Directors' Report
For the Year Ended 31 December 2019

The directors present their report and the financial statements for the year ended 31 December 2019.

Directors' responsibilities statement

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 101 "Reduced Disclosure Framework", and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable United Kingdom Accounting Standards, comprising FRS 101, have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal activity

The Company's principal activity during the year was the generation of electrical power by solar power equipment.

Good Energy Cross Road Plantation Solar Park (028) Limited) is a private limited company incorporated in England and Wales under the Companies Act 2006, and it is domiciled within the United Kingdom. Good Energy Generation Assets No. 1 Limited is the immediate parent company. Good Energy Group PLC is the ultimate parent company of the group to which the Company and its immediate parent belong.

Results and dividends

The loss for the year, after taxation, amounted to £14,528 *(2018 - loss £67,183)*.

During the year no dividend (2018: £nil) was paid. The directors do not recommend the payment of a final dividend (2018: £nil).

Directors

The directors who served during the year were:

Juliet Davenport
Stephen Rosser (resigned 20 March 2020)

Qualifying third party indemnity provisions

As permitted by the Articles of Association, the directors have the benefit of an indemnity which is a qualifying third party indemnity provision as defined by Section 234 of the Companies Act 2006. The indemnity was in force throughout the last financial year and is currently in force.

The ultimate parent company, Good Energy Group plc, also purchased and maintained throughout the financial year Directors' and Officers' liability insurance in respect of itself and its directors.

Principal risks and uncertainties

The main financial risks arising from the Company's activities are liquidity risk, commodity risk, credit risk and interest rate cash flow risk.

Liquidity risk

The Company's approach to managing liquidity is to ensure, as far as possible, that it has sufficient funds to meet its liabilities when due under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. It achieves this by monitoring cash flow forecasts on a 'rolling forecast' basis to ensure it has sufficient cash to meet operational needs while maintaining enough headroom on its cash reserves at all times so as not to breach borrowing limits or covenants.

Commodity price risk

The Company's operations result in exposure to fluctuations in energy prices. In order to manage this, management ensures that the Company enters into sale contracts where the price is fixed for an extended period. Management also ensures that, once the fixed period has concluded, the contract includes a minimum renewal price (a 'floor price'). This ensures that the profits can be maintained at a minimum level to ensure the ongoing profitability of the Company.

Credit risk

The Company's exposure to credit risk arises from its debtors from customers. At 31 December 2019 and 2018, the Company's trade debtors were classed as due within one year, details of which are included in note 11. The Company's policy is to undertake credit checks where appropriate on new customers and to provide for expected credit losses (ECLs) based on estimated irrecoverable amounts determined by reference to specific circumstances and past default experience. At the Statement of Financial Position date the directors have concluded that no provision for expected credit loss is necessary and believe that there is no further credit risk.

Interest rate cash flow risk

The financial risk is the risk to the Company's earnings that arises from fluctuations in interest rates and the degree of volatility of these rates. The Company has borrowings in the form of a loan from the parent company. The directors do not consider the risk from the intercompany loan interest rate to be significant. There is risk of legislative change and impact on the economy and therefore interest rates as a result of Brexit, and management are alert to any decisions that may be made over the coming year in this area.

Directors' Report (continued)
For the Year Ended 31 December 2019

Small companies note

In preparing this report, the directors have taken advantage of the small companies exemptions provided by section 415A of the Companies Act 2006.

This report was approved by the board and signed on its behalf.

1. General information

Good Energy Cross Road Plantation Solar Park (028) Limited is a private limited company incorporated in the United Kingdom under the Companies Act 2006 and is domiciled within the United Kingdom.

The nature of the Company's operations and its principal activities are set out in the Directors' Report. The Company is not listed. The Company's registered office and principal place of business is Monkton Reach, Monkton Hill, Chippenham, Wiltshire, SN15 1EE. The Company's registered number is 08559827.

These financial statements are presented in pounds sterling which is the functional and presentation currency.

2. Accounting policies

2.1 Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention unless otherwise specified within these accounting policies and in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' and the Companies Act 2006.

The preparation of financial statements in compliance with FRS 101 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies (see note 3).

