1 | OVERVIEW

Group snapshot

Revenue

Revenue has increased by over 12% in the last year from **£712m** in 2022 to **£800m** in 2023

Carbon offsets

Our renewable energy sites' carbon saving is over **681,101** carbon tonnes this year

Energy generation

Our renewable energy assets produce enough energy to power over a million UK homes

Number of loans

Over the year we provided financing to, on average **224** borrowers in the UK

Number of employees

We employ over **1,500** people

Number of sites

We own **229**energy sites spread
predominantly across
the UK

Directors Report'

Fern Trading Limited (the Company) or together : The Company's share price delicered \$10% growth with its subsidiaries the "Group": targets consistent. growth for shareholders over the long-term, with a focus on steady and predictable growth, combitsing more than KSO companies that operate across a range of industries. The Group has been trading for 13 years, successfully havigating the economic cycles and market volatility over this period. Our Group has established a stable presence in its sectors. of operation and we expect to continue to perform. predictably in those sectors

The UK faced a challenging economic backdrop. over the financial year. Our Group has continued to demonstrate resilience, though was not immune to the challenging market conditions of the sectors it. operates in The financial results for the period. indicate an accounting loss, this is primarily due to capital deployment into newer asset intensive parts. of the Group, which are expected to deliver profit. growth in the future. Extraordinary costs incurred in the year have a further impact on the Group results.

Our renewable energy business is now a mature and well-established sector for our Group, generating consistent revenues. Our growth strategy in our newer fibre and housebuilding divisions have contributed to an accounting tess this year, ahead of being able to deliver growth in profits in future years.

Our Group comprises energy, property lending, tibre and housebuilding. Which includes retirement ising We have grown to be a significant presence within our mature sectors, producing 4.2% of the UK's solar energy and 2.7% of the UKs onshore windlenergy. quitout. We have built a property lending business. with a book of £474m at year ond which helps to support the construction and reuse criterion of nomed and commercial spaces throughout the UK. The businessed in our binding sectors, fibre and nonrepulling, are establishing themselves as modifiant players in their markork and setting ambitions expansion farget.

over the past 12 months, a steadler increase when compared with the exceptional growth of 10% for the prior year. Over the longer term, we expect the Group to return to our target annual growth. The five-year average annualised share price growth is 4.83% ahead of our target 4.20% annual growth.

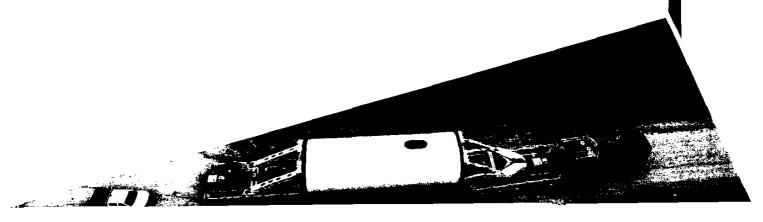

We remain a supportive employer, with an average of 1.500 full-time staff across the businesses that we own and operato, and indirect comployment provided for hundreds more people through contracts that we have in place

A reflection on our year

Our Group delivered £800m of revenue (2022) £ 112m) while growing capital deployment, with net assets increasing to £2,366m at the end of the period (2022, £2,221m, restated), leg primarily by fixed asset expenditure in our energy and fibre **QUESTIONS**

Our more mature sectors operated robustly and we continued to expand newer parts of the Group. As a result, our current year results reflect an EBITDA of £82m (2022, £195m), and an ancounting loss before tax of £149m (2022, £56m restated profit), as these nev: sectors, in particular fibre, are expected to be loss making in their early , ears of construction and operation, perore becoming profitable in future

At the start of the period long-term energ, price forecasts and energy forward rates remained highas the global cooperny continued to recover from the Covid 19 bandemin together with seeking alternative sources of energy as a result of the conflict in Ukraine. Alchigside high infanior, these factors had increased the value of the Group's energy assets in the prior period and in turn the Ishare price of the Group.

Directors Report'

1. Energy

Approximatively 50% of the Group's net assets comprise energy generating assets such as solar energy sites and wind farms. These assets provide long-term revenue streams, though their value can still be impacted by changes in pricing and demand. Our energy sector is intentionally diversified across a range of technologies to mitigate against less favourable conditions in a specific asset class and contribute towards steady, predictable share price growth.

We expanded our solar portfolio with further additions in Zestec, which specialises in developing commercial solar rooftop sites in the UK. These sites are currently under construction, and we expect to retain and operate them once complete. The construction of Guardbridge, our wind farm in Poland, remains on track and on budget, and we expect it to start generating electricity by December 2023 Dulacca Wind Farm, our largescale construction project in Western Australia started generating electricity after year end and was subsequently sold in October 2023. At the beginning of the financial year, in July 2022, we also completed the construction and sale of Darlington Point Solar Farm, one of the largest solar sites in Australia, with a capacity of 333MW

Our successful and well-established biomass division continues to perform well, delivering stable returns since acquisition in 2015. We added a new site at Snetterton in East Anglia in April 2021, which has performed well since acquisition. Though it suffered some months of operational downtime, following a gearbox fault, the insurance claim for replacement parts and loss of revenue was settled in full

Construction at our Waste-to-Energy facility in Avrshire has progressed as planned with completion expected in 2025. The facility has been in development for four years and will be capable of processing over 185,600 tonnes per annum of non-recyclable household, commercial and industrial

waste which would otherwise be sent to landfill or exported. This will generate 17 MW of low carbon electricity enough to power 30,000 homes, and it will be the first large-scale, subsidy-free waste to energy project in western Scotland.

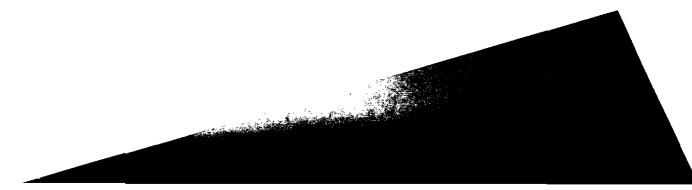

Our 26 reserve bower sites have continued to perform ahead of expectations due to lew generation from wind assets over the winter 2022/23, resulting in demand for additional generation to balance the grid

2. Lending

Our property lending business continues to be a substantial part of the Group, representing around 15% of the Group's net assets, comprising short- and medium-term secured loans to experienced property professionals. Our average loan book constituted over 224 loans this year to borrowers in the UK.

Our loans are written at conservative loan to value ("LTV") levels (below 70%) to protect against a fail in property prices. At the end of the period, the average LTV for the loan book was 60%. The turbulent market this year has reinforced the importance of this strategy, which has served the Group well over its 13 year, history. We are naturally taking a cautious approach when assessing new lending opportunities considering the changing economic outlook.

Since inception in 2010, the Group has lent £2.49bh of property loans and has had a strong record of recovering its capital. However, the abrupt increase in interest rates in the current year has made it more difficult for some borrowers to refinance at the end of their loan term. This has contributed to a small increase in provisions and, at year end, we recorded a provision of £30m against one commercial loan. Though we acknowledge this provision feels noteworthy, for context it amounts to around 1% of the Group's net assets and is an outlier compared to our track record. This does however serve to emphasise the importance of our experience and approach in the sector, including disciplined due

Directors Report'

diagence conservative loan to value ratios and an Edwa develops mid market family homes in South ability and willingness to fee activity in this sector during times of economic uncertainty. We will breadly in the with budget despite challenging continue to adopt this approach thioughout the conditions across the industry. We plan to grow time coming year.

3. Fibre

in March, we successfully consolidated our regional fibre broadband businesses, by morging our four fibre to the premises" (FTTP) businesses – Jurassic Fibre, Swish Tipro Giganet and AllFoints Fibre into a new business, Fern Fibre Trading Timited (FFTD) Given wider market consolidation and opportunities in the market, it has made economic sense to bring together these separate businesses now rather than later. As part of this ipost year end, we undertook a restructuring exercise to realise some operating efficiencies, including a reduction in FFTI's overall neadcount.

In the year we continued to invest capital in expanding our ultrafast FTTP proadband incliverks. The geographic focus of our networks is the Home Counties, the South and South West of England Yorkshire and the Miolanos, however we also provide connectivity to homes and businesses throughout the UK using networks owned by other operators. The business is generating revenue from residential customers and small pusinesses who benefit from the superior connectivity offered by fibric versus the old copper networks.

The intentional growth in our fibre division has resulted in a sport-term decrease in profitability of the Group, as we invest into the infrastructure

4. Housebuilding

Our notwebuilding dit ston remains an important cart of the Group at approximatel, 8% of net assets and is comprised of Elista Homos (Elista) the houseoutding business we acquired ast year and Rangeford Hordings Limited (Pangeford) our retirement fitting pusiness.

Ethia develops mid market family homes in South East commuter towns and ullages and is performing proadly in The with budget, despite challenging conditions across the industry. We plan to grow if in a measured way, organically and dia strategy acquisitions over the next five years a strategy solidified by the acquisition of Millwood Designer Homes, which expanded Elivia's footprint to Fast Sussex and Kent Its ambition remains to deliver 750 homes per year.

Parageford continues to expand its portfolio with three villages fully open and additionally lages under construction in Chertsey and Stapleford (near Cambridge), drie to open in 2024 and 2025 respectively. We are excited by the opportunities for growth in this sector with two further sites acquired in Dorking and East Grinstead. The design work for these villages is well underway.

Inflation and Interest rates

EM. Treasury forecasts that inflation is likely to surpass the Bank of England's target until 2025. A relatively short period of high inflation such as this does not tend to have a material impact on Croup operations. For example, in our energy division, the value of our renewable energy assets is determined by discounting their projected future cashflows over the life of the respective assets (typically 20 plus years). If the outlook for long term inflation were to increase, the impact on our share price should be positive, as increased inflation, will increase the revenue each operating site would expect to make which increases their value.

The rise in interest rates is seen as a return to normal after a long period of corr, low rates. The impant of this risiour business has been broad an eutral as the Group is intentionally intructured such that it does not experience significant value emision when interest rates change. An important part of this is a policy of taking out interest rate protection on the coans, to the Group's energy assets giving us protection from interest rate increases. This has

Directors Report'

resulted in our renewables assets loans continuing to incur low interest costs, at a rate fixed when interest rates were lower.

Rising interest rates are felt more closely in our lending business and as such we continue to take a cautious approach in this sector. We carr, and do, reduce the number of loans we write or after the risk profile of our loans through reducing loan to value ratios, or pausing activity in certain parts of the market, as appropriate

Current trading and outlook

Since the year end, the Group has continued to perform steadily from an operational perspective and in the with our expectations. Our growth targets for the Group over the medium and long term remain unchanged, and we continue to focus on maintaining a diversified business that is capable of delivering predictable growth for snareholders.

In November 2022, the government announced the introduction of an Electricity Generator Levy ("EGL"), a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and applies to electricity generated from renewable biomass, and energy from waste sources. The Group was not required to pay EGL in the period however we do expect to pay this in the next financial year. We had already anticipated the impact on the returns generated from our energy portfolio over the next five years.

Our property lending business continues to perform strongly with a diverse loan book comprising 224 loans on average. We focus on short-term loans (our current loan average term is 20 months) which chables us to swiftly adapt to changes in outlook. We consider this is particularly important in the current economic crimate.

Our recently consolidated regional fibre business. Fern Fibre Trading Limited ("FFTL"), continues to build out its network to accelerate full fibre delivery in the UK, while also focusing on sales and marketing activity selling fibre products directly to customers. As it continues to grow and build out its infrastructure, we do not expect it to report an accounting profit in the coming three to five financial years.

We are pleased to report that in October 2023, the Group raised £217m from existing shareholders through an offer to subscribe for further shares. The funds raised will allow the Group to grow slightly ahead of plans in certain sectors, nowever we do not expect this to materially change our business mix, which will continue to evolve in order to continue to target modest growth for shareholders in the years ahead.

"Our mix of business areas has developed over time, driven by the overarching importance we place on meeting the objectives of our shareholders."

Our business at a glance

What we do

Ferni Trading Limited is the parent company of nearly : 2. Lending division 330 subsidiaries itogether the Naroup 1 The Group 1. We liend on a short, and medium-term, secured operates across four key areas lenging, lenging tibre 🗼 basis to a larger number of property professionals, and houseboking, which includes retirement living. Over the past 15 years we have built a carefully. diversified group of operating businesses that are well positioned to deuker origiterm value and predictable growth for our shareholders

1. Energy division

We generate power primarily from sustainable sources and self the energy produced either directly. to industrial consumers or to large networks. Many of our renewable energy sites qualify for government incentives, that represent an additional, intlationlinked, source of income. We have also utilised our expertise in renewable energy to construct facilities. for sale or Engoing operation. At year end the Group. had fourteen sites under construction.

and our financing enable businesses to build and improve residential and commercial proporties

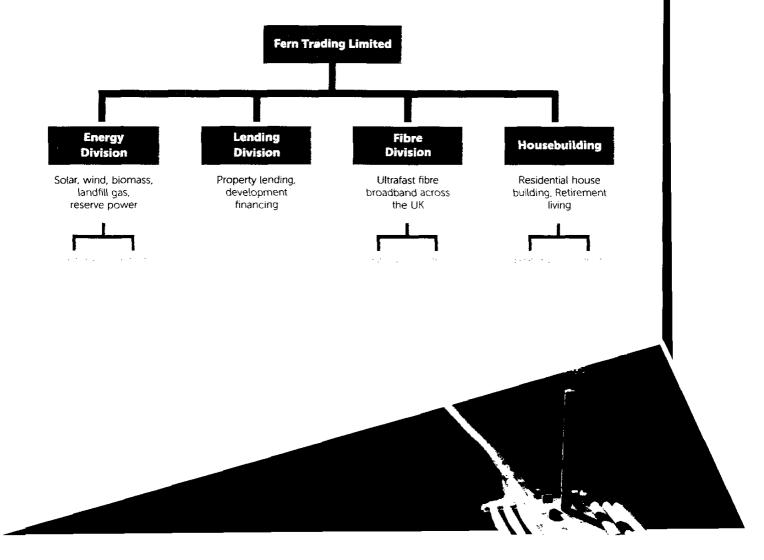

3. Fibre division

We own and operate thre broadband networks across various areas of the UK. We build the networks and connect them to nomes and pusinesses to brovide our customers with utrafast fibre broadband.

