1 | OVERVIEW

Group snapshot

Revenue

Revenue has increased by over 12% in the last year from **£712m** in 2022 to **£800m** in 2023

Carbon offsets

Our renewable energy sites' carbon saving is over **681,101** carbon tonnes this year

Energy generation

Our renewable energy assets produce enough energy to power over a million UK homes

Number of loans

Over the year we provided financing to, on average **224** borrowers in the UK

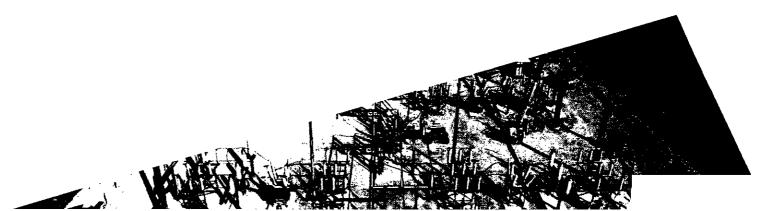

Number of employees

We employ over **1,500** people

Number of sites

We own **229**energy sites spread
predominantly across
the UK

Directors Report'

Ferni Trading Timited (the Corrigany) or together : The Compan, sishare price delivered 5 lo% growth with its subsidiaries the "Group") targets no sistent. growth for shareholders over the long form, with a focus on steady and predictable growth, comprising more than 330 companies that operate across a range of industrics. The Group has been trading for 13 years, successfully natigating the economic cycles and market volatility over this bendo. Our Group has established a stable presence in its sectors. of operation and we expect to continue to parform. predictally in these sectors.

The UK faced a challenging economic backdrop over the financial year. Our Group has continued to demonstrate resilience, though was not immune to the challenging market conditions of the sectors it operates in The financial results for the period isalcate an accounting loss, this is primarily due to capital deployment into newer asset intensive parts. of the Group, which are experited to deliver profit prowth in the future. Extraordinar, costs incurred in the year have a further impact on the Group results.

Our renewable energy business is now a mature and well-established sector for our Group, denerating consistent revenues. Our growth strategy in our newer filtre and housebuilding divisions have contributed to an accounting loss this year, ahead of being able to deliker growth in profits in future years.

Our Group comprises energy, property lending fibre. and housebuilding, which includes retirement itying. We have grown to be a significant presence within our mature sectors, producing 4.2% of the UK's solar energy and 2 % of the UKs onshore windlenergy. hutput. We have built a property lending business. with a book of £474m at year end which helps to support the Eoristruction and improvement of homes and commercial scaces throughout the UK The businesses in our proximal sectors lifting and nouseboliding are establishing themselfer as important iplacers in their markets and setting an bit dus expandin il farget

Ellaver the past 12 months, a steadier increase when compared with the exceptional growth of 10% for the prior year. Over the longer term, we expect the Group to return to our target annual growth. The five year average annualised share price growth is 4.83%, ahead of our target 4.20% annual growth.

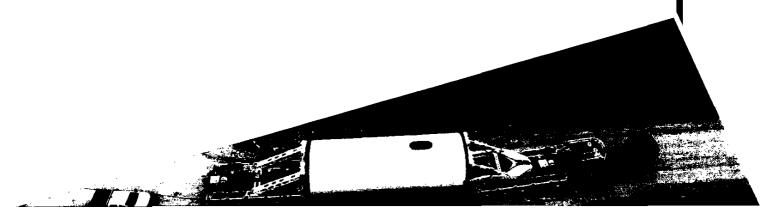

We remain a supportive employer, with an average of 1,500 full-time staff across the businesses that we own and operate, and indirect employment provided. for hundreds more people through contracts that we have in place

A reflection on our year

Our Group delivered £800m of rolonue (2022) £/12m) while growing capital deployment, with net assets increasing to £2,366m at the end of the period (2022 £2,221m restated) (ed primarily by fixed asset expenditure in our energy and fibre divisions

Our more mature sectors operated robustly and we continued to expand newer parts of the Group. As a result, our current year results reflect an EBITDA c* £82m (2022) £195m), and an accounting loss before tax of £149m (2022) £56m restated profit (as these new sectors in particular fibre, are expected to be loss-making in their early years of construction and operation, before becoming profitable in future

At the start of the period tong-term energy price forecasts and energy forward rates remained high, as the global economy continued to recover from the Covid 19 bandemic, together with seeking alternative sources of energy as a result of the conflict in Ulkrains. Alongside high inflation, these factors had increased trie value of the Groups energly assets in the prior behold and in furn, the share time of the Group.

Directors Report'

1. Energy

Approximatively 50% of the Group's net assets comprise energy generating assets such as solar energy sites and wind farms. These assets provide tong-term revenue streams, though their value can still be impacted by changes in pricing and demand. Our energy sector is intentionally diversified across a range of technologies to mitigate against less favourable conditions in a specific asset class and contribute towards steady, predictable share price growth.

We expanded our solar portfolio with further additions in Zestec, which specialises in developing commercial solar rooftop's tes in the UK. These sites are currently under construction, and we expect to retain and operate them once complete. The construction of Guardbridge, our wind farm in Poland, remains on track and on budget, and we expect it to start generating electricity by December 2023 Dulacca Wind Farm, our largescale construction project in Western Australia started generating electricity after year end and was subsequently sold in October 2023. At the beginning of the financial year in July 2022, we also completed the construction and sale of Darlington Point Solar Farm, one of the largest solar sites in Australia, with a capacity of 333MW

Our successful and well-established biomass division continues to perform well, delivering stable returns since acquisition in 2015. We added a new site at Snetterton in East Anglia in April 2021, which has performed well since acquisition. Though it suffered some months of operational downtime, following a gearbox fault, the insurance claim for replacement parts and loss of revenue was settled in full.

Construction at our Waste-to-Energy facility in Ayrshire has progressed as planned with completion expected in 2025. The facility has been in development for four years and will be capable of processing over 185,600 tonnes per annum of non-recyclable, household, commercial, and industrial.

waste which would otherwise be sent to landfill or exported. This will generate 17 MW of low carbon electricity, enough to power 30,000 homes, and it will be the first large-scale, subsidy-free waste to energy project in western Scotland.

Our 26 reserve power sites have continued to perform ahead of expectations, due to low generation from wind assets over the winter 2022/23 resulting in demand for additional generation to balance the grid

2. Lending

Our property tending business continues to be a substantial part of the Group, representing around 15% of the Group's net assets combining short, and medium-term secured loans to experienced property professionals. Our average toan book constituted over 224 loans this year to borrowers in the UK.

Our loans are written at conservative loan to value ("LTV") levels (below 70%) to protect against a fall in property prices. At the end of the period, the average LTV for the loan book was 60%. The turbulent market this year has reinforced the importance of this strategy, which has served the Group well over its 13 year history. We are naturally taking a cautious approach when assessing new lending opportunities considering the changing economic outlook.

Since inception in 2010, the Group has lent £2.49bh of property loans and has had a strong record of recovering its capital. However, the abrupt increase in interest rates in the current year has made it more difficult for some borrowers to refinance at the end of their loan term. This has contributed to a small increase in provisions and, at year end, we recorded a provision of £30m against one commercial loan. Though we acknowledge this provision feels noteworthy, for context, it amounts to around 1% of the Group's net assets and is an outlier compared to our track record. This does however serve to emphasise the importance of our experience and approach in the sector, including disciplined due

Directors Report'

ability and willingness to flex activity in this sector. during times of economic uncertaints. We will continue to adopt this approach this aghout the coming ;ear

3. Fibre

in March, we successfully densoligated our regional. fibre breadband businesses, by merging our tour fibre to the premises if ETET) businesses - Jurassic Fibre, Syvish Fibre, Giganet and AllPoints Fibre into a new business, form Fibre Trading Limited (FFTL) Given wider market consolidation and opportunities in the market lit has made economic rense to bring. together those separate businesses now rather than later. As part of this ipost year end, we undertook a restructuring exercise to realise some operating efficiencies, including a reduction in FFTI's overall headcount.

in the year we continued to invest capital inexpanding our ultrafast EFTP broadband networks. The geographic focus of our networks is the Home. Counties the South and South West of England, Yorkshire and the Midlands, however we also provide: connectivity to homes and businesses throughout the UK using networks dwined by other operators. The business is generating revenue from residential customers and small businesses who benefit from the superior connectivity affered by fibre, varsus the old copper networks

The intentional growth in our fibre givision has resulted in a short term decrease in profitability of the Group, as we invest into the infrastructure

4. Housebuilding

Our housebuilding division remains an important part of the Group, at anbroxin lately 8% of het assets, and is comprised of Elivia Homes ("Elivia"), the inducebuilding but ness the acquired last treat and Handeford Holdings Limited (FRangeford), our retrement Ling business

diligence, conservative loan to value ratios, and an 🗜 Flivia develops and market family homes in South East committer towns and clages and is perform no broadly in line with budget, despite challenging conditions across the industry. We plan to grow it in a measured way organically and via strategic acquisitions over the next five years a strategy solid fed by the acquisition of Millwood Designer Homes, which expanded Flivials loctprint to Fast Sussex and Kent I to amortion remains to deliver 750. nomes per year

> Rangeford continues to expand its portfolio with three villages fully open and additional villages under construction in Chertsey and Staplefold (near Cambridger, due to open in 2024 and 2025 respectively. We are excited by the opportunities for growth in this sector, with two further sites acquired in Dorking and East Grinsthad. The design work for these villages is well underway

Inflation and Interest rates

HM Treasury forecasts that inflation is likely to curpass the Bank of England's target until 2025. A relatively short period of high inflation such as this does not tend to have a material impact on Group operations. For example, in our energy division, the value of our renewable energy assets is determined by discounting their projected future cashfic ws over the life of the respective assets (typically 20 plus years). If the outlook for long-term inflation were to increase the impact on our share price should be positive, as increased inflation will increase the revenue each operating site would expect to make which increases their value

The lise in interest rates is seen as a return to normal, latter allong period of very low rates. The in pact of this on our business has been broadly noutral as the Group is intentionally structured such that it does not experience significant value erosion unon interest rates change. An important part of this is a policy of family out interest rate profession on the cans to the limbuo's energy assets glung us : protection from interest rate increases. This has

Directors Report'

resulted in our renewables assets' loans continuing to incur low interest costs, at a rate fixed wrien interest rates were lower.

Rising interest rates are foll more closely in our lending business and as such we continue to take a cautious approach in this sector. We can, and do, reduce the number of loans we write or after the risk profile of our loans through reducing loan to value ratios, or pausing activity in cortain parts of the market, as appropriate.

Current trading and outlook

Since the year end, the Group has continued to perform steadily from an operational perspective and in line with our expectations. Our growth targets for the Group over the medium and long-term remain unchanged, and we continue to focus on maintaining a diversified business that is capable of delivering predictable growth for shareholders.

In November 2022, the government announced the introduction of an Electricity Generator Levy (FGL), a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and applies to electricity generated from renewable, bromass, and energy from waste sources. The Group was not required to pay EGL in the period, however we do expect to pay this in the next financial year. We had already antic pated the impact on the returns generated from our energy portfolio over the next five years.

Our property lending business continues to perform strongly with a diverse loan book comprising 224 loans on average. We focus on short-term loans (our current loan average term is 20 months) which enables us to swiftly adapt to changes in outlook. We consider this is particularly important in the current economic currate.

Our recently consolidated regional fibre business, Fern Fibre Trading Limited (FFTI), continues to build out its network to accelerate full fibre delivery in the UK while also focusing on sales and marketing activity selling fibre products directly to customers. As it continues to grow and build out its infrastructure, we do not expect it to report an accounting profit in the coming three to five financial years.

We are pleased to report that in October 2023, the Group raised £217m from existing shareholders through an offer to subscribe for further shares. The tunos raised will allow the Group to grow slightly ahead of plans in certain sectors; however we do not expect this to materially change our business mix, which will continue to evolve in order to continue to target modest growth for shareholders in the years ahead.

"Our mix of business areas has developed over time, driven by the overarching importance we place on meeting the objectives of our shareholders."

Our business at a glance

What we do

Fem Tracing himted is the parent company of nearly 536 stubsidiaries (together the "Circup"). The Group operates across four key areas, energy, lending, fibre, and houseburiering which includes retrement hving. Given the past 13 years, we have built a carefully diversified group of operating businesses that are well including to deliver long term balue, and predictable growth for our phareholders.

1. Energy division

We generate power primarily from sustainable sources and self the energy produced either directly to industrial consument or to large networks. Many of our renewable energy sites qualify for government incentives, that represent an additional initiation-linked, source of income. We have also utilised our expertise in renewable energy to construct facilities for sale or ongoing operation. At year end the Group had fourteen sites under construct on

2. Lending division

We lend on a short, and medium-term socured basis to a rarge number of property professionals, and our financing enable businesses to build and improrie residential and commercial properties.

