This form is available in an alternative format. Please visit the forms page on the website at www.companieshouse.gov.uk

10

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a very important document, as it sets out the President's policy for the new year. The President states that he will continue to support the Union and the Constitution, and that he will not allow any state to secede from the Union. He also states that he will not allow any state to interfere with the rights of the people, and that he will not allow any state to interfere with the rights of the states.

[illegible]

$\gamma = 1$ and $\gamma = 2$ are shown in Figure 1. The curves are calculated for $\alpha = 0.5$ and $\beta = 0.5$. The curves show that the probability of a node being a leader increases with the number of nodes in the network. The probability of a node being a leader is higher for $\gamma = 2$ than for $\gamma = 1$.

1. *Pharmaceutical industry* – The pharmaceutical industry is a major contributor to the U.S. economy, with sales of over \$100 billion in 1998. The industry is characterized by high R&D costs, long development times, and high barriers to entry. The industry is also heavily regulated by the FDA.

1

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$

2000

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h and then adjusted to the concentration of 1×10^8 cells/ml. The cells were then mixed with the plant protoplasts at the concentration of 1×10^6 cells/ml. The transformation efficiency was determined by the number of transformants per 10^6 protoplasts. The results were expressed as the mean \pm SD of three independent experiments.