The following principal accounting policies have been applied:

2.2 Financial reporting standard 101 - reduced disclosure exemptions

The company has taken advantage of the following disclosure exemptions under FRS 101:

- the requirements of IFRS 7 Financial Instruments: Disclosures
- the requirements of paragraphs 91-99 of IFRS 13 Fair Value Measurement
- the requirements of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers
- the requirements of paragraph 52, the second sentence of paragraph 89, and paragraphs 90, 91 and 93 of IFRS 16 Leases. The requirements of paragraph 58 of IFRS 16, provided that the disclosure of details in indebtedness relating to amounts payable after 5 years required by company law is presented separately for lease liabilities and other liabilities, and in total
- the requirement in paragraph 38 of IAS 1 'Presentation of Financial Statements' to present comparative information in respect of:
  - paragraph 79(a)(iv) of IAS 1;
  - paragraph 73(e) of IAS 16 Property, Plant and Equipment;
- the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134-136 of IAS 1 Presentation of Financial Statements
- the requirements of IAS 7 Statement of Cash Flows
- the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors
- the requirements of paragraph 17 and 18A of IAS 24 Related Party Disclosures
- the requirements in IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member

2. Accounting policies (continued)

2.3 Going concern

The Company has net liabilities and a loss for the financial year, and receives ongoing financial support from the ultimate parent company. This support has been confirmed for at least 12 months from the date of signing these financial statements. However, with the current outbreak of COVID-19 in the UK, there is uncertainty over lockdown periods and economic conditions which cause decreases in electricity consumption and decreases the ability for customers to pay debts as they fall due.

The operation of the generation sites has been unaffected during the lockdown period. The site can operate without human intervention and contractors have been able to attend the site for any required maintenance as they have been exempted from travel restrictions, due to utilities being an essential service. Whilst it is difficult to forecast the impact of COVID-19, the Company's day to day activities continue without being materially affected.

The Directors completed a detailed going concern assessment for Good Energy Group PLC covering a range of scenarios. A reverse cash stress test ("the Test") was completed as part of this assessment in which there was a reduction in customer payments by up to 40% during a six month lockdown period, of which 50% was not subsequently collected and 100% of bondholders elected to redeem their bonds in June 2021. Under this scenario the Group has sufficient cash to meet its obligations in full and remain compliant with its counterparty covenants.

Given the expected economic downturn, it remains plausible that despite the current impacts of COVID-19 on the Group not being as severe as any of the range of scenarios prepared and with cash collection rates remaining in line with seasonal norms, the impacts could yet outturn worse than the Test scenario. For this reason, a material uncertainty over going concern has been identified over the ability of the Group to meet their obligations as they fall due.

Due to the material uncertainty over going concern within Good Energy Group PLC, as the guarantor for the company's operations, a material uncertainty has also been recognised in the Company. Notwithstanding the material uncertainty described above, after making enquiries and assessing the progress against forecast, projections and status of the mitigating actions referred to above, the Directors have a reasonable expectation that the Company will continue in operation and meet its commitments as they fall due over the going concern period. Accordingly, the Directors continue to adopt the going concern basis in preparing the financial statements.

2. Accounting policies (continued)

2.4 New standards, amendments and IFRIC Interpretations

The company applied IFRS 16 Leases for the first time. The nature and effect of the changes as a result of adoption of these new standards are described below.

Several other amendments and interpretations apply for the first time in 2019, but do not have an impact on the financial statements of the company. The company has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

IFRS 16 Leases

IFRS 16 Leases supersedes IAS 17 Leases, along with three Interpretations: IFRIC 4 Determining whether an Arrangement contains a Lease, SIC 15 Operating Leases – Incentives, and SIC 27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases. As a lessee, the adoption of this standard requires the company to recognise a right-of-use asset and a related lease liability on the Statement of Financial Position. The company has no leasing activities as a lessor. The standard provides specific transition requirements and practical expedients, which have been applied by the company as detailed below.

