Strategic report For the year ended 30 June 2022

The directors present the strategic report for the year ended 30 June 2022.

Review of the business

Alquity UK Limited ('AUK') is the holding company for the Alquity Group, which includes its subsidiaries Alquity Investment Management Limited ('AIML') and Alquity Asia Limited ('AAL')

Alquity Investment Management Limited ('Alquity') is an asset management business that connects investors to their investments and social progress in order to deliver better financial outcomes for all.

It is Alquity's profound belief that every person on the planet deserves the opportunity to succeed and therefore Alquity is committed to building a world leading responsible asset management business focussed on transforming how people invest to create a better, fairer world for all.

'How we deploy our capital shapes our societies': Alquity believes that the investing world needs asset managers who will help solve the greenwashing problem and help re-allocate capital towards a sustainable future. It also believes that the evolution of Environmental, Social and Governance ('ESG') and Impact investing requires a holistic approach (combining ESG with Impact) including a quantitative approach to facilitate large-scale strategies and impact. Alquity is committed to leading the investment community in this respect.

The funds managed by Alquity target attractive returns, defined as performance in the top quartile of our peer group over the medium to long-term (3-5 years), via a high conviction, fundamentally driven process. This approach emphasises not only macro analysis and financial valuation but also ESG factors to assess management quality, operational excellence and firm values. This results in "quality growth" focused portfolios that monetise long-term themes via transparent companies, with effective management who are aligned with all stakeholders.

The funds managed by Alquity are therefore responsible by construction, targeting consistent outperformance whilst contributing to long-term development. This philosophy resonates across the broader business; we encourage fund manager engagement and are happy to share our analysis. Our fund managers actively engage with companies on material ESG issues incorporating our Key Progress Indicators ('KPIs') which drive behaviours supporting the principles enshrined in the UN Global Compact.

Further, we recognise that responsible investment alone is insufficient to engender social progress. Therefore, at the corporate level we donate a minimum of 10% of our fee revenue to development projects in the regions in which we invest. By contributing to long-term sustainable economic development, we create more opportunities for our companies to succeed, closing the Alquity virtuous circle. In this way, our business aligns the incentives and values of investors, employees, holdings and communities. We believe these shared investment values are key to achieving enduring financial success and sustainable social progress.

Alquity ensures there is an alignment of interest predominantly through long-term incentives and remuneration of fund managers connected to the performance of the fund. Team members who drive the growth of Alquity and live our values have the opportunity to join the Alquity Enterprise Management Incentive ('EMI') Scheme, which is a UK HMRC approved options scheme.

Strategic report (continued) For the year ended 30 June 2022

Alquity is responsible for the sales of the funds it manages. Alquity sales team has historically been based out of the London office. We also work with a global network of brokers and distributors to market the funds in the Middle East, Africa, Asia, Latin America and Europe. In the retail market our main distribution channel is through platforms for regular savers, lump sum and pension investors. We have passed their rigorous due diligence due to our gold-standard operational architecture, unique business model and product offering.

The year to the end of June 2022 has been very challenging with reported losses of £28,184 as of 30 June 2022.

Despite this, Alquity Investment Management Limited's (Alquity) commercial prospects continue to grow, and the investment performance of the funds managed by Alquity remains solid. Our 3 core GEM funds are now either 1st or 2nd quartile over 2 years and we expect all three will be in a similar quartile over 3Y in 12 months' time. The energy sector has been the key headwind, appreciating c. 25+% in 2022 so far.

We have also focused on building on improved sustainability standards. In this respect, the latest AFNOR audit was completed with no minor non-conformities and stronger language backing our sustainable investment approach.

Furthermore, all GEM funds now qualify as Article 8 for SFDR purposes and GIF qualifies as Article 9. This is a testament to our ESG and Impact credentials.

However, the AUM has declined materially over the past year. Most of the loss of AUM is attributable to the significantly weaker market environment caused by the twin crises of spiking inflation and Russia's actions in Ukraine.

Despite the decline in AUM, we can report many highlights over the course of the last year.