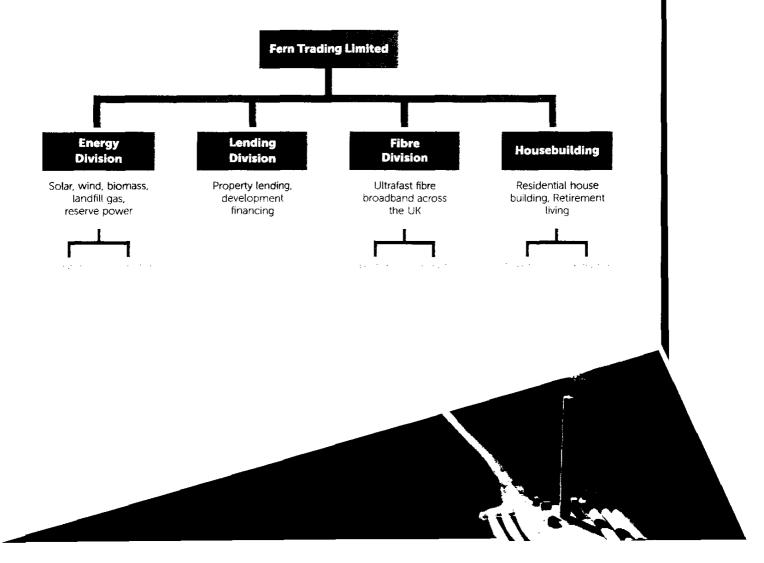

3. Fibre division

We own and operate fibre proadband networks across various areas of the Uk. We build the networks and connect them to homes and businesses to provide nuriquistomers with ultrafast fibre broadband.

4. Housebuilding division

Our residential housebuilding operation develops sites from design stage to final construction to ensure the debery of quality workmanship

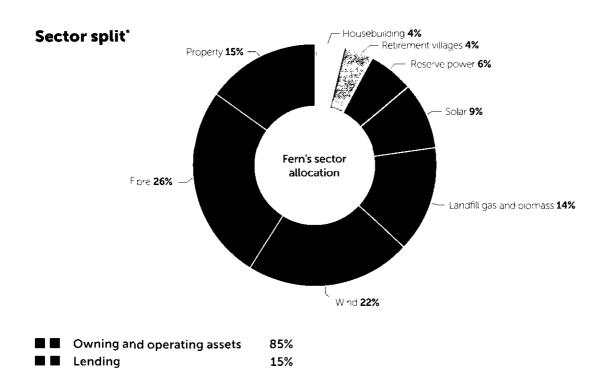

Our retriement orlages provide high quality contemporary using spaces with a friendly community at the heart of our villages.

Our business at a glance

The strength of the Group's strategy is in both its. The scale of our business is a key strength, enabling operational diversity and the diverse return profiles. I us to acquire large-scale established operations, as of these businesses. Our lending business provides 🗼 well as the opportunity to enter new sectors with flex bility, and strong returns over the short term, while our energy fibre, housebuilding and retirement businesses with comprehensive business plans and living divisions offer visibility and stability of returns is strong management teams. This chables us to over the longer term

continue to diversify our business without compromising the quality of our operations

Secret split is given by you as represented on the company balance sheet of Forn Inading Limited.

Our business at a glance

Making a difference

We are proud to operate a Group that makes a positive contribution to society across the UK, generating renewable energy, providing quality retirement living and new homes, and delivering high speed broadband to underserved areas of the country. This is aligned to our environmental, social, and governance ("ESG") policy, which is drafted and approved by the Board of Directors.

Energy

We own 229 operational energy sites, producing 3,069GWh a year. That is enough energy to power over a million homes.

Our combination of technologies across solar, wind, reserve power, piomass and landfill gas complement each other well, helping the UK to meet its energy targets irrespective of the weather

The Fern Community Fund is a social enterprise run by the Group, which works to distribute community funds generated from our wind farms. This year, the Fern Community Fund has committed £1.4m to local community groups, supported 22 local university students through our Student Scholarship –und and provided a winter fuel subsidy to 740 residents who are local to the Group's sites.

Lending

The 191 new loans we advanced ouring the year have helped to fund the construction of much needed residential properties, as well as commercial property creating valuable new employment

Fibre

Within this division we are building full fibre connectivity to hundreds of thousands of properties in small towns and villages that do not currently have access to internet connectivity, ensuring they are fit for modern ways of working and communicating

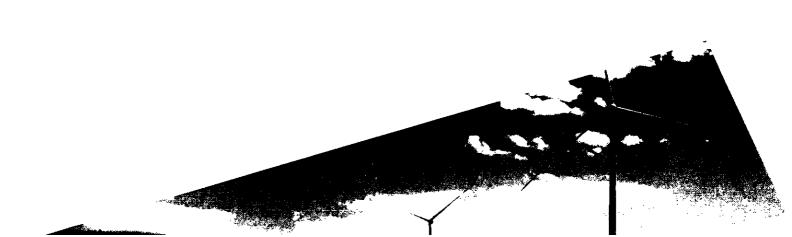

In Vorboss, we are building a dedicated high-speed fibre network for businesses in London, providing the digital infrastructure that the city needs, and removing barrawidth constraints to ensure the economy remains competitive.

Housebuilding

Our housebuilding division sources over 74% of the timber utilised for frames in a sustainable way and installs solar panels or air source heat pumps in all properties, leading the way in this sector and helping reduce carbon emissions.

Our retirement villages provide high-quality, contemporary living spaces, with close to 500 homes currently in place. We have nearly 400 further units in various stages of development, and our secured pipeline sites offer potential for another 300 plus units.

A friendly community is a key differentiator for our retirement villages, which is why our developments provide central facilities and a hub of social activity for our residents.

Our strategy in focus

Our businesses

Energy

Through our energy division, the Group owns and operates energ, sites which supply gas and electricity into the network, as well, as constructing renewable cherovistes for future sale. Of the 229 energy sites that twe own and operate, 703 provide renewable energy, contributing to the Group's position as one of the largest producers of renewable energy from commercial scale solar sites in the UK. Renewable energy sites are typically expected to generate stable profits for many years, due to low operating costs and revenues being linked to inflation. As such owning and operating these pusinesses is attractive to the Group because of their potential to deliver predictable profits over the long term.

Renewable lenergy sites generate policer from sustainable sources and seil energy produced either directly to large industrial consumers or to the network. Many of our renewable energy sites also qualify for government incentives which mount a portion of the generated energy benefits from rates that are flocked in for a specified period once a qualifying site is operational and accreditation has been granted. This has reduced some of the impact of the volatility in long term energy price forecasts. As new sites built in the UK do not qualify for the same historic government incentives we are sceing more interest in the market for sites like the ones we own and operate.

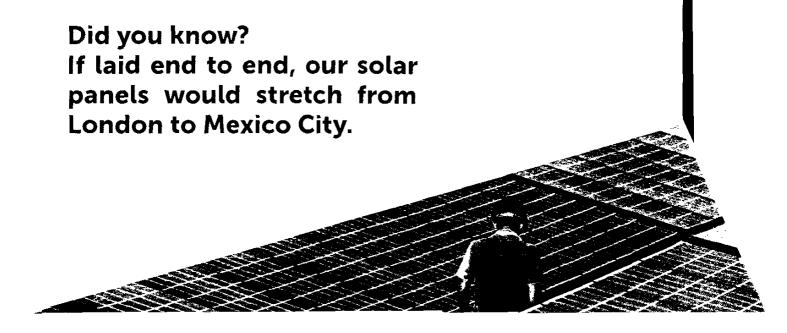

Owning and operating energy sites is a core part of our strategy and currently makes up approximately 50% of the Group's not assets. This part of the Group

casi generated high returns this year due to market conditions but crucially it has the potential to are like stable returns over the long term. This combination is key to our strategy to balance risk and return across the range of Croup activities to generate target predictable returns for shareholders.

"Our energy sites generated 3,069 GWh of power."

Due to the high-quality energy sites that we own live are lable to secure long-term financing from mainstream banks at competitive rates to enhance our returns, which helps us to deliver the level of returns our shareholders expect.

While our renewable energy business started its afe in the solar energy sector the Group has built expertise across other adjacent technologies including onshore wind, biomass and landful gas, supported by reserve power plants which provide backup power to the National Grid. The Group therefore benefits from diversification within this part of its business, since weaker conditions for energy production from one technology often result in stronger production elsewhere. The Group aisorgains significant benefit from its scale in this sector as our business is spread across 229 sites vasily reducing the risk to Group profitability if one site suffers an operational disruption.

Our strategy in focus

in addition to our UK sites, the Group is developing sites overseas, in jurisdictions that we understand well. These present an attractive opportunity as they build on our sector expertise in countries at an earlier stage of renewable development. Currently we operate wind farms in Ireland and France and solar sites in France, in addition to a wind farm under construction in Poland.

During the year we acquired the rights to multiple commercial rooftop sites through our commercial rooftop solar developer, Zested on which we will build solar panels to generate electricity for the tenants of the building. Our sites under construction in Australia came to fruition this year, with Darlington Point, a large-scale solar site sold at the start of the year, and Dulacca Wind Farm achieving commercial operation, shortly, after year, end, and being subsequently sold in October 2023.

Lending

Lending continues to be a core part of our business and has provided the Group with a profitable and cash generative sector over the past 13 years. This well-established part of the Group mainly consists of property, lending, which provides short-term financing to experienced professional property developers, buy-to-let landlords seeking bridging finance and development financing, which provides short- and medium-term financing to companies

A key benefit of the scale of the Group and of the business that we have built up in this sector is our ability to mitigate risk through having a large number of loans spread across relatively small projects to individual borrowers. We preactively manage counterparty risks through unpertaking careful borrower due diligence taking security over assets typically on a first charge basis and maintaining conservative toan to-value ratios. Not all roans will perform as expected and these measures help to minimise the impact of performance issues on an individual loan. This is further mitigated through the value that we tend to individual porrowers, relative to our total loan book, which is spread on average across 224 loans.

Fibre

Our fibre division includes four strategic areas – fibre to the premise ("FTTP"), enterprise fibre, software and mobile

Through our ETTP business, we are building new physical fibre networks for communities in the UK and have completed new fibre infrastructure in underserved parts of Devon. Somerset Dorset, Wiltshire, Hamoshire, Worcestershire, Yorkshire and the Home Counties, spanning hundreds of thousands of properties.

Lending continues to be an important part of our business and has provided the Group with a profitable and cash generative sector over the past thirteen years.

Our strategy in focus

Building a new network involves conflecting large : data centres and telephone exchanges in the UK. with homes and businesses, effectively replacing the scopper wires that were laid in the first half of the 20th century. To date: Jurassic, Swish and Ciganet. have operated a vertically integrated model where they own the fibre, alongside the end customer relationship as the internet service provider (ISE). Following the merger of our FILTP division, FFT, will follow the wholesale strategy of AllPoints Fibre, owning the fibre infrastructure and onboarding multiple ISPs. We will continue to develop our own. ISP service and brand (Cuckoo), which will selfconnectivity on our consolidated network to endcustomers alongside other (SPs) in an increasingly competitive market, a wholesale strategy increases. the opportunity to generate revenue from the network as multiple counterparties can self access to it, rather than just one ISE (as per the vertically integrated model).

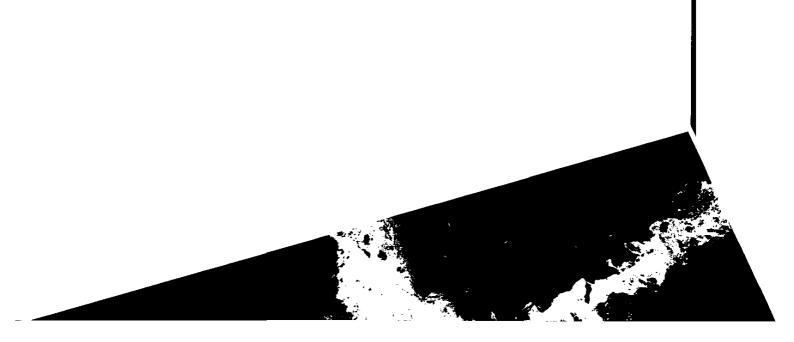

The merger of the FTTF companies took place in March, with the final three months of the year focused on origing the operations of the four companies into one, increasing officiencies and economies of scale. Separately the companies achieved a great deal each building local networks oriboarding customers and delivering outstanding customer service. The benefits of bringing them together and launching a single wholesale offering across their networks will create greater opportunity for the business and potential customers in future

The UR remains behind other European nations when it comes to neuseholds accessing fibre, and our ETTP pusiness is now well positioned to be a key player in bringing ultrafast connectivity to communities around the UK.

Through Vorboss, we are building an enterprise network in London to supply business to pushess (B2B') enterprise connectivity to business customers. Vorboss has installed over 500km of time optic cables in London since 2020 and has spent the last year launching its products to large businesses including market leading 10Gbps and 100Gbps products.

Our revolutionary software business, virtificus building the orchestration systems that the next generation of flore proadband companies need to run their networks of ciently. In doing so, they are both supporting our own FTTP business machieving its strategic goals and also enabling external customers to eliminate agady constraints with autonomous connectivity and workflow management services.

Mobile is our newest area of strategic development. During the year Vitrifi Digital expanded into the mobile network market, becoming a Mobile Virtual Network Aggregator ("MVNA"). This will enable us to saunch an innovative mobile platform to Eucliness and consumer facing companies to operate their own Mobile Virtual Network Operations in the EK.

