

Their shares of trading profit in recent years have been as follows:

(Note: 2014 and 2013 figures are consolidated numbers, when the businesses were carried out in two UK entities)

The largest generator of trading profit continued to be the Global Payments business.

At the beginning of the year the Company recruited from ICAP (an interboker dealer) a team specialising in oil voice brokerage: this was an activity that the competition authorities had requested be shed as a condition for approving ICAP's merger with Tullett Prebon. The oil voice brokerage business generates commission, carries no principal risk, and uses minimal capital.

Throughout the year, the Company added personnel in support functions to help within a number of business areas as regulatory complexity has increased. In addition, projects to upgrade trading systems and platforms in the financial year continued with one particular system planned for implementation in the first quarter of 2018. This system, while intended as a replacement of an existing one, is also expected to add capabilities in certain instruments currently not traded by the Company.

STRATEGIC REPORT

30 September 2017

Key Performance Indicators (KPIs)

The Board of the ultimate parent sets the overall strategy and monitors progress. Individual operating divisions across the Group are monitored regardless of legal entity in which they reside.

At a Company level, management monitors those same businesses with each one assessed for profitability by reference to absolute targets, specifically as to capital employed, including such capital as may be required in the form of liquidity required to manage exceptional market movements.

The Group measures entity performance on the basis of return on equity. In the financial year under review the Company achieved a pre-tax rate of return of 26% (2016: 20%) of average capital employed, which the Company's Board considers more than adequate.

Risk Management

The Company is regulated as a 730k firm and is subject to the EU's CRD IV and associated regulations, and the FCA's ILAS regime with regards to liquidity. Frameworks and assessments have been developed with reference to these regulations, with close oversight also exercised by the Group's risk department.

Risk is inherent in the Company's business and its activities. Exposures to risk are managed continually to ensure that such exposures are within capital constraints and justified by the profitability of any initiative that the Company may pursue.

The principle risks faced by the Company are:

- Credit Risk
- Liquidity Risk
- Market Risk
- Operational Risk
- Regulatory Risk
- Reputational Risk
- Conduct Risk

The mathematical expression of the Company's appetite for the first three risks mentioned above must never be more than that of the Group, and is reviewed regularly, notably as part of the Internal Capital Adequacy Process (ICAAP, 'Pillar II'). New projects or unforeseen events trigger a review of all of the above risks as part of the ICAAP.

Credit risk is managed by setting authorised trading limits on all counterparties and constant monitoring of client positions to ensure adherence to those limits.

In line with Group policy, the Company does not take directional positions but the Group's strategy is that it is a market maker in certain commodities and currencies. Position and other market risk limits are imposed on all trading teams where there is market making. These are monitored daily.

Regulatory capital (Pillar I) requirements are computed and reported at least every three days. These cover credit, concentration, market, and operational risks.

Liquidity risk is monitored daily by reference to internally designed stresses and at least every three days by stress models used by the FCA applying ILAS parameters. Liquidity management is designed to ensure utilisation by each business segment does not exceed pre-agreed capital allocation. The Company has access to contingency funding, and maintains appropriate buffers as laid down by regulation.

STRATEGIC REPORT

30 September 2017

Prospective regulatory challenges

The Group has analysed its business activities within the EU and amongst a range of possible actions, depending on the outcome of the 'Brexit' negotiations, is considering as its preferred option the reinstatement of its Irish entity as a free standing, regulated, limited liability Company. This would enable Group entities, including INTL FCStone Ltd, to service its European client base using the capabilities of INTL FCStone Ltd with minimal disruption.

DIRECTOR'S REPORT

30 September 2017

The financial statements have been prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework ("FRS 101"). The amendments to FRS 101 (2014/2015 Cycle) issued in July 2015 and effective immediately have been applied. In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements of International Financial Reporting Standards as adopted by the EU ("Adopted IFRSs"), but makes amendments where necessary in order to comply with Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken.

Principal activities

The Company provides pricing and execution and clearing services in over 138 currencies with delivery to more than 180 countries. The Company also operates as a broker-dealer and advisor in commodity and foreign exchange risk management by providing a comprehensive range of customised financial services to help clients manage volatility and protect themselves against margin exposure.

Results and dividends

The profit for the year, after taxation, amounted to \$35,520,326 (2016: \$23,584,166). The Company did not pay a dividend in the year and directors have not recommended a final dividend (2016: nil).

