**1. ACCOUNTING POLICIES**

**Basis of preparing the financial statements**

On 31 December 2012, the directors took the decision to cease trading. As the directors intend to wind up the company they have not prepared the financial statements on a going concern basis.

The company made a loss of £1,967 in the year ended 31 July 2014. At 31 July 2014 the company had net liabilities of £1,050,774 and a positive cash balance of £6,186.

To date, the company has been financed by the issue of equity and loans from shareholders. The company does not have any agreed bank overdraft or other bank borrowing facilities.

Assets on the balance sheet at 31 July 2014 have been assessed for impairment and have been included at expected recoverable amounts. Liabilities have been recognised to the extent that an obligation existed at the balance sheet date.

**Accounting convention**

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

**Deferred tax**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis. Deferred tax assets are recognised only to the extent that it is expected that they will be able to be utilised against future profits.

**Research and development**

Research expenditure undertaken with the prospect of gaining new scientific or technical knowledge and understanding is recognised in the profit and loss account as an expense as incurred.

Expenditure on development activities, whereby research findings are applied for the production of new or substantially improved products and processes, is capitalised if the product or process is technically and commercially feasible and the company has sufficient resources to complete development. Amortisation is charged to the profit and loss account on a straight line basis over the useful economic life of the activity.

**Hire purchase and leasing commitments**

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.