4. Housebuilding division

Our residential housebuilding operation develops rites from design stage to final construction to ensure the delivery of quality workmanship

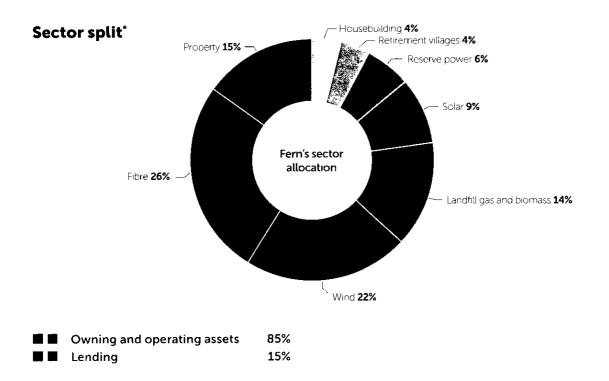

Our retrement villages provide high-quality, contemporary living spaces with a friendly community at the heart of our sillages.

1

2 | STRATEGIC REPORT

Our business at a glance

Making a difference

We are proud to operato a Group that makes a positive contribution to society across the UK, generating renewable energy, providing quality retirement living and new homes, and delivering high-speed broadband to underserved areas of the country. This is aligned to our environmental, social, and governance ("ESG") policy, which is orafted and approved by the Board of Directors.

Energy

We own 229 operational energy sites, producing 3,069GWh a year. That's enough energy to power over a million homes

Our combination of technologies across solar, wind, reserve power, biomass and landfill gas complement each other well, helping the UK to meet its energy targets irrespective of the weather

The Fern Community Fund is a social enterprise run by the Group, which works to distribute community funds generated from our wind farms. This year, the Fern Community Fund has committed £1.4m to local community groups, supported 22 local university students through our Student Scholarship Fund and provided a winter fuel subsidy to 740 residents who are local to the Group's sites.

Lendina

The 191 new loans we advanced during the year have helped to fund the construction of much needed residential properties, as well as commercial property creating valuable new employment

Fibre

Within this division we are building full fibre connectivity to hundreds of thousands of properties in small towns and villages that do not currently have access to internet connectivity, ensuring they are fit for modern ways of working and communicating

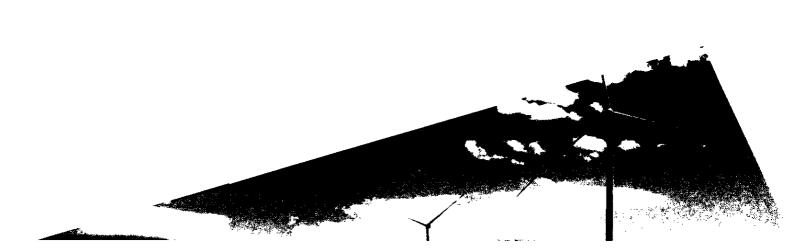

In Vorboss, we are building a dedicated high-speed fibre network for businesses in Lendon, provioing the digital infrastructure that the city needs, and removing bandwidth constraints to ensure the economy remains competitive

Housebuilding

Our housebuilding division sources over 74% of the timber utilised for frames in a sustainable way and installs solar panels or air source heat pumps in all properties, leading the way in this sector and helping reduce carbon emissions.

Our retirement villages provide high-quality, contemporary living spaces, with close to 500 homes currently in place. We have riearly 400 further units in various stages of development, and our secured pipeline sites offer potential for another 300 plus units.

A friendly community is a key differentiator for our retirement villages, which is why our developments provide central facilities and a hub of social activity for our residents.

Our strategy in focus

Our businesses

Energy

Inrough our energy division, the Group owns and operates energy sites which supply gas and electricity into the network, as well as constructing renewable energy sites for future sale. Of the 229 energy sites that we own and operate, 203 provide renewable energy, contributing to the Group's position as one of the largest orciducers of renewable energy from commercial scale solar sites in the IUK. Renewable energy sites are typically expected to generate stapic profits for mainty years, due to low operating costs and revenues being linked to inflation. As such owning and operating these businesses is attractive to the Group because of their potential to deliver predictable profits over the long-term.

Renewable energy sites generate power from sustainable sources and sell energy produced either directly to large industrial consumers or to the network. Many of our renewable energy sites also qualify for government incentives, which means a portion of the generated energy penefits from rates that are locked in for a specified period unce a qualifying site is operational and accreditation has been granted. This has reduced some of the impact of the volatility in long-term energy price forenasts. As new sites built in the UK do not qualify for the same historic government incentives, we are seeing more interest in the market for sites like the ones we own and operate.

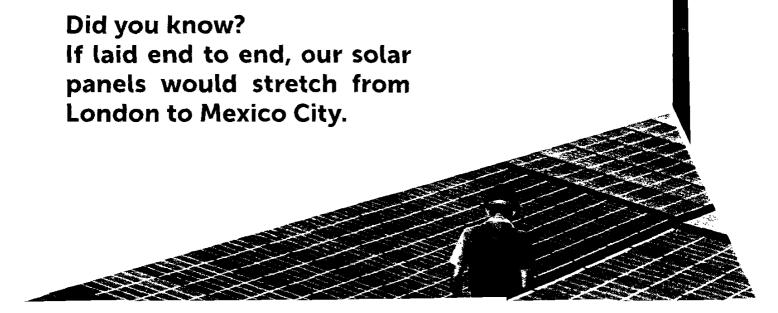

Owning and operating energy sites is a core part of our strategy and currently makes up approximately 50% of the Group's net assets. This part of the Group

has generated high returns this year due to market conditions but crucially it has the obtential to provide stable returns over the long-term. This combination is key to our strategy to balance risk and roturn across the range of Group activities to generate target predictable returns for shareholders.

"Our energy sites generated 3,069 GWh of power."

Due to the high quality energy cites that we own, we are able to secure long term financing from mainstream banks at competitive rates to enhance our returns, which helps us to deliver the level of returns our shareholders expect.

White our renewable energy business started its life in the solar energy sector, the Group has built expertise across other adjacent technologies including onshore wind piomass and pridfill gas supported by reserve power parts which provide backup power to the National Grid Trie Group therefore benefits from diversification within the part of its business since weaker conditions for energy production from one technology often result in stronger production elsewhere. The Group also gains significant benefit from its scale in this sector as our business is spread across 229 sites, vasity reducing the risk to Group profitability if one site suffers an operational disruption.

Our strategy in focus

In addition to our UK sites, the Group is developing sites overseas, in jurisdictions that we understand well. These present an attractive opportunity as they build on our sector expertise in countries at an earlier stage of renewable development. Currently we operate wind farms in Ireland and France and solar sites in France, in addition to a wind farm under construction in Poland.

During the year we acquired the rights to multiple commercial rooftop sites through our commercial rooftop solar developer. Zested, on which we will build solar panels to generate electricity for the tenants of the building. Our sites under construction in Australia came to fruition this year, with Darlington Point, a large scale solar site sold at the start of the year, and Dulacca Wind Farm achieving commercial operation, shortly, after year end, and being subsequently sold in October 2023.

Lending

Lending continues to be a core part of our business and has provided the Group with a profitable and cash generative sector over the past 13 years. This well-established part of the Group mainly consists of property, lending, which provides short-term financing to experienced professional property developers, buy-to-let landfords seeking bridging finance, and development financing, which provides short- and medium-term financing to companies.

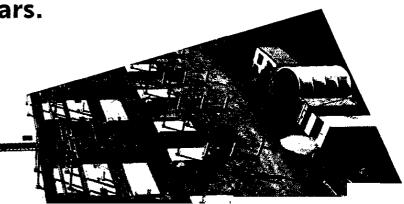

A key benefit of the scale of the Group and of the business that we have built up in this sector is our ability to mitigate risk through having a large number of loans spread across relatively small projects to individual borrowers. We proactively manage counterparty risks through undertaking careful borrower due diligence, taking security over assets typically on a first charge basis and maintaining conservative loan to-value ratios. Not all loans will perform as expected and these measures help to minimise the impact of performance issues on an individual loan. This is further mitigated through the value that we lend to individual borrowers, relative to our total loan book, which is spread on average across 224 loans.

Fibre

Our fibre division includes four strategic areas – fibre to the premise ("FTTP"), enterprise fibre, software and mobile

Through our ETTP business, we are building new physical fibre networks for communities in the UK and have completed new fibre infrastructure in underserved parts of Devon, Somerset, Dorset, Wiltshire, Hampshire, Worcestershire, Yorkshire and the Home Counties, spanning hundreds of thousands of properties

Lending continues to be an important part of our business and has provided the Group with a profitable and cash generative sector over the past thirteen years.

Our strategy in focus

data centres and telephone exchanges in the UK. with homes and publicasses, effectively replacing the 🔡 our FTTP business is now, well positioned to be a key copper wires that were laid in the first half of the 20th century folidate digrassic Swish and Organet have operated a vertically integrated model where they own the fibre, alongside the end customer relationship as the internet service provider (IISP): Following the merger of our ETTP aivision. FFTL will follow the wholesale strategy of AllPoints Fibre. owning the tipre infrastructure and onbuarding multiple ISPs. We will continue to develop our own. ISP service and brand (Cuckoo), which will selfconnectivity on our consolipated network to endcustomers alongside other 'SPs. In an increasinglycompetitive market, a wholesale strategy increases. the opportunity to generate revenue from the network as multiple counterparties can self access to it, rather than just one ISP ias per the vertically. integrated models

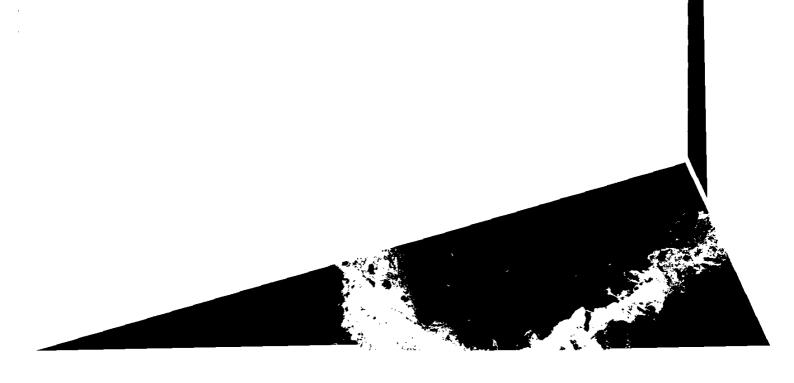

The merger of the ETTP companies took place in March, with the final three months of the year focused on bringing the operations of the fourcompanies into one, increasing efficiencies and economies of scalo Separately the companies achieved a great deal, each building local networks, onboarding customers and dervering butstanding customer service. The benefits of banging them. together and launching a single wholesale offering across their networks will create greater opportunity. for the pusiness and potential customers in future

Building a new network involves connecting large 1. The UK remains behind other European nations when it comes to households accessing fibre, and player in bringing ultrafast connectivity to continuities around the UK

> Through vorbiss, we are building an enterprise network in Landon to supply business to-business. ('P2B') enterprise connectivity to business customers. Vorboss has installed over 500km of fibre optic cables in London since 2020 and has spent the last year launching its products to large businesses, including market leading 10Gbps and 100Gbps products

> Our revolutionary software business, Vitnft is building the orchestration systems that the next generation of fibre broadband companies need to run their networks efficiently in doing so, they are both supporting our own FTTP business in achieving its strategic geals and also enabling external customers to climinate legacy constraints with connectivity and autonomous management services

> Mobile is our newest area of strategic gevelopment During the lear Vicifi Digital expanded into the micalle network market, becoming a Mobile Virtual Network Aggregator (MVNA). This will enable us to launch an innovative mobile platform to business and consumer facing companies to operate their fown Mobile Virtual Network Operations in the UK

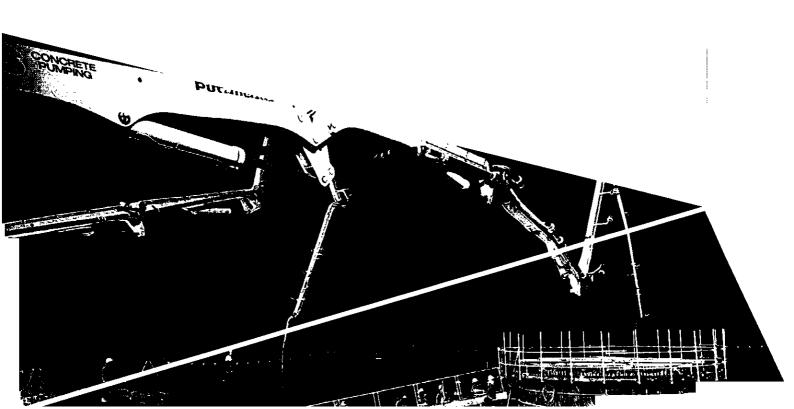

Our strategy in focus

Housebuilding

Our residential building business, Flivia, is a full-service housebuilder which acquires land and develops sites from design stage to final construction to ensure the delivery of quality workmanship. Flivia strives to deliver high quality and design led aspirational homes, comprising a mix of open market and affordable homes, with over 25 sites under construction. Elivia is headquartered near Beaconsfield with a geographical footprint in Buckinghamshire, Berkshire, Hampshire, Surrey and West Sussex, in January 2023 we acquired Millwood Designer Homes which has allowed expansion into the adjacent regions of Kerit and East Sussex, complementing Elivia's existing locations.

As part of our housebuilding division, the Group operates in the retirement living sector. Our retirement living business. Rangeford, owns and operates three retirement villages in Wiltshire, North Yorkshire, and Gloucestershire, is currently constructing two sites for future operations, and has exchanged on two further sites, spread across the country, with the intention of developing these in the future.