Disclosure of Information to Auditor

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the steps that they ought to have taken as a director to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Pursuant to Section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

Going Concern

After making appropriate enquiries which assessed strategy, profitability, funding, risk management and capital resources, the directors consider the Company to be a going concern as the Company has adequate capital and liquid resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual report and accounts.

Insurance

The Company has directors' and officers' liability insurance and it is intended to maintain such cover for the full term of their employment.

Financial instruments

Information regarding the financial risk management objectives and policies are set out within the strategic report.

Pillar 3 disclosures

Details of the Company's unaudited Pillar 3 disclosures, as required by the European Union's Capital Requirements Directive IV may be found in INTL FCSTONE Inc. financial statements, which can be found at www.intlfcstone.com.

Political contributions:

The Company made no political donations (2016: nil) or incurred any political expenditure during the year.

DIRECTOR'S REPORT 30 September 2017

Overseas Branches

The Company has one overseas branch, in Ireland, which has been included in the reported results.

Directors

The directors who served the Company during the year were as follows:

S R Bailey S M O'Connor P A Smith M J Wilde L J McNeile

No director had any beneficial interests in the share capital of the Company.

On behalf of the Board

P A Smith Director

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE STRATEGIC REPORT, THE DIRECTORS' REPORT AND THE FINANCIAL STATEMENTS 30 September 2017

The directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 Reduced Disclosure Framework.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF INTL FCSTONE LIMITED

Opinion

We have audited the financial statements of INTL FCStone Limited ("the company") for the year ended 30 September 2017 which comprise the Income Statement and Other Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity and related notes, including the accounting policies in note 1.

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 30 September 2017 and of its profit for the year then ended;
- have been properly prepared in accordance with UK accounting standards, including FRS 101 Reduced Disclosure Framework and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the company in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Going concern

We are required to report to you if we have concluded that the use of the going concern basis of accounting is inappropriate or there is an undisclosed material uncertainty that may cast significant doubt over the use of that basis for a period of at least twelve months from the date of approval of the financial statements. We have nothing to report in these respects.

Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

Directors' responsibilities

As explained more fully in their statement set out on page 8, the directors are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

The notes on pages 14 to 37 form part of these financial statements

NOTES TO THE ACCOUNTS

30 September 2017

1. Accounting policies

Basis of preparation

The financial statements have been prepared in accordance with Financial Reporting Standard 101 *Reduced Disclosure Framework* ("FRS 101"). The amendments to FRS 101 (2014/2015 Cycle) issued in July 2015 and effective immediately have been applied. In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements of International Financial Reporting Standards as adopted by the EU ("Adopted IFRSs"), but makes amendments where necessary in order to comply with Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken;

- The requirements of IAS 7 Statement of Cash Flows;
- The requirements of paragraph 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors;
- The requirements of IFRS 2 Share based Payment, with exemption from most disclosures, but for the disclosure of the description of the schemes and details about options exercised in the years and options outstanding at year end;
- The requirements of paragraph 17 of IAS 24 Related Party Disclosures;
- The requirements of IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction wholly owned by such member;

In the opinion of the directors, the presentation of turnover, cost of sales and gross profit envisaged by the Companies Act 2006 is not applicable to brokerage companies. The appropriate presentation therefore is for the profit and loss account to begin with "trading profit" which comprise all income and an expense related to the Company's trading activities.

Functional and presentation currency

The Company's financial statements are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"); this is US Dollars (\$). The financial statements are presented in US Dollars (\$), the Company's presentation currency.

Going Concern

After making appropriate enquiries which assessed strategy, profitability, funding, risk management and capital resources, the directors consider the Company to be a going concern as the Company has adequate capital and liquid resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual report and accounts.

Changes in accounting policies and disclosures

The following standards, interpretations and amendments to existing standards have been published and are mandatory for the Company's accounting future periods, but the Company has not early-adopted them:

NOTES TO THE ACCOUNTS

30 September 2017

Accounting policies - continued

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments (effective date 1 January 2018, will be first incorporated within the 30 September 2019 Financial Statements) addresses the classification, measurement and recognition of financial assets and financial liabilities. The full version of IFRS 9 was issued in July 2014. The new standard introduces extensive changes to IAS 39's guidance on the classification and measurement of financial assets and introduces a new "expected credit loss" model for the impairment of financial assets. IFRS also provides guidance on the application of hedge accounting. The classification and measurement of the Company's financial assets will need to be reviewed based on the new criteria that considers the assets' contractual cash flows and the business model in which they are managed. Investment in equity instruments are required to be measured at fair value through profit or loss with the irrecoverable option at inception to present changes in fair value in other comprehensive income. There is a new expected credit-loss based impairment model that replaces the incurred loss impairment model used in IAS 39. The Company has yet to quantify the impact of this standard. Additional analysis will be undertaken by the Company prior to the adoption date to clarify and estimate the effect on the financial statements.

