NOTES TO THE ABBREVIATED ACCOUNTS **for the year ended 30 April 2016**

1. ACCOUNTING POLICIES

Going concern

The directors have a reasonable expectation that the company and the group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, the company continues to adopt the going concern basis in preparing financial statements.

Accounting convention

The financial statements have been prepared under the historical cost convention, and on the going concern basis.

They have been drawn up to comply with applicable United Kingdom accounting standards, which have been applied consistently throughout the current year and previous year.

Cash flow statement

The directors have taken advantage of the exemption in FRS 1 "Cash Flow Statements" (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly-owned and its parent publishes consolidated financial statements.

Stocks

Stocks are stated at the lower of cost and net realisable value. Net realisable value is based upon estimated selling price, less costs to be incurred to completion and disposal.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the group's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Rental income

Rental income is measured at the fair value of the consideration received or receivable on an accruals basis and is stated net of discounts and VAT.

Turnover

Turnover comprises income in relation to the sale of properties and is recognised on the point of completion and originated in the United Kingdom.

2. CREDITORS

Creditors include an amount of £279,246 (2015 - £279,246) for which security has been given.