- Alquity's SICAV assets under management (AUM) reached \$150mn in Q3 2021 before declining to a level of c. \$120mn in February. Prior to the Ukraine conflict, we were seeing healthy net inflows into the funds managed by Alquity through the start of the year. However, the uncertainty caused by the war has led to heightened investor caution. AUM has reduced further to \$103mn as of 30 June 2022. This remains well below AUM levels seen in 2018 and continues to be held back by weak markets. Many clients now have very high levels of cash, which they will put back into the markets when the situation improves. This will be a significant opportunity for us.
- In calendar Q1 2022, Alquity signed an agreement with Spouting Rock Asset Management LLC (SRAM) to sell
 additional equity capital in Alquity UK Limited for £1.5mn. As of 30 June 2022, the first two tranches
 representing c.£800,000 had been deposited and we expect further tranches totaling £700,000 in the coming
 months.
- After signing two distribution agreements (first, we agreed to create a US joint venture entity and distribution
 agreement with SRAM covering the domestic US market; second, we signed a third-party marketing
 agreement with Haven Green Partners to market Future World and Global Impact Fund in selected European
 and Latin American countries) we are pleased to see both organisations gaining traction with institutional
 prospects.
- One of our existing clients, (a French private bank) took a step closer to becoming a strategic partner by granting our strategies wider access to their in-house platforms.

Strategic report (continued) For the year ended 30 June 2022

- Through this period of turmoil, the organisations and businesses we have backed through Transforming Lives, such as Phool and Gjenge Makers, continue to flourish.
- As mentioned above, the investment performance of the funds managed by Alquity for the year to the end of June 2022 was solid despite extremely difficult market conditions. Delivering above average peer performance is an important component to gaining recognition as a leading investment manager. 2022's performance year continued to see heightened macro volatility with tremendous implications not just for stocks and sectors, but for ESG and Impact investing as well. Despite this, our performance has tracked well against most of our competitors. Looking ahead, we remain defensive going into 2022/2023. Nevertheless, our investment team remains in good shape to provide alpha opportunities.
- Lastly, we are pleased to report that our partnership with the Manco of Alquity SICAV, East Capital Asset Management, which includes having access to their administrator and depositary platform, is working very well.

Throughout this period, Alquity has remained true to its origins and purpose: to change the way the world invests by building a bridge between public markets and impact. Alquity's virtuous circle continues to be one of the only investment businesses dedicated to using impact investing as a tool to transform people's lives as well as improving the way our industry and society allocates capital.

In relation to distribution, scaling our ESG and Impact strategies remains our top objective, however this has been slow since the end of COVID. The Ukraine conflict has set sales efforts back again after some positive flow in Q4 2021 and early 2022. Our sales team is highly experienced and with our new European sales director developing new prospects, traction has improved, however we have not delivered meaningful net flows.

Finally, market conditions for Global and Emerging Market Equities will remain challenging for the rest of the year. This undermines our best efforts to gain scale.

Having outlined the challenges which have frustrated our efforts to grow our AUM, we see many opportunities that can deliver the scale we desire:

- UK-based fund advisors are growing more positive with us winning several new clients and initial inflows, which we believe can grow alongside their advised client base.
- Our sales team is also gaining traction with institutional prospects in Europe and North America.

In Europe, fund platforms have placed SFDR article 8 and article 9 strategies at the centre of their allocations. This places Alquity funds at a distinct advantage over many of our industry peers.

Strategic report (continued)
For the year ended 30 June 2022

Principal risks and uncertainties

Exposure to credit, liquidity, interest rate and foreign currency risk arises in the normal course of the company's business.

Credit risk

The company provides sales, marketing and operational services to the Alquity Fund and also funds managed by what was the immediate holding company, a company under common control. Receivables are mainly from this source. Hence, the exposure to credit risk is not considered to be significant as the companies (including the former immediate holding company) are all owned ultimately by the same shareholder. No amounts receivable are past due or impaired.

Liquidity risk

The company's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

Interest rate risk

The company's cash and cash equivalents are primarily invested at short-term market interest rates. Consequently, changes in interest rates would have insignificant impact on the company's losses and retained losses.

Foreign currency risk

As the company's cash at bank, other receivables and payables are denominated predominantly in British Pounds Sterling and US\$, changes in foreign currency rates should have limited impact on the company's losses and retained losses.

Lastly, as a post-balance sheet event, we can also report the approval at the end of September, to increase the share capital of Alquity UK Limited, the parent company of Alquity, in the amount of £1.5m. This was achieved through the swap of debt held by Alquity Group Limited for shares in Alquity UK Limited. The main purpose of this was to strengthen the capital requirement ratios of the Alquity group in light of the new FCA regulatory capital rules.