IFRS 15 Revenue from contracts with customers

IFRS 15 Revenue from contracts with customers (effective date 1 January 2018, will be first incorporated within the 30 September 2018 Financial Statements) presents new requirements for the recognition of revenue, replacing IAS 18 'Revenue', IAS 11 'Construction Contracts', and several revenue-related Interpretations. The new standard establishes a control-based revenue recognition model and provides additional guidance in many areas not covered in detail under existing IFRSs, including how to account for arrangements with multiple performance obligations, variable pricing, customer refund rights, supplier repurchase options, and other common complexities. IFRS 15 is effective for annual reporting periods beginning on or after 1 January 2018. The Company has yet to quantify the impact of this standard. Additional analysis will be undertaken by the Company prior to the adoption date to clarify and estimate the effect on the financial statements.

IFRS 16 Leases

IFRS 16 Leases (effective date 1 January 2019, will be first incorporated within the 30 September 2019 Financial Statements). IFRS 16 replaces the typical straight-line operating lease expense for those leases applying IAS 17 with a depreciation charge for lease assets (included within operating costs) and an interest expense on lease liabilities (included within finance costs). There will also be an increased amount of leases which are required to be recognised on the statement of financial position, in respect to the office premises of the company. The Company has yet to quantify the impact of this standard. Additional analysis will be undertaken by the Company prior to the adoption date to clarify and estimate the effect on the financial statements.

Trading profit

Trading profit represents realised and unrealised profits on trading, commission and fee income, and revenues and costs recharged to affiliates, after deduction of the costs of trading, such as brokerage etc.

Intangible assets and amortisation

Intangible fixed assets purchased separately from a business are capitalised at their cost. Intangible assets acquired as part of a business combination are capitalised at their fair value where this can be measured reliably.

Customer files and software purchased by the Company are amortised to nil by equal annual instalments over their useful economic lives as follows:

Customer Files

3 years straight line

Software

5 years straight line (subsequent enhancements attract accelerated amortisation rates

to the same assumed expected useful life)

NOTES TO THE ACCOUNTS

30 September 2017

Accounting policies - continued

Property, plant, equipment and depreciation

Depreciation is used to write off the cost less the estimated residual value of tangible fixed assets by equal instalments over their estimated useful economic lives as follows:

Computer Equipment

Leasehold improvements and Equipment

Fixtures and Fittings Non-motorised Vehicles 3-5 years straight line

Straight line to the termination of the lease

3 years straight line 1 year straight line

Impairment of non-financial assets

The carrying amounts of the Company's assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of any asset may not be recoverable. If any such indication exists, the assets recoverable amount which is estimated by taking the higher of the assets fair value less costs of disposal and the assets value in use.

An impairment loss is recognised whenever the carrying amount of an asset or its income-generating unit exceeds its recoverable amount. Impairment losses are recognised in the profit and loss account.

Impairment of the financial assets

The Company assesses at each Statement of Financial Position date whether there is objective evidence of impairment

- Available for sale Investments at cost, all Company investments are held at cost less impairment.
- Financial assets and liabilities at fair value through profit and loss, financial assets at fair value through profit and loss comprise unsettled trades. These financial assets are initially recognised at fair value and subsequently measured at fair value with gain or loss taken to profit and loss.

Taxation

The charge for taxation is based on the profit for the year and takes into account deferred taxation.

Current tax is measured as amounts expected to be paid using the tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the Balance Sheet date where transactions or events have occurred at that date that are expected to result in an obligation to pay more, or a right to pay less or to receive more tax.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates and laws that have been substantively enacted by the Balance Sheet date. The measurement reflects the Company's expectation as to how the manner in which the timing differences are expected to reverse. Deferred tax assets and liabilities are not discounted.

