1.2. Turnover

Turnover represents the total invoice value, excluding value added tax, of sales made during the year Revenue is recognised when service has been delivered to the customer.

1.4. Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or subsequently enacted by the balance sheet date

Deferred taxation is recognised in respect of all material timing differences that have originated but not been reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing difference can be deducted

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date

1.5. Investments

Fixed asset investments are stated at cost less provision for permanent diminution in value