For these reasons we look forward to the next 12 months with confidence, despite the challenging market conditions, with far greater capacity to achieve scale, benefitting our clients and shareholders, and transforming more lives.

On behalf of the board

Paul Robinson **Director**29 March 2023

Directors' report

For the year ended 30 June 2022

The directors present their annual report and financial statements for the year ended 30 June 2022.

Principal activities

The principal activity of the group continued to be that of the provision of sales and marketing services for Alquity Group Limited and the provision of investment management and distribution services to the Alquity SICAV, specifically its Alquity fund.

Results and dividends

The results for the year are set out on page 11.

No ordinary dividends were paid. The directors do not recommend payment of a further dividend.

Directors

The directors who held office during the year and up to the date of signature of the financial statements were as follows:

Jane Nicholls

(Resigned 31 July 2022)

Paul Robinson

Neil Sandy

Auditor

Saffery Champness LLP have expressed their willingness to continue in office and a resolution proposing that they be re-appointed will be put at the next general meeting.

Directors' report (continued)
For the year ended 30 June 2022

Statement of directors' responsibilities

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the group financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the United Kingdom.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, International Accounting Standard 1 requires that directors:

- properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IFRSs are insufficient to
 enable users to understand the impact of particular transactions, other events and conditions on the entity's
 financial position and financial performance; and
- make an assessment of the company's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of disclosure to auditor

Each director in office at the date of approval of this annual report confirms that:

- so far as the director is aware, there is no relevant audit information of which the company's auditor is unaware, and
- the director has taken all the steps that he / she ought to have taken as a director in order to make himself / herself aware of any relevant audit information and to establish that the company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of section 418 of the Companies Act 2006.

On behalf of the board

Paul Robinson 29 March 2023

Independent auditor's report
To the members of Alquity UK Limited

Opinion

We have audited the financial statements of Alquity UK Limited (the 'parent company') and its subsidiaries (the 'group') for the year ended 30 June 2022 which comprise the group statement of comprehensive income, the group statement of financial position, the group statement of changes in equity, the group statement of cash flows and the group notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in the preparation of the group financial statements is applicable law and international accounting standards (IAS) in conformity with the requirements of the Companies Act 2006.

In our opinion the financial statements:

- give a true and fair view of the state of the group's affairs as at 30 June 2022 and of the group's loss for the year then ended;
- have been properly prepared in accordance with IAS in conformity with the requirements of the Companies Act 2006; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the group and parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to note 1.2 in the financial statements, which describes the impact of the market conditions on the results and financial position of the group. Note 1.2 discloses a material uncertainty to the future of the business which may significantly alter the group's financial performance from that projected in its financial plan and cashflow projections. In addition, a significant proportion of the group's revenue is linked to fund performance in emerging markets which creates uncertainty in this process. Note 1.2 also refers to the additional support available to Alquity which has enabled the directors to conclude that it is appropriate to prepare financial statements on a going concern basis. It is uncertain as to how long current conditions will continue and how long such additional support will be required and available. As stated in note 1.2, these events or conditions indicate that uncertainty exists that may cast doubt on the group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Independent auditor's report (continued) To the members of Alquity UK Limited

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of our audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and parent company and their environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report. We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit
 have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the parent company or to cease operations, or have no realistic alternative but to do so.

Independent auditor's report (continued)
To the members of Alquity UK Limited

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the group and parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The specific procedures for this engagement and the extent to which these are capable of detecting irregularities, including fraud are detailed below.

Identifying and assessing risks related to irregularities:

We assessed the susceptibility of the group and parent company's financial statements to material misstatement and how fraud might occur, including through discussions with the directors, discussions within our audit team planning meeting, updating our record of internal controls and ensuring these controls operated as intended. We evaluated possible incentives and opportunities for fraudulent manipulation of the financial statements. We identified laws and regulations that are of significance in the context of the group and parent company by discussions with directors and by updating our understanding of the sector in which the group and parent company operates.

Laws and regulations of direct significance in the context of the company include The Companies Act 2006, UK Tax legislation and The Financial Services and Markets Act 2000, on which The Financial Conduct Authority (FCA) Handbook is based.

Audit response to risks identified

We considered the extent of compliance with these laws and regulations as part of our audit procedures on the related financial statement items including a review of financial statement disclosures. We reviewed the company's records of breaches of laws and regulations, minutes of meetings and correspondence with relevant authorities to identify potential material misstatements arising. We discussed the company's policies and procedures for compliance with laws and regulations with members of management responsible for compliance.

