1 | OVERVIEW

Group snapshot

Revenue

Revenue has increased by over 12% in the last year from £712m in 2022 to £800m in 2023

Carbon offsets

Our renewable energy sites' carbon saving is over **681,101** carbon tonnes this year

Energy generation

Our renewable energy assets produce enough energy to power over a million UK homes

Number of loans

Over the year we provided financing to, on average **224** borrowers in the UK

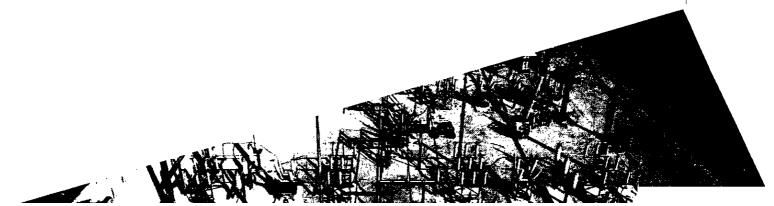

Number of employees

We employ over **1,500** people

Number of sites

We own **229**energy sites spread
predominantly across
the UK

Directors Report'

Ferri Trading Limited (the "Company" or together 🚦 The Company's share price golvered 3.10% growth with its subsidiaries the "Group" itargets consistent growth for shareholders over the long-term, with a focus cinistead, and predictable growth icomprising more than 350 companies that operate across a range of industries. The Group has been frading for 13 years, successfully navigating the Aconomic cycles and market volatility over this period. Our Group has established a stable presence in its scritors. of operation and the expect to continue to perform. predictably in these sectors

The UK taced a challenging economic backdrop over the financial year. Our Group has continued to demonstrate resilience, though was not immune to the challenging market conditions of the sectors it operates in The financial results for the period indicate an accounting loss, this is primarly due to capital deployment into newer asset intensive parts. of the Group, which are expected to deliver profit growth in the future. Extraordinary costs incurred in the year have a further impact on the Group results.

Our renewable energy business is now a mature and well-established sector for our Group, generating consistent revenues. Our growth strategy in our newer tibre and housebuilding divisions have contributed to an accounting loss this year shoad of being able to deliver growth in profits in future years.

Our Group comprises energy, property lending, fibre and housebuilding, which includes retirement living We have grown to be a significant presence within our mature sectors, producing 4.2% of the UK's solar energy and 2.7% of the UK's onshore wing energy output. We have built a property lending business, with a book of £4/4m at year end, which helps to support the construction and improvement of homes and commercial spaces throughout the UK. The businesses in our growing sectors if bill and housebuilding, are establishing themselies as important clavers in their markets and setting amplitions expansion rarget

over the past 12 months, a steadier increase when compared with the exceptional growth of 10% for the prior year. Over the longer term, we expect the Group to return to our target annual growth. The five-year average annualised share price growth is 4.83% lahead or our target 4.20% annual growth.

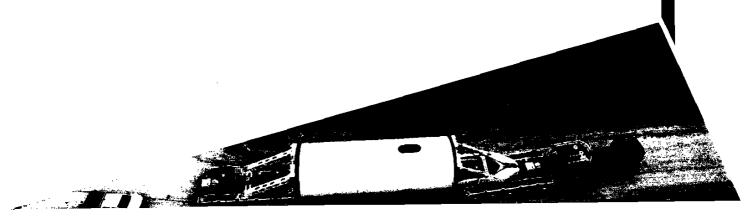

We remain a supportive employer, with an average of 1,500 full-time staff across the pusinesses that we Gwn and operate, and indirect employment provided for nundreas more people through contracts that we have in place

A reflection on our year

Our Group delivered £800m of revenue (2022) £712m) while growing capital deployment, with net assets increasing to £2,366m at the end of the period (2022 E2,221m restated), led primarily by fixed asset expenditure in our energy and fibre divisions.

Our more mature scators operated robustly and we continued to expand newer parts of the Group. As a result four current , ear results reflect an ERITDA of £82m+2022 £195m+ and an acrounting loss before tax of £149m (2022) £56m restated profit), as these new sectors, in particular fibre, are expected to be loss-making in their early years of construction and operation, before becoming profitable in future

At the start of the period, long term energy price forecasts and oneign forward rates remained high, as the global economy continued to recover from the Covid-19 bandernic together with seeking alternative sources of energy as a result of the conflict in Ukraine. Alondvide high inflation, these factors had increased the value of the Group's energy assets in the prior period and, in turn, the share price of the Group

Directors Report'

1. Energy

Approximatively 50% of the Group's net assets comprise energy generating assets such as solar energy sites and wind farms. These assets provide tong-term revenue streams, though their value can still be impacted by changes in pricing and demand. Our energy sector is intentionally diversified across a range of technologies to mitigate against less favourable conditions in a specific asset class and contribute towards steady, predictable share price growth.

We expanded our solar portfolio with further additions in Zestec, which specialises in developing commercial solar rooftop sites in the UK. These sites are currently under construction, and we expect to retain and operate them once complete. The construction of Guardbridge, our wind farm in Polano, remains on track and on budget, and we expect it to start generating electricity by December 2023 Dulacca Wing Farm, our largescale construction project in Western Australia started generating electricity after year end and was subsequently sold in October 2023. At the beginning of the financial year, in July 2022, we also completed the construction and sale of Darlington Point Solar Farm, one of the largest solar sites in Australia, with a capacity of 333MW

Our successful and well-established biomass division continues to perform well, delivering stable returns since acquisition in 2015. We added a new site at Snetterton in East Anglia in April 2021, which has performed well since acquisition. Though it suffered some months of operational downtime, following a gearbox fault, the insurance claim for replacement parts and loss of revenue was settled in full.

Construction at our Waste-to-Energy facility in Ayrshire has progressed as planned, with completion expected in 2025. The facility has been in development for four years and will be capable of processing over 185,600 tonnes per annum of non-recyclable household, commercial and industrial

waste which would otherwise be sent to landfill or exported. This will generate 17 MW of low carbon electricity, enough to power 30,000 hornes, and it will be the first large-scale, subsidy free waste-to-energy project in western Scotland.

Our 26 reserve power sites have continued to perform ahead of expectations, duc to low generation from wind assets over the winter 2022/23, resulting in demand for additional generation to balance the grid

2. Lending

Our property lending business continues to be a substantial part of the Group, representing around 15% of the Group's net assets, commissing short- and medium-term secured loans to experienced property professionals. Our average loan book constituted over 224 loans this year to borrowers in the UK.

Our loans are written at conservative loan to value ("LTV") levels (below 70%) to protect against a fall in property prices. At the end of the period, the average LTV for the loan book was 60%. The turbulent market this year has reinforced the importance of this strategy, which has served the Group well over its 13 year history. We are naturally taking a cautious approach when assessing new lending opportunities considering the changing economic outlook.

Since inception in 2010, the Group has lent £2.49bh of property toans and has had a strong record of recovering its capital. However, the abrupt increase in interest rates in the current year has made it more difficult for some borrowers to refinance at the end of their loan term. This has contributed to a small increase in provisions and, at year end, we recorded a provision of £50m against one commercial loan. Though we acknowledge this provision feels noteworthy for context it amounts to around 1% of the Group's net assets and is an outrier compared to our track record. This does however serve to emphasise the importance of our experience and approach in the sector, including disciplined due

Directors Report'

ability and willingness to flex activity in this sector. during times of economic uncertainty. We will continue to adopt this approach throughout the coming year

3. Fibre

In March, we successfully consolidated our regional fibre proadband businesses, by merging our four fibre to the premises (FETTP) businesses - Jurassic Fibre, Swish Fibre, Giganet and AllPoints Fibre into a new business, Fern Fibre Trading Limited (IFFEL). Given wider market consolidation and opportunities: in the market, it has made economic serise to bring. together these separate businesses now rather than later. As part of this, post year end, we undertook a restructuring exercise to realise some operating efficiencies, including a reduction in FETI's overall headcount

In the year we continued to invest capital in expanding our ultrafast FTTP broadband networks The geographic focus of our networks is the Home. Counties, the South and South West of England Yorkshire and the Midlands, however we also provide connectivity to nomies and businesses throughout the UK using networks owned by other operators. The business is generating revenue from residential customers and small businesses who benefit from the superior connectivity offered by fibre, versus the ald copper networks

The intentional growth in our fibre division has resulted in a short-term decrease is profitability of the Group, as we invest into the intrastructure

4. Housebuilding

Our housebuilding division remains an important. part of the Croup, at approximately 8% of riet assets. and is comprised of Divia Homes ('Elival, the housebuilding businers we acquired last year and Pangeford Holdings Limited CPangeford our retrement laine business.

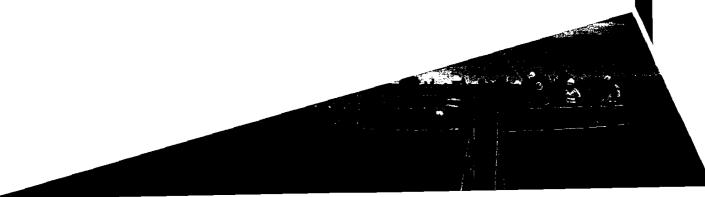

diligence conservative loan-to-value ratios, and an Elivia develops mid-market family findes in South Fast commuter towns and villages and is performing broadly in line with budget despite challenging conditions across the industry. We plan to grow it in a measured way organically and via strategic acquisitions over the next five years, a strategy solarfied by the acquisition of Millwood Designer Tromes, which expanded Elivia's tootprint to East Sussex and Kent Its ambition remains to deliver 750 homes per year.

> Rangeford continues to expand its portfolio with three villages fully open and additional villages under construction in Chertsey and Stapleford (near Cambridge) due to open in 2024 and 2025 respectively. We are excited by the opportunities for growth in this sector, with two further sites acquired in Dorking and East Grinstead. The design work for these villages is well underway

Inflation and interest rates

HM Treasury forecasts that inflation is likely to surpass the Bank of England's target until 2025. A relatively short period of high inflation such as this aces not ferid to have a material inspact on Group operations. For example, in our energy division, the value of our renowable energy assets is determined by discounting their projected full ite cashflows over the life of the respective assets (typically 20 plus years). If the outlook for long-term inflation were to increase, the impact on our share price should be positive as increased inflation will increase the revenue each operating site would expect to make, which increases their value

The rise in interest rates is seen as a return to normal. after a long period of Lery low rates. The impact of this on our business has been broadly neutral as the Group is intentionally structured such that it does inct experience significant value erosion when interest rates change. An immortant part of this is a policy of taking out interest rate protection on the loans to the Group's chergy assets giving us protection from interest rate increases. This has

Directors Report'

resulted in our renewables assets loans continuing to incur row interest costs, at a rate fixed when interest rates were lower.

Rising interest rates are felt more closely in our lending business and as such we continue to take a cautious approach in this sector. We can, and do, reduce the number of loans we write or after the risk profile of our loans through reducing loan to value ratios, or pausing activity in certain parts of the market, as appropriate

Current trading and outlook

Since the year end, the Group has continued to perform steadily from an operational perspective and in line with our expectations. Our growth targets for the Group over the medium and long term remain unchanged, and we continue to tocus on maintaining a diversified business that is capable of delivering predictable growth for shareholders.

In Nevember 2022, the government announced the introduction of an Electricity Generator Levy ("EGL"), a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and applies to electricity generated from renewable, biomass, and energy from waste sources. The Group was not required to pay EGL in the period, however we do expect to pay this in the next financial year. We had already anticipated the impact on the returns generated from our energy portfolio over the next five years.

Our property lending business continues to perform strongly with a diverse loan book comprising 224 toans on average. We focus on short-term loans tour current, loan laverage term is 20 months) which enables us to swiftly adapt to changes in outlook. We consider this is particularly important in the current economic climate.

Our recently consolidated regional fibre business, Fern Fibre Trading Limited (FFTL) continues to build out its network to accelerate full fibre delivery in the UK, while also focusing on sales and marketing activity selling fibre products directly to customers. As it continues to grow and build out its infrastructure, we do not expect it to report an accounting profit in the corning three to five financial years.

We are pleased to report that in October 2023, the Group raised £217m from existing shareholders through an offer to subscribe for further shares. The funds raised will allow the Group to grow slightly ahead of plans in certain sectors, however we do not expect this to materially change our business mix, which will continue to evolve in order to continue to target modest growth for shareholders in the years ahead.

"Our mix of business areas has developed over time, driven by the overarching importance we place on meeting the objectives of our shareholders."

Our business at a glance

What we do

Ferni Trading Limited is the parent company of hearly : 2. Lending division 330 subsidiaries itagether the "Group"). The Group. operates across four key areas, energy conding, fibreand houseburging which includes retirement hving Over the past 13 years we have built a carefully giversified group of operating businesses that are walt positioned to deliver long-term value and predictable growth for our shareholders

1. Energy division

We generate power primarily from sustainable sources and soil the energy produced either directly. to industrial consumers or to large networks. Man, of our renewable energy sites qualify for government incentives that represent an additional, inflationlinked, source of income. We have also utilised our expertise in renewable energy to construct facilities. for sale or engoing operation. At year end the Croup. had fourteen sites under construction.

We lend on a short, and medium term, secured basis to a large number of property professionals. and our financing enable pusinesses to build and improve residential and commercial properties

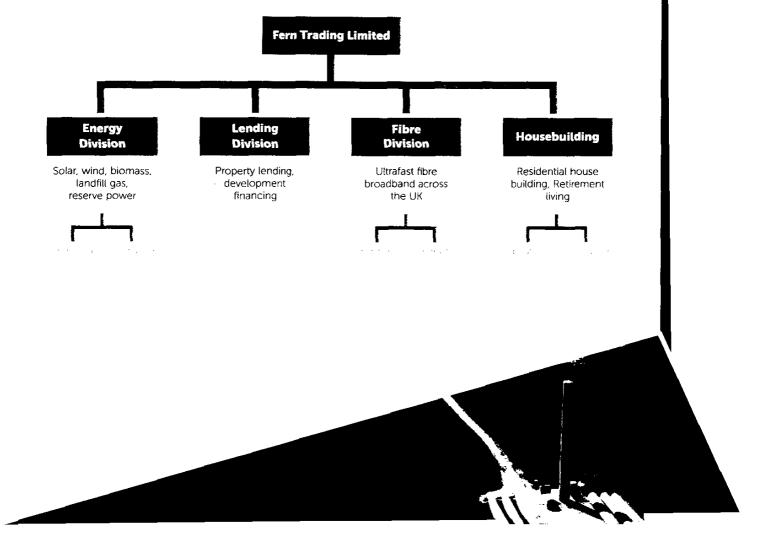

3. Fibre division

We own and operate fibre broadband networks across various areas of tho luk. We build the networks and connect them to homes and businesses to provide our customers with ultrafast fibre broadband.