The company adopted IFRS 16 using the modified retrospective approach, with the date of initial application of 1 January 2019. Under this approach, the standard is applied retrospectively, with any cumulative effect of initially adopting IFRS 16 being recognised within equity as an adjustment to the opening balance of retained earnings for the current period.

For the company however, there was no impact on opening retained earnings, as the right-of-use assets were recognised at an amount equal to the lease liabilities, adjusted for any accrued or prepaid lease payments. Comparatives have therefore not been restated as permitted under the specific transition provisions within the standard.

Upon adoption, the company applied a single recognition and measurement approach for all leases, with the exception of those identified as low-value, or as having a remaining lease term of less than 12 months from the date of initial application.

Please refer to note 2.15 for the accounting policy for leases beginning from 1 January 2019.

The effect of adoption of IFRS 16 as at 1 January 2019 is as follows:

- Right-of-use assets of £705,065 were recognised and presented within fixed assets in the Statement of Financial Position. This includes:
  - Decommissioning costs related to the right-of-use assets with a net book value of £167,006 were also reclassified from plant and machinery.
- Lease liabilities of £538,059 were recognised within borrowings.

For the year ended 31 December 2019:

- The depreciation expense increased due to the depreciation/amortisation of additional assets recognised (being the increase in right-of-use assets, net of the decrease in property, plant and equipment). This resulted in increases in cost of sales of £19,928.
- The rent expense included within cost of sales relating to previous operating leases decreased by £33,331.

2. Accounting policies (continued)

- Finance costs increased by £36,857, relating to the interest expense on additional lease liabilities recognised.

The company has lease contracts for the access to, and use of, land on which its generation assets are located. Prior to the adoption of IFRS 16, the company classified each of these leases (as a lessee) as an operating lease.

For leases previously accounted for as operating leases, the following have been applied by the company:

- For leases identified as low value, or as short-term (i.e. having a remaining lease term of less than 12 months from the date of initial application), the company has elected to apply the recognition exemption and practical expedient to not recognise right-of-use assets. Instead, the lease expense will be accounted for on a straight-line basis over the remaining lease term and recognised in the Statement of Comprehensive Income.

- For those leases not identified as low value or short-term, the company recognised right-of-use assets and lease liabilities. The right-of-use assets were recognised at an amount equal to the lease liablity, adjusted for any prepaid or accrued lease payments that existed at the date of *initial application*.

The lease liabilities were recognised based on the present value of the lease payments which remain unpaid at the date of initial application, discounted using the incremental borrowing rate at that same date.

2.5 Impact of new international reporting standards, amendments and interpretations

IFRS 16

The Company has applied IFRS 16 using the modified retrospective approach, under which the cumulative effect of initial application is recognised in retained earnings at 1 January 2019.

On transition to IFRS 16, the Company elected to apply the following practical expedients:

- the Company has not reassessed contracts that were not identified as leases under IAS 17 and IFRIC 4 to determine whether these is a lease under IFRS 16. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or modified on or after 1 January 2019.
- for leases previously classified as operating leases under IAS 17 -
- the Company has applied a single discount rate to a portfolio of leases with similar characteristics.
- the Company has applied the exemption not to recognise right-of-use assets and liabilities for leases with less than 12 months of remaining lease term at the date of application.
- the Company has excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- the Company has used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

The following tables summarise the impacts of adopting new reporting standards on the Company's financial statements.

2. Accounting policies (continued)

2.5 Impact of new international reporting standards, amendments and interpretations (continued)

Statement of Financial Position (extract)

2. Accounting policies (continued)

2.6 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured as the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes. The following criteria must also be met before revenue is recognised:

The Company is in the business of generation of power. Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring to the customer.

The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in note 3.

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer.

If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made, or when the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract. The Company recognises contract liabilities when customers are in a credit position.

Power generation revenue

Revenue is generated when the solar asset produces power that is sold to Good Energy Limited through a Power Purchase Agreement at an arm's length fixed price per MWh, which is the transaction price. The performance obligation is satisfied immediately when the Company solar assets generate the power. Payment is made no more than one month after the delivery month of the power ends. No refunds, returns or warranties are applicable.