Directors

The experienced Board of Directors for the Fern Group are responsible for determining the strategy of the business and for accounting for the Company's business activities to shareholders. They have a set of complementary commercial, energy sector-related and strategic skills.

Paul Latham

Paul was previously the Chief Executive of Fern. He has had various general management and internal consulting roles across a number of sectors and brings with mini a wealth of industry and business experience including building key elements of the infrastructure for Capita. One Bank (Europe) plc as it grew from a start-up business to a company with 2,000 employees. Paul has worked at Octopus investments since 2005.

Keith Willey Transfer of the control of

Keith is an associate professor of strategy and entreprenduish,plat London Business School. He also holds various non-executive directorships and advisory roles at high growth and more mature companies. In his role as non-executive chairman he is responsible for the effective operation of the Board, as well as its governance. He brings to the Fornibus ness independent commercial experience gained from his time in academia, private equity investment, consulting and various hands-on operational roles.

Peter Barlow

Peter has over 30 years experience in international financing of infrastructure and energy. As a senior executive for International Power, Peter was responsible for an anging over \$12bm of project and corporate funding as well as banking relationships and treasury activities. He has spent over 20 years working internationally for HSBC, Bank of America and Nomura, financing acquisitions and groenfield projects in the energy and infrastructure sectors. His combination of Board-level financing and energy experience over numerous energy sub-sectors, and his all-round knowledge of all the sectors in which Fern operates, adds significant value to the operation of the Board as well as its strategy formation and deployment.

Sarah Grant

Sarah had worked at Octobus Investments binde 2013, she has a particular focus on dobt raising and relationships with har ky and little renders which she chordinates across the Octobus group. She also charts the Octobus Investments investment Ediminitee and claid render of Cotobus AF Management Ltd. Octobus Investments is a key sumher of recourse and expertise to Ferril Sarah's dual role ensures that the relationship between Octobus and Ferril works well and always operates in the bast interests of Ferril chareholders. She has over 25 years experience and previously held roles at Societe Generale and Pothschild.

Tim Arthur

Times a chartered accountant with more than 25 years informational experience as a finance director of both public and private companies. In fail, the worked fur Price Waterhouse in Birmingham and Chillago More recently he was Chief Fill and all Officer of lightsolarce Penaluative Endry, India grobal leader in the funding, device powent and long term independent of order prictopolital, projects. Timestings extensive financial and accountancy knowledge to the Ruard accountancy knowledge to the Ruard account to be usinesses defined from his even size positions.

Principal risks and uncertainties

Principal risks

Management identify, assess and manage risks associated with the Group's business objectives and strategy. Risks arise from external sources, those which are inherent commercial risks in the market, and from operational risks contained within the systems and processes employed within the business. Overal, risk exposure is managed across the Group through the diversification of activities, both by sector and geography.

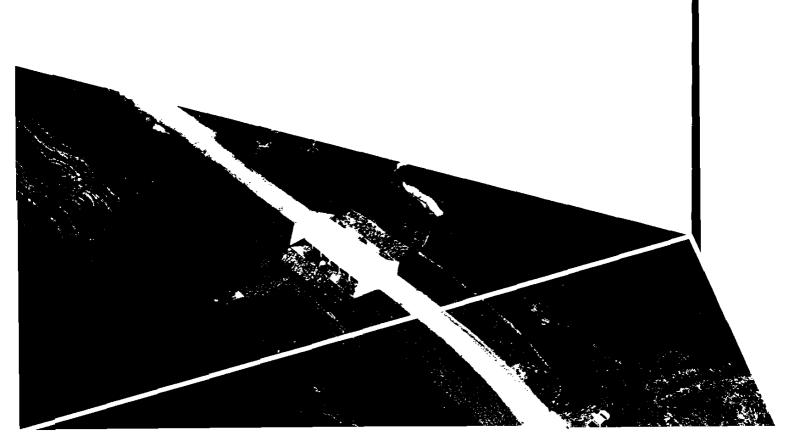

The principal risks that the Group are exposed to are described below, along with the mitigating actions we take to reduce the potential impact of the risk. We also include our assessment of whether the likelihood of the risk has increased, decreased or remained the same.

Energy Division **Mitigations** Change Risk · Contracts are entered into which fix the income for a Market risk: portion of the energy generated by our sites The energy sector is experiencing · Long-term government backed offtake agreements are significant turbulence and there is a risk that forecast, evels of income in place, such as the Renewable Obligation Certification I ROC1 scheme 29% of our energy income was generated are not achieved due to changes in from ROC revenue wholesale energy prices, off-take We engage with the government and the Office of Gas and contracts or government subsidies. Electricity Markets ("CFGEM") to contribute to an industry voice Due to this furbulent environment No change with policy makers who set future regulatory requirements the potential for increased Intervention by the regulator is also a risk Changes in Government policy may result in reduced income streams within the group due to additional Operational risk: · Unpredictability of the weather is mitigated through Levels of energy produced may diversification of technologies and location of sites Regular servicing of assets is undertaken to ensure assets be lower than anticipated due toare kept in dood condition and minimise the risk that assets sub-optimal weather conditions No change are unavailable for a longer benedor performance ssues with equipment, which may result in significant und anned downtime · Management ensures only a small portion of the Group's Financial risk: lassets and revenues are expected to be derived from Revenues (from energy generation): or sale proceeds (from the sale of liciverseas sitos sites) generated from civerseas No change sites are lower than expected due to fluctuations in foreign exchange rates The Group enters fixed price contracts with confractors Construction risk: where appropriate to reduce exposure to increasing costs Construction of the sites takes tunger or is more costly than No change anticipated due to resource availability or increased cost of raw imateriais

The strategic report was approved by the Board of Directors on 20 December 2023 and tigned on its behalf by

PS Latham

Director

20 December 2023

Corporate governance

Section 172 (1) statement

The Board consider that they have adhered to the requirements of section 172 of the Companies Act 2006 (the "Act") and have, in good faith, acted in a way that would be most likely to promote the success of the Group for the benefit of its members as a whole (having regard to all stakeholders and matters set out in section 172(1)(air) of the Act) in the decisions taken during the year ended 30 June 2023.

In the performance of its duty to promote the success of the Group, the Board has regard to a number of matters, including the likely consequence of any decisions in the long term, and listens to the views of the Group's key stakeholders to build trust and ensure it fully understands the potential impacts of the decisions it makes. The Board fulfills these duties partly by delegation to committees and the Boards of subsidiary undertakings, who operate within a corporate governance framework across the Group

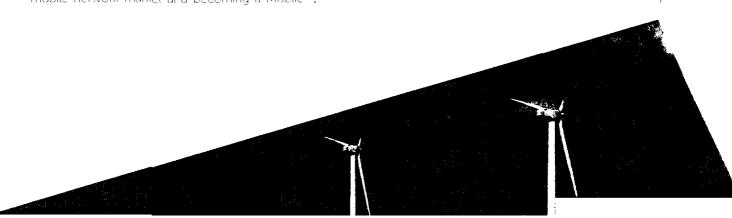

At every Board meeting a review of health and safety across, the group, financial and operational performance, as well as legal and regulatory compliance, is undertaken. The Board also review other areas over the course of the financial year including the Group's business strategy, key risks, stakeholder-related matters, diversity and inclusivity, environmental matters, corporate responsibility, and governance, compliance and legal matters.

Principal decisions

We define principal decisions taken by the Board as those decisions that are of a strategic nature and that are significant to any of our key stakeholder groups. The Board consider that the following are examples of principal decisions it made in the year ended 30 June 2023.

 Evaluating and deciding to create a new strategic area of development by expanding into the mobile network market and becoming a Mobile. Virtual Network Aggregator ("MVNA"). The Board considered this opportunity as well aligned and complementary to the existing fibre broadband operations, which would help to deliver long terminature.

- The Group decided to further expand its foctprint in the housebuilding sector, by acquiring Millwood Designer Homes, a company with values similar of those of Elivia and the Group Millwood is considered an award-winning regional homebuilder based in Kent which built around 100 homes a year. This follows the decision made in May 2022 to diversify the Group's asset base and entering into this new sector has been well thought out with long-term growth in mino. The Board considered the opportunity and how it aligned with our objectives to make a positive contribution to the community and environment, by building new homes to address the UK's shortage of properties.
- · The Board decided to commence a group reorganisation which involved merging the four FTTP business into one new business, Fern Fibre Trading Limited FFTL will focus on two separate strategies, while working closely together (1) wholesale strategy, owning the fibre infrastructure and onboarding multiple ISPs in AilPoints Fibre Networks and (2) developing our own ISP service and brand, through Cuckoo Limited. The Board evaluated the possible impact on stakeholders ncluding shareholders and observed that the new structure would not change how the Board and Group engage with shareholders or their view of the Group, but would be beneficial in providing improved governance and oversight of the sector as well as enhancing the future prospects

Corporate governance

Business strategy

Our business strategy is set out on pages 12 to 15 of the Strategic Report. Management prepares a dictanced Group budget which is approved by the Board on an annual busis and forms the basis for the Group's resource planning and deployment decisions. In making decisions concerning the business plan, the Board has regard first and foremost to its strategic focus, but ulso to other matters such as the interests of its various stakeholders and the long term impact of its actions on the Group's future and reputation.

Shareholders

Shareholder relations and generating shareholder value is a key consideration when the Board is making strategic devisions. The prime medium by which the Group communicates with shareholders is through the annual report and financial statements which aim to provide shareholders with a full understanding of the Group's activities and its results. This information is published on our website at www.ferntrading.com

Employees

The Group's employees are fundamental to the civerall success of the business. The Directors fulfitheir duty to employees by entrusting oversight to subsidiary Boards.

The directors of the subsidiary undertakings manage the day to day doc sion making, engagement and communications with employees and ensure that people are treated fairly and are valued with respect to pay benefit and conditions. We fully realise that our employees wish to be informed and consuted on matters after ting their work and to be into textuin problems of inglathering their work and to be into textuin problems of inglathering their work and to be into textuin problems of inglathering their work and to be into textuin to a policy of good communication at all levels and delarm to restablish a climate with child constantly encourages the open fit work information and deas. Presently, this includes minority team briefings at a rocal links, and they published on of informatic, key

performance indicators cowling output operating costs and health and safet,

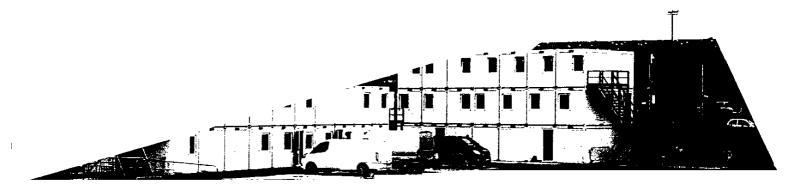

The health and safety of our employeds in the workplace is a continual rocus for the Group, given its broad operational business. The Directors review health and safety reporting at each board meeting to ensure appropriate policies and procedure; are in place to protect the health and safety of our employees and contractors. Where there are potential deficiencies or issues, these are followed up and resolved on a timely basis, with the Board having eversight of the actions taken.

The Group outsources activities and management of certain operational activities to external suppliers. Where activities are outsourced the Board ensures that they are managed by reputable suppliers who meet all the recevant industry and regulatory commitments as well as treating employees fairly Expected standards are documented in all service contracts and adherence to these are continually monitored by Board through their service agreement with Octobus Investments: mited

Suppliers and customers

The Group acts in a fair mainter with all suppliers and customers and seeks to maintain strong pusiness relationships with them. This is achieved by all contracts being negotiated through a fair and transparent tender process which includes assessing the impact on the long-term objectives of the Group. We review our payment processing times against contracts every six months to ensure suppliers are bald cromptly and this information for the company is available on the www.gov.uk viebsite.

The Group ensures in acts fairly and maintransparent manner to fall customers across fall diusions and services, and actively engages to resolve any disputes or nefault. The Poard closely importors customer metrics and engages, with the management ream to understand the issues if business performance does not meet customers' expectations.

Corporate governance

The Board considers Octobus Investments Limited to be a key business partner and supplier with responsibility for the provision of operational oversight, financial administration and company secretarial services.

Community and environment

The provision and operation of sustainable infrastructure is at the centre of the Group's strategic goals. Through its business activities the Group seeks to make a positive contribution to the community, environment and economy. Our renewable energy business is helping the UK meet its renewable energy targets, our fibre network will give people in rural communities access to high-speed broadband, and our retirement villages create communities of people in their later years, reducing the strain on our healthcare services. We are also building new nomes to address the UK's shortage of properties.

Business conduct

As Directors our intention is to behave responsibly, ensuring management operate the business with integrity and in accordance with the high standards of conduct and governance expected of a business such as ours. Our intention through our business strategy (butlined on pages 12 to 15 is to operate in sectors and work with other businesses that share our values

Business ethics and governance

The Board is responsible for ensuring that the activities of the Group and its various businesses are conducted in compliance with the law and applicable governance—and—regulatory—regimes,—and—in adherence with prevailing best practice for the relevant industry. This includes reviewing internal controls, ensuring that there is an appropriate balance of skills and experience represented on the Board, and ensuring that the financial statements give a true and fair view of the state of affairs of the Group Further detail can be found in the statement of directors responsibilities on page 38. In the year to 30. June 2023, no areas of concern have been flagged in this regard.

Employee, human rights, social and community issues, environment policy and anti-corruption and bribery matters

The Board's policy on employee, numan rights, social and community ssues, environment policy and anti-corruption and bribery matters is discussed in the Directors' Report on page 38. The Board actively promotes a corporate culture that is based on ethical values and behaviours.

Task force on Climate-related Financial Disclosures ("TCFD")

In December 2015, the TCPD was established by the Financial Stability Foard (FSBI) to develop renommendations and encourage companies to take account of how the liberitist and manage of mate-related sques The TCFD requires companies to produce of mate-related discussures across four key pillars. Covernance, Strategy, Risk Management and Metrics & Targets. The TCFD has noted eleven key recommendations, across these pillars that enable companies to provide information to shareholders and other stakeholders.