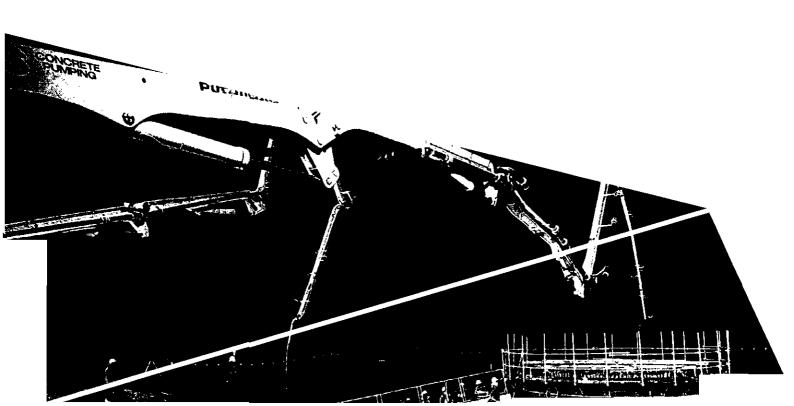

Our strategy in focus

Housebuilding

Our residential building business, Elivia, is a fullservice housebuilder, which acquires land and i retirement living business. Rangeford, owns and develops sites from design stage to final construction. to ensure the delivery of quality workmanship. Elivia. strives to ocliver high quality and design-led aspirational homes, comprising a mix of openmarket and affordable homes, with over 25 sites. under construction. Et via is headquartered near if the future. Beaconsfield with a geographical footprint in Buckinghamshire, Berkshire, Hampshire, Surrey and West Sussex In January 2023, we acquired Millwood Designer Homes which has allowed expansion into the adjacent regions of Kent and East Sussex. complementing Elivia's existing locations.

As part of our housebuilding division, the Group operates in the retirement living sector. Our operates three retirement villages in Wiltshire, North Yorkshire and Gloucesfershire, is currently constructing two sites for future operations, and has exchanged on two further sites, spread across the country, with the intention of developing these in

Directors

The experienced Board of Directors for the Fern Group are responsible for determining the strategy of the business and for accounting for the Company's business activities to shareholders. They have a set of complementary commercial, energy sector-related and strategic skills.

Paul Latham

Eautilities previously the Chief Executive of Form. He has had various general management and internal consulting roles across a number of sectors and brings with firm a wealth of industry and business experience, including building key elements of the infrastructure for Capital One Bank (Europe) pic as it grow from a start-up business to a company with 2,000 employers. Paul has worked at Octopus Investments since 2005.

Keith Willey

Keith is an associate professor of strategy and entrepreneurship at London Business School. He also holds various non-executive directorships and advisory roles at high growth and more mature cumpanies. In his role as non-executive chairman lie is responsible for the effective operation of the Board, as well as its governance. He brings to the Fern business independent commercial experience gained from his time in anadomia, private county investment, consulting and various hands-on operational roles.

Peter Barlow

Potor has over 30 years' experience in international linancing of infrastructure and energy. As a senior executive for international, Power, Peter was responsible for arranging over \$12bh of project and corporate funding as well as banking relationships and treasury activities. He has spent over 20 years working internationally for HSBC, Bank of America and Normural financing acquisitions and greenfield projects in the energy and infrastructure sectors. His combination of Board-level financing and energy experience over numerous energy sub-sectors, and his all-round knowledge of all the sectors in which Fern operates, adds significant value to the operation of the Board as well as its strategy formation and displacement.

Sarah Grant

Sarah has worked at Octopus in Jestmonts since 2013, she has a particular focus on dept raiting and relationships with banks and other lenders. Anion she coordinates across the Octopus group. She also chairs the Octopus investments investment Octominities and codinates of Octopus AIF Management. It is Octopus Investments is alkey supplied of resource and expertine to Ferni Sarah's dual role ensures that the relationship between Octopius and Ferni works well and always operates in the best interests of Fernis shareholders. She has over 25 years, experience and previously help roles at Societe Generale and Pothsphild.

Tim Arthur

Times a chartered accountant with more than 25 years' international experience as a finance idirector of both public and on arc companies. Initially he worked for Frice Waternowsein Bim indhamland Chicago. More recently he mas Chief Financia: Officer of lightsource Penewable Energy Etd. a global leader in the funding development and originary upgration of solar chorovoitald projects. Time brings extensive financial and auxiliantancy knowledge to the abard active as an understanding of dynamic technology suspensor gained from his eyes, tive positions.

The strategic report was approved by the Board of Directors on 20 December 2023 and signed on its behalf by

PS Latham

Director

20 December 2023

Corporate governance

Section 172 (1) statement

The Board consider that they have adhered to the requirements of section 172 of the Companies Act 2006 (the 'Act'), and have, in good faith lacted in a way that would be most likely to promote the success of the Group for the benefit of its members as a whole (having regard to all stakeholders and matters set out in section 172(1)(a-f) of the Act) in the decisions taken during the year ended 30 June 2023.

In the performance of its outy to premote the success of the Group, the Board has regard to a number of matters, including the likely consequence of any decisions in the long-term, and listens to the views of the Group's key stakeholders to build trust and ensure it fully understands the potential impacts of the decisions it makes. The Board fulfils these duties partly by delegation to committees and the Boards of subsidiary undertakings who operate within a corporate governance framework across the Group

At every Board meeting a review of health and safety across the group, financial and operational performance, as well as legal and regulatory compliance, is undertaken. The Board also review other areas over the course of the financial year including the Group's business strategy, key risks, stakeholder-related matters, diversity and inclusivity, environmental matters, corporate responsibility, and governance, compliance and legal matters.

Principal decisions

We define principal decisions taken by the Board as those decisions that are of a strategic nature and that are significant to any of our key stakeholder groups. The Board ochsider that the following are examples of principal decisions it made in the year ended 30 June 2023.

 Evaluating and deciding to create a new strategic area of development by expanding into the mobile network market and becoming a Mobile Virtual Network Aggregator (MVNA). The Board considered this opportunity as well aligned and complementary to the existing fibre broadband operations, which would help to deliver long-term value.

- The Group decided to further expand its footbrint in the housebuilding sector, by acquiring Millwood Designer Homes, a company with values similar of those of Flivia and the Group Millwood is considered an award-winning regional homebuilder based in Kent which built around 100 homes a year. This follows the decision made in May 2022 to diversify the Group's asset base and entering into this new sector has been well thought out with long-term growth in mind. The Board considered the opportunity and frow it aligned with our objectives to make a positive contribution to the community and environment, by building new homes to address the UK's shortage of properties.
- The Board decided to commence a group reorganisation which involved merging the four FTTP business into one new business, Fern Fibre Trading Limited FFTL will focus on two separate strategies, while working closely together (1) wholesale strategy, owning the fibre infrastructure and onboarding multiple ISPs in AllPoints Fibre Networks and (2) developing our own ISP service and brand, through Cuckoo Limited. The Board evaluated the possible impact on stakeholders including shareholders and observed that the new structure would not change how the Board and Group engage with shareholders or their view of the Group, but would be beneficial in providing improved governance and oversight of the sector as well as enhancing the future prospects

Corporate governance

Business strategy

Our pusiness strategy is set out on pages 12 to 15 of the Strategic Report Management prepares a detailed Group budget which is approved by the Board on an annual basis and forms the basis for the Group's resource planning and deployment. decisions. In making decisions concerning the business plan, the Board has regard first and foremost to its strategic focus, but also to other matters such as the interests of its various. stakeholders and the long-term impact of its actions. on the Group's future and reputation.

Shareholders

Shareholder relations and generating shareholder value is a key consideration when the Board is making strategic decisions. The prime medium by which the Group communicates with shareholders. is through the annual report and financial statements. which aim to provide shareholders with a fullunderstanding of the Group's activities and its results. This information is published on our website at

www.ferntrading.com

Employees

The Group's employees are fundamental to the overall success of the business. The Directors fulfitheir duty to amployees by entrusting eversight to subsidiary Boards

The directors of the subsidiary undertakings managethe day to day decision making, engagement and communications with employees and ensure that people are treated fairly and are valued with respect. to pay, benefit and conditions. We fully realise that our employees wish to be informed and consulted. on matters affecting their work and to be involved in problem-solving affecting their claim areas of interest. and responsibility. The Group is filmly committed to alphoroup of good communication at all levels and the aim to establish a climate which constantly encourages the open flow of information and ideas. Precently this includes in ontrly team brickings at all local local and the publication of month, key performance indicators covering output loperating costs, and health and safety

The health and safety of our employees in the workplace is a continual focus for the Group, given ts broad operational business. The Directors review health and safet, reporting at each board meeting to ensure appropriate policies and procedures are in place to protect the health and safety of our employees and contractors. Where there are potential deficiencies or issues, these are followed up and resolved on a timely basis, with the Board having oversight of the actions taken.

The Group outsources activities and management of certain operational activities to external suppliers Where activities are outsourced the Board ensures that they are managed by reputable suppliers who meet all the relevant industry and regulatory commitments as well as treating employees fairly Expected standards are documented in all service contracts and adherence to these are continually monitored by Board through their service agreement with Octobus Investments, imited

Suppliers and customers

The Group acts in a fair manner with all suppliers and customers and seeks to maintain strong business. relationships with them. This is achieved by all contracts being negotiated through a fair and transparent tender process which includes assessing the impact on the long-term objectives of the Group. We review our payment processing times. against contracts every six months to ensure suppliers are paid promptly and this information for the company is available on the www.gov.uk website

The Group ensures it acts fairly and in a transparent martner to a customers across all divisions and services, and actively engages to resolve any disputes or defaults. The Board class y monitors customer metrics and engages with the management ream to understand the issues if business cerformance does not moet dustomars exceptations

Corporate governance

The Board considers Octopus Investments Limited to be a key business partner and supplier with responsibility for the provision of operational oversight, financial administration and company secretarial services

Community and environment

Ine provision and operation of sustainable infrastructure is at the centre of the Group's strategic goals. Through its business activities the Group seeks to make a positive contribution to the community, environment and economy. Our renewable energy business is helping the UK meet its renewable energy targets, our fibre network will give people in rural communities access to high-speed broadband, and our retirement villages create communities of people in their tater years, reducing the strain on our healthcare services. We are also building new homes to address the UK's shortage of properties.

Business conduct

As Directors our intention is to behave responsibly, ensuring imanagement operate the business with integrity and in accordance with the high standards of conduct and governance expected of a business such as ours. Our intention through our business strategy foutlined on pages 12 to 15 is to operate in sectors and work with other businesses that share our values.

Business ethics and governance

The Board is responsible for ensuring that the activities of the Group and its various businesses are conducted in compliance with the law and applicable governance, and regulatory regimes, and neatherence with prevailing best practice for the relevant industry. This includes reviewing internal controls, ensuring that there is an appropriate balance of skills and experience represented on the Board, and ensuring that the financial statements give a true and fair view of the state of affairs of the Group Further detail can be found in the statement of directors responsibilities on page 38. In the year to 30. June 2023, no areas of concern have been flagged in this regard.

Employee, human rights, social and community issues, environment policy and anti-corruption and bribery matters

The Board's policy on employee, human rights, social and community issues, environment policy and anti-corruption and bribery matters is discussed in the Directors' Report on page 38. The Board actively promotes a corporate culture that is based on ethical values and behaviours.

Task force on Climate-related Financial Disclosures ("TCFD")

In December 2015, the TCFD vias established by the financial. Stability Board ("FSB") to develop recommendations and encourage companies to take account of now they dentity and manage climate-related issues. The TCFD requires companies to produce climate related disclosures across four key pillars. Governance, Strategy, Risk Management and Metrics & Targets. The TCFD has noted eleven key recommendations across these pillars that enable companies to provide information to shareholders and other stakeholders.

The Group's operations play an important role in the UK's long-term transition to a net zero economy, as renewable energy and the development of lower-carbon alternatives are critical to a move away from fossil fuels. Capital deployment in renewable energy assets, such as our 80 ground-mounted solar sites, enables our business and shareholders to generate returns from this transition, whilst having an inherently positive impact on climate change and the environment.

Of the Group's divisions, the Board considers the energy division to be most at risk to climate change and conversely most able to take advantage of the opportunities presented by a transition to a lower-carbon economy. Whilst the Board considers the impact of climate related issues across all our energy tending, fibre and housebuilding (including retirement living) divisions, the disclosures set out below are mainly with reference to the Group's energy subsidiaries.

Statement of Compliance

The Board is bleased to confirm that it supports the TCFD's laims and objectives and has included confate-related financial biscosures in line with the four key bitars and eleven recommendations. In addition, to mitigate the financial impact of sustainability lisks wellapply Sustainability Accounting

Standards Board ("SASB") guidance on materiality assessing whether, and to what extent, custainability issues (including climate risks) could moact performance.

Governance

Disclose the organisation's governance around climate-related risks and opportunities

at Describe the board's oversight of climateire ated risks and opportunities

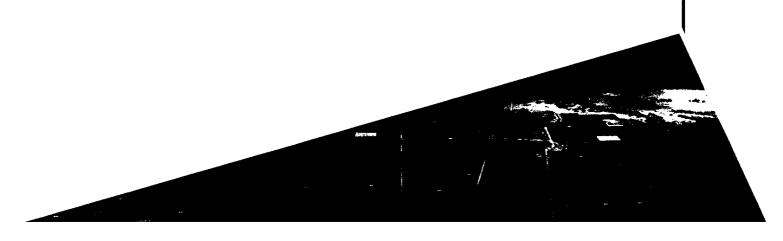

Climate-related risks and deportunities form part of the Board's strategy. A key aspect of the Group's business model, determined by the Board and adhered to by divisional management teams, is to deploy capital in renewable energy assets to benefit from the wider transition to a lower-carbon economy.

