## Notes to the abbreviated accounts For the year ended 31 August 2013

---

### 1. Accounting policies

#### 1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

#### 1.2 Turnover

When goods and services are being supplied to customers under a long term contract, income is recognised as a percentage completion of the contract. The differences between amounts credited to turnover by this method and stage payments received or receivable, after providing for costs to completion where applicable, is shown in the balance sheet as amounts recoverable on contracts (debtors) or payments received on account of contracts (creditors). All turnover is shown net of value added tax.

In respect of long-term contracts and contracts for on-going services, turnover represents the value of work done in the year, including estimates of amounts not invoiced. Turnover in respect of long-term contracts and contracts for on-going services is recognised by reference to the stage of completion.

#### 1.3 Tangible assets and depreciation

Tangible assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases:

Plant and machinery, etc.	-	25% straight line
---------------------------	---	-------------------

#### 1.4 Leasing and hire purchase

Assets obtained under hire purchase contracts are capitalised as tangible assets. Assets acquired by hire purchase are depreciated over their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

#### 1.5 Operating leases

Rentals under operating leases are charged to the profit and loss account on a straight line basis over the lease term.

#### 1.6 Stocks

Stocks are valued at the lower of cost and net realisable value after making due allowance for obsolete and slow-moving stocks.

#### 1.7 Trade and other debtors

Trade debtors are recognised and carried forward at invoiced amounts less provisions for any doubtful debts. Bad debts are written off to the profit and loss account when the directors deem that the balance is no longer collectable. Prepayments are recognised when a purchase invoice has been paid relating to the period after the year end date.

### 1. Accounting policies (continued)

#### 1.8 Cash at bank and in hand

Cash comprises cash at bank after adjustment for any uncredited lodgements and unrepresented cheques clearing the bank account following the year end.

#### 1.9 Trade and other creditors

Trade and other creditors are recognised and carried forward at invoiced amounts. Accruals are recognised for costs relating to the year where an invoice had not been received as at the year end date.

#### 1.10 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.

#### 1.11 Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