4. Housebuilding division

Our residential housebuilding operation develops sites from design stage to final construction to ensure the delivery of quality workmanship

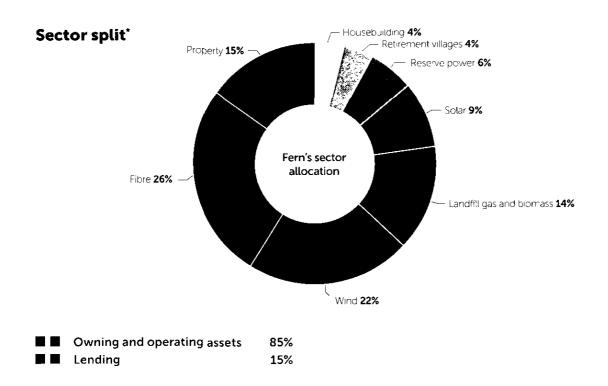

Our retirement villages provide nigh-quality, contemporary wing spaces with a friendly community at the heart of our villages.

Our business at a glance

The strength of the Group's strategy is in both its. The scale of our business is a key strength, enabling operational diversity and the diverse return profiles. over the longer term.

us to acquire large-scale established operations as of those businesses. Our lending business provides 🗄 well as the opportunity to enter new sectors with flexibility and strong returns over the short-term, I minimal risk to the whole Group by selecting while our energy, fibre, housebuilding and rot rement. Edusinesses, with comprehensive business plans and living divisions offer visibility and stability of returns altrong management teams. This enables us to continue to diversify our business without compromising the quality of our operations

As we've around our expertise in thesh pectors in the UR local been able to use our industry knowledge to take our expertise to exciting apportunities overseas including constructing solar and wind farms in Australia. France ideland and Poland.

Our business at a glance

Making a difference

We are proud to operate a Group that makes a positive contribution to society across the UK, generating renewable energy, providing quality retirement Tying and new homes, and delivering high-speed broadband to funderserved areas of the country. This is aligned to our environmental, social and governance ("ESG") policy which is drafted and approved by the Board of Directors.

Energy

We own 229 operational energy sites, producing 3,069GWh a year That's enough energy to power over a million homes.

Our combination of technologies across solar, wind, reserve power, biomass and landfill gas complement each other well, helping the UK to meet its energy targets irrespective of the weather.

The Fern Community Fund is a social enterprise run by the Group, which works to distribute community funds generated from our wind farms. This year, the Fern Community, Fund has committed £1.4m; to local community groups supported 22 local university students through our Student Scholarship Fund, and provided a winter fuel subsidy to 740 residents who are local to the Group's sites.

Lending

The 191 new loans we advanced during the year nave helped to fund the construction of much needed residential properties, as well as commercial property creating valuable new employment

Fibre

Within this division we are building full fibre connectivity to hundreds of thousands of properties in small towns and villages that do not currently have access to internet connectivity, ensuring they are fit for modern ways of working and communicating

In Vorboss, we are building a dedicated high-speed fibre network for businesses in London, providing the digital infrastructure that the city needs and removing bandwidth constraints to ensure the economy remains competitive

Housebuilding

Our houseoulding division sources over 74% of the timber utilised for frames in a sustainable way and installs solar panels or air source heat pumps in all properties, leading the way in this sector and helping reduce carbon emissions.

Our retirement villages provide high-quality, contemporary living spaces, with close to 500 homes currently in place. We have nearly 400 further units in various stages of development, and our secured pipeline sites offer potential for another 300 plus units.

A friendly community is a key differentiator for our retirement villages, which is why our developments provide central facilities and a hub of social activity for our residents.

Our strategy in focus

Our businesses

Energy

Through our energy division, the Group exins and oberates energy sites (which supply gas and electricity into the network as well as constructing renewable energy sites for future sale. Of the 229 energy sites that we exin and oberate, 203 physide renewable energy, contributing to the Group's position as one of the largest producers of renewable energy from commercial scale sclar sites in the UK. Renewable energy sites are typically expected to generate stable profits for many years, due to low oberating costs and revenues being unked to inflation. As such owning and operating these businesses is attractive to the Group because of their potential to deliver predictable profits over the long term.

Renewable energy sites generate power from sustainable sources and self-energy produced either carectly to large industrial consumers or to the network. Many or our renewable energy sites also qualify for government incentives, which means a portion of the generated energy benefits from rates that are 'locked in' for a specified period once a qualifying site is operational and accreditation has been granted. This has reduced some of the impact of the colability in long term energy price forecasts. As new sites built in the UK do not qualify for the same historic government incentives, we are seeing more interest in the market for sites like the ones we own and operation.

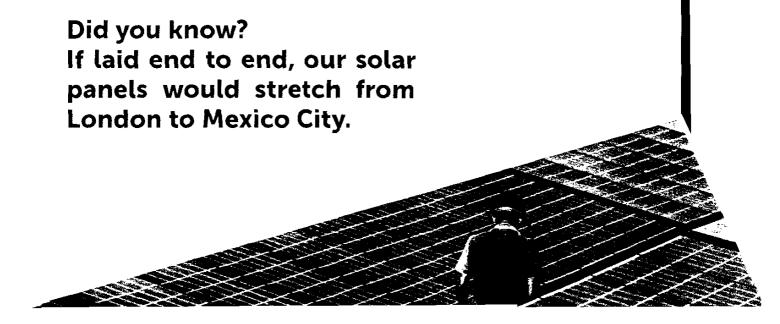

Owning and operating energy sites is a core part of our strategy and currently makes up approximately 50% of the Group's net assets. This part of the Group

has generated high returns this year due to market conditions but crucially it has the potential to provide stable returns over the long-term. This combination is key to our strategy to balance risk and return across the range of Group activities to gonerate target predictable returns to: shareholders

"Our energy sites generated 3,069 GWh of power."

Due to the high quality energy sites that we own, we are lable to secure long-term thrancing from mainstream panks at competitive rates to enhance our returns, which holps us to deliver the level of returns our shareholders expect.

While our renewable chergy business started its life in the solar energy sector, the Group has built expertise across other adjacent technologies including onshore wind biomass and randfill gas, supported by reserve power paints which provide backup power to the National Grid. The Group therefore benefits from diversification within this part of its business since weaker conditions for energy production from one technology often result in stronger production elsewhere. The Group also gains significant benefit from its scale in this sector as our business is spread across 229 sites, vasity reducing the risk to Group profitability if one site suffers an operational disruption.

Our strategy in focus

in addition to our UK sites, the Group is developing sites overseas, in jurisdictions that we understand well. Those present an attractive opportunity as they build on our sector expertise in countries at an earlier stage of renewable development. Currently we operate wind farms in Ireland and France and solar sites in France, in addition to a wind farm under construction in Poland.

During the year we acquired the rights to multiple commercial rooftop sites through our commercial rooftop solar developer, Zestec, on which we will build solar panels to generate electricity for the tenants of the building. Our sites under construction in Australia came to fruition this year, with Darlington Point, a large-scale solar site soto at the start of the year, and Dulacca Wind Farm achieving commercial operation, shortly, after year, and and being subsequently sold in October 2023.

Lending

Lending continues to be a core part of our business and has provided the Group with a profitable and cash generative sector over the past 13 years. This well-established part of the Group mainly consists of property, lending, which provides short-term financing to experienced professional property developers, buy-to-let landlords seeking bridging finance, and development financing, which provides short- and medium-term financing to companies

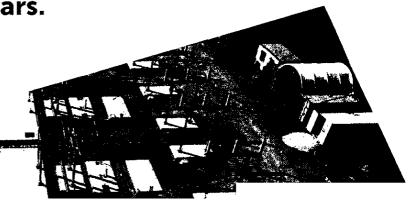

A key benefit of the scale of the Group and of the business that we have built up in this sector is our ability to mitigate risk through having a large number of loans spread across relatively small projects to individual borrowers. We proactively manage counterparty risks through undertaking careful borrower due diligence, taking security over assets typically on a first charge basis and maintaining conservative loan-to-value ratios. Not all loans will portorm as expected and these measures help to minimise the impact of performance issues on an individual toan. This is further mitigated through the value that we levid to individual borrowers, relative to our total loan book, which is spread on average across 224 loans.

Fibre

Our fibre division includes four strategic areas – fibre to the premise ("FTTP") enterprise fibre, software and mobile

Through our FTTF business, we are building now physical fibre networks for dommunities in the UK and have completed new fibre infrastructure in underserved parts of Devon Somerset, Dorset, Wiltshire, Hamoshire Worcestershire, Yorkshire and the Home Counties, spanning hundreds of thousands of properties.

Lending continues to be an important part of our business and has provided the Group with a profitable and cash generative sector over the past thirteen years.

Our strategy in focus

Building a new network involves connecting large. The UK remains behind other European nations data centres and telephone exchanges in the UK. with homes and businesses, effectively replacing the copper wires that were laid in the first half of the 20th century. To date: Jurassic, Swish and Giganet. have operated a vertically integrated mode, where the, own the fibre, alchoulde the end customer. relationship as the infernet service provider (TSP). Following the merger of our FTTP division, FFTL willtollow the wholesale strategy of AdFoints Fibre. owning the fibre infrastructure and onbearding multiple ISPs. We will continue to develop our own. (SI) service and brand (Cuckbo) which will sell connectivity on our consolidated network to endcustomers alongside other ISPs. In an increasingly competitive market, a wholesale strategy increases the opportunity to generate revenue from the network as multiple counterparties can sell access to it, rather than just one ISP (as per the vertically integrated model).

The merger of the ETTP companies took place in March, with the final three months of the year. focused on bringing the operations of the fourcompanies into one, increasing efficiencies and economies of scale. Separately the companies achieved a great deal, each building local networks. onboarding customers and delivering outstanding customer service. The benefits of bringing them. together and launching a single wholesale offering across their networks will create greater opportunity. for the business and potential customers in future when it comes to households accessing fibre, and our FTTP business is now well positioned to be a key. player in bringing ulhafast connectivity to communities around the UK.

Through Vorboss, we are building an enterprise network in Landon to supply pusiness-to-business. (1828) enterprise connectivity to business customers. Vorboss has installed over 500km of fibre optic cables in London since 2020 and has spent the last year launching its products to large businesses, including market leading 10Gbps and 100Gbbs products.

Our revolutionary software business, Vitilifi, is building the oranestration systems that the next generation of fibre broadband companies need to run their networks efficiently. In doing so, they are both supporting our own FTTP business in achieving ts strategic goals and also enabling external customers to eliminate legacy constraints with autonomous connectivity workflow and management sen, ides

Mobile is our newest area of strategic development During the year, Vitrifi Digital expanded into the mobile network market, becoming a Mobile Virtual Notwork Aggregator (IMVNA). This will enable us to launch an innovative mobile platform to husiness and consumer facing companies to operate their own Mobile Virtual Network Operations in the UK

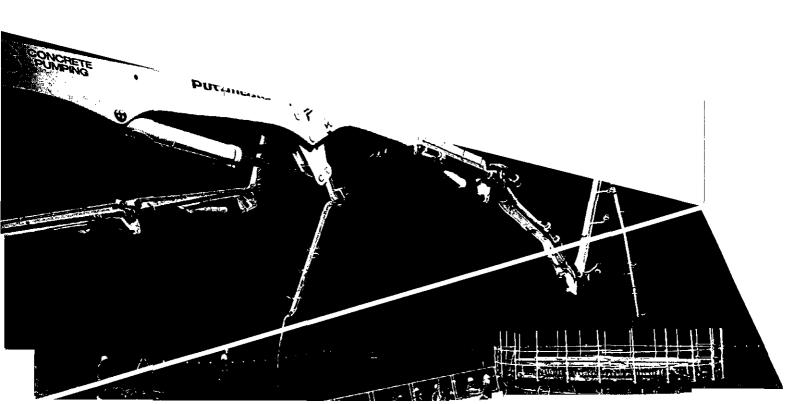

Our strategy in focus

Housebuilding

Our residential building business, Fivial is a full-service housebuilder, which acquires land and develops sites from design stage to final construction to ensure the delivery of quality workmanship. Elivia strives to deliver high quality and design-led aspirational homes, comprising a mix of open market and affordable homes, with over 25 sites under construction. Flivial is headquartered near Beaconsfield with a geographical tootprint in Buckinghamshire, Berkshire, Hampshire, Surrey and West Sussex. In January 2023, we acquired Millwood Designer Homes which has allowed expansion into the adjacent regions of Kent and East Sussex, complementing Elivia's existing locations.

As part of our housebuilding division, the Croup operates in the retirement living sector. Our retirement living business, Rangeford, owns and operates three retirement villages in Willshire, North Yorkshire, and Gloudestershire is currently constructing two sites for future operations, and has exchanged on two further sites, spread across the country, with the intention of developing these in the future.

Directors

The experienced Board of Directors for the Fern Group are responsible for determining the strategy of the business and for accounting for the Company's business activities to shareholders. They have a set of complementary commercial, energy sector-related and strategic skills.

Paul Latham

Paul tivas previously the Chief Executive of Ferm He has had various general management and internal consulting roles across a number of sectors and brings with him a wealth of moustry and business experience, including building key elements of the infrastructure for Capital One Bank (Europe) plc as it grew from a start up business to a company with 2,000 employees multipas worked at Octobus Investments since 2005.

Keith Willey For English of the

Keith is an associate professor of strategy and entrepreneurship at London Business School. He also holds various non-executive directorships and advisory roles at high growth and more mature companies, in his role as non-executive chairman he is responsible for the effective operation of the Poard, as well as its governance. He brings to the Franchusiness independent commercial experience gained from his time in academia, private equity investment, consulting and various hands-on operational roles.

Peter Barlow

Peter has over 30 years experience in international financing of infrastructure and energy. As a senior executive for international Prover, Peter was responsible for arranging over \$12bn of project and corporate funding as we'll as banking relationships and treasure activities. He has spent over 20 years working internationally for HSBC. Bank of America and Nomitra, financing acquisitions and greenfield projects in the energy and intrastructure sectors. His combination of Board level financing and energy experience over numerous energy sub-sectors, and his all round knowledge of all the sectors in which Fern operates, adds significant value to the operation of the Board as well as its strategy formalion and depolerment.

