Notes to the Accounts

1 ACCOUNTING POLICIES

Accounting Convention

The following accounting policies have been consistently applied in dealing with items which are considered material in relation to the company's financial statements.

The accounts have been prepared under the historical cost convention and in accordance with the provisions relating to small companies within the Financial Reporting Standard for Small Entities (effective January 2007)

The company has taken advantage of the exemption conferred by Financial Reporting Standard 1 'Cash Flow Statements' not to prepare a cash flow statement on the grounds that it is a 'small' company under the Companies Act 1985.

Intangible Fixed Assets

Goodwill is written back over 20 years.

Tangible Fixed Assets

Assets held under finance leases and other similar contracts, which confer rights and obligations similar to those attached to owned assets, are capitalised as tangible fixed assets and are depreciated over the shorter of the lease terms and their useful lives. The capital elements of future lease obligations are recorded as liabilities, while the interest elements are charged to the profit and loss accounts over the period of the lease.

The Brants Bridge, Bracknell, Berkshire lease was recognised on the date of purchase of Tyco Electronics UK Ltd at the value of the finance lease obligations arising from the lease. The lease remains in the name of Tyco Electronics UK Ltd. The stock and purchase agreement between Lineage Power and Tyco Electronics Ltd states that where a lease has not been assigned to Lineage Power due to the lessee being unwilling to assign the lease, any obligations arising on the the contract and paid by Tyco Electronics UK Ltd is reimbursed by Lineage Power UK Ltd until the end of the lease. The financial statements recognise the finance lease asset in accordance with FRS 5 which states that the commercial effect of transactions rather than the legal form should be reflected in the financial statements to enable the effects of such transactions to be understood.

Foreign Currencies

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance sheet date. All differences are taken to the profit and loss account.

Taxation

The charge for taxation is based on the results for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for accounting and taxation purposes.

No tax charge arose as tax losses were incurred.

2 TURNOVER

Turnover represents company transfer pricing at 103% of cost of sales included in the profit and loss account net of VAT.