Feed-in-Tariff (FiT) revenue

The Company receives FiT subsidy revenue from Ofgem. The FiT scheme (introduced in April 2010) is a government scheme designed to promote the uptake of renewable generation technologies. FiT payments are received quarterly for the electricity that the generating asset has generated and exported in the period, based on meter readings supplied. This is a single performance obligation (to generate renewable electricity) and the transaction price is explicitly set out per unit of electricity generated. The performance obligation is satisfied immediately when the power is generated. Payment is received from Ofgem approximately 45 days after the end of the period of generation. No refunds, returns or warraties are applicable.

2. Accounting policies (continued)

2.7 Tangible assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The Company adds to the carrying amount of an item of fixed assets the cost of replacing part of such an item when that cost is incurred, if the replacement part is expected to provide incremental future benefits to the Company. The carrying amount of the replaced part is derecognised. Repairs and maintenance are charged to profit or loss during the period in which they are incurred.

Depreciation is charged so as to allocate the cost of assets less their residual value over their estimated useful lives, using the straight-line method.

The estimated useful lives range as follows:

Long-term leasehold property	- 27 years
Generation assets	- 27 years

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted prospectively if appropriate, or if there is an indication of a significant change since the last reporting date.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

2.8 Impairment of tangible assets

The carrying amounts of the Company's assets are reviewed at each Statement of Financial Position date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in the Statement of Comprehensive Income in those expense categories consistent with the function of the impaired asset.

2. Accounting policies (continued)

2.9 Financial instruments

The Company uses certain financial instruments in its operating and investing activities that are deemed appropriate for its strategy and circumstances.

Financial instruments recognised on the Statement of Financial Position include cash and cash equivalents, trade receivables, trade payables and borrowings. Financial assets and liabilities are recognised on the Statement of Financial Position when the Company has become a party to the contractual provisions of the instrument.

Financial assets at amortised cost

The Company's financial assets at amortised cost comprise trade and other receivables and cash and cash equivalents in the Statement of Financial Position. These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are solely payments of principal and interest. They arise principally through the provision of goods and services to customers (e.g. trade receivables), but also incorporate other types of contractual monetary asset. They are initially recognised at fair value and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment. These are held in a business model which intends to hold the financial assets to collect the contractual cash flows rather than through sale. Trade receivables are shown inclusive of unbilled amounts to customers.

The Company recognises an allowance for expected credit losses (ECLs) for all financial assets measured at amortised cost. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive. For trade receivables and contract assets, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For trade receivables, which are reported net, such provisions are recorded in a separate allowance account with the loss being recognised within administrative expenses in the Statement of Comprehensive Income. On confirmation that the trade receivable will not be collectable, the gross carrying value of the asset is written off against the associated provision.

Cash and cash equivalents comprise cash on hand and on demand deposits, and other short term, highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Financial liabilities and equity

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the course of ordinary business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at fair value and subsequently held at amortised cost.

2. Accounting policies (continued)

2.8 Financial instruments (continued)

Borrowings

The Company expenses borrowing costs over the term of the loan facility. Where borrowing costs are attributable to the acquisition, construction or production of a qualifying asset, such costs are capitalised as part of the specific asset. Details of the Company's borrowings are included in note 14.

2.10 Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.11 Finance costs

Finance costs are charged to profit or loss over the term of the debt using the effective interest method so that the amount charged is at a constant rate on the carrying amount. Issue costs are initially recognised as a reduction in the proceeds of the associated capital instrument.

2.12 Dividends

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

2.13 Decommissioning provision

Liabilities for decommissioning costs are recognised when the Company has an obligation to dismantle and remove the generation assets and restore the land on which it is located. Liabilities may arise upon construction of such facilities, upon acquisition or through a subsequent change in legislation or regulations. The amount recognised is the estimated present value of expenditure determined in accordance with local conditions and requirements. A corresponding tangible item of property, plant and equipment to the provision is also created.

Any changes in the present value of the estimated expenditure is added to or deducted from the cost of the assets to which it relates. The adjusted depreciated amount is then depreciated prospectively over its useful economic life. The unwinding of the discount on the decommissioning provision is included as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate.