NOTES TO THE ACCOUNTS

30 September 2017

Accounting policies - continued

Foreign currencies

Transactions in foreign currencies are initially recorded at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the rate of exchange ruling at the Balance Sheet date. Non-monetary assets and liabilities are translated into US Dollar at the effective historical rate used on the date of initial recognition. All differences are booked to the Income Statement.

Pension costs

Contributions to the Company's defined contribution scheme are charged to the profit and loss account in the period in which they are accrued.

Financial instruments:

Financial assets

Financial assets are classified into the different categories of financial assets on initial recognition depending on the characteristics of the financial asset acquired or created and the reason behind entering into an agreement that results in a financial asset being recognised. A financial asset category is important as it drives how the financial asset is to be measured and whether the resulting income and expenses are recognised in the Income Statement or recognised in equity.

The Company classifies its financial assets into one of the following categories:

Fair value through profit or loss

This category included financial assets held for trading. They are carried in the Balance Sheet at fair value with changes in the fair value recognised in the Income Statement; the changes in fair value on "held for trading" assets are recognised through the Income Statement. Gains and losses realised on disposal or redemption of "held for trading" assets are recognised directly through the Income Statement.

The Company classes its trading assets as fair value through profit or loss. Trading assets include:

- amounts presently due for settlement under commodity contracts
- · unrealised gains and losses arising from the valuation of forward positions
- · forward commissions receivable or payable
- cash margin received or paid
- · intercompany trading balances

The majority of these instruments are short term, and due for settlement within three months.

· Loans and receivables

These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are initially recognised at fair value at trade date including direct and incremental transaction costs and subsequently measured at amortised cost using the effective interest rate method less any provision for impairment. Loans and receivables include cash held at bank, non-trading balances with group companies and other receivables.

Available for sale

Non-derivative financial assets not included in the above categories are classified as available for sale, comprising investments in trading exchanges and unlisted corporate entities. They are carried at cost because the fair values of the equity shares are not readily available in the market and the shares trade within an illiquid market.

NOTES TO THE ACCOUNTS.

30 September 2017

Accounting policies – continued

In the case of unlisted investments the Directors assess the market value by reference to the underlying net assets of the investment and to all other available factors which relate to these investments.

Where a decline in the fair value of available for sale financial asset shows evidence of impairment, the amount of the impairment loss is removed from equity and recognised in the Income Statement.

Financial liabilities

The Company classifies its financial liabilities into one of two categories depending on the purpose for which the liability was assumed.

Fair value through profit or loss

This category included financial liabilities held for trading. They are carried on the Balance Sheet at fair value with changes in the fair value recognised in the Income Statement; the changes in fair value on "held for trading" liabilities are recognised through the Income Statement. Gains and losses realised on disposal or redemption of "held for trading" liabilities are recognised directly through the Income Statement.

The Company classes its trading liabilities as fair value through profit or loss.

Trading liabilities include:

- · amounts presently due for settlement under commodity contracts
- · unrealised gains and losses arising from the valuation of forward positions
- · forward commissions receivable or payable
- · cash margin received or paid
- · intercompany trading balances

The majority of these instruments are short term, and due for settlement within three months.

Amortised cost

All financial liabilities not classified as held for trading are classified as financial liabilities at amortised cost. These liabilities are initially measured at fair value net of transaction costs at trade date. Subsequently, they are measured at amortised cost using the effective interest rate method.

Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when the Company has a legally enforceable right to offset the recognised amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Client Money and Trading Positions

The Company holds money on behalf of some clients in accordance with the client money rules of the Financial Conduct Authority. Such monies and the corresponding amounts due to clients are not shown on the face of the Balance Sheet as the Company is not beneficially entitled thereto.

Share based payments

The share option programme allows certain employees and directors to acquire shares in the ultimate parent company at a strike price equal to the market value at the time of the award. The fair value of these options at the time that they are awarded is determined using Black Scholes model and are amortised over the number of years during which they vest and recognised as an expense with a corresponding increase in equity. The amount recognised as an expense is adjusted to reflect the actual number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date.

NOTES TO THE ACCOUNTS

30 September 2017

Accounting policies - continued

Inventory

Inventory is stated at fair value less costs to sell. Changes in the fair value net of costs to sell are recognised in profit or loss in the period of the change.

Operating leases

Operating lease payments are charged to the Income Statement on a straight line basis over the term of the lease. Benefits received and receivable as an incentive to enter into an operating lease are spread on a straight line basis over the lease term.