Sarah Grant

Sarah has worked at Octopus investments since 2013, she has a particular focus on deptirating and relationships with banks and other lenders, which she coordinates across the Octopus group. She also chairs the Octopus investments Investment Committer and significant of Cotopus 4lf Management and Octopus investments is a key supplier of resource and expertise to Ferni Sarah's dual role ensures that the relationship between Cotopus and Ferni works well and always operates in the bost interests of Ferni's shareholdors. She has over 25 years' experience and previous, held roles at Societe Generals, and Rothschild.

Tim Arthur

If misral chartered accountant with more fran 25 years international systematic as a finance director of both public and chicago (More recently he was Chicf Enancial Officer (Materhouse in Birmingham and Chicago (More recently he was Chicf Enancial Officer of Lightsource Renewable Energy Ltd, a global leader in the funding bettersive and forgiserm operation of solar photocoltaic projects. This brings extensive financial and accountantly knowledge to the Board as well at an understanding of puramic technology, pusitiesses gained from his executive positions.

Principal risks and uncertainties

Principal risks

Management identify, assess and manage risks: associated with the Group's business objectives and strategy. Risks arise from external sources, those which are inherent commercial risks in the market. and from operational risks contained within the systems and processes employed within the business. Overall risk exposure is managed across. the Group through the diversification of activities both by sector and geography

The principal risks that the Group are exposed to are described below along with the mitigating actions we take to reduce the potential impact of the risk We also include our assessment of whether the likelihood of the risk has increased decreased or remained the same

Energy Division Risk Mitigations Change Market risk: · Contracts are entered into which fix the income for a portion of the energy generated by our sites The energy sector is experiencing · Long term novemment backed offtake agreements are significant turbulence and there is: in place, such as the Renewable Obligation Certification a risk fnat forecast levels of income ifROC1 scheme 29% of our energy income was generated are not achieved due to changes in wholesale lenergy bridgs, off-take from POC revenue . We engage with the government and the Office of Gas and contracts or government subsidies Electricity Markets ("CFGEM") to contribute to an industry voice Due to this turbulent environment. No change with policit makers who set future regulatory requirements. the potential for increased intervention by the reduction is also a risk Changes in Government policy may result in reduced income streams within the group due to additional levies · Unpredictability of the weather is mitigated through Operational risk:

Levels of energy produced may be lower than anticipated due to sub-optima weather conditions or performance issues with equipment, which may result in significant unplanned downtime

- diversification of technologies and location of sites
- Regular cervicing of assets is undertaken to onsure assets. are kept in good condition and minimise the risk that assets are unavailable for a longer period.

No change

Financial risk:

Revenues (from energy generation) or sale proceeds (from the sale of sites) denerated from overseas sites are lower than expected due to fluctuations in foreign exchange rates

 Management ensures only a small portion of the Group's assets and revenues are expected to be derived from overseas sites

Construction risk:

Construction of the sites takes longer or is more costly than anticipated due to resource availability or increased cost of ray/ materia s

 The Group enters fixed price contracts with contractors where appropriate to reduce exposure to increasing costs.

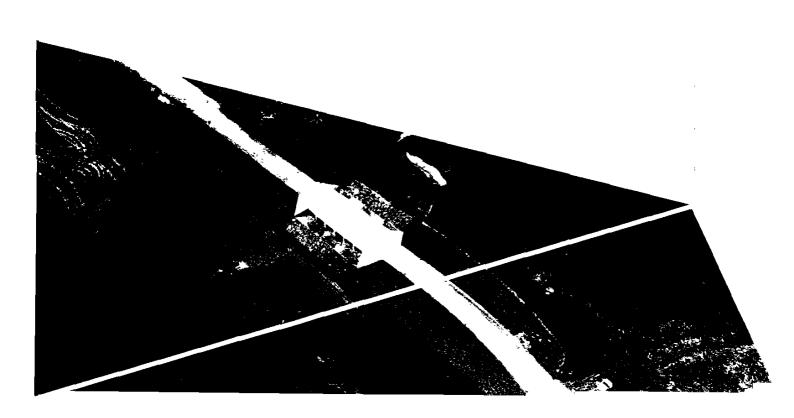

No change

Principal risks and uncertainties

Fibre Division

Risk	Mitigations	Change
Market risk: Ekoepted isales from customers are lower than anticipated due to noreased competition from other providers. A change in policy by the regulators in favour of arger operators cloud impact cur ability in deliker planned development reducing revenues and efficiencies gained from a larger presence in a particular area.	 Management regularly reviews the cumpetitud landscupe in larget build areas to concure plans do not conflict with other alternative network operators. Echowing the merger our FTTP ownresses whare pursuing a whoresale notwork strategy, increasing the network commercialisation apportunity in a more competitive market. Management lengages organitual, with the Office of communications and the Government Officen of the perefits of smaller operators are well understood and its interests are appropriately represented. We are an active participant in relevant industry occurs particularly increasing alternative inerwork operators. 	No char ge
Construction risk: Construction of the network takes longer or a more costly than anticipated one to resource availability or increased cost of raw materials.	 The Group has contracted with a number of different purposers to reduce the exposure to any one no vidual entity. Selection of indiscurced partners is managed through a detailed producement process with long-term unbility of work allowing partners to plan financial properties accordingly. Where topicly that riproblems are expected for critical items out team, generally have switched this stock of fibre inuction of entities on hand and adjunce order teamings out equipment with longlead times. 	No change
Operational risk: Network service is interrupted or unreliable feading to potential loss of illustomers and reputational damage.	 Cruir not works are built in a routilent duly with diverse routour, on should a failure it out in one mute. Risk Mitigations Change

Market risk:

increasing inflation and interest rates load to a market-wine affordability ssue, resulting in a drop in property values across all sectors of real estate. This may impact our ability to receiver a loan in full through a refinance or sale.

- The teams pro-actively manage our position in the marketplace and are prepared to enforce where needed it a Itian moves into default.
- Our loans are made at conservative your to-value (LFV) ratios with a maximum LFV of 70%.

Counterparty risk:

Loans may be made to unsultable counterparties, impacting our ability to recover the loan balance in futt.

- Loans are secured against physical underlying security, such as a charge over the property or other assets of the perrower. These are typically chillal first charge basis to ensure maximum chance of recovery should enforcement action be riedded.
- Thorough dueld agence is performed prior to writing loans including property or land valuations and credit checks done on borrowers
- Where loans are, written for assets under construction in lectories and covenants are put in place to ensure stages are complete prior to releasing further drawdowns.

No change

Housebuilding Division

Risk Mitigations Change

Market risk:

A fall in house prices could impact our ability to generate expected revenue from the sale of apartments in our retirement villages and housing developments out; by Elivia

An increase in interest rates could lead to delays in the purchase process, resulting into completion and revenue not being realised as planned.

- Franning consents on undeveloped land are optimised to maximise revenues and reduce the risk of losses on sale.
- During the under writing process for each site, the proposed pricing is reviewed against current rates in the area. Minima HPL is used and price movement/sales speed sensitivities are included and reviewed.

No change

Construction risk:

Construction takes longer or is more costly than anticipated due to resource availability or increased cost of raw materials.

Inability to engage with suitable contractors, who are financially stable and can honour fixed price contract in the current environment.

- The Group enters fixed price contracts where appropriate to reduce exposure to increasing material costs
- The Group only works with regulable third parties with a strong track record of delivering similar projects.
- The assessment of all potential projects include conservative building cost assumptions with material contingency levels and a healthy allowance for inflation which is benchmarked against other comparable projects.

Principal risks and uncertainties

Group

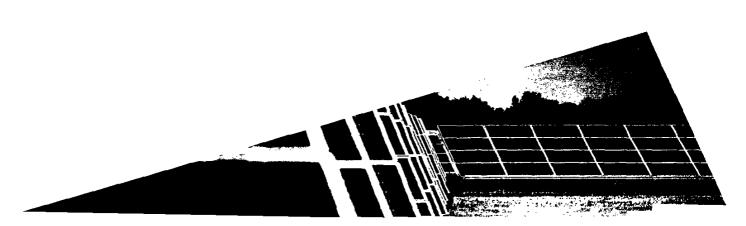

Risk	Mitigations	Change
Market risk: An increase in base rates may increase outs un debt facilities impacting the Choub's ability to service debt as it talls due.	Where floating rate dept is in place (whiche influest varies in tine with an underlying benchmar- rate, the Group typically enters into hedging an argements to five a bortion of these payments influedout the term of the facility. Hed ling arrangements are outlined in Note 20 of the mancial statements.	No crance
Liquidity risk: Poor management of rash within the Group could impact the Groups ability to meet opigations as they fall due.	 A detailed cogh flow forecast is prenared and reviewed by management on a monthly basis, incorporating cash are lability and cash requirements purpositive Group. On at least a quarterly basis this is shared with the Board. The Group monitors bank governant for an origing basis to longuist continued agrierence to covenants. Where covenants can't be met forecasts the updated for the lower cash available as a result of the restriction. The Group has a floxible finance taulity which can be grave on at short notice to meet immediate business helds. 	No change
Health and Safety risk: The safety of our employees and those employed through contracts are of paramount impristance. There is a risk that accidents in the workplace could result in serious in my or death.	 We have occepted account health and safety policies in compliance with ISO4500 account the Group to ensure the will being of buristaff. Health and safety than notice provided to buristaff und contractors on a regular basis. 	**************************************
Cyber Security risk: An artisck on our IT systems and data could lead to disruption of our operations and loss or customer data. Loss or misuse of data may result in reputational damage regulatory action under rIDER and noticitial fines.	 We employ a Chief Information Security Officer (YUSD) which is responsible for data security across the Group and reports quarterly to the Board. The Crist works closely with our husinosses to ensure adequate intandards of security and information management are rue! Fach of our pusing-ses that hold customer data has their own dedicated response for Tland security. 	No change

The strategic reprirt was approved by the Board of Directors on 20 December 2023 and signed on its behalf by

PS Latham

Laector

20 December 2023

Corporate governance

Section 172 (1) statement

The Board consider that they have adhered to the requirements of section 1/2 of the Companies Act 2006 (the 'Act'), and have, in good faith, acted in a way that would be most likely to promote the success of the Group for the benefit of its members as a whole (naving regard to all stakeholders and matters set out in section 172(1)(a-f) of the Acty in the decisions taken during the year ended 30 June 2023

In the performance of its duty to promote the success of the Group, the Board has regard to a number of matters, including the likely consequence of any decisions in the long-term, and listens to the views of the Group's key stakeholders to build trust and ensure it fully understands the potential impacts of the decisions it makes. The Board fulfils these duties partly by delegation to committees and the Boards of subsidiary undertakings, who operate within a corporate governance framework across the Group.

At every Board meeting a review of health and safety across the group, financial and operational performance, as well as legal and regulatory compliance, is undertaken. The Board also review other areas over the course of the financial year including the Group's business strategy, key risks, stakeholder-related matters, diversity and inclusivity, environmental matters, corporate responsibility, and governance compliance and legal matters.

Principal decisions

We define principal decisions taken by the Board as those decisions that are of a strategic nature and that are significant to any of our key stakeholder groups. The Board consider that the following are examples of principal decisions it made in the year ended 30 June 2023.

 Evaluating and deciding to create a new strategic area of development by expanding into the mobile network market and becoming a Mobile Virtual Network Aggregator ("MVNA"). The Board considered this apportunity as well aligned and complementary to the existing fibre broadband operations, which would help to deliver long termivalue.

- The Group decided to further expand its footprint in the housebuilding sector by acquiring Millwood Designer Homes a company with values similar of those of Elivia and the Group Millwood is considered an award-winning regional homebuilder based in Kent which built around 100 homes a year. This follows the decision made in May 2022 to diversify the Group's asset base and entering into this new sector has been well thought out with long term growth in mind. The Board considered the opportunity and how it aligned with our objectives to make a positive contribution to the community and environment by building new homes to address the UK's shortage of properties.
- · The Board decided to commence a group reorganisation which involved merging the four FTTP business into one new business, Fern Fibre Trading E-mited FFTE will focus on two separate strategies, while working closely together (1) wholesale strategy, owning the fibre infrastructure and onboarding multiple ISPs in AllPoints Fibre Networks and (2) developing our own ISP service and brand, through Cuckoo Limited. The Board evaluated the possible impact on stakeholders ancluding shareholders and observed that the new structure would not change how the Board and Croup engage with shareholders or their view of the Group, but would be beneficial in providing improved governance and oversight of the sector as well as enhancing the future prospects

Corporate governance

Business strategy

Our business strategy is set out on pages 12 to 15 of the Strategic Pepoir Management prepares a detailed Group budget which is approved by the Board on an annual basis and forms the basis for the Group's resource planning and oppoyment decisions in making decisions concerning the business plan, the Board has regard first and foremost to its strategic rocus, but also to other matters, such as the interests of its various stakeholders and the long-term impact of its actions on the Group's future and reputation.

Shareholders

Shareholder relations and generating shareholder value is a key consideration when the Board is making strategic decisions. The prime medium by which the Group communicates with shareholders is through the annual report and financial statements, which aim to provide shareholders with a full understanding of the Group's activities and its results. This information is published on our website at www.ferntrading.com

Employees

The Croup's employees are fundamental to the overall success of the business. The Directors fulfil their duty to employees by entrusting oversight ic subsidiary Boards.

The directors of the subsidiary undertakings manage the day to day decision making, engagement and communications with employees and ensure that people are treated fairly and are valued with respect to pay, benefit and conditions. We fully realise that our employees wish to be informed and consulted numetters affecting their work and to be in ofted in problem soll ing affecting the rown areas of interest and responsibility. The Group is firmly committed to a policy of good communication at all locals and we aim to corabish a climate which constantly encourages the coen flors of information and local Presently this includes muntify team prietings at a local level and the publication of month. Fe.

deliformance indicators covering output, operating costs, and health and safety

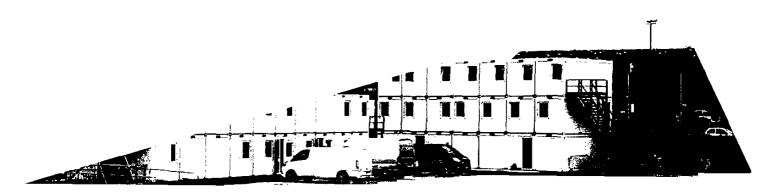

The health and safety of our employees in the workplace is a continual focus for the Group igneritis broad operational business. The Directors review health and safety reporting at each board moeting to ensure appropriate policies and procedures are in place to printed the health and safety of our employees and contractors. Where there are potential deficiencies or issues, these are followed up and resolved on a timely basis, with the Board having oversight of the actions taken.