2. Accounting policies (continued)

2.14 Current and deferred taxation

The tax expense for the year comprises current and deferred tax. Tax is recognised in profit or loss except that a charge attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the Company operates and generates income.

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the Statement of Financial Position date, except that:

- The recognition of deferred tax assets is limited to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits; and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deductions available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

2.15 Leases

The Company as a lessee

The Company assesses whether a contract is or contains a lease, at inception of a contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease agreements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate. [Provide an explanation how the incremental borrowing rate is determined].

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;

The lease liability is included in 'Creditors' on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect

2. Accounting policies (continued)

2.15 Leases (continued)

the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised discount rate.
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).

The Company did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are included in the 'Intangible Assets', 'Tangible Fixed Assets' and 'Investment Property' lines, as applicable, in the Statement of Financial Position.

The Company applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in note 2.7.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has used this practical expedient.

3. Judgements in applying accounting policies and key sources of estimation uncertainty

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Revenue from contracts with customers

Estimates over revenue from contracts with customers

Revenue calculated from energy sales includes an estimate of the quantity in units of energy supplied to customers between the date of the last meter reading and the end of the reporting period. 17% of the total revenue figure is estimated, with a fixed transaction price and estimated unit consumption. The estimates are made using historical consumption patterns, industry estimated consumption rates, and seasonality data available, and takes into consideration industry reconciliation processes, upon which the Company takes a prudent position until final reconciliation data is available from the industry fourteen months after the supply date.

Provision for expected credit losses of trade receivables and contract assets

The Company uses a provision matrix to calculate ECLs for trade receivables. The impairment loss is measured at lifetime ECL. The debtors have been segmented into intercompany and third-party debtors. The ECL is immaterial to the Company's financial position.

Judgements over revenue from contracts with customers

The Company applied the following judgements that affect the determination of the amount and timing of reveneue from contracts with customers:

Identifying performance obligations in contracts

Revenue from contracts with customers includes power generation revenue and Feed-in-Tariff (FiT) revenue. Most of these performance obligations are easily identifiable, and are seperable.

Determining the timing and satisfaction of the services

Revenue for these services is to be recognised over time, because the customer simultaneously receives and consumes the benefits provided by the Company.

Decommissioning provision

Liabilities for decommissioning costs are recognised when the Company has an obligation to dismantle and remove the generation assets and restore the land on which it is located. Liabilities may arise upon construction of such facilities, upon acquisition or through a subsequent change in legislation or regulations. The amount recognised is the estimated present value of expenditure determined in accordance with local conditions and requirements. A corresponding tangible item of property, plant and equipment to the provision is also created.

Any changes in the present value of the estimated expenditure is added to or deducted from the cost of the assets to which it relates. The adjusted depreciated amount is then depreciated prospectively over its useful economic life. The unwinding of the discount on the decommissioning provision is included as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. The full effect of the unwinding will take place over the remaining economic useful life of the asset which is 25 years. This outflow is expected to take place in 2043. There are uncertainties around the estimation of the discount factor used.

4. Revenue

The whole of the revenue is attributable to the Company's principal activity being the supply of electricity generated by solar power equipment.

Segmental revenue recognition:

	2019 £	*2018 £*
Power	**291,127**	*280,020*
FiT	**375,446**	*371,801*
Other	-	-
	666,573	*651,821*

Contract balances

The Company has no contract liabilities or contract assets.

5. Operating profit

The operating profit is stated after charging:

	2019 £	*2018 £*
Depreciation of tangible fixed assets	**223,132**	*220,331*

6. Employees

Staff costs were as follows:

	2019 £	*2018 £*
Wages and salaries	**27,520**	*24,352*
	27,520	*24,352*

During the year salary costs were recharged from Good Energy Limited, a fellow subsidiary, for time spent by its employees working for the Company. The recharge amount relates to time spent by less than 1 full time equivalent employee. The payments to staff are all borne by Good Energy Limited along with all responsibilities surrounding those payments.

7. Directors' remuneration

During the year, no director received any emoluments (2018: £nil).