Critical accounting estimates and judgements

The Company makes estimates and assumptions regarding the future. Estimates and judgements are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future actual results may differ from the planned assumptions and estimates. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of the assets and liabilities within the next financial year are discussed.

Fair value of financial instruments - Available for sale

The Company determines the fair value of financial instruments that are not quoted, based on estimates using present values or other valuation techniques. Those techniques are significantly affected by the assumptions used; including discount rates and estimates obtained from independent experts or quoted market prices of comparable instruments. The derived fair value estimates cannot be substantiated by comparison with independent markets and in some cases not be capable of being realised immediately. At 30 September 2017 the Company had investments of 3,674,772 (2016: 3,711,522) per note 9.

Credit impairments

Each quarter the Company considers whether an impairment should be recognised against its financial assets and other receivables. This impairment loss assessment is made using all relevant information available to management and by applying judgement on whether there is objective evidence that a financial asset or portfolio of assets is impaired as a result of occurred loss events. The calculation of an impairment loss is management's best estimate of losses incurred at Balance Sheet date and reflects the expected future cash flows likely if the trade receivable is written off per note 23.

	3,674,772	(49,835)	13,086	3,711,522		
-						

The Company owns 25,000 'B' Shares of in LME Holdings Limited as required to become a Category 1 ring dealing and clearing member of the London Metal Exchange (LME).

NOTES TO THE ACCOUNTS

30 September 2017

10. Trade and other receivables: amounts falling due within one year

	2017	2016
	\$	\$
Trade receivables carried at fair value through profit and loss	5,878,637,953	11,339,944,891
Balances at clearing houses: Trading balances	118,946,773	125,216,192
Amounts owed by group undertakings	15,589,229	38,571,358
Trade receivables	6,013,173,955	11,503,732,441
Balances at clearing houses: default fund deposits	31,002,693	19,126,031
Other debtors	862,437	1,021,439
Other taxation and social security	1,098,608	796,913
Prepayments and accrued income	15,350,625	11,061,027
	6,061,488,318	11,535,737,851

Trade receivables include balances due by customers under FIA master agreements, amounts due by counterparties and clients in the global payments business, and receivable legs of trades concluded under ISDA (and some other) master netting agreements.

Trade receivables carried at fair value subject to ISDA agreements or other agreements that do not have a legal enforceable right to offset assets against liabilities in the normal course of business have been shown gross on the balance sheet, i.e by classifying receivable and payable legs of underlying contracts as assets and liabilities respectively. Although these agreements do not net on the balance sheet, they always offset in the event of bankruptcy or default, and as such are net settled when closed out net of cash margin. The impact of this further offsetting has been shown on Note 19 Offsetting of financial assets and financial liabilities.

Trade receivables that are subject of/to master netting agreements where net settlement can be imposed in the normal course of business have been offset on the Balance Sheet and have been shown net of cash collateral, as shown in note 19 *Offsetting of financial instruments* which details the Company's gross and net exposures.

11. Investments

The Individual Liquidity Adequacy Standards require buffers to be available for deployment at time of liquidity stress. The company's strategy is to hold its buffer in the form of US Treasury Bills:

	2017	2016
	\$	\$
Investments – US Treasury Bills	31,891,237	

In prior years buffers were held in the form of designated bank account balances.

NOTES TO THE ACCOUNTS

12. Trade and other payables: amounts falling due within one year

	2017	2016
	\$	\$
Trade payables carried at fair value through profit and loss	6,010,048,529	11,520,663,602
Amounts owed to group undertakings	32,778,763	3,004,020
Accruals and deferred income	17,362,896	14,714,609
Other taxation and social security	6,392,725	3,267,091
	6,066,582,913	11,541,649,322

Trade payables carried at fair value through profit and loss include amounts due to clients under FIA master agreements, amounts deliverable to global payments counterparties and clients, suppliers of goods and services, and payable legs due to clients concluded under ISDA master netting agreements, other tailored agreements.

Trade payables subject to ISDA agreements or other agreements do not have a legal enforceable right to offset liabilities against assets in the normal course of business and as such have not been netted on the balance sheet. Although these agreements do not net on the balance sheet, they always offset in the event of bankruptcy or default, and as such are net settled when closed out net of cash margin. The impact of this further offsetting has been shown on Note 19 Offsetting of financial assets and financial liabilities.