The Group's operations play an important role in the JR's long-term transition to a net zero economy, as renewable chergy and the development of lower carbon alternatives are critical to a move away from fossil tuels. Capital deployment in renewable energy assets, such as our 80 ground-mounted solar sites, enables our business and shareholders to generate returns, from this transition, whilst having an inherently positive impact on climate change and the environment.

Of the Group's divisions, the Board considers the energy division to be most at risk to climate change and conversely most able to take advantage of the apportunities presented by a transition to a lower-carbon economy. Whilst the Board considers the impact of climate inlated issues across all our energy tending fibre and housebuilding including retrement living; divisions, the disclosures set out below are mainly with reference to the Group's energ, subsidiaries

Statement of Compliance

The Board is pleased to confirm that it supports the TCFD's laims, and objectively and has included compter-related financial disclosures in the with the four key billiant, and ciclien recommendations in addition to imprigate the financial invasor fluorisamability risks we apply Custamability Aucounting.

Standards Board (ISASE): guidance on materiality, assessing whether and to what extent sustainability issues (including climate risks) could impact performance.

Governance

Disclose the organisation's governance around climate-related risks and opportunities

a) Describe the board's overlight of climate-related risks and opportunities

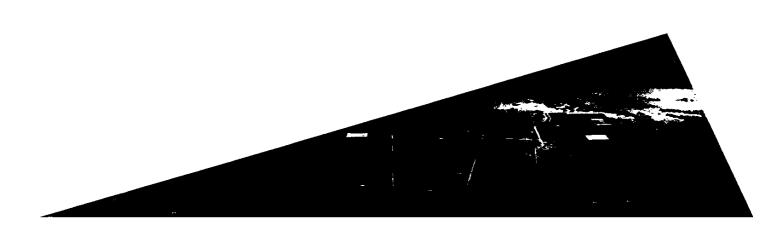

Climate-related risks and opportunities form part of the Board's strategy. A key aspect of the Group's business model, determined by the Board, and adhered to by divisional management reams, is to deploy capital in renewable energy assets to benefit from the wider transition to a lower-carbon economy.

The Board is responsible for monitoring climate-related government policy and physical climate changes to inform the deployment strategy and the materality of risks faced by the Groups subsidiary companies. The Group Board monitors strategic risks and opportunities financial performance and any adverse or positive impacts on revenues or costs that could result from climate-related risks and opportunities.

On an annual basis, the Group Board review and approve an ESG Policy document that was first adopted in September 2020, with the latest version approved in April 2023. The Poard therefore ensures that each new opportunity and existing divisions on an on-going basis adheres to the Group's ESG policy.

by Describe impragaments role in assessing and impracing climate-related risks and proportunities.

At a company level, transition and physical risks and opportunities, are idensidered throughout

Task force on Climate-related Financial Disclosures ("TCFD")

the acquisition, construction and due diligence process right through to the an going management. The Board have reviewed and approved ESG chienal specific to the Group's business that are considered by commercial and management learns, including those operating in the fibre and housebuilding sectors. The day-to-day management and assessment of climate-related hisks and opportunities is therefore undertaken by divisional management teams and reported to the Board where necessary

All of the above ensures the Board's oversight and management of climate-related risks and opportunities includes functions established to provide good governance over the Group's divisions. This enables the Board and subsidiary companies to all be aligned on approach to climate-related risks and opportunities.

Strategy

Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy and financial planning where such information is material.

a) Describe the climate-related risks and opportunities the organisation has identified over the short, medium and long-term

Given the Group's long-term experience in its operating sectors and strong links to its suppliers, particularly in the energy and housebuilding sectors, the Group is well positioned to overcome risks and take advantage of opportunities arising from crimate change. Climate related risks and opportunities are also at the core of the Group's strategy and are discussed right the way through the business, from Board level to the individual subsidiary companies within the Group's long-term business, strategy and financial planning.

The Group's fibre division will remain in growth phase for the next three to five years and management teams consider how to manage emissions and risks while achieving this rapid growth. Fibre has a positive long-term impact on the environment as once the infrastructure is in place and operating, it is seen as a low carbon technology. A well constructed and operated fibre connection facilitates a reduction in carbon emissions in the long-term due to the potential for home working and smart cities.

In the Group's housebuilding division, one major risk is ensuring short- and long term construction processes are managed in line with potential exposure to climate risks, such as flooding. The Group aims to mitigate this risk, as all developments within the housebuilding sector (including retirement living) have technical flood risk assessments carried out before land is purchased.

The Group is also subject to regulatory risk as all homes and developments must satisfy environmental planning conditions, which may change as regulations are introduced to support the UK's transition to net zero. This presents the Group with the opportunity to go above and beyond applicable regulatory standards for energy efficiency of new build homes and become a leader in this regard. It is important for the housebuilding division to satisfy all environmental planning conditions and seek financially viable opportunities to exceed regulatory standards. The Group looks to develop strategies around progressive adoption of Modern Methods of Construction ("MMC"). including timber frames, solar panels, air source heat pumps and electric vehicle charging points where appropriate. Where possible, the Group moves operational assets onto renewable energy

Task force on Climate-related Financial Disclosures ("TCFD")

tariffs and carefull, chooses suppliers to reduce : the impact of climate related risks

Aithin the onergy arcsion, the Group is mastrong position to take advantage or opportunities and mitigate risks that arise from the transition to a net zero economy. The main short-term lisk arises from competition as competitors could der tifu gaps as the , seek to deploy more capital. into renewable energies. The Group's successful: track record notps it seize apportunities denived from the need to tackle climate change and continue to acquire and build new turne-scale impact projects, such as our Waste to-Energy or the expansion into commercial solar rooftood

The Group also faces risks from increased variability in weather patterns and potentially more extreme weather creating difficulty to accurately budget production and financial performance. The Group constantly assesses the risks and opportunities presented by canable. weather as part of engoing due diligence and performance management

Over the longer term irequiatory changes or uldimpact thir Group and could lead to changes. in government incentives for constructing and operating renewable onergy assets. The Groupcould be more exposed to volatile power prices. as renewable energy becomes an increasingly sizeable proportion of total energy produced by the UK market. To mitigate this risk, the Group. enters into short, and long-term contracts which fix the income for all icr a portion of the energy. generated by a site liong term government. par ked apreements are also in place, such as the Renewable Objection Certification - PCC scheme. This aligns with the Group's drategy. of continuing to devotor, predictable is no term. recenue streams proclaing restrence against ud atre pricing changes in the UK energy market.

As new technologies at renephable energy or nousebuilding sites are developed and become more reliable, opeditionities may arise for the Group to integrate these as the technologies mature and become cheaper. However, there is a risk that deployment into newer technologies. could underperform compared to the business cased. Whilst representing a risk lit is expected. trial the negative impact would be immaterial to the Croup's operations, due to diversification.

b) Describe the impact of climate-related risks and departunities on the organisation's business. ctrategy and financial planning.

> Financial projections including those that are utilised for the preparation of the financial statements and included for budget preparations. are based on financial models. Fach model, such as company valuations or business plans, will contain different underlying assumptions on key iriputs such as bower price curves, operating. and maintenance costs or future revenues which are all impacted by transforing to a lowercarbon economy. The most material impact on the valuation of renewable energy assets is usually wholesale energ, prices and operational The Octopus Investments performance Valuation Committee is responsible for reviewing these assumptions and the sensitivities associated and is therefore considered as part of the valuation process.

> The above could impact financial returns positively if the shift towards renewable energy and sustainable homes is successful or negative . if the frankinghild your Extreme incamer such as staring ficulaing or fires could cause dan age. at the Group's bird and solar farms and nousebuilding sites, impacting any incerating and maintenance costs winter offs or impairments and progression budgets. Constructing our

Task force on Climate-related Financial Disclosures ("TCFD")

assets to the highest quality standard and going above, and beyond the relevant regulatory standards by adopting MMCs will impact the Group's operating and maintenance costs further. The Group's cost projections are captured at point of acquisition, and models are updated regularly with diversification of suppliers and appropriate levels of insurance obtained. The Group's biomass plants operate a diversified supply chain of feedstocks and strategic stores to ensure sufficient fuel stores. In case of failed fuel supply from extreme weather conditions, there is contractual recourse obligations between the site and suppliers for protection against loss of revenues.

Climate-related risks also have an impact on accounting estimates and judgements within the financial statements. The Group's balance sheet includes a decommissioning provision relating to the future obligation to return land on which there are operational biomass, wind and sofar farms to their original condition. This accounting estimate is determined to a significant degree by the future dismanting and restoration costs, as well as the timing of the dismantlement, all of which will be impacted by physical crimate risks and raw materials required for restoration. The Group engages with a third party to perform the assessment of costs to be incurred, including an assessment of future crimate risks.

 c) Describe the resilience of the organisation's strategy taking into consideration different future climate scenarios including a 2°C or lower scenario.

The Group benefits from a quicker transition to a lower carbon economy, such as in a 2°C climate pathway (i.e. limiting global temperature increase to well below 2°C) whilst taking the steps to

ensure we remain resilient to the risks associated with scenarios such as a $4^6\mathrm{C}$ pathway

Under a 15°C scenario, the world will experience a significant shift away from traditional fossil fuels towards renewable energy sources as countries and businesses alike implement strong decard onisation plans to reach net zero. Detivery on these ambitions requires a significant increase in the pace of capital deployment into renewable energy, all of which leads to a growth in the Croup's acquisition opportunities.

The main risk from a beneficial transition to renewable energies is from competition and the potential for price cannibalisation. The Group's strategy is resilient to this as they focus on being leaders in the market and seek firstmover advantages before any form of price erosion can take place. Increasing dermand for the electrification of industries will provide vast deployment opportunities for renewable assets. with rising demand supporting the power price. for electricity, mitigating place cannibalisation. The Group's housebuilding sector could also benefit from such a transition by facing lower costs on installation of solar panels or heat pumps as technologies advance and become cheaper to access

Under a 4°C scenario, it is assumed that the transition to a lower-carbon economy has been slower and the incentives to construct and operate renewables have not been forthcoming. There is also the increased physical risk of more extreme, weather detaying the introduction and operation of renewable assets. Whilst this could impact the Group's revenue potential, this would discourage competition and the Group would be well placed to take advantage of any opportunity, that arose. The Group's strategy

Task force on Climate-related Financial Disclosures ("TCFD")

is further resilient as the unpredictability of weather is mitigated through diversification of technologies and location of sites. The Group's increased deployment into the fibre lending and housebuilding sectors is just one of the methods the Group is using to mitigate possible impacts of relying on a poorly supported renewable chergy sector and tower carbon fransition that would occur in a 4°C scenario.

When comparing the two scenarios, the Group is set to benefit more from a 2°C scenario than a 4°C scenario pathway. The Board believes the business strategy is resilient and flexible to other scenario enabling the Group to continue to provide returns whilst contributing to the transition to a lower-carbon economy.

Risk Management

Disclose how the organisation identifies, assesses, and manages climate-related risks.

 a) Describe the organisations process to identifying and ausessing climate-related risks

Climate related risks are considered by management teams at both a Croup and entity level with the specific climate-related risks largely identified, assessed and managed within the deployment process.

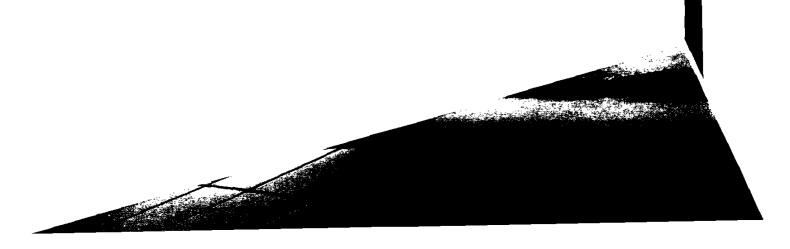

The Group takes responsibility for understanding and lastlessing leach of its group companies against a consistent framework which includes climate-related lisks in our energy sector to facinify crimate-related risks in a subsidiary; management feams use SASB tools as part of origoning idual diligence, such as ThinkHazard and or Climate Scale tools. Reloyant climate-related lisks are considered and genified ancad of capital depla, ment for new, exporturities.

is further resilient as the unpredictability of this Describe the organisations process for managing weather is mitigated through diversification of the climate-related risks.

At a divisional level, transition and physical risks are considered throughout the acquisition process. Climate-related risks are managed by incorporating questions into an ESG matrix to prompt additional due difigence on assets reduiting the review of natural hazards in the region the asset is located and any mitigation strategies can then be determined.

Describe how processes for identifying, assessing and managing climate related risks are integrated into the organisations overall lisk management.

Where material risks have been identified, the Group implements an appropriate strategy to address the ones highligored by the above processes. Strategies include diversification of the Group's operation; in terms of assets and geography, appropriate levels of insurance, and seeking different opportunities in sustainability through incrnebuildon and diversified supply chairs.

Task force on Climate-related Financial Disclosures ("TCFD")

Metrics & Targets

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

 a) Disclose the metrics used by the organisation to assess climate-related risks and opportunities in line with its strategy and risk management process.

As mentioned under the Risk Management pillar, management teams assess the relevant climate-related risks and opportunities of potential acquisitions in relation to set criteria. The ESG Risk Matrix used for our energy assets has a total score of 15, with a score of 9 or more required to indicate compliance with ESG policy requirements.

b) Disclose scope 1, scope 2 and if appropriate scope 3 greenhouse gas (GHG) emissions and the related risks

The Group's location based scope 1, 2 and 3 emissions are disclosed in the table below in accordance with SECR, the Group's scope 3 emissions include only those relating to business travel.

Throughout the year, we have continued to deploy capital in expanding the fibre division resulting in an increase in emissions as this is a function of growth and headcount increase. This is highlighted by the Group's Scope 2 emissions rising by 5% in FY23, caused by increased energy consumption, despite the overall emissions.