The directors are employed by other group companies within the Good Energy Group PLC group and are remunerated by fellow group companies for their services to the group as a whole. It is not practical to allocate their remuneration for their services as a director between group companies. Details of their remuneration and any compensation for loss of office can be found in the financial statements of Good Energy Group PLC.

8. Finance costs

	2019 £	*2018* *£*
Other loan interest payable	2	*5*
Loans from group undertakings	324,676	*369,389*
Interest on lease liabilities	36,857	*-*
	361,535	*369,394*

9. Taxation

	2019 £	*2018* *£*
Corporation tax		
Current tax on profits for the year	(25,163)	*(51,952)*
Adjustments in respect of previous periods	7,149	*-*
Total current tax	**(18,014)**	*(51,952)*
Deferred tax		
Origination and reversal of timing differences	17,769	*31,124*
Adjustments in respect of prior years	(10,809)	*(7,094)*
Total deferred tax	**6,960**	*24,030*
Taxation on loss on ordinary activities	**(11,054)**	*(27,922)*

9. Taxation (continued)

Factors affecting tax charge for the year

The tax assessed for the year is lower than *(2018 - lower than)* the standard rate of corporation tax in the UK of 19.00% *(2018 - 19.00%)*. The differences are explained below:

	2019 £	*2018 £*
Loss on ordinary activities before tax	**(25,582)**	*(95,105)*
Loss on ordinary activities multiplied by standard rate of corporation tax in the UK of 19.00% (2018: 19.00%)	**(4,861)**	*(18,070)*
Effects of:		
Fixed asset differences	**(444)**	-
Effects of changes in tax rate	**(2,091)**	*(3,662)*
Adjustments in respect of prior years	**7,149**	*(7,095)*
Adjustments in respect of prior years - deferred tax	**(10,809)**	-
Other deferred tax movements	**2**	*905*
Group relief surrenedered/(claimed)	**25,163**	-
Payment/(receipt) for group relief	**(25,163)**	-
Total tax credit for the year	**(11,054)**	*(27,922)*

Factors that may affect future tax charges

Changes to the UK corporation tax rates were substantively enacted as part of the Finance Act 2016 (on 15 September 2016), which included a reduction to the main rate of corporation tax to 17% from 1 April 2020.

As the changes have been substantively enacted at the reporting date, their effects are included within these financial statements. Accordingly, deferred tax balances have been calculated using a rate of 17%.

The Chancellor's Spring Budget on 11 March 2020 announced that the UK corporation tax rate is to remain at 19% effective from 1 April 2020. This was enacted on 11 March 2020. The deferred tax balances have not been updated to reflect this and the overall impact of this rate change on the closing deferred tax liability would be an increase of £5,179.

10. Tangible assets

	Long-term leasehold property £	Generation assets £	Total £
Cost or valuation			
At 1 January 2019	-	5,505,054	5,505,054

	2019 £	2018 £
Cash at bank and in hand	**5,768**	*3,451*
	5,768	*3,451*

13. Creditors: amounts falling due within one year

	2019 £	2018 £
Trade creditors	**3,668**	*4,927*
Other taxation and social security	**13,561**	*2,884*
Lease liabilities	**32,151**	-
Accruals and deferred income	**23,562**	*29,445*
	72,942	*37,256*

For more information regarding the leases please see note 15.

14. Creditors: amounts falling due after more than one year

	2019 £	2018 £
Lease liabilities	**509,434**	-
Amounts owed to group undertakings	**5,029,299**	*5,246,346*
	5,538,733	*5,246,346*

Amounts owed to group undertakings are unsecured, bear interest at 8.85% and have no fixed date of repayment. The counterparty has agreed that these amounts will not be repayable for at least one year from 31 December 2019.

For more information regarding the leases please see note 15.

15. Leases

Company as a lessee

The Company has lease contracts for the access to, and use of, land on which its generation assets are located.

Leases of land (inclusive of access rights) typically have lease terms of between 20 and 30 years. The Company's obligations under its leases are secured by the lessor's title to the leased assets.

Each lease generally imposes a restriction from subleasing the underlying assets to another party, therefore the right-of-use assets can only be used by the Company.