Trade payables that are subject to master netting agreements where net settlement can be imposed have been offset on the Balance Sheet and have been shown net of cash collateral, as shown in note 19 Offsetting of financial instruments which details the Company's gross and net exposures.

13. Inventory

· ,	2017	2016
	\$	\$
Precious Metals Inventory	13,303,698	5,333,306
Soft Commodities - Grain Inventory	· .	4,159,132
	13,303,698	9,492,438

Inventory is held at the fair value with changes in fair value reported in the Income Statement for the year. The soft commodities consisted of grains inventory which was purchased under various resale agreements. The Company sold the last of its grain inventory to the counterparty by close of business on 15 December 2016.

Fair value hierarchy - fair value measurement

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date.

The Company measures fair values using the following fair value hierarchy that reflects the significance of the input used in making the measurements:

- Level 1 Quoted market price: Quoted prices in active markets for identical financial instruments.
- Level 2 Observable input: Valuation techniques based on inputs, other than quoted prices within level 1, that are observable, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 Non observable input: Valuation techniques based on inputs for the assets and liabilities that are not based on observable market data. The valuation is primarily based on generally accepted valuation techniques.

The table below analyses financial instruments carried at fair value, by valuation method. The different levels of fair value hierarchy have been defined above.

13,303,698	•	•	•
13 303 608

Total liabilities	11,370,442,127	150,221,475		11,520,663,602

Fair value - Level 2

The amounts falling within the level 2 category are those contracts owing by and to the Company's clients and counterparties in the Global Payments business. Level 2 inputs are inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Fair value - Level 3 Investments

The Company's investments consist of B Shares in London Metals Exchange Holdings Limited (\$ 3,401,121) which enables the Company to trade directly on the London Metals Exchange. The Company holds additional investments which consist of shares in SWIFT (\$ 139,946) and Industrial and General Insurance (IGI) Plc of Nigeria (\$ 133,705), all three of these investments are treated as available for sale.

The Company cannot determine the fair value of these investments as a) the shares are unlisted b) the shares trade infrequently within an illiquid market c) fair value cannot be determined with comparison to similar companies in the market due to lack of appropriate companies and d) No offer of purchase existed at the Balance Sheet date for these investments. Management has therefore valued the investments at the consideration paid on date of acquisition adjusted for revaluation due to foreign exchange rate changes.

19. Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Within the disclosure table below the financial instruments and cash collateral columns represent the 'amounts not set off within the Statement of Financial Position' for trade & other receivable or payable to / from clients, brokers and clearing houses includes transactions where:

NOTES TO THE ACCOUNTS

30 September 2017

Offsetting of financial assets and financial liabilities - continued

- The counterparty has an offsetting exposure with the Company and a master netting or similar
 arrangement is in place with a right of set off only in the event of default, insolvency or bankruptcy, or
 the offset criteria are otherwise not satisfied; and
- Cash collateral has been received/ pledged in respect of transactions described above.

Cleared derivative contracts that are subject to a master agreement allowing for enforced netting in the ordinary course of business are shown 'gross' to the extent that fair values are either positive or negative. Grossing of 'OTC' contracts that are subject to ISDA and other types of master agreement where netting can only be enforced on an event of default is by reference to each payable and receivable leg, on the basis that these are the amounts (valued in USD) that might be settled at some time after the balance sheet date.

In addition to the financial assets and liabilities subject to formal netting agreements shown above, the Company enters into contracts for the receipt and delivery of currencies in its global payments business. These are in some cases subject to master agreements that might provide for set-off in the event of default, but as the trades are almost always 'spot' they have been treated as not benefitting in practice from set-off. The total receivable under such trades at 30 September 2017 was \$134,282,419 (2016 - \$148,720,066), and the total amount payable was \$135,715,593 (2016 - \$150,221,475). These amounts are included in the totals of trade receivables and trade payables in notes 10 and 12.

NOTES TO THE ACCOUNTS

30 September 2017

20. Country-by-country reporting

Trading profit represents realised and unrealised profits on customer trading, commissions receivable (after deduction of brokerage and similar charges), fee income from issuing contracts, and net interest receivable on trading balances, after deduction of the costs of trading, excluding value added tax.

Geographical analysis

The geographical analysis has been compiled on the basis of location of the office where the transactions are recorded.