Independent auditor's report (continued) To the members of Alquity UK Limited

During the planning meeting with the audit team, the engagement partner drew attention to the key areas which might involve non-compliance with laws and regulations or fraud. We enquired of management whether they were aware of any instances of non-compliance with laws and regulations or knowledge of any actual, suspected or alleged fraud. We addressed the risk of fraud through management override of controls by testing the appropriateness of journal entries and identifying any significant transactions that were unusual or outside the normal course of business. We assessed whether judgements made in making accounting estimates gave rise to a possible indication of management bias. At the completion stage of the audit, the engagement partner's review included ensuring that the team had approached their work with appropriate professional scepticism and thus the capacity to identify non-compliance with laws and regulations and fraud.

The company is regulated by the FCA. We discussed the company's authorisation and permitted activities with the SMF16 and obtained evidence of this from the FCA register. We obtained additional evidence about compliance by discussing any breaches with the SMF16 and SMF17 and reviewing correspondence with the FCA.

There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities is available on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the group financial statements For the year ended 30 June 2022

1 Accounting policies

Company information

Alquity UK Limited ("the company") is a private limited company incorporated in England and Wales. The registered office is 3rd Floor, 9 Kingsway, London, WC2B 6XF. The company's principal activities and nature of its operations are disclosed in the directors' report.

The group consists of Alquity UK Limited and all of its subsidiaries.

1.1 Accounting convention

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006.

The financial statements are prepared in sterling, which is the functional currency of the group. Monetary amounts in these financial statements are rounded to the nearest £1. The principal accounting policies adopted are set out below.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 2.

1.2 Going concern

At the time of approval of the financial statements, the directors recognise that the ongoing difficult market conditions represent a material uncertainty to the future of the business which may significantly alter the group's financial performance from that projected in its financial plan and cash flows and therefore may cast doubt on the ability of the group to continue as a going concern.

In particular, a significant proportion of the group's revenue is linked to the performance of funds in emerging markets which are inherently volatile, creating some uncertainty in the forecasting process. During the year, this has resulted in a loss totalling £28,184 (2021: £1,878,176).

Nevertheless, having prepared forecasts looking ahead 12 months to consider both the resources needed, and the support available to the group from the controlling party, the directors consider it appropriate to prepare the financial statements on a going concern basis.

1.3 Revenue

Revenue across the group is recognised in line with the requirements of IFRS 15 as contractual performance obligations are satisfied, as noted below by revenue stream. Revenue is measured at the fair value of the consideration received adjusted for clawbacks, allowance for impairment, discounts, rebates, and other sales taxes or duty.

Initial Fee income

Fees are recognised as earned at the point when financial advice is provided.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

Ongoing Fee income

Fees are recognised as and when fees from the management of investments are earned.

Investment management

Revenue is recognised as gross earned for the value of FUM held within the month.

Interest income

Revenue is recognised as interest accrues (using the effective interest method that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset).

1.4 Goodwill

Goodwill represents the excess consideration over the fair value of the investment in subsidiaries. Goodwill is annually reviewed for impairment by management.

1.5 Intangible assets other than goodwill

Computer software

Acquired computer software is initially measured at cost and subsequently measured at cost or valuation, net of amortisation and any impairment losses. The software has a useful economic life of 2 years.

1.6 Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Right of use asset Life of the lease

Leasehold improvements5 yearsFixtures and fittings2 yearsComputers2 years

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in the statement of comprehensive income.

1.7 Impairment of tangible and intangible assets

At each reporting end date, the group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

1.8 Fixed asset investments

Interests in subsidiaries are initially measured at cost and subsequently measured at cost less any accumulated impairment losses. The investments are assessed for impairment at each reporting date and any impairment losses or reversals of impairment losses are recognised immediately in profit or loss.

1.9 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

1.10 Financial assets

Financial assets are recognised in the group's statement of financial position when the group becomes party to the contractual provisions of the instrument. Financial assets are initially recorded at fair value plus transaction costs

There are three primary measurement categories for financial assets being:

- a) Amortised cost;
- b) Fair value through other comprehensive income (FVOCI); and
- c) Fair value through profit or loss (FVTPL)

All recognised financial assets that are within the scope of IFRS 9 are required to be measured subsequently at amortised cost or fail value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Amortised cost are measured using the effective interest method. Interest is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial. The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the debt instrument to the net carrying amount on initial recognition.