The Board is responsible for monitoring climate-related government policy and physical climate changes to inform the deployment strategy and the materiality of risks faced by the Group's subsidiary companies. The Group Board monitors strategic lisks and opportunities, financial performance and any adverse or positive impacts on revenues or costs that could result from climate related risks and opportunities.

On an annual basis, the Group Board review and approve an ESG Policy document that was first adopted in September 2020, with the latest version approved in April 2023. The Board therefore ensures that each new opportunity, and existing divisions on an en going basis, adheres to the Group's ESG policy.

b) Describe irranagements role in assessing and managing climate-related risks and opportunities.

At a company level, transmore and physical risks and opportunities, are considered throughout

Task force on Climate-related Financial Disclosures ("TCFD")

the acquisition, construction and due diligence process right through to the on-going management. The Board have reviewed and approved ESG chterial specific to the Group's business that are considered by commercial and management teams, including those operating in the fibre and housebuilding sectors. The day to-day management and assessment of climate-related risks and opportunities is therefore undertaken by divisional management teams and reported to the Board where necessary

All of the above ensures the Board's oversight and management of climate-related risks and opportunities includes functions established to provide good governance over the Group's divisions. This enables the Board and subsidiary companies to all be aligned on approach to climate related risks and opportunities.

Strategy

Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy and financial planning where such information is material.

 a) Describe the climate-related risks and opportunities the organ sation has identified over the short, medium and long-term

Given the Group's long-term experience in its operating sectors and strong links to its suppliers, particularly in the energy and housebuilding sectors, the Group is well positioned to overcome risks and take advantage or opportunities arising from climate change. Climate related risks and opportunities are also at the core of the Group's strategy and are discussed right the way through the business, from Board level to the individual subsidiary companies within the Group's long term business, strategy and financial planning.

The Group's fibre division will remain in growth phase for the next three to five years, and management teams consider how to manage emissions and risks while achieving this rapid growth Fibre has a positive long term impact on the environment as once the infrastructure is in place and operating, it is seen as a low carbon technology. A well-constructed and operated fibre connection facilitates a reduction in carbon emissions in the long-term due to the potential for home working and smart cities.

In the Group's housebuilding division, one major risk is ensuring short and long-term construction processes are managed in line with potentia, exposure to climate risks, such as flooding. The Group aims to mitigate this risk, as all developments within the neusebuilding sector (including retirement living) have technical flood risk assessments carried out before land is purchased.

The Group is also subject to regulatory risk as all homes and developments must satisfy environmental planning conditions, which may change as regulations are introduced to support the UK's transition to net zero. This presents the Group with the opportunity to go above and beyond applicable regulatory standards for energy efficiency of new build homes and become a leader in this regard. It is important for the housebuilding division to satisfy all environmental planning conditions and seek financially viable opportunities to exceed regulatory standards. The Group looks to develop strategies around progressive adoption of Modern Methods of Construction ("MMC") including timber frames, solar panels, air source heat puirips and electric vehicle charging points where appropriate. Where possible, the Group moves operational assets onto renewable energy

Task force on Climate-related Financial Disclosures ("TCFD")

tariffs and carefully chooses suppliers to reduce the impact of climate-related risks.

Within the energy division, the Group is in a strong position to take advantage of apportunities and mitigate risks that arise from the transition to a net izero economy. The main short-term risk arises from competition as competitors could identify gaps as they seek to riepley more capital into renewable energies. The Group's successful track record helps it soize opportunities derived from the need to tackle climate change and continue to acquire and build new large-scale impact projects, such as our Waste-to-Energy or the expansion into commercial solar reoctops

The Group also faces risks from increased variability in weather partoins and potentially more extreme weather creating difficulty to accurately brugget production and financial performance. The Group constantly assesses the risks and opportunities presented by variable weather as part of origing due diligence and performance management.

Over the longer torm, regulatory changes could impact the Group and could lead to changes in government incentives for constructing and operating renewable energy assets. The Group could be more exposed to votatile power prices. as renewable energy becomes an increasingly sizeable proportion of total energy produced by the UK market. To mitigate this risk, the Group. enters into short- and long term contracts which fix the income for all, or a portion of the energy. generated by a site. Long-term government backed agreements are also in place louch as the Renewable Obligation Certification (PDC) scheme. This aligns with the Group's strategy. of continuing to gove op predictable i practom. revenue streams providing revillence against ac at leipticing changed in the Ukleherg, market 📑 As new technologies at renewable energy or housebuilding sites are developed and become more reliable, apportunities may arise for the Group to integrate these as the technologies mature and become cheaper Trowever, there is a risk that deployment into newer technologies could underperform compared to the business cases. Whitst representing a risk, it is expected that the negative impact would be immaterial to the Choup's operations, due to diversification.

b) Describe the impact of cumate related risks and opportunities on the organisation's business strategy and financial planning.

Financial projections including those that aid utilised for the preparation of the financial statements and included for hudget preparations. are based on financial microels. Each impuel, such as company valuations or business plans, will contain different underlying assumptions on key inputs such as power price curves, operating and maintenance costs or future revenues which are all impacted by transitioning to a lower carbon economy. The most material impact on the valuation of renewable energy assets is usually wholesale energy prices and operational performance. The Octobus Investments Valuation Committee is responsible for reviewing these assumptions and the sensitivities. associated and is therefore considered as part of the valuation process.

The above could impact financial returns positively fittle shift towards renewable energy and sustainable homes is successful or negatively if the transition is slow. Extreme weather such as stormin flooding or fires could cause pamage at the Groups wind and solar farms and housebuilding sites, impacting any operating and maintenance costs, write offs or impairments and longer-term buogets. Constructing our

Task force on Climate-related Financial Disclosures ("TCFD")

assets to the highest quality standard and going above, and beyond the relevant regulatory standards by adopting MMCs will impact the Group's operating and maintenance costs further the Group's cost projections are captured at point of acquisition, and models are updated regularly with diversification of suppliers and appropriate levels of insurance obtained. The Group's biomass plants operate a diversified supply chain of feedstocks and strategic stores to ensure sufficient fuel stores. In case of failed fuel supply from extreme weather conditions, there is contractual recourse obligations between the site and suppliers for protection against ioss of revenues.

Climate-related risks also have an impact on accounting estimates and judgements within the financial statements. The Group's balance sheet includes a decommissioning provision relating to the future obligation to return land on which there are operational biomass wind and solar farms to their original condition. This accounting estimate is determined to a significant degree by the future dismantling and restoration costs, as well as the timing of the dismantlement, all of which will be impacted by physical climate risks and raw materials required for restoration. The Group engages with a third party to perform the assessment of costs to be incurred, including an assessment of future climate risks.

 Describe the resilience of the organisation's strategy taking into consideration different future climate scenarios Including a 2°C or lower scenario

The Group benefits from a quicker fransition to a lower-carbon economy, such as in a 2°C climate pathway (i.e. limiting global temperature increase to well below 2°C) whilst taking the steps to

ensure we remain resilient to the risks associated with scenarios such as a 4°C pathway.

Under a 15°C scenario, the world will experience a significant shift away from traditional fossil fuels towards renewable energy sources as countries and businesses alike implement strong decarbonisation plans to reach net zero. Delivery on these ambitions requires a significant increase in the pace of capital deployment into renewable energy, all of which leads to a growth in the Group's acquisition opportunities.

The main risk from a beneficial transition to renewable energies is from competition and the potential for price cannibalisation. The Group's strategy is resilient to this as they focus on being leaders in the market and seek firstmover advantages before any form of price erosion can take place. Increasing demand for the electrification of industries will provide vast deployment opportunities for renewable assets with rising demand supporting the power price for electricity, mitigating price cannibalisation. The Group's housebuilding sector could also benefit from such a transition by facing lower costs on installation of solar panels or heat pumps as technologies advance and become cheaper to access.

Under a 4°C scenario, it is assumed that the transition to a lower-carbon economy has been slower and the incentives to construct and operate renewables have not been forthcoming. There is also the increased physical risk of more extreme, weather delaying the introduction and operation of renewable assets. Whilst this could impact the Group's revenue potential, this would discourage competition and the Group would be well placed to take advantage of any opportunity, that arose. The Group's strategy

Task force on Climate-related Financial Disclosures ("TCFD")

is further resilient as the unpredictability of E or Describe the organisations process for managing weather is mitigated through diversification of terminingles and location of sites. The Group's increased deployment into the fibre, lending and housebuilding sectors is just one of the methods. the Group is using to mitigate possible impacts. of relaing on a poorly supported renewable energy sector and lower carbon transition that would occur in a 4% scenario

When comparing the two scenarios, the Group is set to benefit more from a 2°C scenario than a 4°C scenario pathway. The Board believes the business strategy is resilient and flexible to either scenario enabling the Group to continue to provide returns which contributing to the transition to a lower-carbon economy.

Risk Management

Disclose how the organisation identifies, assesses, and manages climate-related risks.

a). Describe the organisations process to rigentifying. and assessing climate-related risks

Climate-related risks are considered by management teams at both a Croup and entity level with the specific of mate-related risks largely identified, assessed and managed within the deployment process

The Group takes responsibility for understanding and assessing each of its group companies against a consistent framework which includes climate related risks. In our energy sector, to identify climate-related risks in a subsidiary, mianagement feamis use SASB tools as part of ongoing due disgence, such as ThinkHazard and/or Climate Scale ton. Pele anti-climaterelated risks are nonsigered and identified shead. of capital deployment for help opportunities.

clumate related risks.

At a divisional level transition and physical tisks are considered throughout the acquisition process. Climate related hisks are managed by incorporating questions into an ESG matrix to prompt additional due diligence on assets. requiring the review of natural hazards in the region the asset is located and any mitigation strategies can then be determined.

c). Describe how processes for identifying, assessing and managing climate-related risks are integrated. into the organisations overall risk management

Where materal risks have been identified, the Group implements an appropriate strategy to address the ones highlighted by the above processes. Strategies include diversification of the Group's operations in terms of assets and geography, appropriate levels of insurance, and seeking different opportunities in sustainability through noniebuilders and diversified supply chains

Task force on Climate-related Financial Disclosures ("TCFD")

Metrics & Targets

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

 a) Disclose the metrics used by the organisation to assess climate related risks and opportunities in line with its strategy and risk management process

As mentioned under the Risk Management pillar, management teams assess the relevant climate-related risks and opportunities of potential acculisations in relation to set criteria. The ESG Risk Matrix used for our energy assets has a total score of 15, with a score of 9 or more required to indicate compliance with ESG policy requirements.

b) Disclose scope 1, scope 2 and if appropriate scope 3 greenhouse gas (GHG) emissions and the related risks.

The Group's location-based scope 1, 2 and 3 emissions are disclosed in the table below. In accordance with SECR, the Group's scope 3 emissions include only those relating to business travel.

Throughout the year, we have continued to deploy capital in expanding the fibre division resulting in an increase in emissions as this is a function of growth and headcount increase. This is highlighted by the Group's Scope 2 emissions rising by 5% in EY23, caused by increased energy consumption, despite the overal, emissions.

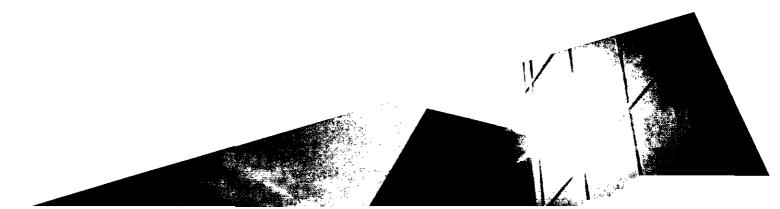

reduction across the business. While our fibre companies are focused on the end goal of building a network, the journey along the way is just as important.

The increase in emissions from our Fibre division has been fully offset by reductions in emissions from our reserve power sites, which account for 90% of reported emissions. Our 26 reserve power sites provide vital back-up power to the National Grid in times of peak demand, and emissions are expected to vary year on year, due to fluctuations in the energy generation required to balance the grid and supplement baseload power. We have thus seen a 5.2% reduction in emissions from the prior year in our reserve power sites alone, a function of the sites being called upon with less frequency.

The other primary or ver of the Group's emissions are our biomass plants which account for a further 9% of the remaining emissions. Our biomass plants use a mix of straw, waste wood chips and other fuels of natural origins, which also have the capacity to regenerate to produce electricity.

The Group has therefore seen a headline reduction in tonnes of CO2 cmitted in FY23 compared to FY22 of 5.8%, primarily driven by the lower use of fuel in the reserve power and biomass sites that the Group owns and operates, as described above, only slightly offset by increases in Fibre emissions.

