## 1. Accounting policies

### 1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

The accounting policies remain unchanged from the previous year and are set out below

### 1.2 Going concern

It is the directors' intention that the company will be wound up in 2013. The financial statements are therefore prepared on a break up basis. The financial statements include adjustments for the write down of assets to net realisable value.

### 1.3 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following basis:

Leasehold property	- over the term of the lease
Other fixed assets	- 4% and 10% straight line

Other fixed assets represents the costs of construction of solar plants: solar panels, civil/structural and electrical costs, grid connection, planning and professional fees capitalised and depreciated at 4% per annum on a straight line basis. Costs of transformers, inverters and cabling are being depreciated at 10% per annum on a straight line basis.

### 1.4 Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the Balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the Profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity.

### 1.5 Deferred taxation

Deferred tax is recognised on all timing differences where the transactions or events that give the company an obligation to pay more tax in the future, or a right to pay less tax in the future, have occurred by the balance sheet date. Deferred tax assets are recognised when it is more likely than not that they will be recovered. Deferred tax is measured using rates of tax that have been enacted or substantively enacted by the balance sheet date.
