The Company endeavours to work with the most successful co-producers, distributors and broadcasters, and to work with and engage the highest quality personnel to carry out its production activities. The Company continues to monitor the exploitation of programmes in international markets and anticipates further income from those sources.

Cash flow risk

The Company's activities expose it to the financial risks of changes in foreign currency exchange rates. The Company uses foreign exchange forward contracts to hedge these exposures. The Company does not use financial instruments for speculative purposes.

- select suitable accounting policies and apply them consistently,
- make judgements and estimates that are reasonable and prudent,

They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In so far as the directors are aware

NOTES TO THE FINANCIAL STATEMENTS

5 APRIL 2012

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention. The financial statements have been prepared in accordance with applicable United Kingdom Accounting Standards. The significant accounting policies adopted are summarised below. These policies have been consistently applied in the year.

Turnover

Turnover derives from one class of business, the production and exploitation of television programmes, and is stated net of Value Added Tax. Turnover is entirely derived from the activities in the United Kingdom. Turnover is recognised at the fair value of the right to consideration and is not recognised until there is certainty over the right to consideration. Turnover which has been recognised but not invoiced by the Balance Sheet date is included in accrued income. Amounts invoiced in advance are included in deferred income.

Cost of sales

Cost of sales represents direct costs attributable to turnover.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date.

Deferred taxation is provided in full on timing differences that result in an obligation at the Balance Sheet date to pay more tax, or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in financial statements. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

Stock

Stock and work-in-progress other than long-term contracts, are stated at the lower of cost and net realisable value. Cost comprises contractual expenditure in respect of the television programmes being produced or co-produced. Net realisable value is based on estimated selling price less all further costs to completion and all relevant marketing, selling and distribution costs.

Financial instruments

The Company's principal financial instruments are its cash at bank and receivables. The main purpose of the cash at bank and receivables are to provide funding for the Company's operations and to ensure the Company can meet its liabilities as they fall due.

Due to the nature of the financial instruments used by the Company, there is no exposure to price risk. Credit risk of receivables is closely monitored.

1. Accounting policies (continued)

Foreign currencies

Transactions denominated in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rate of exchange ruling at the Balance Sheet date, with the exception of certain balances which are translated into sterling at the rate of exchange in forward and spot rate contracts. These contracts are in place in order to mitigate the risk of exchange rate fluctuations. Exchange differences are taken to the Profit and Loss Account.