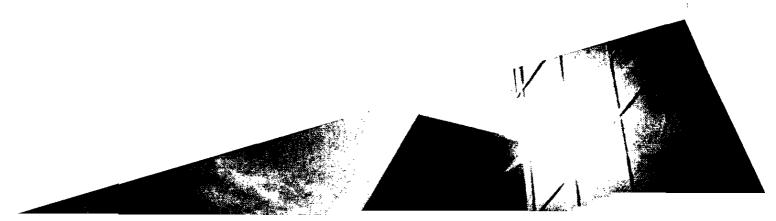

reduction across the business. While our fibre companies are focused on the end goal of building a network the journey along the way is just as important.

The increase in emissions from our Fibre division has been fully offset by reductions in emissions from our reserve power sites, which account for 90% of reported emissions. Our 26 reserve power sites provide vital back-up power to the National Grid in times of peak demand, and emissions are expected to vary year on year, due to fluctuations in the energy generation required to balance the grid and supplement baseload power. We have thus seen a 5.2% reduction in emissions from the prior year in our reserve power sites alone, a function of the sites being called upon with less frequency.

The other primary driver of the Group's emissions are our biomass plants, which account for a further 9% of the remaining emissions. Our biomass plants use a mix of straw, waste wood chips and other fuels of natural origins, which also have the capacity to regenerate, to produce electricity.

The Group has therefore seen a headine reduction in tonnes of CO2 emitted in FY23 compared to FY22 of 5.8%, primarily driven by the lower use of fuer in the reserve power and biomass sites that the Group owns and operates, as described above, only slightly offset by increases in Fibre emissions.

	FY23	FY22	
Emissions (Location Based)	(tCO2e)	(tCO2e)	% Change
$\textbf{\#} \textit{were the property of the property of the second of the second$	CALCAMA CONTRACTOR AND AND A	селения по-дето с уменця завиня міже. А зглучаю	STATE OF THE STATE

Friery, Consumption on Win	Harris Contraction	Therengy of the	450
Provident mently of Cochotal Prengo postanction	Coss	5 (5)14	1.1%

Quality of data provided

The Group appointed Minimum, who are carbon accounting exports, to independently calculate its. Greenhouse Gas (GHGT) emissions in accordance with the UK Government's Environmental Reporting Guidelines. Including Streamlined Energy and Carbon Reporting Guidance. The GHG emissions have been assessed following the ISO 14064-2018 standard and have used the 2022 emission conversion factors, published by the Department for Business Energy 8 Industrial Strategy (BES).

The ramssions were categorised into location-based Scope 1, 2 and 3 emissions in alignment with the World Resources Institute'r. Greenhouse Gas. Protocoi: A. Corporate. Accounting and Reporting Standard, guidelines with the below definitions.

- Scope 1: All direct GHC emissrins by the Group from sources under their control teig burning fuel).
- Scope 2 Indirect GHC emissions from where the energy the Group purchases and uses is produced reign when generating electricity used in the buildings).
- Scope 3: All indirect emissions not covered by scope 2 that riccur up and down the value chair long from business trace, emilyide commuting use of sold productri distribution.

Minimum used a survey based approach to collect data allowing subsidiary companies to submit total values for different activities or detailed consumption figures. Wherever possible, primary, data was collected be it kWhs of electricity consumed, milliof natural gas burnt and kilomotres travelled by different modes for scope 3 emissions. We are pleased to report that of the data collected for the TOFD and SECR discrosures, 99% is based on actual figures submitted by the subsidiary companies.

 c) Describe the targets used by the organisation to manage climate related tisks and opportunities and performance against targets.

The Group, through the development and operation of primarily renewable energy assets innerently contributes to the UK achieving its net zero target and neips drive the transition away from rossic fuels. Although the majority of the Group's energy generating assets, such as wind and solar prelow-carbon by nature, other Group divisions are more carbon intensive and drive higher emissions. For instance, the operation of the Group's reserve power plants or the construction of our fibre, home and chergy assets. Where possible, the Group moves operational assets into renewable tariffs, and seeks to partiel with suppliers and or invactors that are like-minored in the right hate amortions.

Group finance review

Review of financial statements

The purpose of this report is to provide additional explanatory information on the financial statements. In measuring our performance, the financial measures that we use include those that have been derived from our reported results in order to eliminate factors that distort year-on-year comparisons. These are considered non GAAP financial measures.

A reconciliation of these to the financial results can be found in note 28 of the notes to the financial statements.

The financial statements show assets at amortised cost, as such they do not reflect the future value that we expect to derive from these businesses. To that extent accounting performance may differ materially from the share price and may not reflect changes in the full market value or assets or businesses owned by the Group.

There were various changes to the operational assets during the year, including the sale of Darlington Point a large solar site in Australia, and Elivia expanding their south-eastern footprint with the acquisition of Millwood Designer Homes. In March, our FTTP businesses were successfully consolidated into one new business focusing on whotesale strategy and our own ISP brand. Subsequent to year end, Dulacca, a large, wind farm in Western Australia, became operational following a two-year construction process, and was sold for a profit of £22 in in October 2023.

To support continued expansion, we built up cash reserves at year end of £157m, which serve to fund the operational needs of our divisions

		(restated)	Movement

Financial performance

The Group has reported a loss before tax of £149m for the year ended 30 June 2022, which is a fall from profit of £59m (restated) in the prior year. This is driven primarily by expansion in our fibre sector, as we continue to grow our assets and operational base, as detailed further in this report. Similarly, overall EBITDA decreased by 58% to £82m (2022, £195m), which is mainly due to operational growth in our newer.

divisions particularly fibre, and a number of provisions recognised against specific property loans. Additionally, there are two instances of extraordinary costs included in the financial statements, which are not expected to reoccur. (1) restructuring costs of £13m associated with the merger of fibre-to the premises businesses, and (2) impairments costs of £22m, associated with trading assets which were sold subsequent to year end.

Group finance review

Revenue increased by E88m to E800m (2022, f.712m). For the language of Danington, Font in July which was divien by a steady increase across all our sectors. Following the acquisition of Elivia Homes in . May 2022, revenue from homebuliding was included. for a full year in the financial results for the first time. and contributed Ebum of the £88m increase. The second most impactful increase, at £16m, was in our energy division as power generation from our operating ascets remained steady and energy prices stabilised in the second part of the year

Retirement using savy a £9m increase (45%) in revenue las we saw our sites reaching completion and buyers taking residence. Additionally, revenue from our lending division saw an increase of 15% to £49m (2022, £42m) due to an increase in the loan. book value to an average of £454m over the year.

Operating expenses for the year were in line with our expectations, with the increase primarily driven. by receive power, due to gas procurement costs. Our fibre division continuing to grow its operational base, and the associated costs resulting from the addition of Elivia prought an associated increase in staff cost, and overall for the Group, staff costs. increased by filtim.

A prior year restatement, due to nedge accounting on interest rate swaps, prompted a reclassification. between Other Comprehensive Income and Retained Earnings, this resulted in an accumulated reduction of £15m in financing costs and is reflected. in the restated accounts. However, interest costs increased in the year, as Euria's external acbit facility. was included in the Group results for the full year.

Financial position

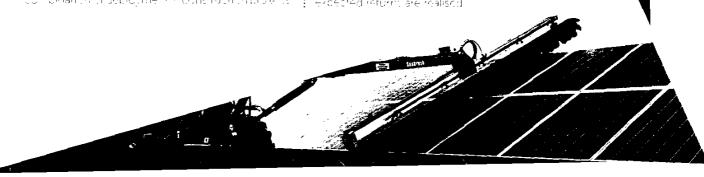

Continued shareholder interest and investment has seen net assets grow to £2.366m (2022) £2.221m. restated). In the year ended 30 Junie 2027, Live issued. 142m chares (2022) 150mil filma total consideration. of £257/m (2022, £206m)

miled assets increased by £115m, acidebloyment in fibre network assets grow by £27 im in the year and cherol, assets deureased by a net £108m lougito a combination of deployment in construction projects.

Net current assets of £815m (2022, £807m restated). have increased by £8m, reflecting a £79m increase. in stock in the nomebuilding division, which in turn was offset by £99m decrease in cash due to ancelerated cash deployment. Our toan book, gross of provisions, has increased by 21% to £474m (2020) £375m), and at 30 June 2023 represented 15% of net assets (2022-13%).

Cash and cash equivalents as at 30 June 2023 were £157rn (2022 £256m) Cash generated from operating activities remained strong at £205m (2022) £346m), which has been litilised alongsidd external long-term financing and capital raised by new share issues to grow the business. We have invested substantially into the fibre and homebuilding sectors, which will require further capital excenditure over the next 12 months, increasing our diversification across sectors. Of the cash held at year end, £134m. was held in our energy, homebuilding and fibre subsidiaries, where there are a number of construction and infrastructure projects under way. requiring cash to be readily available for stage payments due in the months after year end.

Goodwill, at £514m (2022, £541m), continues to be a significant number on the balance sheet and arises. on the acquistion of some businesses. Acquired businesses, for example renewable energy sites. icffort have a market value in excessiof the company's het assets, incliedting their reliable future income streams. Put simply, the market value of our operation businesses inflects the value of future expected profits risk the best of simplifications tang ble assets such as solar panels or wirld torbines. We pay market value for the sites we acquire which may exceed the value of identifiable assets such as the solar panels and solgenerates doody. It which essentially represents the value of the expected future income streams. Goodwill recognised is rested for impairment annually and but gradual, be written of typical, over the include of the site, as expected returns are realised.

Group finance review

Sector performance

Energy

As economic activity and global demand continued to remain high throughout the year, so too did wholesald energy prices driven by movements in commonly prices. This resulted in the Group maintaining strong revenues from energy generation at a level similar to 2022 across our energy sites, with revenue of £606m (2022, £590m).

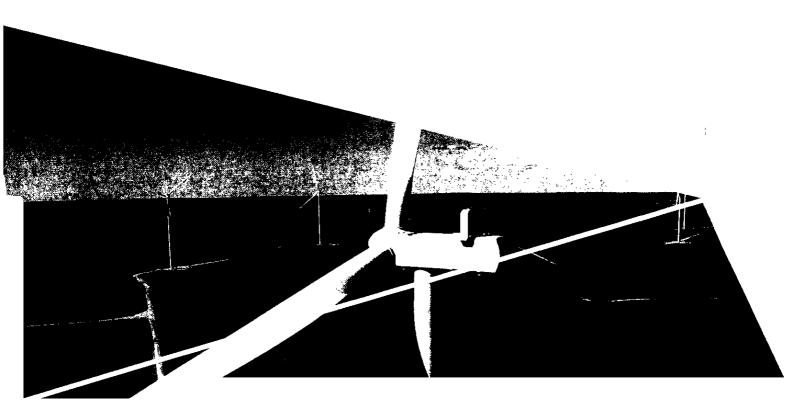

Our generation capacity remained consistent year on year, as there were no substantial changes to our energy generating assets. However, production was marginally reduced due to Snetterton, one of our biomass-fired power plants, suffering some months of operational downtime following a gearbox fault

The associated insurance claim for replacement parts and loss of revenue was settled in full

The impact was offset by the increase in the average price per unit for the division as a whole, as it increased to £107.7 MWh from £97.5 MWh in the prior year a movement of 10%

While total operating costs remained mostly consistent year-on-year at £377m (2022-£327m), the Group recorded a £30m increase in gas procurement costs for reserve power plans, driven by inflated gas prices in the first half of the year. Correspondingly, EBITDA also decreased by 13% to £232m (2022-£258m)

	FY2023 Production (MWh)	FY2022 Production (MWh)	FY2023 External Availability	FY2022 External Availability
Bromass	991,873	1.050,038	83.5%	84 6%

Group finance review

The Trench government has announced in Applied retoke the measure introduced in November 2020 to retroactively modify Fill contracts, which reduces uncertainty in our French solar portfolios. However, this carrier ruling resulted in an £8m French solar Goodwill impairment in the prior year, which due to accounting convention cannot be reversed once recognised.

In November 2022, the Uk government announced the introduction of an Electricity Generator Levy (EGE), a temporary measure to charge exceptional receipts on high revenues for raicups denerating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and it enacts a 45% windfall key, on wholesale energy market revenues in excess of £75/MVM isportficially to electricity generated from renewable, highests, and energy from waste sources. The Group was not required to pay EGE in the period, however we do expect to pay this in the next financial year, and are assessing our position. Wo had already anticipated the impact on the returns generated from our energy portfolio over the next five years, which is reflected in the share price.

Lending

Revenue from lending increased by £ m to £49m. (15%) primarily due to a larger loan book for 2023, as property deployment accelerated in the year. At year end, the book had increased both in value (3474m). 2022, 305mit and in numbers of leans (219 Dans, 2022, 176 Joansi, However, the UK's challenging. packgroung was not without impact and throughout the year, the recorded a provision of £30m against one commercial loan. This has highlighted the benefit of our diversification strateny as propert, fending acrounts for F4T0m of the total dusion. spread across 198 luaris at Jear end. As a reculti-EBITDA for the lending division, increased slightly to £8m lost from £16m loss in the prior lear if, this this movement are provisions of 343m recognised against property cansiduring the ceam 2022, £39m.

Fibre

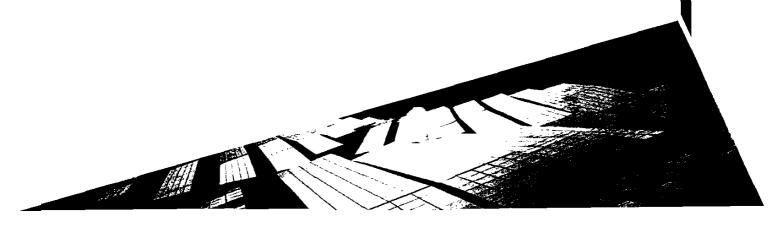

As a growing division, all our fibre businesses arc in the build phase and are starting to addicustomers to their networks by 30 Junie 2023, the drus on was serving around 50,000 customers and building in over 100 locations in the UK, v.e are on track to be able to ideliver full fibre connectivity to 500,000 properties in those towns and villages.