Financial assets held at amortised cost

Financial instruments are classified as financial assets measured at amortised cost where the objective is to hold these assets in order to collect contractual cash flows, and the contractual cash flows are solely payments of principal and interest. They arise principally from the provision of goods and services to customers (eg trade receivables). They are initially recognised at fair value plus transaction costs directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment where necessary.

Impairment of financial assets

The group recognises a loss allowance for expected credit losses on debt instruments that are measured at amortised cost. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The group always recognises lifetime ECL for trade receivables, contract assets and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

Derecognition of financial assets

Financial assets are derecognised only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership to another entity.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

1.11 Financial liabilities

The group recognises financial debt when the group becomes a party to the contractual provisions of the instruments. Financial liabilities are classified as either 'financial liabilities at fair value through profit or loss' or 'other financial liabilities'.

Derecognition of financial liabilities

Financial liabilities are derecognised when, and only when, the group's obligations are discharged, cancelled, or they expire.

1.12 Equity instruments

Equity instruments issued by the parent company are recorded at the proceeds received, net of direct issue costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer payable at the discretion of the company.

1.13 Derivatives

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to fair value at each reporting end date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognised as a financial asset, whereas a derivative with a negative fair value is recognised as a financial liability. A derivative is presented as a non-current asset or liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realised or settled within 12 months. Other derivatives are classified as current.

Derivatives embedded in other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at fair value through profit or loss.

1.14 Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting end date.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting end date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when the group has a legally enforceable right to offset current tax assets and liabilities and the deferred tax assets and liabilities relate to taxes levied by the same tax authority.

1.15 Employee benefits

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of inventories or non-current assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the group is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

1.16 Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense when employees have rendered the service entitling them to the contributions.

1.17 Leases

At inception, the group assesses whether a contract is, or contains, a lease within the scope of IFRS 16. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Where a tangible asset is acquired through a lease, the group recognises a right-of-use asset and a lease liability at the lease commencement date. Right-of-use assets are included within property, plant and equipment, apart from those that meet the definition of investment property.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs and an estimate of the cost of obligations to dismantle, remove, refurbish or restore the underlying asset and the site on which it is located, less any lease incentives received.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

The lease liability is initially measured at the present value of the lease payments that are unpaid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the group's incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise fixed payments, variable lease payments that depend on an index or a rate, amounts expected to be payable under a residual value guarantee, and the cost of any options that the group is reasonably certain to exercise, such as the exercise price under a purchase option, lease payments in an optional renewal period, or penalties for early termination of a lease.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in: future lease payments arising from a change in an index or rate; the group's estimate of the amount expected to be payable under a residual value guarantee; or the group's assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less, or for leases of low-value assets including IT equipment. The payments associated with these leases are recognised in profit or loss on a straight-line basis over the lease term.

1.18 Grants

Government grants are recognised when there is reasonable assurance that the grant conditions will be met and the grants will be received.

1.19 Foreign exchange

Transactions in currencies other than pounds sterling are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation in the period are included in the consolidated statement of comprehensive income for the period.

Notes to the group financial statements (continued) For the year ended 30 June 2022

1 Accounting policies (continued)

1.20 Basis of consolidation

The consolidated financial statements incorporate the financial statements of subsidiary entities. A subsidiary is defined as an entity over which the company has control. Control is achieved when the company has power over an entity, is exposed to, or has rights to, variable returns from its involvement with the entity, and has the ability to use its power to affects its returns.

Consolidation of a subsidiary begins when the company obtains control and ceases when control is lost. The company reassesses whether or not it controls an entity if facts and circumstances indicate that there are changes to one or more of the three control elements listed above.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the group are eliminated on consolidation. Where necessary, adjustments are made to the financial statements of subsidiaries to bring accounting policies used into line with the group's accounting policies.

2 Critical accounting estimates and judgements

In the application of the company's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The estimates and assumptions which have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are outlined below.

Critical judgements

Share based payments

Share options were held by employees as at 30 June 2022 (see note 21) for further information on these). As the company is not listed there is not readily available information with regards to the value of the company's shares and as such inputs have had to be based on other similar companies that are listed as well as a number of estimates based on historic information.

As at 30 June 2022, no option charge has been recognised in the financial statements as this was not considered by the directors to be material.