The Group outsources activities and management of certain operational activities to external suppliers. Where activities are outsourced the Board ensures that the arc managed by reputable suppliers who meet all the indexant industry and regulatory commitments as well as treating employees fairly. Expected standards are documented in all service contracts and adherence to these arc continually manifored by Board through their service agreement with Octopus Investments limited.

Suppliers and customers

The Croup acts in a fair manner with all suppliers and distomers and soeks to maintain strong business relationships with them. This is achieved by all contracts being negotiated through a fair and transparent tender process which includes assessing the impact on the long-term objectives of the Croup. We review our payment processing times against contracts ever, six months to ensure suppliers are paid promptly and this information for the company is available on the www.gov.uk website.

The Group chauses it acts fairly and in a transparent manner to all customers across all divisions and services and actively engages to rescribe any disputes or default. The Board Chiscly monitors customer metrics and engages with the management team to understand the issues if publies performance does not most customers' expectations.

Corporate governance

The Board considers Octopus Investments Limited to be a key business partner and supplier with responsibility for the provision of operational oversight, financial administration and company secretaria, services

Community and environment

The provision and operation of sustainable infrastructure is at the centre of the Group's strategic goals. Through its business activities the Group seeks to make a positive contribution to the community, environment and economy. Our renewable energy business is helping the UK meet its renewable energy targets, our fibre network will give people in rural communities access to high-speed proaphand, and our retirement villages create communities of people in their later years, reducing the strain on our healthcare services. We are also building new homes to address the UK's shortage of properties.

Business conduct

As Directors our intention is to behave responsibly, chauring imanagement operate the business with integrity and in accordance with the high standards of conduct and governance expected of a business such as ours. Our intention through our business strategy fourlined on pages 12 to 15 is to operate in sectors and work with other businesses that share our values.

Business ethics and governance

The Board is responsible for ensuring that the activities of the Group and its various businesses are conducted in compliance with the law and applicable governance, and regulatory regimes, and in adherence with prevailing best practice for the relevant industry. This includes reviewing internal controls, ensuring that there is an appropriate balance of skills and experience represented on the Board, and ensuring that the financial statements give a true and fair view of the state of affairs of the Group Further detail can be found in the statement of directors responsibilities on page 38. In the year to 30. June 2023, no areas of concern have been flagged in this regard.

Employee, human rights, social and community issues, environment policy and anti-corruption and bribery matters

The Board's policy on employee, human rights, social and community issues environment policy and anti-corruption and bribery matters is discussed in the Directors Report on page 38. The Board actively promotes a corporate culture that is based on ethical values and behaviours.

Task force on Climate-related Financial Disclosures ("TCFD")

In December 2015, the TCFD was established by the Emancial Stability Board (TESR') to develop recommendations and encourage companies to take account of how they demity and manage of mate related issues. The TCFD requires companies to produce climate-related disclosures across four key pillars. Governance, Strategy Risk Management and Metrics & Targets. The TCFD has noted eleven key recommendations across these pillars that enable companies to provide information to shareholders and other stakeholders.

The Group's operations play an important role in the UK's long-term transition to a net zero economy, as renewable energy and the development of lower-carbon alternatives are critical to a move away from fossil fuels. Capital deployment in renewable energy assets, such as our 80 ground-mounted sciar sites enables our business and shareholders to generate returns from this transition, whilst having an inhibitority positive impact on camate charice and the environment.

Of the Group's divisions, the Board considers the energy division to be most at risk to climate change and conversely most abid to take advantage of the opportunities presented by a transition to a tower carbon economy. Whilst the Board considers the impact of climate-related issues across all our energy, lending, fibre and housebuilding fincluding retirement cying? divisions, the disclosures set out below are mainly with reference to the Group's energy subsidiaries.

Statement of Compliance

The Board is pleased to confirm that it supports the TCFD's laims and objectives and has included comate related financial disclosures in line with the four key billars and eleven recommendations in addition to mitibate the financial impact of sustainability face unting.

Standards Board ("SASB") guidance on materiality, assessing whether, and to what exicint, sustainability issues (including climate risks) could impact performance

Governance

Disclose the organisation's governance around climate-related risks and opportunities

a) Describe the board's oversight of crimate-related risks and opportunities

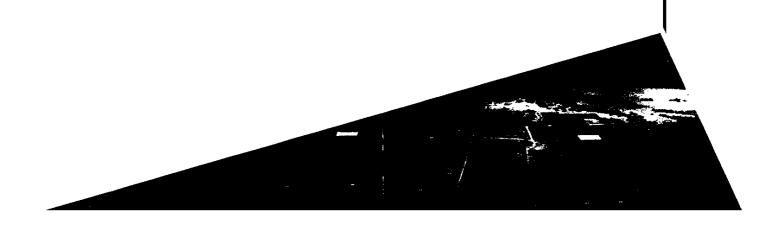

Climate-related risks and apportunities form part of the Board's strategy. A key aspect of the Group's business imodel, determined by the Board, and adhered to by divisional management teams, is to deploy capital in renewable energy assets to benefit from the wider transition to a lower-carbon economic

The Board is responsible for monitoring climate related government policy and physical climate changes to inform the deployment strategy and the materiality of risks faced by the Group's subsidiary companies. The Group Board monitors strategic risks and opportunities, financial porformance and any adverse or positive impacts on revenues or costs that could result from climate-related risks and opportunities.

On an annual basis, the Group Board roview and approve an ESG Policy document that was first adopted in September 2020, with the latest version approved in April 2023. The Board therefore ensures that each new opportunity, and existing divisions on an on-going basis adheres to the Group's ESG policy.

 Describe management's role in assessing and managing climate-related risks and opportunities

At a company level, transition and physical lisks and opportunities are considered two idhout

Task force on Climate-related Financial Disclosures ("TCFD")

the acquisition, construction and due ditigence process right through to the on-going management. The Board have reviewed and approved ESG criteria specific to the Group's business that are considered by commercial and management teams, including those operating in the fibre and liousebuilding sectors. The day-to-day management and assessment of climate related risks and opportunities is therefore undertaken by divisional management teams and reported to the Board where necessary.

All of the above ensures the Board's oversight and management of climate-related risks and opportunities includes functions established to provide good governance over the Group's divisions. This enables the Board and subsidiary companies to all be aligned on approach to climate-related risks and opportunities.

Strategy

Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy and financial planning where such information is material.

 a) Describe the climate-related risks and opportunities the organisation has identified over the short, medium and long term

Given the Group's long-term experience in its operating sectors and strong links to its suppliers, particularly in the energy and housebuilding sectors, the Group is well positioned to overcome risks and take advantage of opportunities arising from climate change. Climate-related risks and opportunities are also at the core of the Group's strategy and are discussed right the way through the business, from Board level to the individual subsidiary companies within the Group. Climate plays a part in shaping the Group's long-term business, strategy and financial planning.

The Group's fibro division will remain in growth phase for the next three to five years, and management teams consider how to manage emissions and risks while achieving this rapid growth. Fibro has a positive long term impact on the environment as once the infrastructure is in place and operating, it is seen as a low carbon technology. A well-constructed and operated fibro connection facilitates a reduction in carbon emissions in the long-term due to the potential for home working and smart cities.

In the Group's housebuilding division, one major risk is ensuring short and long-term construction processes are managed in line with potential exposure to climate risks, such as flooding. The Group aims to mitigate this risk, as all developments within the housebuilding sector (including retirement living) have technical flood risk assessments carried out before land is purchased.

The Group is also subject to regulatory risk as all names and developments must satisfy environmental planning conditions, may change as regulations are introduced to support the UK's transition to net zero. This presents the Group with the opportunity to go above and beyond applicable regulatory. standards for energy efficiency of new build homes and become a leader in this regard. It is important for the housebuilding division to satisfy all environmental planning conditions and seek financially viable opportunities to exceed regulatory standards. The Group looks to develop strategies around progressive adoption of Modern Methods of Construction ("MMC") including timber frames, solar panels, air source heat pumps and electric vehicle charging points where appropriate. Where possible, the Group moves operational assets onto renewable energy.

Task force on Climate-related Financial Disclosures ("TCFD")

tailffs and carefully the oses supplied to reduce the impact of climate-related risks

Within the energy drission, the Group is in a strong position to take advantage of deportunities and mitigate risks that arise from the transition to a net zero economy. The main short-term risk arises from competition as competitors could identify gaps as they seek to deploy more capital into renewable energies. The Group's successful track record helps it seize opportunities derived from the need to tackle chimate change and continue to acquire and build new large-scale impact projects, such as our Waste-to-Energy or the expansion into commercial solar rooftops.

The Group also faces risks from increased variability in weather patterns and potentially more extreme weather, creating difficulty to accurately budget production and financial performance. The Group constantly assesses the risks and opportunities presented by variable weather as part of ongoing due diligence and performance muniagement.

Over the longer term regulatory changes could impact the Group and could lead to changes in dovernment incentives for constructing and operating renewable energy assets. The Group could be more exposed to colatile power prices. as renewable energ, becomes an increasingly sizeable proportion of total energy produced by the UK market. To mitigate this risk, the Group. enters into short- and long-term contracts which fix the income for all lor a portion of the energy. generated by a site. Long-term government backed agreements are also in place, such as the Renemable Cibligation Certification (POC) schome. This aligns with the Group's strategy. of continuing to develop credictable. Forgiterm revenue streams, stouding resultance against. uctable pricing changes in the UK energ, market As new technologies at renevable energy of housebuilding sites are developed and become more reliable opportunities may arise for the Group to integrate those as the technologies mature and become cheaper. However, there is a risk that deployment into newer technologies could underperform compared to the business cases. Whilst representing a risk it is expected that the negative impact would be immaterial to the Group's operations, due to diversification.

b) Describe the impact of comato related risks and opportunities on the organisation's business, strategy and financial planning

Financial projections including those that are utilised for the preparation of the financial statements and included for budget preparations. are based on financial models. Each model such as company valuations of business plans will contain different underlying assumptions on key inputs such as power price durves, operating and maintenance costs or future revenues which are all impacted by transitioning to a lower carbon economy. The most material impact on the valuation of renewable energy assets is usually wholesale energy prices and operational performance life Octopus investments Valuation Committee is responsible for reviewing these assumptions and the sensity ties associated and is therefore considered as part of the valuation process.

The above could impact financial returns positively if the shift towards renowable energy and sustainable homes is successful or negatively if the transity his slow. Extremoliveather such as storms, flooding or free could cause damage at the Group's wind and solar faints and housebuilding sites impacting and inparticipance costs, write wife or impairments and longer-term loudgets. Constructing our

Task force on Climate-related Financial Disclosures ("TCFD")

assets to the highest quality standard and going above, and beyond the relevant regulatory standards by adopting MMCs will impact the Group's operating and maintenance costs further. The Group's cost projections are captured at point of acquisition, and models are updated regularly with diversification of suppliers and appropriate levels of insurance obtained. The Group's biomass plants operate a diversified supply chain of feedstocks and strategic stores to ensure sufficient fuel stores. In case of failed fuel supply from extreme weather conditions, there is contractual recourse obligations between the site and suppliers for protection against loss of revenues.

Climate-related risks also have an impact on accounting estimates and judgements within the financial statements. The Group's balance sneet includes a decommissioning provision relating to the future obligation to return land on which there are operational biomass, wind and solar farms to their original condition. This accounting estimate is determined to a significant degree by the future dismantling and restoration costs, as well as the timing of the dismantlement, all of which will be impacted by physical climate risks and raw materials required for restoration. The Group engages with a third party to perform the assessment of costs to be incurred, including an assessment of future climate risks.

 c) Describe the resilience of the organisation's strategy taking into consideration different future of mate iscenarios. Including a 2°C or lower scenario.

The Group benefits from a quicker transition to a lower-carbon economy, such as in a 2°C climate pathway (i.e. limiting global temperature increase to well below 2°C) whilst taking the steps to

ensure we remain resilient to the risks associated with scenarios such as a 4°C pathway.

Under a 1.5°C scenario, the world will experience a significant shift away from traditional fossil fuels towards renewable energy sources as countries and businesses alike implement strong decarbonisation plans to reach net zero. Delivery on these ambitions requires a significant increase in the pace of capital deployment into renewable energy, all of which leads to a growth in the Group's acquisition opportunities.

The main risk from a beneficial transition to renewable energies is from competition and the potential for price cannibalisation. The Group's strategy is resilient to this as they focus on being leaders in the market and seek first mover advantages before any form of price erosion can take place. Increasing demand for the electrification of industries will provide vast deployment opportunities for renewable assets, with rising demand supporting the power price for electricity, mitigating price cannibalisation The Group's housebuilding sector could also benefit from such a transition by facing lower costs on installation of solar panels or heat pumps as technologies advance and become cheaper to access

Under a 4°C scenario, it is assumed that the transition to a lower carbon coonomy has been slower and the incentives to construct and operate renewables have not been forthcoming. There is also the increased physical risk of more extreme, weather, delaying the introduction and operation of renewable assets. Whilst this could impact the Group's revenue potential, this would discourage competition, and the Group would be well placed to take advantage of any opportunity, that arose. The Group's strategy

Task force on Climate-related Financial Disclosures ("TCFD")

is further resident as the unpredictability of 1.0). Describe the organisations process for managing weather is mitigated through diversification of techniologies and location of sites. The Group's increased deployment into the fibre, lending and housebuilding sectors is just one of the methods. the Group is using to initigate possible impacts. of rewing on a boorty supported renewable. energy sector and lower-carbon transition that would occur in a 4°C scenario

When comparing the two scenarios, the Groupis set to benefit more from a 2°C scenario than a 4°C scenario pathway. The Board believes the business strategy is resilient and flexible to either scenario enabling the Group to continue. to provide returns whilst contributing to the transition to a lower carbon economy

Risk Management

Disclose how the organisation identifies, assesses, and manages climate-related risks.

a) Describe the organisations process for identifying and assessing climate-related risks

Cliniate-related lisks are considered by management teams at both a Group and entity level with the specific climate iclated lisks largely identified assessed and managed within the deployment process

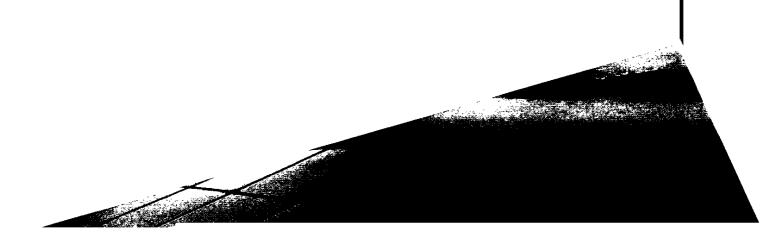

The Group takes responsibility for understanding and assessing each of its group companies against a consistent framework which includes climate-related risks in our energy sector to identify climate related risks in a subsidiary, mianagement teams use SASB tools as part of ongoing due diligence such as ThinkHazard. and/or Climate Scale tools. Pelevant simaterelated risks are considered and identified at eadof capital deployment for now opportunities.

ulimate related risks

At a divisional level, transition and physical risks are considered throughout the acquisition. process. Climate related risks are managed by incorporating questions into an ESG matrix to prompt additional due diligence on assets. requiring the review of natural hazards in the region the asset is located and any mitigation. strategies can then be determined

c). Describe how processes for identifying assessing and managing climate-related risks are integrated. into the organisations overall risk management.