Name	Nature of activities	Geographical	Turnover	Profit before tax	Corporation tax paid	Average number of employees
2017 INTL FCStone Ltd	Broker/Dealer	United Kingdom	169,543,554	44,267,911	7,017,529	238

INTL FCStone Ltd	Broker/Dealer	Ireland	2,225,909	748,644	114,193	7
Dublin branch						

No public subsidies were received during the current or prior reporting periods.

The geographical analysis has been prepared in accordance with Capital Requirements (Country-by-Country Reporting) Regulations 2013.

21. Defined contribution pension scheme

The Company operates a defined contribution pension scheme. The pension cost charge for the period represents contributions payable by the Company to the scheme and amounted to \$1,307,396 (2016: \$1,216,442).

There were contributions payable to the scheme at 30 September 2017 of \$171,405 (2016: \$148,652).

22. Segregated balances

The Group and Company also holds the following segregated balances on behalf of clients in accordance with the client money rules of the Financial Conduct Authority.

	2017	2016
	\$	\$
Cash at bank and in hand	107,085,587	54,638,065
Balances held at brokers	31,428,960	36,623,739
Balances at clearing houses	59,046,907	55,874,838

NOTES TO THE ACCOUNTS

30 September 2017

23. Financial risk review

The Company is exposed to the following risks:

- · Credit that clients or counterparties might default while being in debt to the Company
- Market that market values of positions in foreign exchange or metals move materially adversely to the cost of the Company
- Liquidity that the Company will not be able to pay its liabilities as they fall due
- Operational that the failure of any processes negatively affect the efficient and profitable running of the Company

Credit risk

In managing credit risk the Company divides its exposures into two categories:

- Derivative contracts with clients and counterparties. These are in respect of: contracts cleared on exchanges, OTC Foreign Exchange prime brokerage services, and bullion.
- Foreign Exchange to be received in respect of Global Payment services (94% of which was due within 2 days of 30 September 2017).

Summary of credit risks at 30 September 2017

The total potential amount at risk at 30 September 2017 under master netting agreements is shown in note 19 was \$263,278,221 (2016 - \$ 361,647,414) and the total amount due by global payments counterparties was \$134,282,419 (2016 - \$148,720,066).

In addition the Company had placed \$31,002,693 at clearing houses as default deposits (2016 - \$19,126,031). These might be wholly or partly at risk should a clearing member default and the initial margin fail to cover any losses incurred by that member.

Derivative instruments

Derivatives are marked to market daily with margining arrangements in place to collect collateral to support deficits from clients in the form of G8 currencies. Any credit facilities granted to clients is reviewed at least annually.

At 30 September 2017 a provision of \$1,459,879, including a \$53,760 provision brought forward from 2016, (2016: \$3,218,219) was made for receivables past due and a charge of \$4,141,263 (2016 - \$542,049) to the Income Statement because customers were unable to pay.

Notwithstanding the accounting treatment of instruments governed by ISDA master agreements (treated as 'gross' on the face of the Balance Sheet and per note 19) settlements with clients are either net of is gross, subject to agreed limits or the client is required to pay first. Settlements with prime broker banks are sometimes made net for each currency sometimes with the Company paying first, in line with approved policies.

The geographic distribution of derivative contracts with valuations owing to the Company, including clearing houses/exchanges after deducting cash received as collateral as at 30 September was:

% of Expos	sure
2017	2016
63.37%	71.95%
6.62%	3.34%
24.80%	23.69%
2.09%	0.92%
2.73%	0.00%
0.38%	0.10%
100.00%	100.00%
	2017 63.37% 6.62% 24.80% 2.09% 2.73% 0.38%

NOTES TO THE ACCOUNTS

30 September 2017

Financial Risk Review - continued

An analysis of net amounts receivable, after deduction of any collateral received was as follows:

	2017	2016
Clearing houses	37.2%	35.7%
Banks	30.1%	38.3%
Affiliate – INTL FCStone Inc *	12.8%	10.2%
Affiliates excluding INTL FCStone Inc	0.1%	0.2%
Clients	19.8%	15.6%
Total	100.0%	100.0%

^{*} Futures Commission Merchant Regulated by CFTC in USA (segregated funds)

Note 19 shows the gross value of each leg, receivable and payable in respect of derivative contracts. Each of those legs is subject to market moves that might result in increased amounts due to the Company. Subject to the adequacy of collateral received such market moves might result in margin calls due to the Company the following day.