The lease payments within all of the Company's lease agreements (with the exception of short-term leases, leases of low-value underlying assets, and those leases containing a variable lease payment component) are linked to annual changes in the Retail Price Index.

The Company's leases are subject to variable lease payments which do not depend on an index or rate. These relate to the Company's generation assets, where the lease payments are based on the actual performance of the asset (which in turn is dependent upon the weather). These payments are not, in substance, fixed and therefore are excluded from the initial measurement of the lease liability and rightof-use asset.

Lease liabilities are due as follows:

	2019 £
Not later than one year	32,151
Between one year and five years	116,803
Later than five years	392,631
	541,585

The following amounts in respect of leases, where the Company is a lessee, have been recognised in profit or loss:

	2019 £
Interest expense on lease liabilities	36,857

16. Deferred taxation

	2019 £	*2018 £*
At beginning of year	(37,059)	*(13,031)*
Charged to profit or loss	(6,960)	*(24,028)*
At end of year	**(44,019)**	*(37,059)*

The provision for deferred taxation is made up as follows:

	2019 £	*2018 £*
Accelerated capital allowances	(98,506)	*(91,547)*
Tax losses carried forward	54,487	*54,488*
	(44,019)	*(37,059)*

17. Other provisions

	2019 £	*2018 £*
Decommissioning provision	179,516	*176,446*
	179,516	*176,446*

A provision has been recognised for decommissioning costs associated with Cross Road Plantation Solar Park.

An increase of £2,070 has been added to the decommissioning provision to reflect the unwinding of the discount factor. The full effect of the unwinding will take place over the remaining economic useful life of the asset which is 24 years. This outflow is expected to take place in 2043. There are uncertainties around the estimation of the discount factor used.

18. Called up share capital

	2019 £	*2018 £*
Allotted, called up and fully paid		
1 *(2018 - 1)* Ordinary share of £1.00	1	*1*

19. Reserves

Profit and loss account

The profit and loss account represents the accumulated profits, losses and distributions of the Company.

20. Related party transactions

The Company is a wholly owned subsidiary of Good Energy Group PLC and has taken advantage of the exemption conferred by Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101) not to disclose transactions with Good Energy Group PLC or its subsidiaries.

21. Post balance sheet events

In March 2020 the outbreak of COVID-19 became a global issue. In light of the outbreak's wide-ranging implications, a detailed going concern review has been undertaken by the parent company Good Energy Group PLC at a group level to ensure continued operations throughout the period affected, with a focus on cash flows and business continuity plans. To date, the group has not seen any significant financial impact from the COVID-19 outbreak, however it continues to monitor the situation closely throughout the coming weeks and months. Estimates of these impacts cannot be made precisely at this time due to the rapidly changing nature of the outbreak, and its subsequent effects.

The extent of this period of closure and the impact on the economy after lockdown are uncertain, but the Group's downside scenario forecasting indicates impacts on customer energy usage and cash collection rates as compared to the Board's expectations prior to development of the COVID-19 pandemic. The Directors do not currently expect an impairment of property, plant and equipment or right of use assets.

The Directors have concluded that the latest developments up to the date of signing of these financial statements have not provided further information about the circumstances existing at the reporting date, therefore do not expect any adjustments to these financial statements to be made as a consequence.

22. Ultimate parent undertaking and controlling party

The Company's ultimate parent undertaking and controlling party is Good Energy Group PLC, a company incorporated in England and Wales.

Good Energy Group PLC is the parent undertaking of the largest group of undertakings to consolidate these financial statements. The consolidated financial statements of Good Energy Group PLC can be obtained from:

Monkton Raech
Monkton Hill
Chippenham
Wiltshire
SN15 1EE.

The Company's immediate parent undertaking is Good Energy Generation Assets No. 1 Limited, a company incorporated in England and Wales.

Good Energy Generation Assets No. 1 Limited is the parent undertaking of the smallest group of undertakings to consolidate these financial statements. The consolidated financial statements of Good Energy Generation Assets No. 1 Limited can be obtained from:

Monkton Raech
Monkton Hill
Chippenham
Wiltshire
SN15 1EE.