Overall, the division has almost boulfied its revenue year onlyear from £9m in 2022 to £16m in the current year. Although building a fibre network is capital intensive and leads to a physical asset on balance sheet, the division aso incurs rarge operating expenses as the businesses scale their operations and develop market presence. This resulted in a reported EPITDA loss of £120m (2022-£16m loss) which is in one with expectations and reflects the development stage of the division. This includes extraordinary costs of £15m associated with the restricture.

As we build out these networks, the assets will be recognised on the balance sheet at cost which cannot include future value which is expected to be generated, as the assets have been internally denerated.

Housebuilding

We have repraided our Healthcare division to Houseboilding thireflect the change in business mix. Whereas littlincorporates primarily Elivia and Pangeford this division continues to reclude the results of Orie Healthcare (two private nospitals) for this financial, ear. The Oric Healthcare trading assets and liabilities were sold subsequent to year end Extraordinary posses of £22m associated with those assets are recognised in the accounts and are not exponted to reoccur in future periods.

Group finance review

Housebuilding operations contributed £130m (2022 £71m) to Group revenues for the year reflecting the impact of increased revenue in Rangeford, as well as a full year of Elivia operations. Elivia sold 152 units in the year, and is performing in line with budget, while Rangeford increased its revenue by 45% to £29m and sold 47 units.

A change in accounting policy resulted in the cost of Rangeford communal areas being capitalised as fixed assets (furniture, fixtures and equipment) and amortised over the life of the site. Previously, these costs were immediately recognised to Cost of Sales in the P&L. The treatment has been agreed with our auditors, and has not resulted in a prior year restatement, however, Rangerford, fixed, assets increased by £15m in the current year as a result.

Funding and liquidity

Our strategy within our renewable energy businesses is to secure long term financing at conservative levels from mainstream banks to enhance returns. At year end we had drawn £1,160m of external debt in this part of the Group, with a further £175m available to be drawn

This approach enables us to acquire businesses that have stable characteristics such as predictable cost base, revenue streams, government incentives or proven technology and as such have lower returns that without leverage would be insufficient for our shareholders. It also allows us flexibility in financing our businesses and managing cash flow. We believe that failing to adopt this strategy would have a negative impact on business return and shareholder value over the long term. 80% of our interest payable is fixed, and therefore, we are not significantly exposed to current interest rate voiatility. The Group applies hedge accounting for interest rate swaps.

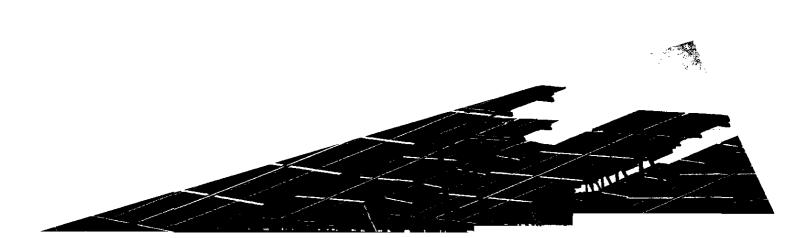

which means any changes in the fair value of the swap is recognised in reserves (cash flow hedge reserve), with the ineffective portion of the hedge recognised in the P&I. The market value of the swaps is recognised on the balance sheet as an asset or a liability, depending on whether the swap is favourable compared to current rates.

We continually review financing arrangements to ensure that they are competitive and optimised for the needs of the business. To ensure cash is managed in an agile manner, we maintain flexible finance facilities which can be drawn or repaid to meet immediate business needs. Specifically, the Group has access to a Revolving Credit Facility of £290m, which is interinked to the net assets of our energy division. The flexibility to draw and repay funds at short notice facilitates effective management of short-term cash fluctuations, which can be driven by seasonality of operating working capital.

Looking ahead

At the end of the financial year, we continue to believe that the business is positioned well to take advantage of future growth opportunities across its core business areas. Energy and lending operations are well established in the market and continue to make excellent progress with robust performances in the new financial year. Provisions taken against loans during the year in our lending sector have ring-fenced challenges which are not indicative of further problems across other loans in the sector.

Deployment into fibre continues to roll out in line with expectations, while growing its revenue and operational base. Sales activity in our housebuilding dwision remain strong against a challenging market and are reporting profits in line with budget.

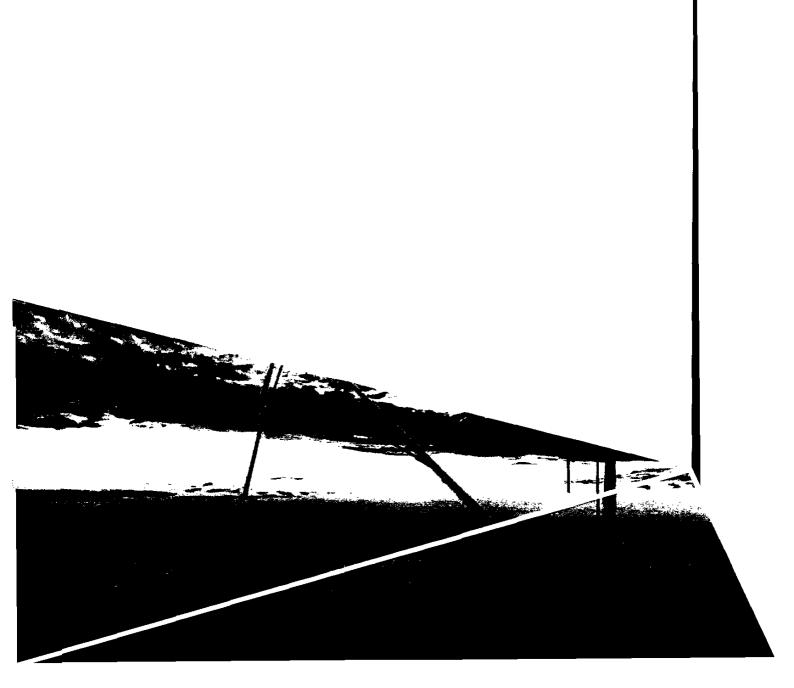

Group finance review

We expect to generate strong oberating rotums from our established divisions for the commit, ears in addition to the anticipated cuttless for our construction phase assets while at the same time growing our fibre and housebuilding divisions to maturity.

Independent auditors' report to the members of Fern Trading Limited

Opinion

We have audited the financial statements of Fern. We believe that the audit evidence we have obtained Trading Emitted (the Parent Company) and its subsidiaries (the Group) for the Jearlehoed 30 June 2025 which comprise the Group Statement of Comprehensive Income, the Group and Parent Company Balance Sheet, the Group Statement of Cash Flows, the Group and Parent Statement of Changes in Equity and the related notes 1 to 29, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable laviand United Kingdom Accounting Standards including FRS 102 The Friancial Reporting Standard applicable. in the UK and Republic of Ireland' (United Kingdom) Generally Accepted Accounting Practices

In our opinion, the financial statements

- give a true and fair niew of the Group's and of the Parent Company's affairs as at 30 June 2023 and of the Group's loss for the year then ended,
- · have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, and
- · have been prepared in accordance with the requirements of the Companies Act 2006

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)): and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the francac statements section of curreport. We are independent. of the Group in accordance with the ethicalrequirements that are relevant to our audit of the financial statements in the LF including the FHC of Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance of thit hese. requirements.

: is sufficient and appropriate to provide a basis for our

Conclusions relating to going concern

in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work wo have berformed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant population the Group and Parent Company's ability to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report however because not all tuture events or conditions. can be predicted, this statement is not a quarantee as to the Group's ability to continue as a going concern.

Other information

The other information composes the information included in the annual report, other than the fir and a statements and our auditor's report thereon. The directors are responsible for the other information. Contained within the annual report.

Our opinion on the financial statements does not cover the other information and except to the extent incherance explaintly stated in this report the an not expression, form of assurance devictusion thereon.

Cur responsibility is to read the other information. land in doing to consider chettier the other information is materially inconsistent with the means at statements or our enougledge obtained in the course of the aildflor otherwise appears to be imateral, misstated if i.i.d dentify hugh material

Independent auditors' report to the members of Fern Trading Limited

inconsistencies or apparent material misstatements, we are required to determine whether this gives use to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic report and the Directors report for the financial year for which the financial statements are prepared is consistent with the financial statements, and
- the Strategic report and Directors' report have been prepared in accordance with applicable legal requirements

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or Directors' report

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion.

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us, or
- the Parent Company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of Directors' remuneration specified by law are not made, or

 we have not received all the information and explanations we require for our audit

Responsibilities of directors

As explained more fully in the Directors responsibilities statement set out on pages 38 and 39 the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error

In preparing the financial statements, the Directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of those financial statements.

Independent auditors' report to the members of Fern Trading Limited

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

firegularities including fraud are instances of non-compliance with laws and regulations, we adsign procedures in line with our responsibilities outlined above to detect irregularities a didding fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resuding from error, as fraud may involve deliberate concealment by for example, forgery or intentional misrepresentations or through collation. The ristent to which our procedures are capable of detecting inegularities, including traud is detailed below However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Group and determined that the most significant are those that relate to reporting framework (FPS 102 and the Companies Act 2006).
- We understood how Form Trading Simited is complying with those frameworks by making enduries of management, those charged with governance and those responsible for legal and compliance procedures as to any fraud risk framework within the entity including whether a formal fraudingriassessment is completed. We corresponded our enquiries through review of the trillowing documentation or performance of the hold wing procedures.
 - obtaining an understanding of entity-elecontrol and considering the influence of the control on tenment.

- Obtaining are understanding of policies and providedures in place regarding compliance with laws and regulations including how compliance with such policies is monitored and enforced, obtaining an understanding of management's process for identifying and responding to frauditisks, including programs and controls established to address risks identified, or otherwise prevent deter and detect fraudiand how senior management migritors those programs and controls.
- rower, of board meeting minutes in the period and up to date of signing
- We assessed the susceptibility of the Group's financial statements to material misstatement, including how fraud might occur by holding a discussion within the audit team which included
 - · identification of related parties,
- understanding the Group's pusiness, the control
 entirchment and assessing the inherent risk for
 relevant assestions at the significant account
 level including discussions with management
 to gain an understanding of those areas of the
 fir and at statements which were susceptible to
 traud as identified by management, and
- considered the controls that the Group has established to address risks identified by the entity or that otherwise seek to prevent, deterior detect fraudincluding gaining an unperstanding of the entity level controls and policies that the Group applies
- dased on this understanding we designed our audit procedures to dentify non-tomplance with such law and regulations. Our procedures it solved itesting of journal entires incough journal arraytics tools with focus on manual

Independent auditors' report to the members of Fern Trading Limited

journals, large or unusual transactions, or journals meeting our defined risk criteria based on our understanding of the business, tested accounting estimates for evidence of management bias, enquiring of members of senior management and those charged with governance regarding their knowledge of any non-compliance or potential non-compliance with laws and regulations that could affect the financial statements, and inspecting correspondence, if any, with the relevant licensing or regulatory authorities.

A further description of our responsibilities for the audit of the financial statements is located on the

Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities This description forms part of our auditor's report

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are

required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Statement of accounting policies

Company information

Fern Trading timited time Company (IIIs a private company limited by shares and incorporated on 14 May 2020. The company is dominated in England, the Jurited Kingdom and registered under company number 12601636. The address of the registered office is at 6th Floor 35 Holloon, London, England, £C1N 2HT.

Statement of compliance

The Group and individual financial statements of Fern Trading Limited have been prepared in compliance with the United Kingdom Accounting Standards including Financial Reporting Standard 192. The Financial Reporting Standard applicable in the United Kingdom and the Republic of Tretand (FRS 1921) and the Companies Act 2006.

Basis of preparation of financial statements

The financial statements have been probated on a going concern basis, under the historical cost convention, as monified by the recognition of certain financial assets and liabilities measured at fair value, and in accordance with the Companies Act 2006 and applicable accounting standards in the United kingdom. The principal accounting policies, which have been applied consistently throughout the year, are set out below.

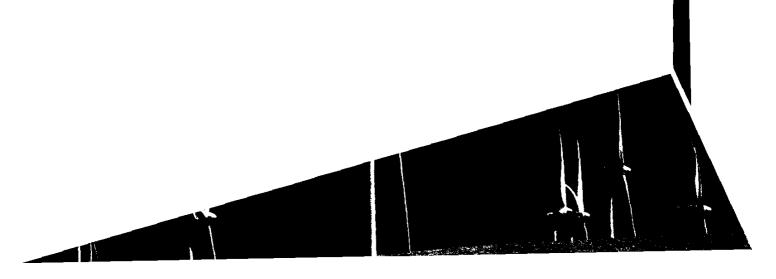

The consolidated financial statements include the results of all subsidiaries owned by Fern Trading Ermited as listed in note 29 of the annual financial statements. Certain companies of those subsidiaries, which are listed in note 29, have taken the exemption from an audit for the year endour 30 June 2023 permitted by section 479A of Companies Act 2006. In order to allow those subsidiaries to take the audit exemption, the parent company has given a statutory guarantee, in line with section 479C of Companies. Act 2006, of all the outstanding not liabilities as at 30 June 2023.

Going concern

The Group's and the Company's business activities together with the factors likely to affect its future development performance and position are set out the Strategic Report on pages 4 to 15. The financial position of the direct, its cash flows, liquidity position and benowing facilities are described in the triancial review on pages 31 to 36. The principal risks of the Group are set out on pages 17 to 30.

The Directors perform an annual going concern review that considers the Gicup's ability to meet its financial obligations as they fall due, for a period of twelve months after the date that the financial statements have been signed.

Due to the chailer ging market conditir ns management have performed an assessment to determine whether there are any material uncertainties anding that hould cast tightfoant coubt on the ability of the Group to contribe as a going concern. No sign ficant issues have been noted and as a consequence, the directors belove that the croup is well blaced to manage its business risks successfully despite the current uncertain reconomic outlook.