	FY23	FY22

Quality of data provided

The Group appointed Minimum, who arc carbon accounting experts, to independently calculate its. Greenhouse. Gas. ("GHG") emissions in accordance, with the UK Government's Environmental Reporting Guidelines, including Sticamined. Energy, and Carbon Reporting Guidance. The IGHG emissions have been assessed following the ISO-14064 2018 standard and have used the 2022 emission conversion factors, bublished by the Department for Business Energy 8 Industrial Strategy (BEIS).

The emissions were categorised into location based Scope 1, 2 and 3 emissions in alignment with the World Resources, institute's 'Greenhouse Gas' Protocol. A Corporate Accounting and Peporting Standard, guidelines with the below definitions.

- Scope 1: All direct GHG emissions by the Group from sources under their control (cig burning fuel)
- Scope 2 Indirect GHG emissions from where the energy the Group purchases and uses is produced to gli when igenerating electricity used in the buildings).
- Scope 3: Althindirect chilispins not covered by scape 2 that occur up and down the value chain lieig from business travel ichnocyee committing, use of sord products, distribution.

Minimum used a survey based appreach to collect data allowing subsidiarly companies to submit total values for different activities or detailed consumption figures. Wherever possible primary data was collected be it kWhs of electricity consumed, m² of natural gas burnt and kilometres travelled by different modes for scope 3 emissions. We are pleased to report that of the data collected for the ECFD and SECR disclosures. 99% is based on actual figures submitted by the subsidiarly companies.

 d) Describe the targets used by the organisation to manage climate-related risks and opportunities and performance against targets

The Group, through the doveropment and operation of primarily renewable energy assets innerently contributes to the UK ar hiering its not zero target and helps drive the transition away from fessil fuels. Although the majority of the Groups energy generating assets such as wind and solar, are low-carbon by nature other Group divisions are more carbon intensite and drive higher emissions. For instance, the operation of the Group's reserve power plants or the construction of our fibre, home and energy assets. Where possible, the Group moves operational assets onto renewable tar ffor and seeks to partner with suppliers and contractor, that are like-ininged in their climate ambitions.

Group finance review

Review of financial statements

The purpose of this report is to provide additional explanatory information on the financial statements in measuring our performance, the financial measures that we use include those that have been derived from our reported results in order to eliminate factors that distort year-on year comparisons. These are considered non-GAAP financial measures.

A reconculation of these to the financial results can be found in rigge 28 of the notes to the financial statements

The financial statements show assets at amortised cost, as such they do not reflect the future value that we expect to derive from these businesses. To that extent accounting performance may differ materially from the share price and may not reflect changes in the full market value of assets or businesses owned by the Group

There were various changes to the operational assets during the year including the sale of Darlington Point, a large solar site in Australia, and Etiva expanding their south castern footprint with the acquisition of Millwood Designer Homes In Maion, our FTTP businesses were successfully consolidated into one new business focusing on wholesate strategy and our own ISP brand. Subsequent to year end, Dulacca, a large, wind farm in Western Australia, became operational following a two year construction process, and was sold for a profit of £22m in October 20124.

To support continued expansion, we built up cash reserves at year end of £157m, which serve to fund the operational needs of our divisions.

Financial performance

The Group has reported a loss before tax of £149m recognised against for the year ended 30 June 2022, which is a fall from Additionally, there are two profit of £59m (restated) in the prior year. This is driven costs included in the fin not expected to reoccu continue to grow our assets and operational base, as decreased by 58% to £82m (2022 £195m), which is find the find the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is finding the finding promises businesses, and decreased by 58% to £82m (2022 £195m), which is subsequent to year end.

divisions particularly fibre, and a number of provisions recognised against specific property loans. Additionally, there are two instances of extraordinary costs included in the financial statements, which are not expected to reoccur. (1) restructuring costs of £13m associated with the merger of fibre-to-the-premises businesses, and (2) impairments costs of £22m, associated with trading assets which were sold subsequent to year end.

Tharmings helbire interest, tax, depreciation, and amortisation

Group finance review

Revenue increased by £88m to £800m (2022 £712m) which was driven by a stead, increase across all our sectors. Following the acquisition of Elizia Homes in May 2022, revenue from homebuilding was included for a full year in the financial results for the first time and contributed £50m of the £88m increase. The second most impactful increase, at £16m, was in our energy division, as power generation from our operating assets remained steady and energy prices stabilised in the second part of the year.

Retirement living saw a £9m increase (45%) in relienue, as we saw our sites reaching compaction and buyers taking residence. Additionally revenue from our lending division saw an increase of £5% to £49m (2022, £42m) due to an increase in the loan book value to an average of £454m over the year.

Operating expenses for the year word in line with our expectations, with the increase primarily driven by reserve power due to gas produrement costs. Our fibre division continuing to grow its operational base, and the associated costs resulting from the addition of Flicia brought an associated increase in staff cost, and overall for the Group, staff costs increased by F35m.

A prior year restatoment, due to hedge accounting on interest rate swaps, prompted a reclassification between. Other Cornorel ensive income and Retained Earnings, this resulted in an accumulated reduction of £15m in financing costs and is reflected in the restated accounts. However, interest costs increased in the year at Elivia's external debt facility was included in the Group results for the full year.

Financial position

Continued shareholder interest and investment has seen not assets grow to £2,766m (2022) £2,221m restated. In the year ended 30 June 2023, we issued 149m shares, 2022, 156m (it.), a total consideration of £20,4m, 2022, £205m.

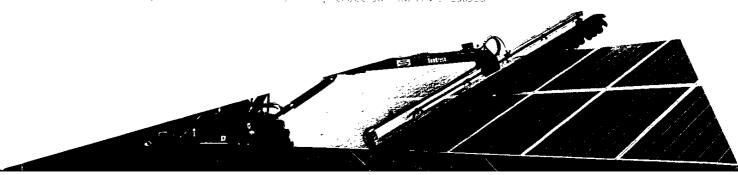

Fixed assets increased ty E113m, as deptoyment in fibre network assets drew by a 2.77m in the year and energy assets decreased by a net FIC8m, due to a combination of deptoyment in our struction projects.

offset by the asposal of Darlington Point in July 2022

Net current assets of £815m (2022, £807m restated) have increased by £8m reflecting a £, 9m increase in stock in the normabuilding division, which in turn was lotfset by £99m docrease in cash due to accelerated cash deployment. Our loan book, gross of previsions has increased by 27% to £474m (2020 £375m), and at 30 June 2023 represented 15% of net assets (2022, 15%).

Cash and cash equivalents as at 30 June 2023 were £15 m (2022 £256m). Cash generated from operating activities remained strong at £205m (2022 £346m) which has been utilised alongside external long term financing and capital raised by now share issues to grow the business. We have invested substantially into the fibre and nomebulloing sectors, which will require further capital expenditure over the next 12 months increasing our diversification across sectors. Of the cash held at year end if 134m was held in our energy, nomebuilding and fibre subsidiaries, where there are a number of construction and intrastructure projects under way reduring cash to be readily available for stage payments oue in the months after year end

Goodwill, at £5:4m (2022, £541m), continues to he a significant number on the balance sheet and arises on the acquisition of some businesses. Acquired businesses, for example renewable energy sites, often have a market value in excess of the company's not assets, refrecting their reliable future income streams. Put simply, the market value of our operation dusinesses reflects the value of tuture expected profits institute cost of simply bulling tang ble assets such as solar bandls or wind turbined We pay market talue for the sites we acquire twhich. may exceen the latter of identifiable assots such as the solar daniels and soligenerates goods. If which essentially represents the value of the expected future income streams. Goodwill recognised is fested for impairment annual, and will graduall, be protein off it lordally coler the life of the arts, as expected inturns are realised

Group finance review

Sector performance

Energy

As economic activity and global demand continued to remain high throughout the year, so too did wholesale energy prices, driven by movements in commodity prices. This resulted in the Group maintaining strong revenues from energy generation at a level similar to 2022 across our energy sites, with revenue of £606m (2022, £590m).

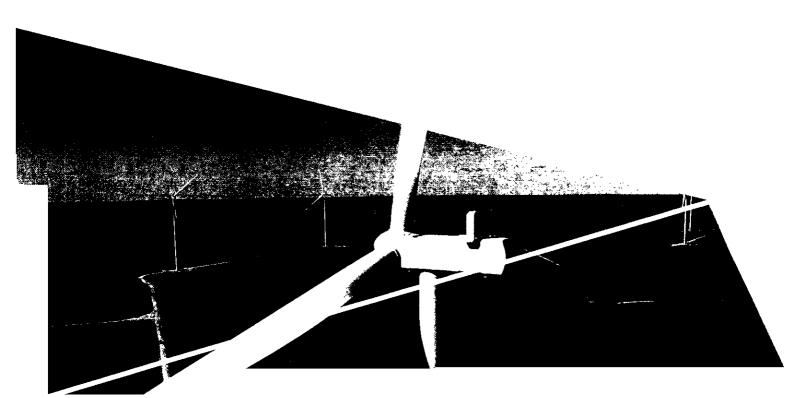

Our generation capacity remained consistent year on year, as there were no substantial changes to our energy generating assets. However, production was marginally reduced due to Snetterton, one of our piomass fired power plants, suffering some months of operational downtime following a gearbox fault.

The associated insurance calm for replacement parts and loss of revenue was settled in full.

The impact was offset by the increase in the average price per unit for the division as a whole, as t increased to £1077 MWn from £975 MWh in the prior year, a movement of £10%

While total operating costs remained mostly consistent year on-year at £377m (2022 £327m), the Group recorded a £30m increase in gas procurement costs for reserve power plans, driven by inflated gas prices in the first half of the year Correspondingly, EBITDA also decreased by 13% to £232m (2022 £258m)

	FY2023 Production (MWh)	FY2022 Production (MWh)	FY2023 External Availability	FY2022 External Availability

Total	3,068,792	3,099,690		

Group finance review

The French government has announced it would revoke the measure introduced in November 2020 to retroactively modify FIT contracts which reduces uncertainty in our French solar portfolios. However this earlier ruling resulted in an £8m French solar Goodwill impairment in the prior year, which due to accounting convention carried be reversed once recognised.

In November 2022, the UK government announced the introduction of an Electricity Generator Levy (EGC) a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and it enacts a 45% windfall levy on wholesale energy market revenues in excess of £75/MWh, specifically to electricity generated from renewable, plomass, and energy from waste sources. The Group was not required to pay EGL in the bened, however we do expect to pay this in the next financial year, and are assessing our position. We had already anticipated the impact on the returns generated from our energy portfolio over the next five years, which is reflected in the share price.

Lending

Revenue from lending increased by £7m to £49m. (15%) primarily due to a larger toan book for 2023, as property deployment accelerated in the year. At year, end the book had increased both in value (£474m). 2022 (375m) and in numbers of loans (219 loans). 2022 176 loans). However, the UK's challenging. packground was not without impact and throughout the year, we recorded a provision of £30m against one commercial loan. This has highlighted the periofit of our diversification strategy as property lending accounts for £470m, of the total division. opread across 198 foans at year end. As a result-ERICDA for the kinding division, improved slightly to £9m loss from £13m loss in the prior year. Within this movement are provisions of £45m recognised. adainst property, band during the licar (2022, £39m).

Fibre

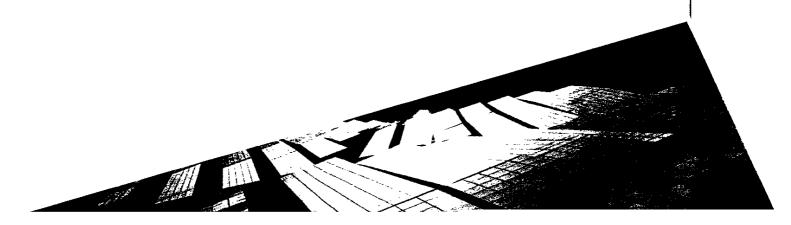

As a growing division, all our fibre businesses are in the build phase and are starting to add customers to their networks. By 30 June 2023, the division was serving around 50,000 customers and building in over 100 locations in the UK, we are on track to be able to deliver full fibre connectivity to 500,000 properties in findie towns and villages.

Overall the division has almost doubled its revenue year onlyear, from F9m in 2022 to £16m in the current year. Although building a fibre network is capital intensive and leads to a physical asset on balance sheet, the division also incurs large operating expenses as the businesses scale their operations and develop market presence. This resulted in a reported EBITDA loss of £120m (2022) £56m loss), which is in line with expectations and reflects the development stage of the division. This includes extraordinary costs of £13m associated with the restructure.

As we build out these networks, the assets will be recognised on the balance sheet at cost which cannot include future value which is expected to be generated as the assets have been internally generated.

Housebuilding

We have rebranded our Healthcare division to Housebuilding to reflect the change in business mix. Whereas, it incorporates primarily Edva and Rangeford, this division continues to include the results of One Healthcare itwo private hospitals) for this financial year. The One Healthcare trading assets and liabilities, were sold subsequent to year and Extraordinary costs of £22m associated with these assets are recognised in the accounts and are not expected to recognise in future periods.

Group finance review

Househulding operations contributed £130m (2022 £71m) to Group revenues for the year reflecting the impact of increased evenue in Rangeford, as well as a full year of Ervia operations. Elivia sold 132 units in the year, and is performing in the with budget, while Rangeford increased its revenue by 45% to £29m and sold 47 units.