Where material risks have been identified the Group implements an appropriate strategy to audress the ones highlighted by the above processes. Strategies include diversification of the uroup's operations in terms of assets and geography, appropriate levels of insurance, and seeking different opportunities in sustainability through homebuilders and diversified supply chains

Task force on Climate-related Financial Disclosures ("TCFD")

Metrics & Targets

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

 a) Disclose the metrics used by the organisation to assess climate-related risks and opportunities in line with its strategy and risk management process

As mentioned under the Risk Management pillar, management teams assess the relevant climate related risks and opportunities of potential acquisitions in relation to set criteria. The FSG Risk Matrix used for our energy assets has a total score of 15, with a score of 9 or more required to indicate compliance with ESG policy requirements.

b) Disclose scope 1, scope 2 and it appropriate scope 3 greenhouse gas (GHG) emissions and the related risks

The Group's location-based scope 1, 2 and 3 emissions are disclosed in the table below. In accordance with SFCR, the Group's scope 3 emissions include only those relating to business travel.

Throughout the year, we have continued to deploy capital in expanding the fibre division resulting in an increase in emissions as this is a function of growth and headcount increase. This is highlighted by the Group's Scope 2 emissions rising by 5% in FY23, caused by increased energy consumption, despite the overall emissions

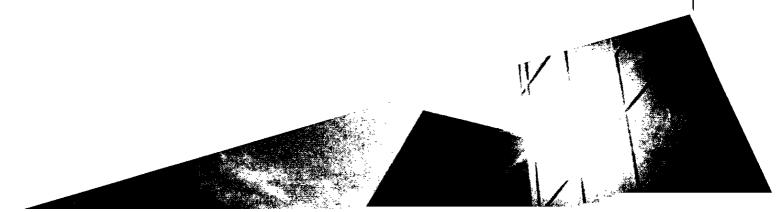

reduction across the business. While our fibre companies are focused on the end goal of building a network, the journey along the way is just as important.

The increase in emissions from our Fibre division has been fully offset by reductions in emissions from our reserve power sites, which account for 90% of reported emissions. Our 26 reserve power sites provide vital back up power to the National Grid in times of peak demand, and emissions are expected to vary year on year, due to fluctuations in the energy generation required to balance the grid and supplement baseload power. We have thus seen a 5.2% reduction in emissions from the prior year in our reserve power sites alone, a function of the sites being called upon with less frequency.

The other primary driver of the Group's emissions are our piomass plants, which account for a further 9% of the remaining emissions. Our biomass plants use a mix of straw, waste wood chips and other fuels of natural origins, which also have the capacity to regenerate, to produce electricity.

The Group has therefore seen a headline reduction in tonnes of CO2 emitted in FY23 compared to FY22 of 5.8%, primarily driven by the lower use of fuel in the reserve power and biomass sites that the Group owns and operates, as described above, only slightly offset by increases in Fibre emissions.

	FY23	FY22	% Change
Emissions (Location Based)	(tCO2e)	(tCO2e)	
Scores	221 552	237727	(/%)
Scope 2	4 123	4,877	:1%
Scope 3	2 024	332	6 <u>19</u> 99
Total	228,699	242,932	(6%)

Task force on Climate-related Financial Disclosures ("TCFD")

Quality of data provided

The Group appointed Minimum, who are carbon accounting exports, to independently calculate its. Greenhouse, Gas. ("GHG"), emissions, in accordance, with the UK. Government's Environmental Peporting Guidelines, Including Streamuned, Energy, and Carbon, Reporting Guidance. The GHG cmissions have been assessed following the ISO 14064-2018 standard and have used the 2022 emission conversion factors, published, by the Department for Business Energy 8 Industrial Strategy (BEIS).

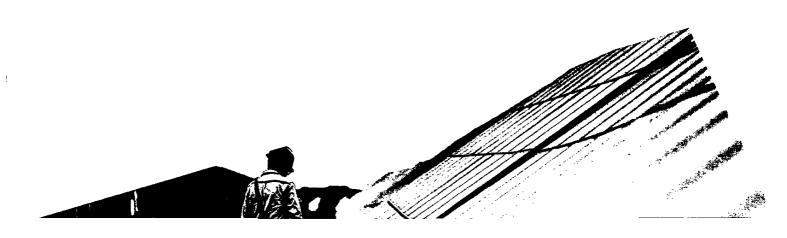

The emissions were categorised into location based Scope 1, 2 and 3 emissions, in alignment with the World Resources Institute's Greenhouse Gas Protocol. A Corporate Accounting and Reporting Standard guidelines with the below definitions.

- Scope 1: All pirect GHG emissions by the Group from sources under their control (e.g., burning fuel).
- Scope 2 Indirect GHG emissions from where the energy the Group purchases and uses is produced (e.g. when generating electricity used in the buildings)
- Mode 3. All indirect omissions not covered by scope 2 that occur up and down the value chain leigh from business travely employee commuting, use of sold products, distributions.

Minimum used a Jurvey-based approach to collect data, allowing subsidiarly companies to submit total values for different activities or detailed consumption figures. Wherever possible, primary data was collected, be it kWhs of electricity consumed, m⁵ of natural gas burnt and kilometres travelled by different modes for shopp 5 emissions. We are pleased to report that of the data explicated for the TCFD and SECR disclosures. 99% is based on actual figures submitted by the subsidiary companies.

 c) Describe the targets used by the organisation to manage comate related risks and opportunities and performance against targets.

The Group, through the development and operation of primarily renewable energy assets, inherently contributes to the UK achieving its net zero target and helps drive the transition away from fossil fuels. Although the majority of the Croup's energy generating assets, such as wind and solar, are low-carbon by nature other Group divisions are more carbon intensive and drive higher emissions. For instance, the operation of the Group's reserve power plants, or the construction of our fibre, nome and energy assets. Where possible, the Group moves operational assets onto inhowable tariffs, and seeks to partner with suppliers and contractors that are like minded in their climate amorphors.

Group finance review

Review of financial statements

The purpose of this report is to provide additional explanatory information on the financial statements. In measuring our performance, the financial measures that we use include those that have been derived from our reported results in order to eliminate factors that distort year-on-year comparisons. These are considered non-CAAP financial measures.

A reconcillation of these to the financial results can be found in note 28 of the notes to the financial statements

The financial statements show assets at amortised cost, as such they do not reflect the future value that we expect to derive from these businesses. To that extent accounting performance may differ materially from the share price and may not reflect changes in the full market value of assets or businesses owned by the Group.

There were various changes to the operational assets during the year, including the sale of Darlington Point, a large solar site in Australia, and Elivia expanding their south-eastern footprint with the acquisition of Millwood Designer Flomes. In March our ETTP businesses were successfully consolidated into one new business focusing on wholesale strategy and our own ISP brand. Subsequent to year end, Dulacca, a large wind fairn in Western Australia, became operational following a two year construction process, and was sold for a profit of £22m in October 2023.

To support continued expansion, we built up cash reserves at year end of £157m, which serve to fund the operational needs of our divisions.

	2023 £'000	(restated)		Movement	
		2022 £'000	£'000	%

Financial performance

The Group has reported a loss before tax of £149m for the year ended 30 June 2022, which is a fail from profit of £59m (restated) in the prior year. This is driven primarily by expansion in our fibre sector as we continue to grow our assets and operational base, as detailed further in this report. Similarly, overall £BITDA' decreased by 58% to £82m (2022 £195m), which is mainly due to operational growth in our newer

divisions, particularly fibre, and a number of provisions recognised against specific property loans. Additionally, there are two instances of extraordinary costs included in the financial statements, which are not expected to reoccur. (1) restructuring costs of £13m associated with the merger of fibre-to-the-premises businesses, and (2) impairments costs of £22m associated with trading assets which were sold subsequent to year end.

Group finance review

Revenue increased by 485 m to £800m (2022-4712 m) it indiffer to the idisposal of Darlington Point in July which was driven by a steady increase across all our sectors. Following the acquisition of Elias Homes in May 2022, revenue from homebuilding was included. for a full year in the financial results for the first time. and contributed £50m of the £88m increase. This second most impactful increase, at £16m, was in our energy division as power generation from our operating assets remained steady and energy buces stabilised in the second part of the year

Refirement living saw a £9m increase (45%) in revenue as we saw our sites reaching completion. and buyers taking residence. Additionally revenue from our lending division saw an increase of 15% to £49m (2022 E42m) due to an increase in the loan. book value to an average of F454m over the year.

Operating expenses for the year were in line with our expectations, with the increase primarily driven. my reserve power, due to gas procurement costs. Our fibre division continuing to drow its operational base, and the associated costs resulting from the addition of Elivia brought an associated increase in staff cost, and overall for the Group staff costs increased by £35m.

A prior year restatement, due to hedge accounting on interest rate swaps, prompted a reclassification. between Other Comprehensive Income and Retained Earnings, this resulted in an accumulated regulation of £15m. In finanting costs and is reflected. in the restated accounts. However interest costs increased in the year, as Elivia's external debt facility. was included in the Group results for the full year.

Financial position

Continued shareholder interest and investment has seen net assets drow to Fiz 366m (2022) 62 221m. restated in the sear ended 30 June 2023, we issued 142m sharer (2022, 150m) for a total consideration. of £257m (2022, £205m).

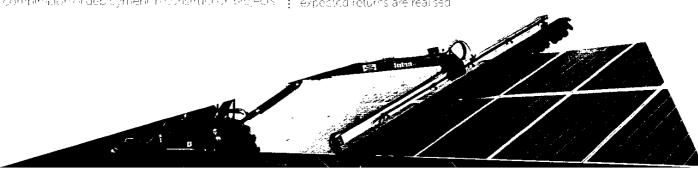

Fixed assets increased by £115m las deplotment in flore network assets growing. £277m in the lear and energy alsets decreased by a net £108h indue to a combination of desicyment in construction diejects.

2022

Net current assets of £815m (2022, £807m restated). have increased by F8rm reflecting a £79m increase in stock in the homobuilding division which in turn was offset by £99m decrease in cash due to accelerated cash deployment. Our loan book gross of provisions, has increased by 21% to £474m (2020) £375m), and at 30 June 2023 represented 15% of net assets (2022-13%)

Cash and cash equivalents as at 30 June 2023 were £157m (2022 £256m) Cash generated from operating activities remained strong at £205m (2022) £346m), which has been utilised alongside external. long-term financing and capital raised by new share issues to grow the business. We have invested substantially into the fibre and homebuilding sectors. which will require further capital expenditure over the next 12 months, increasing our diversification across sectors. Of the cash held at year end, £134m. was held in our energy, homebuilding and fibre subsidiaries, where there are a number of construction and infrastructure projects under way. requiring cash to be readily available for stage payments due in the months after year end

Goodwill at £514m (2022, £5.41m), continues to be a significant number on the balance sheet and arises on the acquisition of some businesses. Acquired businesses for example renewable chargy sites, often have a market value in excess of the company's net assets, reflecting their reliable future income streams. But simply, the market value of our operation businesses reflects the value of future expected profits, not the cost of simply buying tang ble assets such as solar panels or wind turbines. We pay market value for the sites we acquire, which mal, exceed the value of roottifable assets such as the solar panels and so generates goodwill which essential, represents the value of the expected future income streams. Goodwill recognised is fested for impairment annually, and will gradually be written off typically over the life of the site as expected returns are realised

Group finance review

Sector performance

Energy

As economic activity and global demand continued to remain high throughout the year, so too did wholesale energy prices, driven by movements in commodity prices. This resulted in the Group maintaining strong revenues from energy generation at a level similar to 2022 across our energy sites, with revenue of £606m (2022, £590m).

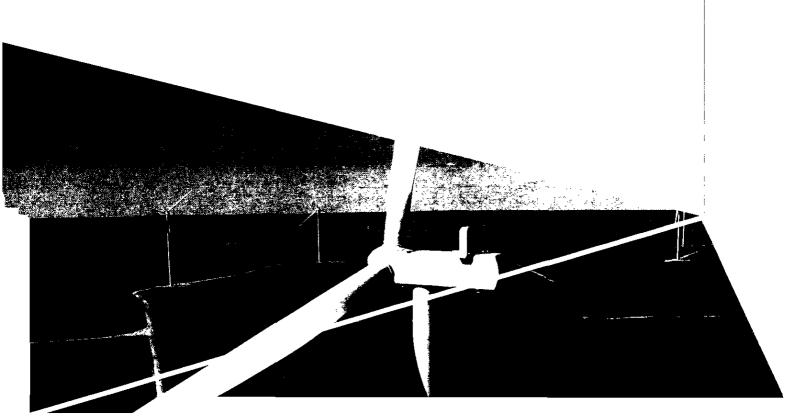

Our generation capacity remained consistent year on year, as there were no substantial changes to our energy generating assets. However, production was marginally reduced due to Snetterton, one of our biomass fired power plants, suffering some months of operational downtime following a gearbox fault

The associated insurance claim for replacement parts and loss of revenue was settled in full.

The impact was offset by the increase in the average price per unit for the division as a whole, as it increased to £1077 MWh from £975 MWh in the prior year, a movement of 10%

While total operating costs remained mostly consistent year-on year at £377m (2022 £321m), the Group recorded a £30m increase in gas procurement costs for reserve power plans, driven by inflated gas prices in the first half of the year Correspondingly, EBITDA also decreased by 13% to £232m (2022 £258m).

	FY2023 Production (MWh)	FY2022 Production (MWh)	FY2023 External Availability	FY2022 External Availability

Group finance review

The French dovernment has announced it would revoke the measure introduced in November 2020 to retroactively mobility. FIT contracts, which reduces uncertainty in our French solar portfolios However this earlier roung resulted in an £8m French solar Goodwill impairment in the prior year, which due to accounting convention cannot be reversed once recognised.

