1.5 Going concern

In assessing the company's ability to continue as a going concern, the directors have considered the financial position and performance of both the company and the largest group of which the company is a member and for which consolidated financial statements are prepared. The largest such group is Esquire Consolidated Group Limited, which made a loss of £94m (this is after £71.3m relating to impairment of fixed assets and £7.7m relating to exceptional costs) for the year ended 31 December 2011, had a net current liability of £34m and negative shareholders funds of £101m as at 31 December 2011.

Having due regard to the net current liability and negative shareholders funds of Esquire Consolidated Group Limited, these financial statements have been prepared on the going concern basis, which assumes that the company and its fellow subsidiaries will continue to have sufficient funds to meet its cash requirements and its liabilities as they fall due for the next twelve months from approval of these financial statements.

The directors believe that, based on its current five year forecasts, which incorporates new banking facilities, additional funds introduced by loan stock holders of ultimate parent company and acquisition of new properties, the group will have sufficient funds to meet its cash requirements for the foreseeable future whilst maintaining compliance with the envisaged financial covenants within the new banking arrangement.

The current five year forecast is based on a number of financing and growth scenarios and, as discussed below, the financing have been secured to provide the group with sufficient funds for the next twelve months. The forecast assumes that growth will be achieved through realistic fee increases and occupancy levels. The directors believe that these are reasonable assumptions based on the group's previous history and current performance.

The new banking facilities, loan stock conversion and acquisition of new properties have taken place after the year end, and details are outlined below.

1 In July 2012, Esquire Consolidated Group Limited and its subsidiaries entered into a senior facilities agreement with its current group bankers and all its existing bank term loans and overdraft facilities including hedging instruments were refinanced and restructured. The new banking terms provide the Group with favourable interest terms compared to the facilities in place at the year end and additional credit facilities to support the Group's five year plan. The new facilities maturity date is July 2017.

2 In addition, the Convertible Unsecured Loan Stocks ("CULS") issued by the ultimate parent company, Esquire Group Investment (Holdings) Limited ("EGIHL") and its subsidiary, Esquire Consolidated Investment (Holdings) Limited, ("ECIHL") were capitalised with the relevant CULS holders ultimately receiving an equity interest at EGIHL level. Furthermore, certain of the CULS holders have advanced new money amounting to £7m alongside the bank senior lenders.

3 At the same time, the group has acquired four property holding companies from PSPI, whose properties were previously let to the group. This has resulted in the ownership of a further 28 freehold properties further increasing the Group's ownership of its own facilities.

On the above basis, the directors have a reasonable expectation that the group and company will be able to continue in operational existence for the foreseeable future and thus continue to adopt the going concern basis in preparing the financial statements.

1.6 Fixed Assets - Leasehold Properties

Leasehold properties are initially recorded at cost. The directors have made a decision to revert to historic cost accounting for the leasehold properties held by the company. The main reason for this change is that historic cost is less volatile in the current economic climate and simpler to understand. This restatement has had the effect of reducing net assets as at 31 December 2010 by £2.1m.