Statement of accounting policies

In reaching this conclusion the Directors have reviewed the financial impact of the uncertainty on the Group's balance sheet, profit and loss and cash flows with specific consideration given to the following

A reverse stress test was performed on the base case forecast to ascertain what scenarios would result in risks to the Group's liquidity position. The test showed even in an unlikely scenario of a significant reduction of revenue of 46%, the Group is able to sustain its current operational costs and indeet all liabilities as they fall due for at least a year from the date of signing these financial statements when utilising the available facilities within the Group.

The Group has a number of financing facilities that contain covenants requiring the Group to maintain specified financial ratios and comply with certain other financial covenants. These financial covenants are tested at least biannually, and, at the date of this report, the Group is in compliance with all its financial covenants. Stress tests on reasonably plausible scenarios such as a significant reduction in EBITDA of 84% over time have been used to assess the covenant requirements for the at least the next twelve months and all covenants have been forecast to be met even under the stress test scenario, in the going concern period.

At 30 June 2023, the Group had available cash of £157m and headroom available of £175m including a revolving credit facility of £290m. Debt of £217m is due to mature in less than one year, with the remainder of £941m payable in more than one year. The Group's facilities, repayment dates and undrawn amounts are set out in Note 16 Loans and Borrowings.

Key accounting judgement and estimates have been made with consideration given to the current economic outlook. Key estimates include loan recoverability, valuation of work in progress, decommissioning provisions impairment of goodwill and investments, business combinations and hedge accounting. Details are set out on pages 50 to 60.

Based on the above assessment of current economic conditions and the impact on the Group's financial position, liquidity and financial covenants, the directors have concluded that the Group and the Company has adequate resources to continue in operational existence for the next 12 months. Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Exemptions for qualifying entities under FRS 102

FRS 102 allows a qualifying entity certain disclosure exemptions, subject to certain conditions, which have been complied with including notification of, and no objection to, the use of exemptions by the Company's shareholders.

The Company has taken advantage of the following exemptions

- from preparing a statement of cash flows, on the basis that it is a qualifying entity and the consolidated statement of cash flows, included in these financial statements, included the Company's cash flows
- from the financial instrument disclosures, required under FRS 102 paragraphs 11 39 to 11,48A and paragraphs 12 26 to 12 29, as the information is provided in the consolidated financial statement disclosures.
- iii from disclosing the Company key management personnel compensation, as required by FRS 102 paragraph 33.7

Statement of accounting policies

Basis of consolidation

The consolidated financial statements include the results of Fern Trading Limited and air its subsidiary undertakings made up to the same accounting date. All intra group balances, transactions, income and expenses are of minated in tuilion consolidation. The results of subsidiary undertakings acquired or disposed of during the period are included or excluded from the moome statement from the effective date of acquisition or disposal.

All undertakings over which the Group exercises control being the power to govern the financial and operating policies so as to obtain benefits from their activities, are consolidated as subsidiary undertakings. Where a subsidiary has different accounting poucies to the Group adjustments are made to those subsidiary financial statements to apply the Group's accounting poucies when preparing the consolidated financial statements.

Any subsidiary undertakings or associates sold or acquired during the year are included up to lor from, the dates of change of control or change of significant influence respectively.

Where the Group has written a but option over shares hold by a non-controlling interest, the Group derecognises the non-controlling interest and instead recognised contingent deferred consideration liability within other payables for the estimated amount likely to be paid to the non-controlling interest on exercise of those options. The residual amount representing the difference between any consideration paid/payable and the non-controlling interest's chare of net assets its recognised as goodwil. Movements in the estimated liability after initial recognition are recognised as goodwill.

Foreign currency

i. Functional and presentation currency

The Group financial statements are presented in pound sterling and rounded to finousands

The Company's functional and presentation currency is pound sterling and rounded to thousands

ii. Transactions and balances

Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions. At each period end foreign currency monetary, tems are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary, items measured at fair value are measured using the exchange rate when fair value, was determined. Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss actionnt

Au foreign exchange gains and losses are presented in the brottoland loss account within obtainistrative expenses.

iii. Translation

The trading results of Group undertakings are translated into pounds sterling at the average exchange rates for the year. The assert and facilities of outsteet undertakings and using ghods. If and fair value adjustments arruing on appoint on lare translated at the exchange rates ruling at the year end. Exchange adjustments arising from the retranslation of opening het investments and from the translation of the profits or losses at average rates are recognised in Other comprehens to income and alk rated to non-controlling interest as accretion are

Statement of accounting policies

Turnover

The Group operates a number of classes of business. Revenue is derived by the following

• Energy

Turnover from the sale of electricity generated by solar farms, wind generating assets, reserve power plants and biomass and landfill sites is recognised on an acciuals basis in the period in which it is generated. Revenue from long-term government backed offtake agreements, such as the Renewable Obligation Certification (IROCT) scheme are accrued in the period in which it relates to Turnover from the sale of fertiliser by biomass and landfill businesses is recognised on physical dispatch.

Lending

Turnover represents arrangement fees and interestion loans provided to customers, net of any value added tax, Loan interest is recognised on an accrual basis in line with contractual terms of the loan agreement. Arrangement fees are spread over the life of the loan to which they relate

Fibre

Turnover is recognised at the fair value of the consideration received for internet connectivity and related IT services provided in the normal course of business, and is shown not of VAT. Turnover is recognised based on the date the service is provided.

· House building

Turnover is recognised on legal completion of the sale of property, land and commercial spaces. Itunover from housing association contracts is recognised by reference to the value of work completed as a proportion of the total contract value. Turnover for retirement living is recognised when the significant risks and rewards of ownership of retirement properties have passed to the buyer (on legal completion), the amount of revenue can be recognised reliably, and it is probable that the economic benefits associated with the transaction will flow to the entity.

Employee benefits

The Group provides a range of benefits to employees including annual bonus arrangements, paid holiday arrangements and defined contribution pension plans.

i. Short-term benefits

Short-term benefits including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.

ii. Defined contribution pension plan

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. Once the contributions have been paid the Group has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the Group in independently administered funds.

Statement of accounting policies

iii. Share-based payments

Cash-rettied share-based payments are measured at fair value at the palarice sheet date. The Group reoriginises a vability at the palarice sheet date based on these fair values, taking into account the estimated number of units that will actually vest and the current proportion of the vesting period. Changes in the value of this liability are recognised in the income statement.

The Group has no courty-settled arrangements

Finance costs

Finance costs are charged to the profit and loss account over the term of the dobt using the effective interest method so that the amount charged is at a constant rate on the carrying amount. Issue costs are initially recognised as a reduction in the profits of the associated capital instrument and released to the profit and loss account over the term of the debt.

Current and deferred tax

Tax is recognised in the statement of income and retained earnings, except that a change attributable to an term of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or pirectly in equity respectively.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the balance sheet date in the countries where the Company operates and generates income.

Deferred balances are recognised in respect of all timing differences that have onglinated but not reversed by the Balance sheet date, except that

- The recognition of deferred tax assets is limited to the extent that it is probable that they is III be recovered
 against the reversal of deferred tax liabilities or other future taxable profits, and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax beductions available for thom and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Business combinations and goodwill

Business combinations are accounted for by applying the purchase method

The cost of a business combination is the fair value of the consideration given it abilities incurred or assumed and the equity instruments, assued plus the costs directly attributable to the business combination. Where control is achieved in stages the cost is the consideration at the date of each transaction.

On adquishion of a dusiness fair values are attributed to the identifiable assets. Tabilities and contingent had ties unless the fair value cannot be neasured reliably in which case the value is incompliated as gnodwill. At least the fair value of contingent liabilities had not be reliably measured they are discressed on the carno basis as other contingent, about es.

Goodwill recognised represents the excess of the fair value and directly attributable costs of the purchase consideration over the fair values to the Group's interest in the identifiable net assets, liabilities and contingent liabilities acquired.

On acquisition, goodwild is allocated to cash generating units (CGU's) that are expected to benefit from the combination

Goodwill is amortised over its expected useful life which is determined based on the estimated lifespan of the assets acquired. Where the Group is unable to make a reliable estimate of useful life, goodwill is amortised over a period not exceeding ten years. Goodwill is reviewed and assessed for impairment indicators on an annual basis and any impairment is charged to the profit and loss.

Tangible fixed assets

langible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives. Depreciation commences from the date an asset is brought into service. Land and assets in the course of construction are not depreciated. Tangible assets are depreciated over their estimated useful lives, as follows.

Land and buildings	2% to 4% straight line
Power stations	3% to 5% straight line
Plant and machinery	4% to 33% straight line
Network assets	4% to 6% straight line

Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use

Where factors, such as technological advancement or changes in market price, indicate that residual value or useful life have changed, the residual value juseful life or depreciation rate are amended prospectively to reflect the new circumstances. The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired

Cains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within profit or loss.

Intangible assets

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated, using the straight-line method, to allocate the depreciable amount of the assets to their residual values over their estimated useful lives, as follows:

Development rights	25 and 30 years
Software	2 to 10 years

Amortisation expenses are included in administrative expenses. Development rights relate to planning consent to build a solar farm and a wind farm acquired on acquisition.

Where factors, such as changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or amortisation rate are amended prospectively to reflect the new circumstances.

The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired

Statement of accounting policies

Leases

At incoption the Group assesses agreements that transfer the right to use assets. The assessment considers whether the arrangement is or contains a lease based on the substance of the arrangement and whether the lease should be classified as either a finance lease or an operating lease.

Eeases infrassors that transfer substantiarly all the risks and rewards incidental to ownership are classified as finance leases. Finance leases are capitalised at the commendement of the lease at the fair value of the leased asset and depreciated over the shorter of the lease term and the estimated useful life of the asset. Assets are assected for impairment at each reporting date.

Leases that do not transfer all the risks and rewards of ownership are classified as operating leases. Hayments under operating clases are charged to the profit and loss account on a straight line basis over the period of the lease.

Investments

The Company holos investments in a subridiary at cost less accumulated impairment losses. If an impairment loss is subsequently reversed, the carrying amount of the investment is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined had no in pairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.

Cash

Cash includes cash in hand and deposits repayable on demand. Restricted cash represents cash for which the Group does not have immediate and direct access or for which regulatory or logal requirements restrict the use of the cash.

Stocks

Raw materials, spare parts and consumables are valued at the lower of cost and net realisable value. Where necessary a provision is made for obsolete, slow incoming and defective stock. Cost is determined on the first-in, first-out (FIFO) method.

Fuel stocks (MBM and litter) are valued on an average cost basis over one to two months and provision for unusable after is reviewed monthly and applied to off-site stock.

Fig. stock of straw has been valued at the historical cust per tonne of straw. A precision for unusable straw is dentified on an individual stack basis and is reviewed monthly. Stocks are used on a first in, first out (FHO) basis in lage of straw.

grocks or ash at Fibrophos are valued at the fower of lost and net realisable, albe to the faroup

Stocks of property obtalopment work in progress (W.P.) are stated at the lower of obst and net realisable up to Cost comprises direct imatchals and lowere applicable idirect fathour costs and those coefficials that have been incurred in bringing the stocks to their present locations and condition.

An each reporting data can asse direct is made for impairment. Any excess of the carrying amount of ktocks contins estimated for inglocities essistant to complete and self-sirelognized as an impairment loss through the profit and loss account. Reversals of impairment losses are ash recognised in the profit and loss account.

Accrued income

Accrued income on loans is calculated at the rate of interest set out in the loan confracts. Energy income is accrued over the period in which it has been generated.

Deferred income

Deferred income is recognised in accordance with the terms set out in the contact. Deferred income is released to the profit and loss account in the period to which it relates.

Financial instruments

The Group has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments

Financial assets

Basic financial assets including trade and other receivables and cash and bank balances are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest Such assets are subsequently carried at amortised cost using the effective interest method.

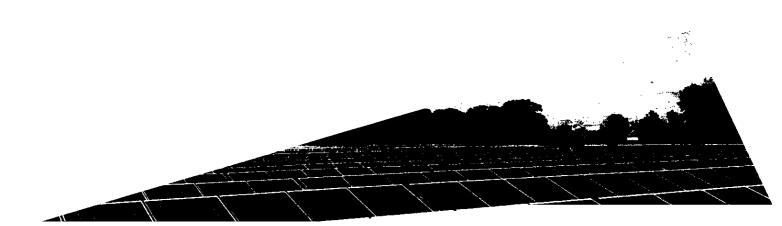

At the end or each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment of an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

Other financial assets, including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price. Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

Financial liabilities

Basic financial liabilities including trade and other payables, bank loans, loans from fellow Group companies and preference shares, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest

Dept instruments are subsequently carried at amortised cost using the effective interest rate method. Here paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is propable that some or all of the facility will be provided with In this case, the feel's defended until the draw down occurs. To the extent there is no evicy need that it is probable that some or all of the facility will be grawn down, the feel is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Acrounds payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities, frade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or explicis.

Provisions

Provisions are made where an event has taken place that gives the Group allegal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the profit and loss account in the year that the Group becomes aware of the obligation, and are measured at the best estimate at the balance sheet nate of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

Hedging

The Group applies hedge accounting for transactions entered into to manage the early flow exposures of borrowings. Interest rate swaps are held to manage the interest rate exposures and are designated as cash flow hedges of floating rate borrowings. Changes in the fair values of demandes designated as cash flow hedges, and which are effective, are renognised directly in equity. Any ineffectiveness in the nedging relationship ibeing the excess of the cumulative change in fair value of the hedging instrument since inception of the hedge over the cumulative change in the fair value of the hedged ten since inception of the hedge) is recognised in the profit and loss.

The gain or loss recognised in other comprehensive income is reclassified to the profit and loss in accordance with the cash flows of the heaged item. Heage accounting is discentinued when the hedging instrument expires into longer meets the hedging criteria, the forecast transaction is no longer highly probable, the hedged debt instrument is decoraging on the heaging instrument is terminated.