In November 2022, the UK government announced the introduction of an Electricity Generator Lexy (EGE) a temporary measure to charge, exceptional receipts on high revenues for Groups generating electricity. The roxy is in effect from 1 January 2023 until 31 March 2028 and it enacts a 45% windfall levy on wholesale energy market revenues in excess of 175/14V/h, specifically to electricity generated from renewable biomass, and energy from waste sources. The Group was not required to pay EGE in the period movever weld expect to pay this in the next financial year, and are assessing our position. We had already anticipated the impact on the returns generated from our energy portfolio over the next tive years, which is reflected in the share price.

Lending

Revenue from lending increased by £7m to £49m. (15%), primarily due to a larger loan book for 2023, as: property deployment accelerated in the year. At year end, the book han increased both in value (£4.4m). 2022, 3 5mill and in numbers of loans (209 toans) 2022 176 loans: However, the UK's challenging background was not without impact and throughout the year, we recorded a provision of £30m against one commercial pan. This has nightighted the benefit of our piversification strategy as property. lending accounts for £470m of the total duision. spread across 198 Idans at year and. As a result, EBITDA for the leriand all sion improved slightly to £8rn ft ss from £15hr loss in the prior jear i Offmhith si movement are provisions of £43m recognised. against procerty loans during the year (2022, 639m).

Fibre

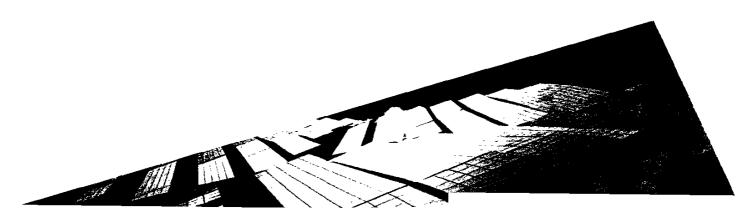

As a growing division, all our fibre but nesses are in the build phase and are starting to add customers to their networks. By 30 June 2023, the drission was serving around 50,000 customers and building in over 100 locations in the UK, we are on track to be able to deliver full fibre connectivity to 500,000 properties in those towns and villages.

Overart the division has almost doubled its revenue year on year, from £9n, in 2022 to £16m in the current year. Although building a fibre network is capital intensive and leads to a physical asset on balance sheet the division also incursiving operating expenses as the hus nesses scale their operations and develop market presence. This resulted in a reported EBITDA loss of £120m (2022, £56m loss), which is in line with expectations and reflects the development stage of the division. This includes extraordinary costs of £13m associated with the restructure.

As we build out these networks, the assets will be recognised on the balance sheet at cost which cannot include future value which is expected to be generated, as the assets have been internally generated.

Housebuilding

We have repraided our Healthcarr division to Housebuilding to reflect the change in business mix. Whereas it incorporates primaril, Elivia and Pangoford, this division continues to include the results of One Healthcare (two private hospitals) for this financial year. The One Healthcare trading assets and flabilities were sold subsequent to year end Extraordinar, costs of Ezizm associated with these assets are recognised in the account, and are not expected to recognised in future periods.

Group finance review

Housebuilding operations contributed £130m (2022 £71m) to Group revenues for the year reflecting the impact of increased revenue in Rangeford, as well as a full year of Elivia operations. Elivia sold 132 units in the year, and is performing in line with budget, while Rangetord increased its revenue by 45% to £29m and sold 47 units.

A change in accounting policy resulted in the cost of Rangeford communal areas being capitalised as fixed assets (furniture fixtures and equipment) and amortised over the life of the site. Previously, these costs were immediately recognised to Cost of Sales in the P&L. The treatment has been agreed with our auditors, and has not resulted in a prior year restatement, however, Rangerford fixed assets increased by £15m in the current year as a result.

Funding and liquidity

Our strategy within our renewable energy businesses is to secure long-term financing at conservative levels from mainstream banks to enhance returns. At year end we had drawn £1,160m of external debt in this part of the Group, with a further £1/5m available to be drawn.

This approach enables us to acquire businesses that have stable characteristics such as predictable cost base, revenue streams, government incentives or proven technology and as such have lower returns that without leverage would be insufficient for our shareholders. It also allows us flexibility in financing our businesses and managing cash flow. We believe that falling to adopt this strategy would have a negative impaction business return and shareholder value over the long-term. 80% of our interest payable is fixed and therefore we are not significantly exposed to current interest rate volatility. The Group applies fledge accounting for interest rate swaps.

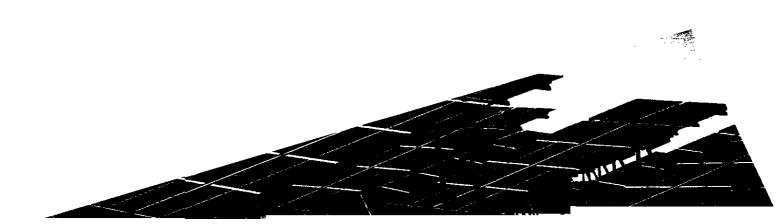

which means any changes in the fair value of the swap is recognised in reserves (cash flow nedge reserve), with the ineffective portion of the hedge recognised in the P&L. The market value of the swaps is recognised on the palarice sheet as an asset or a liability, depending on whether the swap is favourable compared to current rates.

We continually review financing arrangements to ensure that they are competitive and optimised for the needs of the business. To ensure cash is managed in an agile manner, we maintain flexible finance facilities which can be drawn or repaid to meet immediate business needs. Specifically, the Group has access to a Revolving Credit Facility of £290m, which is interlinked to the not assets of our energy division. The flexibility to draw and repay funds at short notice facilitates effective management of short-term cash fluctuations, which can be diliven by seasonality of operating working capital.

Looking ahead

At the end of the financial year, we continue to believe that the business is positioned well to take advantage of future growth opportunities across its core business areas. Energy and lending operations are well established in the market and continue to make excellent progress with robust performances in the new financial year. Provisions taken against loans during the year in our lending sector have ring-fenced challenges which are not indicative of further problems across other loans in the sector.

Deployment into fibre continues to roll out in line with expectations, while growing its revenue and operational base. Sales activity in our housebuilding division remain strong against a challenging market and are reporting profits in line with budget

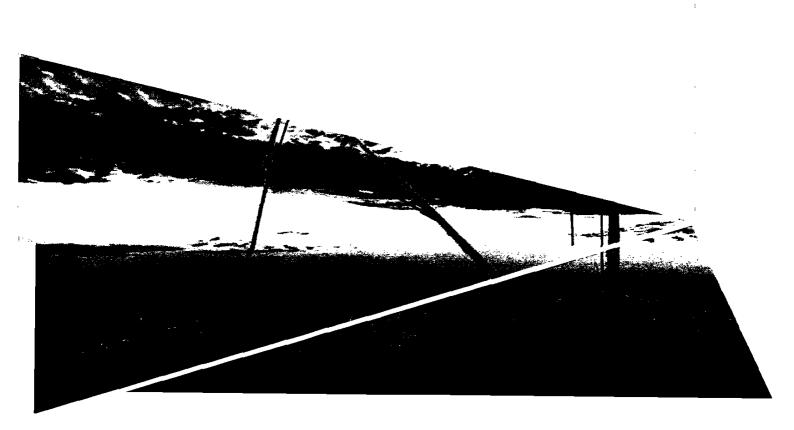

Group finance review

We expect to generate strong operating returns from our established divisions for the coming years, in addition to the anticipated outflows for our construction chase assets, write at the same time growing our fibre and housecultaing divisions to maturity.

Independent auditors' report to the members of Fern Trading Limited

Opinion

We have audited the financial statements or form 1. We believe that the audit evidence we have obtained Trading Limited (the Parent Conipan,) and its subsidiaries (the Group : for the year ended 30 June) 2023 which complise the Group Statement of Comprehensive Income, the Group and Parent Company Balance Sheet, the Group Statement of Cash Flows, the Group and Farent Statement of Changes in Equity and the related notes 1 to 29. including a summary of significant accounting policies. The financial reporting framework that has pech applied in their preparation is applicable law. and United Kingdom Accounting Standards including FRS 102 The Financial Reporting Standard applicable. in the UK and Republic of Ireland' (United Kingdom) Generally Accepted Accounting Practices

In our opinion, the financial statements.

- give a true and fair view of the Group's and of the Parent Company's affairs as at 30 June 2023 and of the Group's loss for the year then ended
- · have been properly prepared in accordance with United Kinggom Generaliy Accepted Accounting Practice, and
- · have been prepared in accordance with the requirements of the Companies Act 2006

Basis for opinion

We conducted our augit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditors. responsibilities for the audit of the financial statements section of our report. We are independent. of the Group in accordance with the eurical requirements that are relevant to our allost of the financial statements in the L.K. including the FRC's Ethical Standard, and we have fulfilled bur other ethical responsibilities in actificance with these : regiziteroents

is sufficient and appropriate to provide a basis for our data (CI)

Conclusions relating to going concern

in auditing the financial statements, we have concluden that the directors use of the going concern basis of accounting in the preparation of the financial statements is appropriate

Basco on the work we have performed we have not identified any material uncertainties relating to events or conditions that, individually or collectively. mar, cast significant doubt on the Group and Parent Company's ability to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report However, because not all future ments or conditions can be predicted, this statement is not a guarantee as to the Group's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditors report thereon. The directors are responsible for the other information. contained within the annual report.

Our opinion on the financial statements goes not cover the other information and, except to the extent otherwise explicitly stated in this record the do not expressionly form of assurance conclusion thereon.

Our responsibility is to read the other information and in doing so consider whether the other information is materially inconsistent with the financial statements or our knowledge notained in the ricurse of the audit or other tise appears to the imaterial, misstated if the identify such material

3 | GOVERNANCE

Independent auditors' report to the members of Fern Trading Limited

nconsistencies or apparent material misstatements, we are required to defermine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact

We have nothing to report in this regard

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit

- the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements, and
- the Strategic report and Directors' report have been prepared in accordance with applicable legal requirements

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or Directors' report

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us or
- the Parent Company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of Directors' remuneration specified by law are not made, or

 we have not received all the information and explanations we require for our audit

Responsibilities of directors

As explained more fully in the Directors' responsibilities statement set out on pages 38 and 39 the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

3 GOVERNANCE

Independent auditors' report to the members of Fern Trading Limited

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with cur responsibilities outlined above, to defect irregularities, including fraud. The risk of not defecting a material misstatement duc to fraud is higher than the risk of not defecting one resulting from error, as fraud may involve deliberate concealment by, for example forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, tric primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our appreach was as follows:

- We obtained an understanding of the logal and regulatory frameworks that are approache to the Group and determined that the most significant are those that relate to reporting framework (FRS 102 and the Companies Act 2006)
- We uniderstood how Fern Trading Limited is complying with those trainevorks by making enquires of management, those charged with governance and those responsible for legal and compliance procedures as to any fraud risk framework within the entity, including whether a formal fraud risk assessment is completed. We corroborated our enquires through review of the following documentation or performance of the following procedures.
 - obtaining an understanding of entry-level controls and considering the influence of the control or wronn ent.

- obtaining an understanding of policies and procedures in place regarding compliance with taws and regulations including now compliance with such policies is monitored and enforced, obtaining an understanding of management's process for dentifying and responding to traud lisks including programs and controls established to address risks identified, or otherwise prevent, deter and defect fraild and how schlor management monitors those programs and centrols.
- review of Floard meeting minutes in the period and up to date of signing
- We assessed the susceptibility of the Group's financial statements to material misstatement, including how traud might occur by holding a discussion within the audit team which included
 - · identification of related parties,
 - understanding the Group's business, the control
 convironment and assessing the inherent risk for
 pelevant assertions at the significant account
 level including discussions with management
 to gain an understanding of those areas of the
 financial statements, which were susceptible to
 fraud, as identified by management, and
 - considered the controls that the Group has established to address risks identified by the entity or that otherwise seek to prevent, deter or defect fraud including gaining an understanding of the entity level controls and policies that the Group applies
- Based on this understanding we designed our audit procedures to identify non-compliance with such fauts and regulations. Our procedures involved festing of ournal entires through journal analytics tools with focus on manual

3 | GOVERNANCE

Independent auditors' report to the members of Fern Trading Limited

journals, large or unusual transactions, or journals meeting our defined risk criteria based on our understanding of the business, tested accounting estimates for evidence of management bias, enquiring of members of senior management and those charged with governance regarding their knowledge of any non-compliance or potential non-compliance with laws and regulations that could affect the financial statements, and inspecting correspondence, if any, with the relevant licensing or regulatory authorities.

A further description of our responsibilities for the audit of the financial statements is located on the

Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

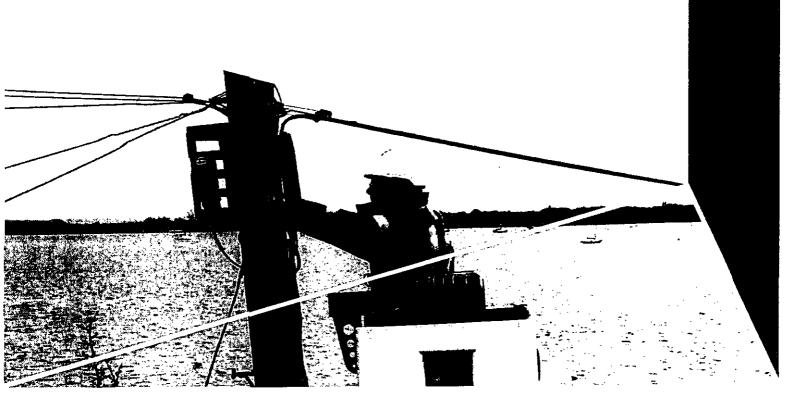

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are

required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Statement of accounting policies

Company information

Form frading Limited (the Company) is a private company limited by shares and ill corporated on 14 May 2020. The company is domiciled in England, the United Kingdom and registered under company number 12601636. The address of the registered office is at 6th Floor, 33 Holborn, London, England, EC1N 2E7.

Statement of compliance

The Group and individual financial statements of Fern Trading Limited have been propared in combinance with the United Kingdom Accounting Standards including Financial Reporting Standard 162, "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland (+RS 102) and the Companies Act 2006

Basis of preparation of financial statements

The financial statements have been prepared on a going concern basis, under the historical of st convention as medified by the recognition of certain financial assets and liabilities measured at fair value, and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The principal accounting petroes, which have been applied consistently throughout the year, arc set out below.