Notes to the group financial statements (continued) For the year ended 30 June 2022

2 Critical accounting estimates and judgements (continued)

IFRS 9 - Expected credit losses

The directors have judged expected credit losses associated with trade receivable balances to be low risk and simple in nature, due to both the relatively low risk profile of the majority of the Group's clients.

Amounts recoverable from related party undertakings are repayable on demand. The directors have assessed different scenarios relating to the recoverability and possibility of default from the amount recoverable from subsidiary undertakings. The directors assessed expected future cash flows compared to the carrying value of the receivable and using experience and knowledge of group operations have assigned a level of probability to the different expected credit loss scenarios.

	1,743,314	2,222,886	1 ,743,314	2,222,886

An unsecured loan note for £3,750,000 was issued on 5 April 2013 to Alquity Group Limited as part of the consideration for the acquisition of Alquity Investment Management Limited. The loan is subordinated and interest free. Repayment is in tranches and will be determined by the Board. At 30 June 2022, £1,814,491 (2021: £2,246,005) was outstanding and included in the above aggregate loans payable balance.

The loan is repayable in full either upon the sale of the entire share capital of the company for full value on an arms-length basis; or a flotation of the company on a recognised stock exchange.

An unsecured loan facility for \$1,500,000 was agreed with Paul Robinson on 28 November 2013. The loan facility may be drawn down as required and in a currency of USD, GBP or EUR as per the lenders preference. Repayment is to be made in USD. The facility does not have a fixed term but the borrower will make reasonable efforts to repay the lender in full upon sufficient funds becoming available for repayment by the Borrower. All amounts drawn down under the facility together with interest accrued thereon shall be repaid immediately in full in the event of the sale of the Borrower. Repayment will be made to the extent that the business will continue to hold more than 7 months regulatory capital, £128,456 (2021: £128,456) was outstanding and included in the above aggregate loans payable balance.

Notes to the group financial statements (continued) For the year ended 30 June 2022

19 Convertible loan notes

£3,060,000 of convertible loan notes were issued on 17 November 2020 as part of the Futures Fund loan scheme. The notes were converted into 10,206,066 ordinary shares of the company during the year. The conversion price was at a 20% discount to the market value share price at the date of the conversion.

Interest at 8% per annum was accrued until conversion and converted at par.

	Movements and balance at the period end				Liability £
	Liability component at 1 July 2020				-
	Issue of convertible loan notes				3,060,000

21 Share-based payment transactions (continued)

	Number of share options		Weighted average exercise price	
	2022	2021	2022	2021
			£	£
Outstanding at 1 July 2021	2,561,335	2,923,007	0.32	0.37
Granted in the period	3,177,293	515,129	0.50	-
Exercised in the period	(229,603)	-	0.31	-
Expired in the period	-	(876,801)	-	0.31
Outstanding at 30 June 2022	5,509,025	2,561,335	0.42	0.32
Exercisable at 30 June 2022	1,091,510	1,321,113	0.35	0.35

The weighted average share price at the date of exercise for share options exercised during the year was £0.31 (2021 - £0).

The options outstanding at 30 June 2022 had an exercise price ranging from £0.00001 to £0.61. and a remaining contractual life of up to 4 years.

During the year, options were granted on 09 October 2021. The weighted average fair value of the options on the measurement date was £0.08 per share. During 2021, options were granted with a weighted average fair values at the measurement date of £0.08. In both years, the fair values were assessed by reference to market prices.

No share option charge has been recognised in the financial statements as it is not considered material to either the company or group.

Notes to the group financial statements (continued) For the year ended 30 June 2022

22 Capital risk management

The group's primary objectives when managing capital are to safeguard the group's ability to continue as a going concern, so that it can continue to provide returns for shareholders in future years, by pricing products and services commensurately with the level of risk and by securing access to finance at a reasonable cost. As the group is part of a larger group, the group's sources of additional capital and policies for distribution of excess capital may also be affected by the larger group's capital management objectives.

The group defines 'capital' as including all components of equity. Accordingly, the capital balance for the group as at 30 June 2022 is £2,459,631 (2021: £2,459,631).

The group's capital structure is regularly reviewed and managed with due regard to the capital management practices of the larger group to which the group belongs.

Adjustments are made to the capital structure in light of changes in economic conditions affecting the group, to the extent that these do not conflict with the directors' fiduciary duties towards the group.

