NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 30 SEPTEMBER 2016

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2015).

At the balance sheet date, the company's profit and loss reserves are showing a negative balance. The company has received assurance from the directors that they will continue to give financial support to the company for twelve months from the date of signing these financial statements. On this basis, the directors consider it appropriate to prepare the accounts on a going concern basis. However, should the financial support mentioned above not be forthcoming, the going concern basis used in preparing the company's accounts may be invalid and adjustments would have to be made to reduce the value of assets to their realisable amount and to provide for any further liabilities which might arise. The accounts do not include any adjustment to the company's assets or liabilities that might be necessary should this basis not continue to be appropriate.

Turnover

The turnover shown in the profit and loss account represents amounts received during the year for the rental of an overseas property.

Fixed assets

All fixed assets are initially recorded at cost.

Investment properties

Investment properties are shown at the director's estimate of open market value. Depreciation is not provided on investment properties. This accounting policy is in accordance with Statement of Standard Accounting Practice No. 19.

Operating lease agreements

Assets held for use in operating leases are included in fixed assets. Rental income from operating leases is recognised on a straight line basis over the lease term

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
