DIRECTORS' REPORT

The directors present their annual report and the audited financial statements for the period from 13 September 2011 to 31 December 2012

Principal activity and business review

The company was incorporated on 13 September 2011. The company acts as a non-trading company within the Senior plc group of companies and is expected to do so for the foreseeable future.

During the period, the company delivered good results with profit before tax of \$27,023,000 and its financial position at the period end was strong with net assets of \$265,023,000

Results and dividends

The results for the period were as follows

	2012 USD\$'000
Profit and loss account, at incorporation Profit for the financial period Dividends paid	27,023 (27,000)
Profit and loss account, 31 December	23

Principal risks and uncertainties

The main risk facing the company is the underlying performance of its subsidiary companies. The directors address this by ensuring the subsidiaries have sufficient resources from within the Senior group to be able to continue trading.

Due to a large outstanding balance owed to group undertakings as stated in note 9, the company's main risk in respect of going concern is the net current liabilities held on the balance sheet. The company achieved a good level of profit in the period and its financial position is strong. This, combined with the support of its ultimate parent company (Senior plc), gives the directors the expectation that the company will have adequate resources to continue in existence for the foreseeable future. Thus, the Board has continued to adopt the going concern basis in preparing the company's financial statements.
