Notes to the financial statements Year ended 31 March 2021

1. General information

The company is a private company limited by shares, registered in England & Wales. The address of the registered office is Clive House, 2 Old Brewery Mews, Hampstead, London, NW3 1PZ.

2. Statement of compliance

These financial statements have been prepared in compliance with the provisions of FRS 102, Section 1A, 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'.

Under FRS 102 Section 1A, advantage has been taken of the disclosure exemption available not to present a cash flow statement. The preparation of financial statements in compliance with FRS 102 Section 1A requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying teh company's accounting policies.

3. Accounting policies

Basis of preparation

The financial statements have been prepared on the historical cost basis, as modified by the revaluation of certain financial assets and liabilities and investment properties measured at fair value through profit or loss.

The financial statements are prepared in sterling, which is the functional currency of the entity.

Consolidation

The company has taken advantage of the option not to prepare consolidated financial statements contained in Section 398 of the Companies Act 2006 on the basis that the company and its subsidiary undertakings comprise a small group.

Turnover

Turnover represents rent receivable from investment properties let during the period under review.

Taxation

The taxation expense represents the aggregate amount of current and deferred tax recognised in the reporting period. Tax is recognised in the statement of comprehensive income, except to the extent that it relates to items recognised in other comprehensive income or directly in capital and reserves. In this case, tax is recognised in other comprehensive income or directly in capital and reserves, respectively.

Current tax is recognised on taxable profit for the current and past periods. Current tax is measured at the amounts of tax expected to pay or recover using the tax rates and laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognised in respect of all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date that are expected to apply to the reversal of the timing difference.

Notes to the financial statements (continued) Year ended 31 March 2021

3. Accounting policies (Continued)

Investment property

Investment property is shown at directors' valuation of market value expected to realise if the properties concerned were offered for sale individually in the open market at the Balance Sheet date. Investment property is carried at fair value determined annually by the directors and derived from the current market rents and investment property yields for comparable real estate, adjusted if necessary for any difference in nature, location or condition of the specific asset. No depreciation is provided. Changes in fair value are recognised in statement of comprehensive income for the year. Investment properties are valued by the directors annually using a yield methodology. This uses market rental values capitalised at market capitalisation rates but there is an inevitable degree of judgement involved in that each property is unique and value can ultimately be reliably tested by the market itself.

Fixed asset investments

Fixed asset investments are initially recorded at cost and subsequently stated at cost less any accumulated impairment losses.

Impairment

A review for indicators of impairment is carried out at each reporting date, with the recoverable amount being estimated where such indicators exist. Where the carrying value exceeds the recoverable amount, the asset is impaired accordingly. Prior impairments are also reviewed for possible reversal at each reporting date.

Provisions

Provisions are recognised when the entity has an obligation at the reporting date as a result of a past event; it is probable that the entity will be required to transfer economic benefits in settlement and the amount of the obligation can be estimated reliably. Provisions are recognised as a liability in the statement of financial position and the amount of the provision as an expense.

Provisions are initially measured at the best estimate of the amount required to settle the obligation at the reporting date and subsequently reviewed at each reporting date and adjusted to reflect the current best estimate of the amount that would be required to settle the obligation. Any adjustments to the amounts previously recognised are recognised in profit or loss unless the provision was originally recognised as part of the cost of an asset. When a provision is measured at the present value of the amount expected to be required to settle the obligation, the unwinding of the discount is recognised in finance costs in profit or loss in the period it arises.

Financial instruments

A financial asset or a financial liability is recognised only when the company becomes a party to the contractual provisions of the instrument.

Basic financial instruments are initially recognised at the transaction price, unless the arrangement constitutes a financing transaction, where it is recognised at the present value of the future payments discounted at a market rate of interest for a similar debt instrument.

Debt instruments are subsequently measured at amortised cost.

Notes to the financial statements (continued) Year ended 31 March 2021

4. Judgements and key sources of estimation uncertainty

The preparation of financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (UK GAAP), requires the use of certain critical accounting estimates and judgements. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Although these estimates are based on directors' best knowledge of the amount, event or actions, actual results may differ from those estimates. The following is intended to provide an understanding of the policies that the directors consider critical because of the level of complexity, judgement or estimation involved in their application and their impact on the financial statements.

Investment property valuation

Investment property is revalued annually to fair value using an income capitalisation technique. The valuation is prepared by the directors, based upon assumptions including future rental value, anticipated property costs, future development costs and the appropriate discount rate. Reference is also made to market evidence of transaction prices for similar properties.

Despite continued uncertainity around the long-term impact of the COVID-19 Pandemic on the global economy, there has been increased levels of transactional and comparable evidence throughout the reporting period. On this basis and aligned with guidance from the Royal Institute of Chartered Surveyors (RICS), the proviso relating to the material uncertainity around the 31 March 2020 property valuations is not applicable for the 31 March 2021 year end valuations. As the reopening of the global economies has progressed, the directors continue to monitor the economic recovery in the context of the risks presented to the company's business.

Recoverability of debtors

The recoverability of debtors is assessed based on factors specific to each individual debtor.

Notes to the financial statements (continued) Year ended 31 March 2021