In addition, as AIML is a licensed corporation registered under the Financial Conduct Authority (the FCA) in the UK, the group is also subject to a minimum capital requirement. The group monitors its compliance with the requirement on a daily basis.

During the current financial year, the group's strategy, which was unchanged from last year, was to maintain a higher capital level than regulatory requirement of the FCA. The group reviews its capital adequacy and structure regularly to ensure regulatory capital requirements are met, adequate funds are available to support business operation and growth, and excess capital is distributed to its holding company.

Notes to the group financial statements (continued) For the year ended 30 June 2022

23 Financial Instruments

Credit risk

The group provides sales, marketing and operational services to the Alquity Fund and also funds managed by what was the immediate holding company, a company under common control. In addition there is a fee paid by CalPERs related to the investment management services for our mandate with them. Receivables are mainly from these sources. Hence, the exposure to credit risk is not considered to be significant as the companies (including the former immediate holding company) are all owned ultimately by the same shareholder. No amounts receivable are past due or impaired.

The group's maximum exposure to credit risk is represented by its trade receivables and cash balances, which are usually paid within 30 working days. The balances represent number of days from the date of invoice. Of the £120,236 trade receivables balance, £31,436 of this is over 30 days old. No impairment has been recognised. Given the credit terms, the balances outside the current category are not deemed past due.

Historically, the group does not have a default rate. The group would typically recognise a provision against the trade receivables balance once the balance is over 60 days old.

Liquidity risk

The group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

None of the group's contracted maturities bear interest. £1,056,998 (2021: £1,167,544) is payable within one year.

Interest rate risk

The group's cash and cash equivalents are primarily invested at short-term market interest rates. Consequently, changes in interest rates would have insignificant impact on the company's losses and retained losses.

Foreign currency risk

As the group's cash at bank, other receivables and payables are denominated predominantly in British Pounds Sterling and US\$, changes in foreign currency rates should have limited impact on the group's losses and retained losses.

Notes to the group financial statements (continued) For the year ended 30 June 2022

24 Related party transactions

Group

The group considers transactions with its senior management as related party transactions. Senior management are considered to be directors of Alquity UK Limited who manage the main operating activities of the group. Except for the emoluments disclosed in note 7 and the loan from Paul Robinson disclosed below, there are no transactions, arrangements and agreements made for persons who were directors of Alquity UK Limited during the year.

The group has entered into the following transactions with related parties during the year:

The group received fee income of £112,787 (2021: £119,482) from Alquity Group Limited, as a company under common control. There is a £104,980 (2021: £83,128) outstanding from Alquity Group at 30 June 2022. The company also has a loan balance due from Alquity Group Limited at 30 June 2022 of £519,013 (2021: £519,013). No interest is charged on this loan.

Included in non-current liabilities is a loan of £1,614,858 (2021: £2,094,430) from Alquity Group Limited, a company under common control.

Included in non-current liabilities is a loan of £128,456 (2021: £128,456) from Paul Robinson, the ultimate controlling party. Interest, which is charged on this loan at 7.5% per annum, is rolled up into the principal. In the current year £nil (2021: £1,450,000) was repaid.

The group received fee income of £1,156,579 (2021: £753,896) from Alquity SICAV, a company of which Paul Robinson is also a director. There is £182,767 (2021: £137,599) due to Alquity SICAV at 30 June 2022. No interest is charged on this loan.

During the year the group made donations totalling £124,363 (2021: £86,582) to the Alquity Transforming Lives Foundation, an entity under mutual control. At the reporting date the group owed £380,107 (2021: £329,688) to this entity.

Company

During the year Alquity UK limited, the parent entity, subscripted to a share issue in Alquity Investment Management Limited totaling £600,000 (2021: £3,060,000). At the reporting date £3,450,440 (2021: £3,289,280) was due to Alquity Investment Management Limited. No interest is charged on this loan.

25 Events after the reporting date

After the reporting date, Alquity UK Limited issued 3,658,537 preferred ordinary shares to Alquity Group Limited at 41p per share in a debt for equity swap.

Also after the reporting date, the intercompany debtor due to Alquity UK Limited by Alquity Investment Management Limited was formalised into loan agreements and is now due for repayment on 23 September 2032.

Notes to the group financial statements (continued) For the year ended 30 June 2022

26 Controlling party

The immediate and ultimate controlling party is considered to be Paul Robinson.