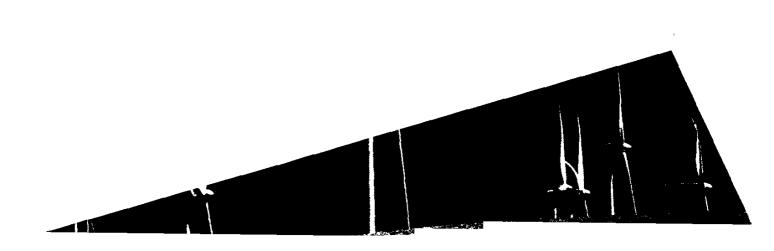

The consolidated financial statements include the results of all subsidiaries owned by Ferri Irading Limited as Itsted in note 29 of the annual financial statements. Certain companies of these subsidiaries, which are listed in note 29 have taken the exemption from an audit for the year ended 30 June 2023 permitted by section 479A of Companies Act 2006. In order to allow these subsidiaries to take the audit exemption, the parent company has given a statutory guarantee in line with section 419C of Companies Act 2006, of all the cutstanding net liabilities as at 30 June 2023.

Going concern

The Group's and the Company's business activities, together with the factors likely to affect its future development performance and position are set out the Strategic Report on pages 4 to 15. The financial position of the Group its cash flows, liquidity position and porrowing facilities are described in the financial review on pages 31 to 36. The principal risks of the Group are set out on pages 17 to 20.

The Directors perform an annual going concern review that considers the Group's ability to meet its financial obligations as they fall due, for a period of twelve months after the date that the financial statements have been signed.

Due to the charteriging market conditions management have performed an assessment to determine whether there are any material uncertainties arising that could cast significant doubt on the about of the Group to continue as a going concern. No significant issues have been noted and an a consequence, the directors believe that the Group is well placed to manage its business risks successfully despite the current uncertain economic outlook.

Statement of accounting policies

In reaching this conclusion the Directors have reviewed the financial impact of the uncertainty on the Group's balance sheet, profit and loss and cash flows with specific consideration given to the following

A reverse stress test was performed on the base case forecast to ascertain what scenarios would result in risks to the Group's Equidity position. The test showed even in an unlikely scenario of a significant reduction of revenue of 46%, the Group is able to sustain its current operational costs and meet all liabilities as they fall due for at least a year from the date of signing these financial statements when utilising the available facilities within the Group.

The Group has a number of financing facilities that contain coveriants requiring the Group to maintain specified financial ratios and comply with certain other financial coveriants. These financial coveriants are tested at least biannually, and, at the date of this report, the Group is in compliance with all its financial coveriants. Stress tests on reasonably plausible scenarios such as a significant reduction in EBITDA of 84% over time have been used to assess the coveriant requirements for the at least the next twelve months and all coveriants have been forecast to be met even under the stress test scenario, in the going concern period

At 30 June 2023, the Group had available cash of £157m and headroom available of £175m including a revolving credit facility of £290m. Debt of £217m is due to mature in less than one year, with the remainder of £941m payable in more than one year. The Group's facilities, repayment dates and undrawn amounts are set out in Note 16 Loans and Borrowings.

Key accounting judgement and estimates have been made with consideration given to the current economic outlook. Key estimates include loan recoverability, valuation of work in progress, decommissioning provisions, impairment of goodwill and investments, business combinations and heage accounting. Details are set out on pages 50 to 60.

Based on the above assessment of current economic conditions and the impact on the Group's financial position, liquidity and financial covenants, the directors have concluded that the Group and the Company has adequate resources to continue in operational existence for the next 12 months. Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Exemptions for qualifying entities under FRS 102

FRS 102 allows a qualifying entity certain disclosure exemptions, subject to certain conditions, which have been compiled with, including notification of, and no objection to, the use of exemptions by the Company's shareholders

The Company has taken advantage of the following exemptions

- from preparing a statement of cash flows, on the basis that it is a qualifying entity and the consolidated statement of cash flows, included in these financial statements, included the Company's cash flows.
- ii. from the financial instrument disclosures, required under FRS 102 paragraphs 11-39 to 11-48A and paragraphs 12-26 to 12-29, as the information is provided in the consolidated financial statement disclosures.
- iii. from disclosing the Company key management personnel compensation, as required by FRS 102 paragraph 33.7

Statement of accounting policies

Basis of consolidation

The consolidated financial statements include the insults of item liading limited and all its subordary undertakings made up to the same accounting date. All intra-group balances, transactions income and expenses are eliminated in full on consolidation. The results of subsidiary undertakings acquired or disposed or ouring the period are included or excluded from the income statement from the effective date of acquisition or disposal.

All undertakings over which the Group exercises control being the nower to govern the financial and operating policies so as to obtain benefits from their activities, are consolidated as subsidiary undertakings. Where a subsidiary has different accounting policies to the Group, adjustments are made to those subsidiary financial statements to apply the Group's accounting policies when preparing the consolidated financial statements.

Any subsidiary undertakings or associates sold or acquired during the year are included up to, or from the dates of change of control or change of significant influence respectively.

Where the Group has written a put option over shares held by a non-controlling interest, the Group derecognises the non-controlling interest and instead recognised contingent deferred consideration trability within other payables for the estimated amount likely to be paid to the non-controlling interest on exercise of those options. The residual amount, representing the difference netween any consideration paid/payable and the non-controlling interests schare of net assets is recognised as goodwill. Movements in the estimated liability after initial recognition are recognised as goodwill.

Foreign currency

i. Functional and presentation currency

The Group financial statements are presented in pound sterling and councied to thousands

The Company's functional and presentation currency is pound sterling and rounded to thousands

ii. Transactions and balances

Toreign currency transactions are translated into the functional currency, using the spot exchange rates at the dates of the transactions. At each period end foreign currency monerary items are translated using the closing fate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined. Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of munetary assets and liabilities denominated in foreign currences are recognised in the profit and loss acroount.

All foreign exchange gains and losses are cresented in the profit and loss account within ladministrative expenses.

iii. Translation

The frading results of Group uncertakings are translated into bounds sterling at the allerage exchange rates for the year. The assets and ilabilities of overseas undertakings including goodwill and fair value adjustments arising on acquisition, are franslated at the exchange rates ruling at the year-end. Exchange adjustments arising from the retranslation of opening net investments and from the translation of the profits or losses at average rates are renognised in 'Other comprehensive income' and allocated to nun-controlling interest as appropriate.

Statement of accounting policies

Turnover

The Group operates a number of classes of business. Revenue is derived by the following

Energy

Jurnover from the sale of electricity generated by solar farms, wind generating assets, reserve power plants and biomass, and landfill sites is recognised on an accruals basis in the period in which it is generated. Revenue from long-term government backed offtake agreements, such as the Renewable Colligation Certification ("ROC") scheme are accrued in the period in which it relates to Turnover from the sale of fertiliser by biomass and landfill businesses is recognised on physical dispatch.

Lending

Turnover represents arrangement fees and interest on loans provided to customers, not of any value added tax. Loan interest is recognised on an accrual basis in line with contractual terms of the loan agreement. Arrangement fees are spread over the life of the loan to which they relate.

Fibre

Turnover is recognised at the fair value of the consideration received for internet connectivity and related IT services provided in the normal course of business, and is shown net of VAT. Turnover is recognised based on the date the service is provided.

· House building

Turnover is recognised on legal completion of the sale of property, land and commercial spaces. Turnover from housing association contracts is recognised by reference to the value of work completed as a proportion of the total contract value. Turnover for retirement I ving is recognised when the significant risks and rewards of ownership of retirement properties have passed to the buyer (or legal completion), the amount of revenue can be recognised reliably, and it is probable that the economic benefits associated with the transaction will flow to the entity.

Employee benefits

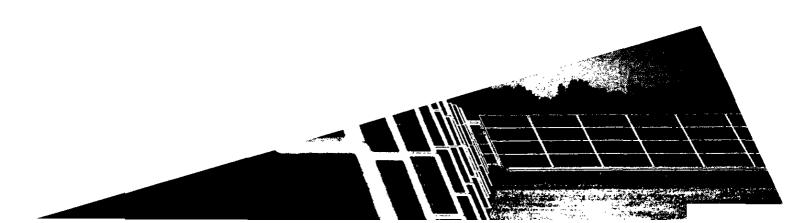

The Group provides a range of benefits to employees, including annual bonus arrangements, baid holiday arrangements and defined contribution pension plans

i. Short-term benefits

Short term benefits including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.

ii. Defined contribution pension plan

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. Once the contributions have been paid the Group has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the Group in independently administered funds.

Statement of accounting policies

iii. Share-based payments

Cash-settled share-based payments are measured at fair value at the balance sheet date. The Group recognises a liability at the balance sheet date based on these fair values, taking into account the estimated number of tinits that will actually vest and the current proportion of the leating period. Changes in the value of this liability are recognised in the income statement.

The Group has no equity settled arrangements

Finance costs

Finance costs are charged to the profit and loss account over the term of the dobt using the effective interest in ethod so that the amount charged is at a constant rate on the carrying amount. Issue costs are inhally recognised as a reduction in the proceeds of the associated capital instrument and released to the brofit and loss account over the term of the debt.

Current and deferred tax

Tax is recognised in the statement of income as diretained carnings, except that a change attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income rax charge is calculated on the basis of tax rates and laws that have been enacted or substantifiery enacted by the balance sheet date in the countries where the Company operates and generates income.

Deferred balances are recognised in respect of all unling differences that have originated out not reversed by the Balance sheet date, except that

- The recognition of defored tax assets is limited to the extent triacit is probable that the, will be recovered
 against the reversal of deferred tax liabilities or other future taxable profits, and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances
 have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deductions available for them and the differences between the fair values of Labilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Business combinations and goodwill

Business combinations are accounted for bliapplying the burchase method

The cost of a pusiness combination is the fair value of the consideration given, translation incurred or assumed and the equit, instruments issued plus the costs prectil attributable to the business combination. Where control is achieved in stages the cost is the consideration at the pate of each transaction.

On arguiration of a pusiness, tair values are attributed to the identifiable assets, capitites and contingent tabilities unless the fair value cannot be measured reliably in which case tile value is incomprated as good will. Where the fair value of contingent fiabilities cannot be reliably hieasured they are disclosed on the same basis as other contingent rabilities.

Statement of accounting policies

Goodwill recognised represents the excess of the fair value and directly attributable costs of the purchase consideration over the fair values to the Group's interest in the identifiable net assets, liabilities and contingent liabilities acquired.

On acquisition, goodwill is allocated to cash-generating units (CGUs) that are expected to benefit from the combination

Goodwill is amortised over its expected useful life which is determined based on the estimated lifespan of the assets acquired. Where the Croup is unable to make a reliable estimate of useful life, goodwill is amortised over a period not exceeding ten years. Goodwill is reviewed and assessed for impairment indicators on an annual basis and any impairment is charged to the profit and loss.

Tangible fixed assets

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, tess their estimated residual value, over their expected useful lives. Depreciation commences from the date an asset is brought into service. Land and assets in the course of construction are not depreciated. Tangible assets are depreciated over their estimated useful lives, as follows.

Land and buildings	2% to 4% straight line
Power stations	3% to 5% straight line
Plant and machinery	4% to 35% straight line
Network assets	4% to 6% straight line

Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use

Where factors, such as technological advancement or changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or depreciation rate are amended prospectively to reflect the new circumstances. The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within profit or loss

Intangible assets

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated, using the straight-line method, to allocate the depreciable amount of the assets to their residual values over their estimated useful lives, as follows.

Development rights	25 and 30 years
Software	2 to 10 years

Amortisation expenses are included in administrative expenses. Development rights relate to planning consent to build a solar farm and a wind farm acquired on acquisition.

Where factors, such as changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or amortisation rate are amended prospectively to reflect the new circumstances.

The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

Statement of accounting policies

Leases

At inception the Group assesses agreements that transfer the right to use assets. The assessment considers whether the arrangement is, or contains, a lease based on the substance of the arrangement and whether the lease should be classified as either a finance lease or an operating lease.

Leases of assets that transfer substantially all the risks and rewards incidental to dwnership are classified as finance leases. Finance leases are capitalised at the common ement of the lease at the fair value of the leased asset and depreciated over the shorter of the lease term and the estimated useful life of the asset. Assets are assessed for impairment at each reporting date

Leases that do not transfer all the tisks and rewards of plynership are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.

Investments

The Company holds inventments in a subsidiar, at cost less accumulated impairment losses. If an impairment loss is subsequently reversed, the carrying amount of the investment is increased to the revised estimate of its recoverable amount, but onri, to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.

Cash

Cash includes cash in hand and deposits repayable on demand. Restricted cash represents cash for which the Group poes not have immediate and direct across or for which requiator, or legal requirements restrict the use of the cash.

Stocks

Kaw materials, spare parts and consumables are valued at the lower or cost and net realisable value. Where necessary, a provision in made for obsolete, slow-moving and defective stock. Cost is determined on the first-in, first-out (FiFO) method.

Fuel stocks (MBM and litter) are valued on an average cost basis over one to two months and provision for unusable litter is reviewed monthly and applied to off-site stock.

Fuer stock of straw has been valued at the historical cost per terms of shaw. A provision for unusable straw is identified on an individual stack basis and is reviewed monthly. Stocks are used on a first in, first out 1 FEO to basis by age of straw.

Stocks of asinat Fibrophosiale, alued at the lower of cost and net realisation laue to the laroup

Stocks of property development work in progress. WIPI: are stated at the lower of cost and net reassable liable. Cost cumprises direct materials and, where applicable id lect about costs and those overneads that have been incurred in bringing the stocks to their present locations and condition.

At each reporting gate, an assessment is made for impairment. Any excession the carrying amount of stocks over its estimated selling price less tost to complete and soll is recognised as an impairment loss through the profit and loss account. Reversals of impairment losses are also recognised in the profit and loss account.

Statement of accounting policies

Accrued income

Accrued income on loans is calculated at the rate of interest set out in the loan contracts. Friergy income is accrued over the period in which it has been generated.

Deferred income

Deferred income is recognised in accordance with the terms set out in the contact. Deferred income is released to the profit and loss account in the period to which it relates.

