Depreciation

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows

Office equipment	33.3% straight line basis
------------------	---------------------------

Deferred taxation

Deferred tax is recognised, without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes, which have arisen but not reversed by the balance sheet date, except as required by FRSSE

Deferred tax is measured at the rates that are expected to apply in the periods when the timing differences are expected to reverse, based on the tax rates and law enacted at the balance sheet date.

Start-up costs

Start-up costs are accounted for on a basis consistent with similar costs incurred as part of the company's ongoing business.

Where there are no similar ongoing costs, start up costs which satisfy the criteria under relevant accounting standards to be recognised as assets are included in the balance sheet. All other costs are written off as incurred.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