Share capital

Circlinary shares issued by the Group are recognised in court, at the value of the proceeds received with the excess over norminal value being credited to share promium.

Non-controlling interests

Tour controlling interests are measured at their proportionate chare of the acquirees identifiable not assets at the data of acquisition.

Key accounting judgements and estimates

The preparation of financial statements in compliance with FRS 102 requires the use of certain critical accounting estimates at also requires management to exercise judgement in applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are policied to be reasonable under the circumstances. The key estimates and judgements in preparing these financial statements are:

i. Recoverability of loans and advances to customers (estimate)

Loans and advances to customers, including associated accrued income balances, are reviewed for impairment on a biannual basis. In considering the need for a provision, management determine their best estimate of the expected future cash flows on a case by case basis. As this estimate relies on a certain number of assumptions about future events which may differ from actual outcomes, including the borrower's ability to repay interest and capital due in future perioos, this gives rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the action balance.

Management note that provisions against loans and advances is a critical estimate and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conclude that a change of +/- one per cent in the amount provided against the estimated balance at risk would have resulted in £3 6m less/more expenditure being charged to the income statement during the period. See note 13 for the carrying amount of the debtors and provisions at 30 June 2023.

ii. Value of property development work in progress ('WIP') (estimate)

Property development WIP is reviewed for impairment on a periodic basis. In considering the need for a provision, management determine their best estimate of the recoverable value. Management engage an expert external valuer to provide key assumptions about ruture events which may differ from actual outcomes, including property valuations, rate of sales and development costs.

Those estimates give rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the balance as at the 30 June 2023. Post year end, management have reviewed the assumptions used to determine the value of property development WIP and have observed no changes in performance that would impact the valuation as at the 30 June 2023. See note 12 for the carrying amount of the property development WIP.

iii. Purchase price agreement (Australian entities) (judgement)

The Group owns one energy generating subsidiary in Australia which has entered into purchase price agreements (PPA's) in 2019 and 2021. The PPA's include a contract for differences "CfD" whereby the subsidiaries pay/receive amounts from the customer based on the differences between a fixed selling price and the actual price for electricity sold to the Australian energy market. The directors believe the contract is outside the scope of FRS 102 section 12 as it is for the sale of a non-financial item and the CfD is typical for such arrangements. Therefore it is being accounted for under FRS 102 section 23 as a revenue contract with variable consideration, rather than revaleing the entire contract to fair value.

iv. Business combinations (estimate)

The cost of a business combination is the fair value of the consideration given, trabilities incurred plus the costs directly attributable to the business combination. Fair value of these combinations is a key estimate and more details are provided on pages 54 to 55.

Statement of accounting policies

v. Decommissioning provision (estimate)

The provision for decommissioning costs is measured at management's pest estimate of the present value of the expenditure required to settle the future obligation to return land on which there are operational wind and so ar farms it to its original condition. The level of the provisions is determined to a significant degree by the estimation of future dismantling and restoration costs as well as the timing of dismantlement.

Wind Farms (estimate):

Management note that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of ±/- one per cent in the discount rate would have resulted in £2.2m increase/decrease in the provision. See note 18 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated cost to dismantle and have used a discount rate of 4.5% to reflect the time in value of money and the risks specific to the obligation.

UK Solar (estimate):

Management note that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of $+\ell$ one per cent in the discount rate would have resulted in £3.0m increase/decrease in the provision. See note 18 for the provision recognised at 50 June 2023. Management utilise external expertise to provide an estimated cost to dismantle and have used a discount rate of 4.2% to reflect the time in value of money and the risks spricific to the obligation.

French Solar (judgment):

Management believe that given the nature of these particular assets, the lesser may wish to either take title of the assets for either continued use or to realise value through selling the assets and an such do not believe that an outflow is probable to settle this restoration obligation. Management will continue to monitor the situation at each balance sheet date.

vi. Impairment of goodwill and investments (estimate)

The value of goodwill held by the Group and investments in subsidiar, undertakings held by the Company is reviewed annually for impairment. The recoverability of these balances is considered with reference to the present value of the estimated future cash flows. These calculations use cash flow projections which extend forward forecast business performance together with a sumptions surrounding the expected life of the asset, externally prepared forecasts and valuations and any adjustments reduired to the discount rate to take account of business risk. The estimated present value of these future cash flows is sensitive to the discount rate and growth rate used in the calculation, all of which require managements judgement. Testing of the carrying value has been performed during the year, which has involved several scenaries being modelled. Based on this testing and the resulting impairment recognised on it resting in subsidiary entities.

Management note that impairment or goods It and investments is a critical estimate and have therefore performed sensitivity, analysis on the provision of her results of the sensitivity, analysis conclude that a change of her one per cert in the amount provided against the estimated balance at his would have resulted in £5.14m. His migra expenditure being charged to the income characteristic during the period. See note 8 for the carrying amount of the gonds. If and investments at 30 June 2023.

5 Forpt - -- characterismente

A number of subsidiaries of the Group operate a cash-settled LTIP to qualifying employees, whereby employees render services in exchange for cash, the amount of which is determined by reference to the valuation of the underlying subsidiary. The fair value of the liability for the awards made is measured at each reporting date and at the settlement date. The fair value is recognised over the vesting period. The amount of expense recognised takes into account the best available estimate of the number of units expected to vest under the service and performance conditions underlying each award granted.

Details of related undertakings are shown in note 29

Unlisted investments comprise the Group's holding of the members' capital of Terido LLP, a lending business, and its shareholding in Bracken Trading Limited. Fern co-founded Terido LLP in October 2012 with the intention of conducting a proportion of its future trade through the partnership. Additions and disposals of unlisted investments relate to investments and divostments in Terido LLP in line with Fern's cash induirements and to utilise surplus funds. Fern has a small shareholding in Bracken Trading Limited from time to time. Fern's investment in Bracken Trading Limited at 30 June 2023 was fixed (30 June 2022. Enil). The directors do not consider Terido LCP or Bracken Trading Limited to be subsidiary uncertakings of Fern Trading Limited.

Note 26 details the prior period adjustments

Notes to the financial statements for the year ended 30 June 2023

Derivative financial instruments

The Group's financial risk management seeks to minimise the exposure to market risk, credit risk, Equidity and cash flow risk, and energy market risk.

a) Market risk

Energy market risk

The energy sector is experiencing sign ficant turbulence and there is a risk that forecast levels of income are not achieved due to changes in wholesale energy prices off-take contracts or government subsidies. Changes in Government policy for regulator intervention may result in reduced income streams within the group due to additional levies.

Currency risk

The Group presents its consolidated financial statements in sterling and conducts business in a number of other currencies, principally Euro and Australian dollar. Consequently, the Group is exposed to foreign exchange risk due to exchange rate movements, which affect the Group's transactional expenses and the translation of carning and net assets of its non-sterling operations.

Transactional exposures

Transactional exposures arise from administrative and other expense in currencies other than the Group's presentational currency (Sterling). The Group enters in to forward foreign exchange contracts and foreign exchange swaps to mitigate the exchange rate risk for certain foreign currency payables and receipts. The forward currency contracts and swaps are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key inputs used in valuing the derivatives are the forward exchange rates for GBP AUD and GBP EUR. On 30 June 2023 the fair value of the foreign currency contracts was an asset of Enil (2022, Enil) and a hability of Enil (2022, Enil).

Translational exposures

Balance sheet translational exposures arise on consolidation on the retranslation of the balance sheet of non-sterling operations into sterling, the Group's presentational currency. The level of exposure is reviewed by management and the potential foreign exchange movement is within an acceptable level of risk and therefore typically, the Group's policy to not to actively hedge these exposures.

Interest rate risk

The Group has exposure to fluctuations in interest rates on is borrowings. Where the Group enters into borrowing arrangements with floating rate interest, a swap arrangement is entered into to fix a portion of the interest in order to mitigate against an increase in interest rates. The portion of interest to be fixed is assessed on a case by case basis. Management can elect whether to hedge account for these arrangements on an individual transaction basis and have elected to apply hedge accounting for interest rate swaps. The swaps are based on a principal amount of the loan facility and mature on the same date. On 30 June 2023, the outstanding interest rate swaps have a maturity in excess of five years and the fair value is in an asset position of £105,691,000 (2022, liability of £54,409,000).

Price risk

The Group is a short- to medium-term lender to the residential property market. To the extent that there is deterioration in the level of house prices that affects the properties that the Group's loans are secured against, there is a risk that the Group may not recoup its full exposure. This is mitigated by the short-term nature of the loans and the conservative level of loan to value that the Group is prepared to lend at

Notes to the financial statements for the year ended 30 June 2023

b) Credit risk

Customer credit risk is mitigated through the Group's credit control policies, which are in place to ensure that our customers have an appropriate credit history and are monitored on an ongoing basis.

c) Liquidity risk

Liquidity risk are managed by ensuring that sufficient cash is available to fund continuing and future operations.

Liquidity risk arises on bank loans in place across the Croup and is managed through careful monitoring of covenants and sensible levels of debt. Borrowing is on a long-term basis, whereas our revenue is received throughout the year as well as interest and redemptions on our short-term loan book. Cash flow risk is managed through ongoing cash flow forecasting to ensure receipts are sufficient to meet liabilities as they fall one.

At the year end the Group had capital commitments as follows

The Group is entitled to a profit share as a result of its investment in Terido LLP, a related party due to key management personner in common. In 2023 a share of profit equal to £955,000 (2022 £5,249,000) has been recognised by the Group. At the year end, the Croup has an interest in the member's capital of £13,742,000 (2022 £35,452,000) and accrued income due of £2,812,000 (2022 £5,276,000).

The Group engages in lending activities which include balances provided to related parties. Regarding entities with key management personnel in common, loans of £65,070,000 (2022 £63,490,000), accrued income of £28,896,000 (2022 £19,789,000) and deferred income of £Nil (2022 £Nil) were outstanding at year end. During the year interest income of £9,162,000 (2022 £7,160,000) and fees of £214,000 (2022 £394,000) were recognised in relation to these loans.

As at 30 June 2023 FNil (2022, £Nil) was owed to the Company by Bracken Trading Limited, a related party by key management personnel in common

Other than the transactions disclosed above, the Company's other related party transactions were with its wholly owned subsidiary members of the Group.

25 Citimate parent demain, and central indipart

In the opinion of the directors, there is no ultimate controlling party or parent company

Notes to the financial statements for the year ended 30 June 2023

The Late of the Park

a) Derivative adjustment

We have conducted a review of prior years' accounting treatment of other comprehensive income in relation. to derivative recognition. We have identified an error relating to all financial years from 2017, relating to the amortisation of loss associated with a specific cash flow hedge. The loss was the result of a retinancing exercise undertaken in 2017, and the Group has received professional advice in relation to the accounting treatment. Upon review it was discovered the amortisation of the loss was already reflected in the updated fair value of the cash flow hedges, and the amortisation loss had incorrectly been recognised twice, ever the life of the cash flow hedge. This also has a consequence on the calculation of hedge ineffectiveness. The cumulative impact was a £15.5m reduction in historical interest cost, and an equal and opposite reduction in other comprehensive income. A summary of the impact of the correction is provided below, which includes the associated tax adjustments

28

Cruir reported results are prepared in actordance with United Kingdom Accounting Standards, including einancial Reporting Standard 102 as detailed in the Financial Statements starting on page 44 of the Annual Report. In measuring our portermance, the financial measures that we ust include those that have been derived from our reported results in proef to diministe factors that distint year-on-year companisons. These are considered non-uAAP financial measures.

Net debt

We provide net dent in addition to cash and gross debt as a way of assessing our overall cash position and it is computed as follows:

Net debt		1,001,265	793,167
carrent park and millione		(156,919)	(256,415)
Gross debt		1,158,184	1,049,582
Office Danie	14 1	125,000	5,364
Bank in unsignation introffs	L L	1,033,184	1,044,218
and the state of t	IX te	000)3	f:000
		2023	2022

Notes to the financial statements for the year ended 30 June 2023

EBITDA

Earnings before interest, tax, depreciation and amortisation ("FBITDA") is calculated by adjusting profit after tax for interest, tax, depreciation and amortisation, in addition to income and expenses that do not relate to the day to day operations of the Group. We provide EBITDA in addition to profit after fax as it allows us to assess our performance without the effects of financing and capital expenditures.

The following table details the adjustments made to the reported results

		2023	(restated) 2022
	Note	£'000	£'000
Profit/(loss) for the financial year	o et systematione a statement a de la consecutación de la consecut	(131,559)	38,020
Add			
Amortisation of enangible assets	2	43,055	37,849

5 | APPENDIX - SHARE PRICE PERFORMANCE (UNAUDITED)

Fern's share price has performed in line with targets

Form Trading Emitted is an unlisted corrigany. Every month, our Board of Directors agrees a price at which it will be willing to issue new shares. The share price is unaudited.

Share price growth since inception: Fern Trading Limited

Performance is calculated based on the sale price for Ferris shares at 2 June each year. The share price is not subject to audit by Ernst & Young LEP.

Annual discrete performance

Financial Year	Discrete share price performance
June 2022-23	3.10%
June 2021-22	9.91%
June 2020-21	4.87%
June 2019-20	0.33%
June 2018-19	6.23%
June 2017-18	1.05%
June 2016-17	5.54%
June 2015 16	3.83%
June 2014 15	3.98%
June 2013-14	3.72%
June 2012 13	3.97%
June 2011 12	1.02%

Forward-looking statements

This Annual Report contains certain forward-locking statements related to the Company's future business and financial performance and future events or developments. These statements are based on the current knowledge and expectations of management and are subject to assumptions, ricks and uncertainties, some of which are related to factors that are beyond the control of the Company. Accordingly, no assurance can be given that any particular expectation will be met and forward-looking statements regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. Past performance cannot be relied on as a guide to future performance. Nothing in this Annual Report should be construed as a profit forecast.
