1 Accounting policies

Basis of preparation of financial statements

The financial statements have been prepared in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and under the historic cost convention.

Fixed assets

The cost of tangible fixed assets is their purchase cost, together with any incidental expenses of acquisition.

Depreciation is provided on all tangible fixed assets, at rates calculated to write off the cost or valuation of each of the assets, less their estimated residual values, over its expected useful life, the annual rates are as follows:-

Office equipment	25% of cost
------------------	-------------

Revenue recognition

Revenue is recognised when it is judged that the stage of completion of the contract, the amount to be received and the costs incurred to complete the contract can be measured reliably and it is probable the revenue will be received. It is measured by reference to the stage of completion of the contract at the estimated fair value of the right to consideration, which represents amounts chargeable to clients, including expenses, disbursements, excluding value added tax. Revenue chargeable but not billed to clients is included in trade debtors.

Deferred taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.