Credit – non derivative instruments

For the Global Payments business all unpaid amounts due to the Company three days after contracted value date are investigated.

At 29 September 2017 trades for delivery that were recorded as past due date by five days totalled \$17,018,620 (2016: \$5,913,101 as of the 30 September 2016), with all of these being settled within a few days of the year end. Bad debts incurred in the financial year totalled \$443 (2016 - \$5,083), being mainly small amounts written off as trade errors.

Liquidity risk

Liquidity risk arises mainly from timing differences between margin payments called on the Company by exchanges and brokers, and subsequent collection from clients. This is managed by parameters set by the Board to constrain total gross and net positions held with each such institution. The Company is subject to the ILAS regime per the FCA's handbook (BIPRU 12), by which it is required to keep the certain buffers to handle potential margin call stress, and must manage its liquidity as a standalone entity, not dependent on any liquidity resources that are shared with other group companies.

The Company's ring team on the floor of the London Metal Exchange is the other division in the Company that exposes the Company to market risk. During the financial year there were 2 days when the ring team lost between \$100,000 and \$140,000.

All the Company's physical inventory is hedged, to mitigate market risk.

NOTES TO THE ACCOUNTS

30 September 2017

Financial Risk Review - continued

Operational Risk

Operational risk management (ORM) forms part of the day-to-day responsibilities of management at all levels. The ORM framework includes qualitative and quantitative methodologies and tools to assist management to identify, assess and monitor operational risks and to provide management with information for determining appropriate controls and mitigating measures. The framework is based around risk and control self-assessments (RCSA), key risk indicators (KRIs) and incident reporting. All incidents are reported to the executive directors, as are KRI reports. In addition the Operational Risk Department escalates where appropriate to work with management to mitigate any risks.

While routine operational risk mitigation is embedded by application of necessary controls at all levels of management, and can be the subject of internal audit, the Company's Board also focusses on, and reviews potentially high impact, low frequency losses, where there is no loss experience to assess future exposures. Mitigating steps are taken where possible.

All ORM incidents are logged, regardless of any losses incurred, and analysed to ensure that adequate management action is taken in respect of the cause of losses. ORM incident trends are included in the Company's regular assessment of the adequacy of the pillar 2 capital requirement.

Assessments are continuous but four specific operational risks are generally identified with a potential for the material adverse financial impact after mitigation. These are:

- Business continuity (failure of data lines, server centres, inability to access offices)
- System failure (third party or internally built software/systems failure)
- Failure to comply with all regulations in the safeguarding of client assets under various regimes
- Client and Company data loss or compromise from external, third party, action

Each of these risks has received the full attention of management, and effective mitigation designed and implemented, as have all others with the potential to incur material financial cost (pre mitigation). Mitigation includes: back up data server centres across two continents with tested failover processes; duplicate data lines into London offices; operation across to two offices; available serviced offices for critical staff, well-resourced internal audit and compliance departments, and a dedicated data security department.

New projects and products are subjected to Operational Risk review before proposals are accepted.

All identified risks are reviewed by the Operational Risk department and at least once a year the whole management team is invited to challenge the impact and effectiveness of mitigation, in a process overseen by the Board of the Company.

NOTES TO THE ACCOUNTS

30 September 2017

Financial Risk Review - continued

Capital risk

This is the risk that the Company's capital and leverage ratios fall short of the requirements imposed by regulation. The Company calculates both in accordance with the EU's Capital Requirements Directive IV and associated Regulations at least every three days. All the Company's capital is classed as Tier 1, and at each financial year end the ratios were as follows:

	2017	2016
	\$,000	\$,000
Capital and retained earnings	197,640	162,119
Less: intangible assets	(2,965)	(1,474)
Less: Free Deliveries	(473)	(134)_
Own Funds (CET1 only) at 30 September	194,202	160,511
Total Capital ratio year end profit included	17.56%	15.26%
Total Capital ratio year end profit excluded	14.35%	12.90%
Leverage ratio year end profit included	8.65%	8.92%
Leverage ratio year end profit excluded	7.07%	7.6%

Capital regulations preclude the application of retained profits until they are verified by the auditors. The above ratios are as at 30 September 2017 and post-audit.

"New initiatives are assessed by reference to externally imposed and internally calculated capital requirements.