A change in accounting policy resulted in the cost of Rangeford communal areas being capitalised as fixed assets (furniture fixtures and equipment) and amortised over the life of the site. Previously, these costs were immediately recognised to Cost of Sales in the P&L. The treatment has been agreed with our auditors, and has not resulted in a prior year restatement, however, Rangerford fixed assets increased by £15m in the current year as a result.

Funding and liquidity

Our strategy within our renewable energy businesses is to secure long-term financing at conservative levels from mainstream banks to enhance returns. At year end we had drawn £1,160m of external debt in this part of the Group, with a further £175m available to be drawn.

This approach enables us to acquire businesses that have stable characteristics such as predictable cost base, revenue streams, government incentives or proven technology and as such have lower returns that without leverage would be insufficient for our shareholders. It also allows us flexibility in financing our businesses and managing cash flow. We believe that failing to adopt this strategy would have a negative impact on business return and shareholder value over the long-term. 80% of our interest payable is fixed and therefore we are not significantly exposed to current interest rate volatility. The Group applies hedge accounting for interest rate swaps.

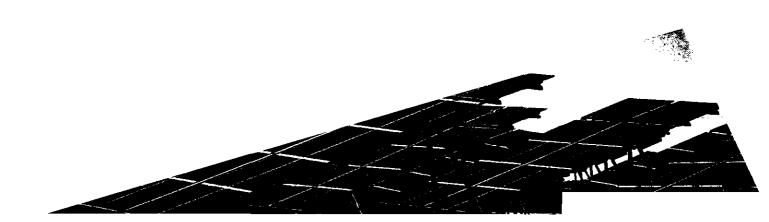

which means any changes in the fair value of the swap is recognised in reserves (cash flow hedge reserve) with the ineffective portion of the hedge recognised in the P&L. The market value of the swaps sirecognised on the balance sheet as an asset or a trability, depending on whether the swap is favourable compared to current rates.

We continually review financing arrangements to ensure that they are competitive and optimised for the needs of the business. To ensure cash is managed in an agile manner, we maintain flexible finance facilities which can be drawn or repaid to meet immediate business needs. Specifically, the Group has access to a Revolving Credit Facility of £290m which is intertinked to the net assets of our energy division. The flexibility to draw and repay funds at short notice facilitates effective management of short-term cash fluctuations, which can be driven by seasonality of operating working capital.

Looking ahead

At the end of the financial year, we continue to believe that the business is positioned well to take advantage of future growth opportunities across its core business areas. Energy and lending operations are well established in the market and continue to make excellent progress with robust performances in the new financial year. Provisions taken against loans during the year in our lending sector have ring-fenced challenges which are not indicative of further problems across other loans in the sector.

Deployment into fibre continues to roll out in line with expectations, while growing its revenue and operational base. Sales activity in our housebuilding division remain strong against a challenging market and are reporting profits in line with budget.

Group finance review

We expect to generate strong operating roturns from our established divisions for the coming years in adoltion to the anticipated outflows for our construction phase pasets. White at the same time growing our fibre and housebuilding divisions to maturity.

Independent auditors' report to the members of Fern Trading Limited

Opinion

We have audited the financial statements or Fern Trading I mited ofthe Parent Company's and its subsidiaries (the Group) for the year ended 30 June 2023, which comprise the Group Statement of Comprehensive Income the Group and Parent Company Balance Sheet, the Group Statement or Cash Flows, the Group and Farent Statement of Changes in Equity and the related notes 1 to 29 including a summary of significant accounting polinies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Audiounting Standard applicable in the UK and Republic of Ireland (United Kingdom Generally Accepted Accounting Fractice).

In our opinion, the financial statements

- give a true and fair view of the Group's and of the Parent Company's affairs as at 30 June 2023 and of the Group's loss for the year then ended
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, and
- have been prepared in accordance with the requirements of the Companies Act 2006

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (IJK) (ISAs (IJK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. Violate independent of the Group in accomance with the ethical requirements that are relevant to our audit of the financial statements in the IJK including the FRC nethical Standard and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

in auditing the financial statements we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively may cast significant doubt on the Group and Parent Company's ability to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However because not all future events or conditions can be predicted this statement is not a guarantee as to the Group's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our implication the financial statements does not cover the other information and except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereor.

Our responsibility is to read the other information and in doing so consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in this course of the audit or otherwise appears to be materially misstated. If we identify such material

Independent auditors' report to the members of Fern Trading Limited

inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have conformed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit

- the information given in the Strategic report and the Directors' report for the financial year for which the financia, statements are prepared is consistent with the financial statements, and
- the Strategic report and Directors' report have been prepared in accordance with applicable legal requirements

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or Directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us, or
- the Parent Company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of Directors remuneration specified by law are not made, or

 we have not received all the information and explanations we require for our audit

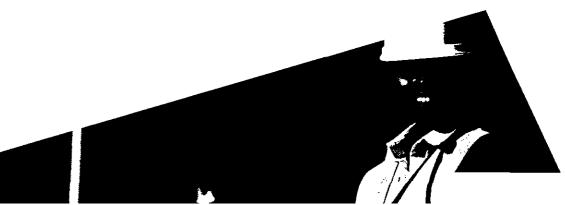

Responsibilities of directors

As explained more fully in the Directors responsibilities statement set out on pages 58 and 59 the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from materia; misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether oue to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditors' report to the members of Fern Trading Limited

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

firegularnos, including fraud are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to traud is higher trian the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with diviernance of the entity and management.

Our approach was as to tows

- We obtained an understanding of the regal and regulatory frameworks that are applicable to the Group and determined that the most significant are those that relate to reporting framework (EPS) 102 and the Companies Act 2006)
- We understood now Fern Trading Emited is complying with those frameworks by making enquiries of management, those charged with governance and those responsible for legal and compliance procedures as to any fraudirisk framework within the entity, including whether a formal fraudirish assessment is completed. We corroborated our enquiries through review of the following documentation or performance of the following procedures.
 - notaining an understanding of entity-love, controls and considering the influence of the control entitionment

- obtaining an understanding of policies and procedures in place regarding compliance with laws and regularions, ricluding now compliance with such policies is monitored and enforced obtaining an understanding of management's process for identifying and responding to fraud risks including programs and controls established to address risks identified, or otherwise prount, deter and detect fraud, and now schior management monitors these programs and controls
- review of board meeting minutes in the period and up to pare of signing.
- We assessed the susceptibility of the Grouns financial statements to material misstatement, including how fraud might occur by holding a discussion within the audit team which included
 - · identification of related parties,
- understanding the Group's business, the control
 environment and assessing the inherent risk for
 relevant assertions at the significant account
 level including discussions with management
 to gain an understanding of those areas of the
 financial statements which were susceptible to
 final discidentified by management, and
- considered the controls that the Group has established to address risks mentified by the entity or that otherwise seek to prevent, deter or detect fraud including gaining an understanding of the entity level controls and policies that the Group applies
- Based on this understanding we designed our audit procedures its identify non-compliance both such about and requiations. Our procedures involved itesting of numbil entities through journal analytics hoots, with focus on manual

Independent auditors' report to the members of Fern Trading Limited

journals, large or unusual transactions, or journals meeting our defined risk criteria based on our understanding of the business, tested accounting estimates for evidence of management bias, enquiring of members of senior management and those charged with governance regarding their knowledge of any non-compliance or potential non-compliance with laws and regulations that could affect the financial statements, and inspecting correspondence, if any, with the relevant licensing or regulatory authorities.

A further description of our responsibilities for the audit of the financial statements is located on the

Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities This description forms part of our auditor's report

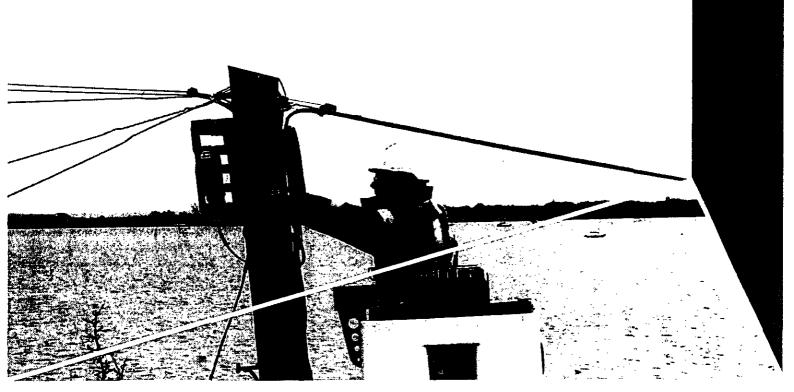

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are

required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Statement of accounting policies

Company information

Fern Trading Limited ('the Company') is a private company i mited by shares and incorporated on 14 May 2020. The company is dominiled in England, the United Ringdom and registered under company number 12601636. The address of the registered office is at 6th Floor, 33 Houborn, London, England, EC1N 2H1.

Statement of compliance

The Group and individual financial statements of Ferri Trading Finited have been prepared in combiliance with the Purited Kingdom Accounting Standards, including Financial Reporting Standard 102. The Financial Reporting Standard applicable in the United Kingdom and the Republic of Treath (FRS 1021) and the Companies Act 2006.

Basis of preparation of financial statements

The financial statements have been prepared on a going concern basis, under the historical cost convention, as modified by the recognition of certain financial assets and liabilities measured at fair value, and in accordance with the Companies. Act 2006 and applicable accounting standards in the United Engdom. The principal accounting policies which have been applied consistently throughout the year, arc set out below.

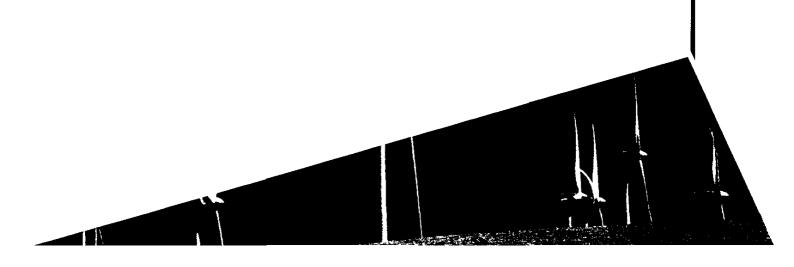

The consolidated financial statements include the results of all subsidiaries owned by Fem Trading cimited as listed in note 29 of the annual financial statements. Certain companies of these subsidiaries, which are listed in note 29 have taken the exemption from an audit for the year ended 30 June 2023 permitted by section 479A of Companies Act 2006. In order to allow those subsidiaries to take the audit exemption, the parent company has given a statutory guarantee, in line with section 479C of Companies Act 2006, of all the cutstanding net liabilities as at 30 June 2023.

Going concern

The Group's and the Company's business activities together with the factors likely to affect its future development, performance and position are set out the Strategic Report on pages 4 to 15. The financial position of the Group, its cash flows, liquidity position and horizoning facilities are described in the financial review on pages 41 to 36. The principal risks of the Group are set out on pages 17 to 20.

The Directors perform an annual going concern review that considers the Group's ability to meet its financial obligations as they fall due, for a period of tikelye months after the date that the financial statements have been signed.

Due to the challenging marketick addrons management have performed an assessment to determine whether there are any material uncertainties arising that could cast significant doubt on the ability of the Group to continue as a going conneir. No significant insues have been noted and as a consequence, the directors because that the Group it well planed to manage its hus ness risks discretifiely despite the current uncertain economic nutlook.

Statement of accounting policies

in reaching this conclusion the Directors have reviewed the financial impact of the uncertainty on the Group's balance sheet, profit and loss and cash flows with specific consideration given to the following

A reverse stress lost was performed on the base case forecast to ascertain what scenarios would result in risks to the Group's liquidity position. The test showed even in an unlikely scenario of a significant reduction of revenue of 46%, the Group is able to sustain its current operational costs and meet all liabilities as they fall one for at least a year from the date of signing these financial statements when utilising the available facilities within the Group.

The Group has a number of financing facilities that contain covenants requiring the Group to maintain specified financial ratios and comply with certain other financial covenants. These financial covenants are tested at least biannually, and at the date of this report, the Group is in compliance with all its financial covenants. Stress tests on reasonably plausible scenarios such as a significant reduction in EBITDA of 84% over time have been used to assess the covenant requirements for the at least the next twelve menths and all covenants have been rolecast to be met even under the stress test scenario, in the going concern period

At 30 June 2023, the Group had available cash of £15/m and headroom available of £175m including a revolving credit facility of £290m. Debt of £21/m is due to mature in less than one year, with the remainder of £941m payable in more than one year. The Group's facilities, repayment dates and undrawn amounts are set out in Note 16 Loans and Borrowings.

Key accounting judgement and estimates have been made with consideration given to the current economic outlook. Key estimates include loan recoverability, valuation of work in progress, decommissioning provisions, inpairment of goodwill and investments, business combinations and hedge accounting. Details are set out on pages 50 to 60.

