**Notes to the Abbreviated Accounts for the period ended 31 March 2014****1 Accounting Policies****Basis of measurement and preparation of accounts**

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities effective April 2008.

**Turnover policy**

Turnover represents hotel income and rents received from let properties.

**Tangible assets depreciation policy**

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Freehold Property - 1% straight line

**Valuation information and policy**

Investment Properties

The company holds some properties for long term investment and these are included in the balance sheet at what the directors consider to be their current open market value.

Depreciation is not provided in respect of the freehold investment properties. This policy represents a departure from statutory accounting principles, which require depreciation to be provided on all fixed assets. The directors consider that this policy is necessary to give a true and fair view because current values and changes in current values are of prime importance rather than the calculation of systematic annual depreciation.
