**Notes to the Financial Statements
for the Period 30 March 2018 to 28 March 2019**

1. STATUTORY INFORMATION

Companion Care (Ipswich Martlesham) Limited is a private company, limited by shares, registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

2. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with the provisions of Section 1A "Small Entities" of Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006.

3. ACCOUNTING POLICIES

Basis of preparation

The financial statements have been prepared under the historical cost convention and on a going concern basis. The presentation currency is sterling (£).

Accounts are prepared on a 52 week period resulting in a fluctuating year end between the 25th and 31st March.

Going Concern

Notwithstanding net liabilities of £278,525 as at 28 March 2019 and a loss for the year then ended of £13,450, the financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reasons.

The directors have prepared cash flow forecasts for a period of 12 months from the date of approval of these financial statements which indicate that, taking account of reasonably possible downsides, the company will have sufficient funds, through in downside cases funding and other financial support from its Joint Venture Investor company, Companion Care (Services) Limited, to meet its liabilities as they fall due for that period.

Those forecasts are dependent on Companion Care (Services) Limited not seeking repayment of the amounts currently due to it, which at 10 October 2019 amounted to £154,104, and providing additional financial and other financial support during that period. Companion Care (Services) Limited has indicated its intention to continue to make available such funds and other financial support as are needed by the company, and that it does not intend to seek repayment of the amounts due at the balance sheet date, for the period covered by the forecasts. As with any company placing reliance on other related entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although, at the date of approval of these financial statements, they have no reason to believe that it will not do so.

Consequently, the directors are confident that the company will have sufficient funds to continue to meet its liabilities as they fall due for at least 12 months from the date of approval of the financial statements and consequently have prepared the financial statements on a going concern basis.

Turnover

Turnover represents the amounts (excluding value added tax) derived from the provision of goods and services to customers in the UK.

Turnover is recognised at point of sale except for turnover derived from Care Plans, which is recognised on an apportioned basis relative to delivery of the service.

Tangible fixed assets

Tangible fixed assets are initially measured at cost. Depreciation is charged so as to allocate the cost of assets less the estimated residual value over their estimated useful lives, on a straight line basis. Plant and machinery is depreciated over 3 - 10 years dependent on the individual asset's useful economic life.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Gains and losses on disposal are determined by comparing the proceeds with carrying amount and are recognised within the Income Statement.

3. ACCOUNTING POLICIES - continued

Stocks

Stocks are stated at the lower of cost and net realisable value.

Leases

Assets acquired under finance leases are capitalised and the outstanding future lease obligations are shown in creditors.

Operating lease rentals are charged to the profit and loss account on a straight line basis over the period of the lease.

Taxation

Taxation for the period comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives or the lease term, whichever is the shorter.

The interest element of these obligations is charged to profit or loss over the relevant period. The capital element of the future payments is treated as a liability.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

Dividends on shares presented within shareholders' funds

Dividends unpaid at the balance sheet date are only recognised as a liability at that date to the extent that they are appropriately authorised and are no longer at the discretion of the company. Unpaid dividends that do not meet these criteria are disclosed in the notes to the financial statements.

Dividends only become available for distribution once the terms of the Joint Venture agreement have been met.

3. ACCOUNTING POLICIES - continued

Classification of financial instruments issued by the company

Financial instruments issued by the Company are treated as equity (i.e. forming part of shareholders' funds) only to the extent that they meet the following two conditions:

a) they include no contractual obligations upon the Company to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Company; and

b) where the instrument will or may be settled in the Company's own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Company's own equity instruments or is a derivative that will be settled by the Company exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the Company's own shares, the amounts presented in these financial statements for called up share capital and share premium account exclude amounts in relation to those shares.

Finance payments associated with financial liabilities are dealt with as part of interest payable and similar charges. Finance payments associated with financial instruments that are classified as part of shareholders' funds (see dividends policy), are dealt with as appropriations in the reserves note.