Based on the above assessment of current economic conditions and the impact on the Group's financial position liquidity and financial covenants, the directors have concluded that the Group and the Company has adequate resources to continue in operational existence for the next 12 months. Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Exemptions for qualifying entities under FRS 102

FRS 102 allows a qualifying entity certain disclosure exemptions, subject to certain conditions, which have been complied with, including netification of, and no objection to, the use of exemptions by the Company's shareholders

The Company has taken advantage of the following exemptions

- from preparing a statement of cash flows, on the basis that it is a qualifying entity and the consolidated statement of cash flows, included in these financial statements, included the Company's cash flows.
- ir. from the financial instrument disclosures, required under FRS 102 paragraphs 11 39 to 11 48A and paragraphs 12 26 to 12 29, as the information is provided in the consolidated financial statement disclosures.
- iii from disclosing the Company key management personnel compensation, as required by FRS 102 paragraph 33.7

Statement of accounting policies

Basis of consolidation

The consolidated financial statements include the results of Ferri Trading i imited and all its subsidiary undertakings made up to the same accounting date. All intra-group balances, transactions, income and expenses are eliminated in full on consolidation. The results of subsidiary undertakings acquired or disposed of during the period are included or excluded from the income statement from the effective date of acquisition or disposal.

All undertakings over which the Group exercises control, being the power to govern the financial and operating policies so as to obtain benefits from their activities, are consolidated as subsidiarly undertakings. Where a subsidiarly has different accounting policies to the Group adjustments are made to those subsidiarly financial statements to apply the Group's accounting policies when preparing the consolidated financial statements.

Any subsidiary undertakings or associates sold or acquired during the year are included up to lor from, the dates of change of control or change of significant influence respectively.

Where the Group has written a put option over shares held by a non-controlling interest, the Group derecognises the non-controlling interest and instead renognised contingent deferred consideration liability within other payables for the estimated amount likely to be paid to the non-controlling interest on exercise of those options. The residual amount, representing the difference between any consideration paid/payable and the non-controlling interests share of net assets, is recognised as goodwill. Movements in the estimated liability after initial recognition are recognised as goodwill.

Foreign currency

i. Functional and presentation currency

The Group financial statements are presented in pound sterling and rounged to thousands

The Company's functional and presentation currency is pound stelling and rounded to thousands

ii. Transactions and balances

Foreign currency transactions are translated into the functional currency using the soot exchange rates at the dates of the transactions. At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined. Foreign exchange gains and losses resulting from the seff ement of transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in tereign currencies are recognised in the profit and loss account.

All foreign exchange gains and cases are desented in the profit and loss account within abministrative expenses.

iii. Translation

The tracing results of Group undertakings are translated into occuros sterling at the average exchange rates to the lear. The assets and labilities of overseas undertakings including goodwill and fair value agristments arising on accounting are translated at the exchange rates ruling at the year-end. Exchange adjustments arising from the retranslation of compling net investments and from the translation of the profits or cosses at average rates are recognised in Other comprehensive income and allocated to non-controlling interest as appropriate.

Statement of accounting policies

Turnover

The Group operates a number of classes of business. Revenue is derived by the following

Energy

Turnover from the sale of electricity generated by solar farms, wind generating assets, reserve power plants and biomass and landfill sites is recognised on an accruals basis in the period in which it is generated. Revenue from long-term government backed offtake agreements, such as the Renewable Obligation Certification ("ROC") scheme are accrued in the period in which it relates to Turnover from the sale of fertiliser by biomass and landfill businesses is recognised on physical dispatch.

• Lendina

Turnover represents arrangement fees and interest on loans provided to customers, not of any value added tax. Loan interest is recognised on an accrual basis in line with contractual terms of the loan agreement. Arrangement fees are spread over the life of the toan to which they relate.

Fibre

Turnover is recognised at the fair value of the consideration received for internet connectivity and related IT services provided in the normal course of business, and is shown net of VAT. Turnover is recognised based on the date the service is provided.

· House building

Turnover is recognised on legal completion of the sale of property, land and commercial spaces. Turnover from nousing association contracts is recognised by reference to the value of work completed as a proportion of the total contract value. Turnover for retirement living is recognised when the significant risks and rewards of evinership of retirement properties have passed to the buyer (on legal completion), the amount of revenue can be recognised reliably, and it is probable that the economic benefits associated with the transaction will flow to the entity.

Employee benefits

The Group provides a range of benefits to employees including annual bonus arrangements, paid holiday arrangements and defined contribution pension plans

i. Short-term benefits

Short term benefits including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received

ii. Defined contribution pension plan

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. Once the contributions have been paid the Group has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the Group in independently administered funds.

Statement of accounting policies

iii. Share-based payments

Cash settled share-based payments are measured at fair value at the balance short date. The Group recognises a liability at the balance sheet date based on these fair values, taking into account the estimated number of units that will ar tually vost and the current proportion of the vesting period. Changes in the value of this liability are recognised in the incline statement.

The Circup has no equity settled arrangements

Finance costs

Finance costs are charged to the profit and loss account over the term of the debt using the effective interest method so that the amount charged is at a constant rate on the carrying amount. Issue costs are initially recognised as a reduction in the proceeds of the associated capital instrument and released to the profit and loss account over the term of the debt.

Current and deferred tax

Tax is recognised in the statement of income and retained earnings, except that a change attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively chacted by the balance sheet date in the countries where the Company operates and generates income.

Deferred balances are recognised in respect of all timing differences that have originated but not reversed by the Barance sheet date, except that

- The recognition of deferred tax assets is limited to the extent that it is probable that they will be recovered
 against the reversal of deferred tax liabilities or other future taxable profits, and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deputations available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Business combinations and goodwill

business combinations are accounted for by applying the purchase method

The cost of a business combination is the fair value of the consideration given. Tab thes incurred or assumed and the equity instruments, issued pure the costs oriently attributable to the business combination. Where control is annieved in stages the nost is the consideration at the date of each transaction.

On acquisition of a business fair values are attributed to the identifiable assets. Labilities and contingent habitities unless the fair value cannot be measured reliably, in which case the value is incorporated as goodwill. Where the fair value of contingent vabilities cannot be reliably measured they are disclosed on the same basis actified contingent, abilities.

Statement of accounting policies

Goodwill recognised represents the excess of the rain value and directly attributable costs of the purchase consideration over the fair values to the Group's interest in the identifiable net assets, liabilities and contingent liabilities acquired.

On acquisition, goodwill is allocated to cash generating units (CGUs) that are expected to benefit from the combination

Goodwill is amortised over its expected useful life which is determined based on the estimated lifespan of the assets, acquired. Where the Group is unable to make a reliable estimate of useful life, goodwill is amortised over a period not exceeding ten years. Goodwill is reviewed and assessed for impairment indicators on an annual basis and any impairment is charged to the profit and loss.

Tangible fixed assets

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives. Depreciation commences from the date an asset is brought into service. Land and assets in the course of construction are not depreciated. Tangible assets are depreciated over their estimated useful lives, as follows.

Land and buildings	2% to 4% straight line
Power stations	3% to 5% straight line
Plant and machinery	4% to 33% straight line
Network assets	4% to 6% straight line

Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use

Where factors, such as technologica, advancement or charges in market price, indicate that residual value or useful life have changed, the residual value, useful life or depreciation rate are amended prospectively to reflect the new circumstances. The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within profit or loss

Intangible assets

intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated, using the straight line method, to allocate the depreciable amount of the assets to their residual values over their estimated useful lives, as follows:

Development rights	25 and 30 years
Software	2 to 10 years

Amortisation expenses are included in administrative expenses. Development rights relate to planning consent to build a solar farm and a wind farm acquired on acquisition.

Where factors, such as changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or amortisation rate are amended prospectively to reflect the new circumstances.

The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

Statement of accounting policies

Leases

At incoption the Group assesses agreements that transfer the light to use assets. The assessment considers whether the arrangement is ion contains a lease based on the aubstance of the arrangement and whether the lease should be classified as oither a finance lease or an operating lease.

Leases of assets that transfer substantially all the risks and rewards incidental to ownership are classified as the area eases. Finance leases are capitalised at the confinencement of the lease at the fair value of the lease asset and depraciated over the shorter of the lease ferm and the estimated useful life of the asset. Assets are assessed for in pairment at each reporting date

Leases that do not transfer all the risks and rewards of ewnership are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.

Investments

The Company holds investments in a subsidiary at cost less accumulated impairment losses—fran impairment toss is subsequently reversed, the carrying amount of the investment is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.

Cash

Cash includes cash in hand and doposits repayable on demand. Restricted cash represents cash for which the Group does not have immediate and direct access or for which regulatory or legal requirements restrict the use of the cash.

Stocks

Raw materials, spare parts and consumables are valued at the lower of cost and not realisable value. Where nocessary a provision is made for obsolete, slow-moving and defective stock. Cost is determined on the first-in-first-out (F.FO) method.

Fixel stocks (MBM and litter) are valued on an average cost basis over one to two months and provision for unusable litter is reviewed monthly and applied to off-site stock.

Fuel stock of straw has been valued at the historical cost per tonne of straw. A provision for unusable straw is identified on an individual stack basis and is reviewed monthly. Stocks are used on a first in, first out (FIFO) basis by age of straw.

Stocks of ash at Fibrophics are liabled at the lower of cost and net realizable value to the Group.

Stocks of properly development work in progress FWIP , are stated at the lower of cost and not realisable value. Cost comprises direct materials and where applicable, direct labour costs and those cuernoads that have been incurred in buringing the stocks to their present locations and condition.

At each reporting date, an assessment is made for in pariment. Any excess of the carrying amount of stocks over its estimated solving price less costs to complete and soil is recognised as an impariment loss through the profit and loss account. Reversals of impairment losses are also recognised in the profit and loss account.

Statement of accounting policies

Accrued income

Accrued income on loans is calculated at the rate of interest set out in the loan contracts. Energy income is accrued over the period in which it has been generated.

Deferred income

Deterred income is recognised in accordance with the terms set out in the contact. Deforred income is released to the profit and loss account in the period to which it relates.

Financial instruments

The Group has chosen to adopt Sections 11 and 12 of FPS 102 in respect of financial instruments

Financial assets

Basic financial assets, including trade and other receivables and cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest Such assets are subsequently carried at amortised cost using the effective interest method

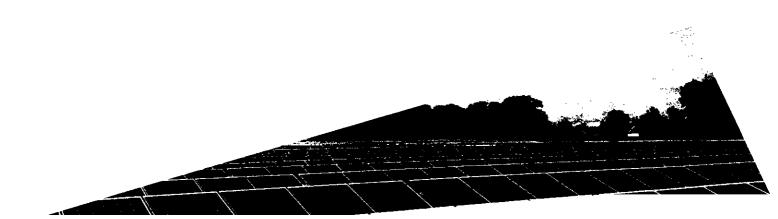

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

Other financial assets, including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price. Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity. Instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow Group companies and preference shares, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest

Statement of accounting policies

Dobt instruments are subsequently carried at amortised cost, using the offective interest rate method. Fees paid on the establishment of loan rac lities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down in this case, the fee is deferred until the drawn down oncors. To the extent there is no by dence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or loss. If not, they are presented as non-current Labilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires

Provisions

Provisions are made where an event has taken blace that gives the Group a logal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the profit and loss account in the year that the Group becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

Hedging

The Group applies hedge accounting for transactions entered into to manage the pash flow exposures of porrovings. Interest rate swaps are held to manage the interest rate exposures and are designated as cash flow hedges of floating rate porrovings. Changes in the fair values of derivatives designated as each flow hedges, and which are effective are recognised directly in easily. Any ineffectiveness in the hedging relationship theirigithe excess of the cumulative change in fair value of the hedging instrument sin. It inception of the hedge over the cumulative change in the fair value of the hedged item since inception of the hedge) is recognised in the profit and loss.

The gain or loss recognised in other comprehensive income is reclassified to the profit and loss in accordance with the cash flows of the hedged item. Hedge accounting is discontinued when the hedging instrument exolres in olderiger ments the hedging criteria, the forecast transaction is no longer highly probable, the hedged deel instrument is derecognised or the hedging instrument is terminated.

Share capital

Grainary shares issued by the furbud are recognished in county at the value of the proceeds received, with the excess over normal value being credited to share prendum.

Non-controlling interests

Even-controlling interests are measured at their proportionate chare of the adquiree's identifiable not assets at the date of adquisition

Statement of accounting policies

Key accounting judgements and estimates

The preparation of mancial statements in compliance with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key estimates and judgements in preparing these financial statements are

i. Recoverability of loans and advances to customers (estimate)

Loans and advances to customers, including associated accrued income balances, are reviewed for impairment on a biannual basis. In considering the need for a provision, management determine their best estimate of the expected future cash flows on a case by case basis. As this estimate relies on a certain number of assumptions about future events which may differ from actual outcomes, including the borrower's ability to repay interest and capital due in future periods, this gives rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the debtor balance.

Management note that provisions against loans and advances is a critical estimate and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conclude that a change of +/- one per cent in the amount provided against the estimated balance at risk would have resulted in £3.6m less/more expenditure being charged to the income statement during the period. See note 13 for the carrying amount of the debtors and provisions at 30 June 2023.

ii. Value of property development work in progress ('WIP') (estimate)

Property development WIP is reviewed for impairment on a periodic basis. In considering the need for a provision, management determine their best estimate of the recoverable value. Management engage an expert external valuer to provide key assumptions about future events which may differ from actual outcomes, including property valuations, rate of sales and development costs.