Financial instruments

The Group has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments

Financial assets

Basic financial assets, including trade and other receivables and cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest Such assets are subsequently carried at amortised cost using the effective interest method

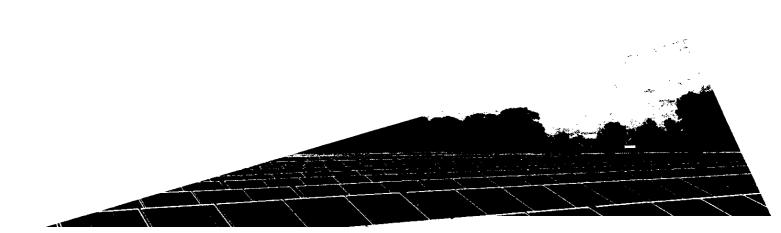

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

Other financial assets including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price. Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions

Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow Group companies and preference shares, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest

Statement of accounting policies

Debt instruments are subsequently coined at amortised dist, using the effective interest rate method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down occurs. To the extent there is no exidence that it is probable that some or all of the facility will be drawn down the tee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less it not they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Financial rabilities are derecognised when the liability is extriguished, that is when the contractual obligation is bischarged, cancellno chexpires.

Provisions

Provisions are made where an event has taken place that gives the Group a legal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the profit and loss account in the , ear that the Group becomes aware of the colligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and oncertainties.

Hedging

The Group applies nedge accounting for transactions entered into 10 manage the cash flow exposures of borrowings interest rate swaps are held to manage the interest rate exposures and are designated as each flow hedges of floating rate borrowings. Changes in the fair values of derivative, designated as cash flow nedges, and which are effective, are recognised intectly in equity. Any meffect veness in the nedging relationship (being the excess of the cumulative change in fair value of the hedger distribution of the nedge) is recognised in the profit and loss.

The gain or loss recognised in other comprehensive income is reclassified to the profit and loss in accordance with the cash ficklys of the hedged item. Hodge accounting is discontinued when the hedging instrument expires, no longer meets the hedging criteria, the forecast transaction is no longer highly probable, the negated debt instrument is derecognised or the hedging instrument is terminated.

Share capital

Ordinary shares issued by the Group are recognised in equity at the value of the proceeds received, with the excess common valuable being or displict pramouni

Non-controlling interests

Tron-controlling interests are measured at their proportionate share of the acquirer's identifiable net assets at the date of acquirer on

Statement of accounting policies

Key accounting judgements and estimates

The preparation of financial statements in compliance with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key estimates and judgements in preparing these financial statements are

i. Recoverability of loans and advances to customers (estimate)

Loans and advances to customers including associated accrued income balances, are reviewed for impairment on a biannual basis. In considering the need for a provision, management determine their best estimate of the expected future cash flows on a case by case basis. As this estimate relies on a certain number of assumptions about future events which may differ from actual outcomes, including the borrower's ability to repay interest and capital due in future periods, this gives rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the debtor balance.

Management note that provisions against loans and advances is a critical estimate and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conclude that a change of +/- one per cent in the amount provided against the estimated balance at risk would have resulted in £3.6m less/more expenditure being charged to the income statement during the period. See note 13 for the carrying amount of the debtors and provisions at 30 June 2023.

ii. Value of property development work in progress ('WIP') (estimate)

Property development WiP is reviewed for impairment on a periodic basis. In considering the need for a provision, management determine their best estimate of the recoverable value. Management engage an expert external valuer to provide key assumptions about future events which may differ from actual outcomes, including property valuations, rate of sales and development costs.

These estimates give rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the balance as at the 30 June 2023. Post year end, management have reviewed the assumptions used to determine the value of property development WIP and have observed no changes in performance that would impact the valuation as at the 30 June 2023. See note 12 for the carrying amount of the property development WIP.

iii. Purchase price agreement (Australian entities) (judgement)

The Group owns one energy generating subsidiary in Australia which has entered into purchase price agreements (PPA's) in 2019 and 2021. The PPA's include a contract for differences "CfD" whereby the subsidiaries pay/receive amounts from the customer based on the differences between a fixed selling price and the actual price for electricity sold to the Australian energy market. The directors believe the contract is outside the scope of FRS 102 section 12 as it is for the sale of a non-financial item and the CfD is typical for such airrangements. Therefore it is being accounted for under FRS 102 section 23 as a revenue contract with variable consideration, rather than revaluing the entire contract to fair value.

iv. Business combinations (estimate)

The cost of a business combination is the fair value of the consideration given, habilities incurred plus the costs directly attributable to the business combination. Fair value of these combinations is a key estimate and more details are provided on pages 54 to 55.

Statement of accounting policies

v. Decommissioning provision (estimate)

The provision for ancommissioning costs is neasured at management's best estimate of the present value of the expenditure required to settle the future obligation to return and on which there are operational wind and solar farms, to its original corrotton. The level of the provisions is determined to a significant pogree by the estimation of tuture dismanling and restoration costs, as well as the timing of dismantlement.

Wind Farms (estimate):

Management note that decommissioning provisions it a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of 47- one per cent in the discount rate would have resulted in £2.2m increase/decrease in the provision. See note 18 for the provision recognised at 30 June 2023. Management utilise external exportise to provide an estimated cost to dismantie and have used a discount rate of 4.5% to reflect the time in value of money and the risks specific to the obligation.

UK Solar (estimate):

Management mote that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis life results of the sensitivity analysis conducte that a change of 47 one per cent in the discount rate would have resulted in £3 0m increase/decrease in the provision. See note £8 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated cost to dismantle and have used a nincount rate of 4.2% to reflect the time in value of money and the risks specific to the obligation.

French Solar (judgment):

Management believe that given the nature of these particular assets, the lesser may wish to either take lifterof the assets for either continued use or to realise value inrough selling the assets and as such do not believe that an outflow is probable to settle this insteration obligation. Management will continue to incritor the situation at each balance sheet date.

vi. Impairment of goodwill and investments (estimate)

The value of goodwill held by the Group and investments in subsidiary undertakings held by the Compuny is reviewed annually for impairment. The recoverability of these balances is considered with reference to the present value of the estimated future cash flows. These calculations use cash flow projections which extend forward forecasts business performance together with assumptions surrounding the expected life of the asset externally prepared forecasts and valuations, and any adjustments required to the discount rate to take account of business risk. The estimated present value of these future cash flows is sensitive to the discount rate and growth rate used in the calculation, all of which require management's judgement. Testing of the carrying value has been performed during the year, which has involved several scenarios being modelled. Based on this testing and the resulting impairment recognised on investments, management be, ever there is sufficient headroom to support the value of goodwill and investments in subsidiary entities.

Management note that impainment of goodwill are investments is a critical sistimate and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conclude that a change of #1 one per cent in the amount provided against the estimated palance at risk whilid have resulted in £5 (4m festimate expenditure being charged to the income statement during the being See more 8 for the carrying amount of the good will and investments at 30 June 2023.

The Group has no other key management (2022) none).

5 End to year thate intention.

A number of subsidiaries of the Group operate a cash-settled ETIP to qualifying employees whereby employees relider screeces in exchange for cash, the amount of which is determined by reference to the valuation of the underlying subsidiary. The fair value of the liability for the awards made is measured at each reporting date and at the settlement date. The fair value is recognised over the vesting period. The amount of expense recognised takes into account the best available estimate of the number of units expected to vest under the service and performance conditions underlying each award granted.

Details of related undertakings are shown in note 29

Unlisted investments comprise the Group's holding of the members' capital of Terido LLP, a lending business, and its shareholding in Bracken Trading Limited. Fern co-founded Terido LLP in October 2012 with the intention of conducting a proportion of its future trade through the partnership. Additions and disposals of unlisted investments relate to investments and divestments in Terido LLP in line with Fern's cash requirements and to utilise surplus funds. Fern has a small shareholding in Bracken Trading Limited from time to time. Fern's investment in Bracken Trading Limited at 30 June 2023 was £Nil (30 June 2022. £nil). The directors do not consider Terido LLP or Bracken Trading Limited to be subsidiary undertakings of Fern Trading Limited.

Note 26 details the prior period adjustments

Notes to the financial statements for the year ended 30 June 2023

Derivative financial instruments

The Group's financial risk management seeks to minimise the exposure to market risk, credit risk, aquidity and cash flow risk, and energy market risk.

a) Market risk

Energy market risk

The energy sector is experiencing sign ficant turbulence and there is a risk that forecast levels of income are not achieved due to changes in wholesale energy prices, off-take contracts or government subsidies. Changes in Government policy, or regulator intervention may result in reduced income streams within the group due to additional levies.

Currency risk

The Group presents its consolidated financial statements in sterling and conducts business in a number of other currencies, principally Euro and Australian dollar. Consequently, the Group is exposed to foreign exchange risk due to exchange rate movements, which affect the Group's transactional expenses and the translation of earning and net assets of its non-sterling operations.

Transactional exposures

Transactional, exposures arise from administrative and other expense in currencies other than the Group's presentational currency (Sterling). The Group enters in to forward foreign exchange contracts and foreign exchange swaps to mitigate the exchange rate risk for certain foreign currency payables and receipts. The forward currency contracts and swaps are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key inputs used in valuing the derivatives are the forward exchange rates for GBF AUD and GBP FUR. On 30 June 2023 the fair value of the foreign currency contracts was an asset of Enil (2022, Enil) and a liability of Enil (2022, Enil).

Translational exposures

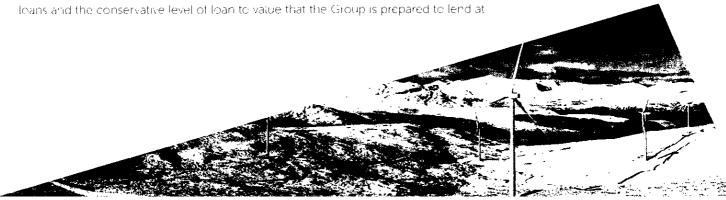

Balance shect translational exposures arise on consolidation on the retranslation of the palance sheet of non-sterling operations into sterling, the Group's presentational currency. The level of exposure is reviewed by management and the potential foreign exchange movement is within an acceptable level of risk and therefore, typically, the Group's policy to not to actively hedge these exposures.

Interest rate risk

The Group has exposure to fluctuations in interest rates on is borrowings. Where the Group enters into borrowing arrangements with floating rate interest, a swap arrangement is entered into to fix a portion of the interest in order to mitigate against an increase in interest rates. The portion of interest to be fixed is assessed on a case by case basis. Management can elect whether to hedge account for these arrangements on an individual transaction basis and have elected to apply hedge accounting for interest rate swaps. The swaps are based on a principal amount of the loan facility and mature on the same date. On 30 June 2023, the outstanding interest rate swaps have a maturity in excess of five years and the fair value is in an asset position of £105,691,000 (2022), liability of £54,409,000).

Price risk

The Group is a short- to medium term lender to the residential property market. To the extent that there is deter oration in the level of house prices that affects the properties that the Group's loans are secured against, there is a risk that the Group may not recoup its full exposure. This is mitigated by the short-term nature of the loans and the conservative level of loan to value that the Group is prepared to lend at

Notes to the financial statements for the year ended 30 June 2023

b) Credit risk

Customer credit risk is mitigated through the Group's credit control policies, which are in place to ensure that our customers have an appropriate credit history and are monitored on an ongoing basis.

c) Liquidity risk

Enquidity risk are managed by ensuring that sufficient cash is available to fund continuing and future operations

Louidity risk arises on pane loans in place across the Gircup and is managed through careful monitoring of covenants and sensible levels of dept. Borrowing is on a long-term basis, whereas our revenue is received throughout the year as well as interest and redemptions on our short-term loan book. Cash frow risk is managed through ongoing tash frow rorecasting to ensure reneipts are sufficient to meet liabilities as they fall due.

Under FRS 102-33-1A disclosures need not be given of transactions entered into between two or more members of a Group, provideo that any subsidiary which is a party to the transaction is wholly owned by such a member

During the year, fees of £90,490,000 (2022 £77,934,000) were charged to the Group by Octopus Investments. Limited, a related party due to its significant influence over the entity. Octopus Investments Limited was recharged legal and professional fees totalling £75,000 (2022 £10,155) by the Group. At the year end, an amount of £Nil (2022 £5,500) was outstanding which is included in trade creditors.

The Group is entitled to a profit share as a result of its investment in Terido EEF, a related party due to key management personnel in common. In 2023 a share of profit equal to £955,000 (2022-£5,249,000) has been recognised by the Group. At the year end, the Group has an interest in the member's capita, or £13,742,000 (2022-£35,452,000) and accrued income due of £2,812,000 (2022-£5,276,000).

The Group engages in lending activities which include balances provided to related parties. Regarding entities with key management personnel in common, loans of £65,070,000 (2022 £63,490,000), accrued income of £28,896,000 (2022 £19,789,000), and deferred income of £Nit (2022 £Nit) were outstanding at year end During the year interest income of £9,162,000 (2022 £7,160,000), and fees of £214,000 (2022 £394,000), were recognised in relation to these loans.

As at 30 June 2023 £Nil (2022 ±Nil) was owed to the Company by Bracken Trading Limited ia related party by key management personnel in common

Other than the transactions disclosed above, the Company's other related party transactions were with its wholly owned subsidiary members of the Group

25 Ultimate parent company and controlling part.

In the opinion of the directors, there is no ultimate controlling party or parent company

Notes to the financial statements for the year ended 30 June 2023

a) Derivative adjustment

We have conducted a review of prior pears accounting treatment or other comprehensive income in relation to derivative recognition. We have identified an error relating to all financial years from 2017, relating to the amortisation of loss associated with a specific dash flow hedge. The loss was the result of a refinancing exercise undertaken in 2017, and the Group has received professional advice in relation to the accounting treatment. Upon review, it was discovered the amortisation of the lose was already reflected in the updated fair value of the cash flow needges, and the amortisation loss had incorrectly been recognised twice over the life of the cash flow needge. This also has a consequence on the calculation of hedge ineffectiveness. The cumulative impact was a £15 5m reduction in historical interest cost, and an equal and opposite reduction in other comprehensive income. A summary of the impact of the correction is provided below, which includes the associated tax adjustments.

EBITDA

Earnings before interest, tax, depreciation and amortisation (FBITDA) is calculated by adjusting profit after tax for interest, tax, depreciation and amortisation, in addition to income and expenses that do not relate to the day to day operations of the Group. We provide EBITDA in addition to profit after tax as it allows us to assess our performance without the effects of financing and capital expenditures.

The following table dotails the adjustments made to the reported results

Forward-looking statements

This Annual Report contains certain forward-looking statements related to the Company's future business and financial performance and future events or developments. These statements are based on the current knowledge and expectations of management and are subject to assumptions, risks and uncertainties, some of which are related to factors that are beyond the control of the Company. Accordingly, no assurance can be given that any particular expectation will be met and forward looking statements regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. Past performance cannot be relied on as a guide to future performance. Nothing in this Annual Report should be construed as a profit forecast.
