4 Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes. Deferred taxation is calculated on an un-discounted basis at the tax rates which are expected to apply in the periods when the timing differences will reverse.

5 Leasing and hire purchase commitments

Assets held under finance leases and hire purchase contracts, which are those where—substantially all the risks and rewards of ownership of the asset have passed to the company, are—capitalised in the balance sheet and depreciated over their useful lives. The corresponding lease—or hire purchase obligation is treated in the balance sheet as a liability. The interest element of the rental obligations is charged to the profit and loss account over the period of the lease and represents a constant proportion of the balance of capital repayments outstanding. Rentals paid under operating leases are charged to income on a straight line basis over the lease term.

₆ Share capital

Allotted, called up and fully paid: Ordinary shares £1 each, No: 100, £100, (2010: £100).