These estimates give rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the balance as at the 30 June 2023. Post year end, management have reviewed the assumptions used to determine the value of property development WIP and have observed no changes in performance that would impact the valuation as at the 30 June 2023. Sec note 12 for the carrying amount of the property development WIP.

iii. Purchase price agreement (Australian entities) (judgement)

The Group owns one energy generating subsidiary in Australia which has entered into purchase price agreements (PPA's) in 2019 and 2021. The PPA's include a contract for differences "CfD" whereby the subsidiaries pay/receive amounts from the customer based on the differences between a fixed selling price and the actual price for electricity sold to the Australian energy market. The directors believe the contract is outside the scope of FRS 102 section 12 as it is for the sale of a non-financial item and the CfD is typical for such arrangements. Therefore it is being accounted for under FRS 102 section 23 as a revenue contract with variable consideration, rather than revaluing the entire contract to fair value.

iv. Business combinations (estimate)

The cost of a business combination is the fair value of the consideration given, liabilities incurred plus the costs directly attributable to the business combination. Fair value of these combinations is a key estimate and more details are provided on pages 54 to 55.

Statement of accounting policies

v. Decommissioning provision (estimate)

The provision for decommissioning costs is measured at management's bost estimate of the present value of the expenditure required to settle the future obligation to return land on which there are operational wind and solar farms, to its original condition. The level of the provisions is determined to a significant degree by the estimation of ruture dismanding and restoration costs as well as the timing of dismantlement.

Wind Farms (estimate):

Management note that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of 47 one per cent in the discount rate would have resulted in E22m increase/decrease in the provision. See note 18 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated cost to dismantle and have used a discount rate of 4.5% to reflect the time in value of money and the risks specific to the obligation.

UK Solar (estimate):

Management mote that decomplissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of #/- one per cent in the discount rate would have resulted in £3.0m increase/decrease in the provision. See note 18 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated cost to dismantic and have used a discount rate of 4.2% to reflect the time in value of money and the risks specific to the obligation.

French Solar (judgment):

Management believe that given the nature of these particular assets, the lessor may wish to either take title of the assets for either continued use or to realise value through soiling the assets and as such do not believe that an outflow is probable to settle this restoration obligation. Management will continue to monitor the situation at each tralance sheet date.

vi. Impairment of goodwill and investments (estimate)

The value of goodwill held by the Group and investments in subsidiary undertakings held by the Company is reviewed armually for impairment. The recoverability of these balances is considered with reference to the present value of the estimated future cash flows. These calculations use cash flow projections which extend forward forecast business performance together with assumptions surrounding the expected life of the asset, externacy prepared forecasts and valuations, and any adjustments required to the discount rate to take account of business risk. The estimated present ralue of these future cash flows is sensitive to the discount rate and growth rate used in the calculation, all of which require management's judgement. Testing of the carrying value has been performed during the year, which has involved several scenarios being modelled. Based on this testing and the resulting inpairment recognised on investments, management believes there is sufficient headercome to support the value of good viriliand investments in subsidiar, entities

Management instell that impairment of gouldwill and investments is a critical estimate and have therefore performed sensituity analysis on the provision. The results of the sensituity analysis conclude that a change of ±1- one per century the amount provided against the estimated balance at rick would have resulted in 50-14m less-more expenditure being charged to the income statement during the period. See note 8 for the carrying amount of the goodwill and investments at 30 June 2023.

5 Employee and Continues

A number of subsidiaries of the Group operate a cash settled LTIP to qualifying employees, whereby employees render services in exchange for cash, the amount of which is determined by reference to the valuation of the underlying subsidiary. The fair value of the liability for the awards made is measured at each reporting date and at the settlement date. The fair value is recognised over the vesting period. The amount of expense recognised takes into account the best available estimate of the number of units expected to vest under the service and performance conditions underlying each award granted.

Cash-settled share-based payment transactions with employees

Details of related undertakings are shown in note 29

Unlisted investments comprise the Group's holding of the members' capital of Terido LLP, a cending business, and its shareholding in Bracken Trading Limited. Fern co-founded Terido LLP in October 2012 with the intention of conducting a proportion of its future trade through the partnership. Additions and disposals of unlisted investments relate to investments and divestments in Terido LLP in line with Fern's cash requirements and to utilise surplus funds. Fern has a small shareholding in Bracken Trading Limited from time to time. Fern's investment in Bracken Trading Limited at 30 June 2023 was £Nit (30 June 2022. Enil). The directors do not consider Terido LLP or Bracken Trading Limited to be subsidiary undertakings of Fern Trading Limited.

Notes to the financial statements for the year ended 30 June 2023

Cash includes each in hand and deposits repayable on demand

Restricted cash represents cash for which the Group does not have immediate and direct access or for which regulatory or logal requirements restrict the use of the cash

Note 26 details the prior period adjustments

Notes to the financial statements for the year ended 30 June 2023

Derivative financial instruments

The Group's financial risk management seeks to minimise the exposure to market risk, credit risk, liquidity and cash flow risk, and energy market risk.

a) Market risk

Energy market risk

The energy sector is experiencing significant turbulence and there is a risk that forecast levels of income are not achieved due to changes in wholesale energy prices, off-take contracts or government subsidies. Changes in Government policy, or regulator intervention may result in reduced income streams within the group due to additional levies.

Currency risk

The Group presents its consolidated financial statements in sterling and conducts business in a number of other currencies, principally Euro and Australian dollar. Consequently, the Group is exposed to foreign exchange risk due to exchange rate movements, which affect the Group's transactional expenses and the translation of earning and net assets of its non-sterling operations.

Transactional exposures

Transactional exposures arise from administrative and other expense in currencies other than the Group's presentational currency (Sterling). The Group enters in to forward foreign exchange contracts and foreign exchange swaps to mitigate the exchange rate risk for certain foreign currency payables and receipts. The forward currency contracts and swaps are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key inputs used in valuing the derivatives are the forward exchange rates for GBP AUD and GBP EUR. On 30 June 2023 the fair value of the foreign currency contracts was an asset of Enil (2022, Enil) and a liability of Enil (2022, Enil).

Translational exposures

Balance sheet translational exposures arise on consolidation on the retranslation of the balance sheet of non-sterling operations into sterling, the Group's presentational currency. The level of exposure is reviewed by management and the potential foreign exchange movement is within an acceptable level of risk and therefore, typically, the Group's policy to not to actively hedge these exposures.

Interest rate risk

The Group has exposure to fluctuations in interest rates on is borrowings. Where the Group enters into borrowing arrangements with floating rate interest, a swap arrangement is entered into to fix a portion of the interest in order to mitigate against an increase in interest rates. The portion of interest to be fixed is assessed on a case by case basis. Management can elect whether to hedge account for these arrangements on an individual transaction basis and have elected to apply hedge accounting for interest rate swaps. The swaps are based on a principal amount of the loan facility and mature on the same date. On 30 June 2023, the outstanding interest rate swaps have a maturity in excess of five years and the fair value is in an asset position of £105,691,000 (2022) liability of £54,409,000).

Price risk

The Group is a short- to medium-term lender to the residential property market. To the extent that there is deterioration in the level of house prices that affects the properties that the Group's loans are secured against there is a risk that the Group may not recoup its full exposure. This is mitigated by the short term nature of the loans and the conservative level of loan to value that the Group is prepared to lend at

Notes to the financial statements for the year ended 30 June 2023

b) Credit risk

Customer credit risk is mitigated through the Group's credit control poticies, which are in place to ensure that our customers have an appropriate credit history and are monitored on an ongoing basis.

c) Liquidity risk

Liquidity risk are managed by ensuring that sufficient cash is available to fund continuing and future operations

Equidity risk arises on bank loans in place across the Group and is managed through careful monitoring of covenants and sensible levels of dobt. Borrowing is on a long-term basis, whereas our revenue is received throughout the year as well as interest and redemptions on our short term loan book. Cash flow risk is managed through origoning cash flow forecasting to ensure receipts are sufficient to meet liab liftes as they fall due.

a) Derivative adjustment

We have itonoristed a movew of prior years, accounting freatment of other comprehensive income, in relation to derivative recognition. We have identified an error relating to all financial years from 2017 relating to the amortisation of loss associated with a specific cash flow hedge. The loss was the result of a refinancing exercise unpertaken in 2017, and the Group has received professional advice in relation to the accounting treatment. Upon review, it was discovered the amortisation of thic loss was arcady reflected in thic updated fair value of the cash flow hedges, and the amortisation loss had incorrectly been recognised twice, over the life of the cash flow hedge. This also has a consequence on the calculation of hedge ineffectiveness. The cumulative impact was a £15.5m; reduction in historical interest cost, and ari equal and opposite reduction in other comprehensive income. A summary of the impact of the correction is provided below, which includes the associated tax adjustments.

Goodwill resulting from the business combination was £6,565,000 and has an estimated useful life of 10 years, reflecting the lifespan of the assets acquired.

The consolidated statement of comprehensive income for the year includes £12.604,000 revenue and a loss before tax of £469,000 in respect of this acquisition

Notes to the financial statements for the year ended 30 June 2023

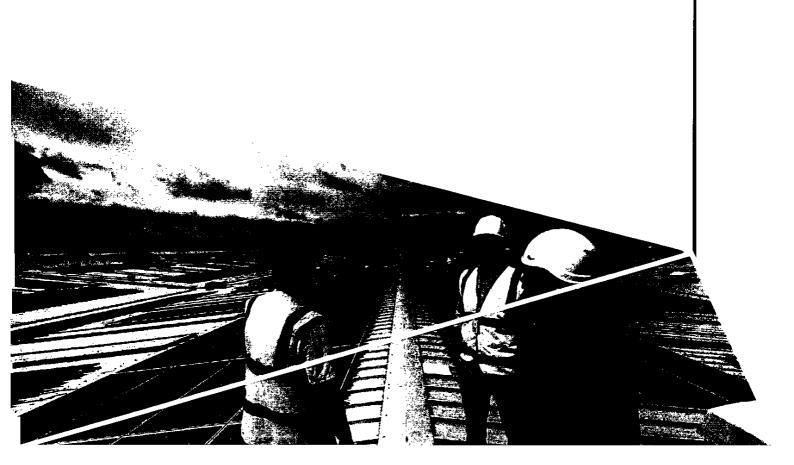

28 Control of the con

Our reported results are prepared in accordance with United Fingdom Accounting Standards, including Financial Reporting Standard 102 as detailed in the Financial Statements stanting on page 44 of the Annual Report. In measuring our nerformance, the imancial measures that we use include rhose that have been derived from our reported results in order to eliminate factors that distort year on-year comparisons. These are considered non-GAAF financial measures.

Net debt

We provide net debt in addition to cash and gross debt as a wall of assessing our overall cash position and it is computed as follows:

Net debt		1,001,265	793,167
Lastriat trace, and in harid		(156,919)	(256,415)
Gross debt		1,158,184	1,049,582
Chier oats	±4. <u>.</u> €	125,000	5,364
Bank toans and overmatis	16	1,033,184	1,044,218
EST STORY THE REAL STREET STORY CONTINUES OF THE STREET STORY OF THE STREET STREET STORY OF THE STREET	in the second second second	£'000	£.000
		2023	2022

Notes to the financial statements for the year ended 30 June 2023

EBITDA

Earnings before interest, tax, depreciation and amortisation ("EBITDA") is calculated by adjusting profit after tax for interest, tax, acpreciation and amortisation, in addition to income and expenses that do not relate to the day to day operations of the Croup. We provide EBITDA in addition to profit after tax as it allows us to assess our performance without the effects of financing and capital expenditures.

The following table details the adjustments made to the reported results

			(restated)
		2023	2022
	Note	£'000	£.000
Profit/(loss) for the financial year	a and in particular season is at 193 and 190 a	(131,559)	38,020
Ada			
Amortisation of intangicle assets	/	43,055	37,849
Impairment of intangible assets	8	936	7,913
Depreciation of tangible assets		103,754	101,802
Impairments	ŷ.	21,670	
Interest payable and sign at expenses	6	49,265	25,270
Exceptional tems		12,674	1,105
T _{dy}	7	(17,208)	17,868
1.055			
Income from other fixed as set investments		(955)	(5,249)
Fruft en disposal of sub-idial es		1,045	(29,532)
Interestico nivable and similar income	6	(713)	(130)
EBITDA		81,963	194,917

Note 26 details the prior period adjustments

The directors believe that the carrying value of the investments is supported by their underlying net assets

5 | APPENDIX - SHARE PRICE PERFORMANCE (UNAUDITED)

Fern's share price has performed in line with targets

Ferni Trading Limited is an imilisted company. Every month, our Board of Directors agrees a price at which it will be willing to issue new shares. The share price is unaudited.

Share price growth since inception: Fern Trading Limited

Performance is calculated based on the sale price for Fern's shares at 2 June each year. The share price is not subject to audit by Ernst 8 Young LEP

Annual discrete performance

Financial Year	Discrete share price performance
June 2022-23	3.10%

Forward-looking statements

This Annual Report contains certain forward-looking statements related to the Company's future business and financial performance and future events or developments. These statements are based on the current knowledge and expectations of management and are subject to assumptions, risks and uncertainties, some of which are related to factors that are beyong the control of the Company. Accordingly, no assurance can be given that any particular expectation will be met and forward-looking statements regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. Past performance cannot be relied on as a guide to future performance. Nothing in this Annual Report should be construed as a profit forecast.
