Notes to the financial statements for the year ended 31 December 2011

1. Accounting policies

These financial statements are prepared on the going concern basis, under the historical cost convention and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The significant accounting policies adopted are set out below.

Cash flow

The director has taken advantage of the exemption in FRS 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its ultimate parent publishes a consolidated cash flow statement.

Turnover

Turnover represents the invoiced value of goods supplied during the period, excluding value added tax, and is net of sales returns, trade discounts and rebates. Revenue is recognised either upon shipment of products or on delivery of the products, depending on when title to the product is transferred to the customer. This varies from customer to customer according to the terms of sale.

Foreign currency

Transactions denominated in foreign currencies are recorded at the rate of exchange at the date of the transaction or, if hedged, at the forward contract rate. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are reported at the rates of exchange prevailing at that date or, if appropriate, at the forward contract rate. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included as an exchange gain or loss in the profit and loss account.

Stocks

Stocks are stated at the lower of cost and net realisable value. Cost includes all direct costs incurred in bringing the finished goods and goods for resale to their present condition and location. Net realisable value is based on estimated selling price, less further costs expected to be incurred to disposal. Provision is made for obsolete, slow-moving or defective items where appropriate.

Deferred taxation

Deferred taxation is provided in full on timing differences that result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, based on tax rates and laws which have been enacted or substantively enacted by the balance sheet date. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in financial statements. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

2 Turnover

No analysis of turnover by activity or geographical area has been provided as, in the opinion of the director, such disclosure would be seriously prejudicial to the interests of the group.
