NOTES TO THE FINANCIAL STATEMENTS

For the period ended 31 March 2009

PRINCIPAL ACCOUNTING POLICIES**1. Basis of accounting**

The financial statements have been prepared under the historical cost convention.

Compliance with accounting standards

The financial statements have been prepared in accordance with applicable United Kingdom accounting standards. The significant accounting policies adopted are summarised below. These policies have been consistently applied in the current period.

Investment in associated Partnership

The investment in the associated Partnership is stated at cost less provision for any permanent diminution in value and is accounted for using the equity method. The profit and loss account includes the Company's share of the Partnership's profits less losses while the Company's share of the net assets of the Partnership is shown in the balance sheet.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred taxation is provided in full on timing differences that result in an obligation at the balance sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in the financial statements. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Foreign currency

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.

Financial instruments

The Company's principal financial instruments are its bank balance, receivables and redeemable preference shares. The main purpose of the bank balance and receivables is to provide funding for the Company's operations and to ensure the Company can meet its liabilities as they fall due.

Due to the nature of the financial instruments used by the Company, there is no exposure to price risk. Credit risk of receivables is closely monitored.

Redeemable preference shares are only redeemed in the event that new B ordinary shares are issued in accordance with the offer as set out in the Company's prospectus and the redeemable preference shares are fully paid up. Redeemable preference shares are classified as long term liabilities of the Company until they are settled.
