Basis of preparing the financial statements

The financial statements have been prepared under the historical cost convention.

Going concern

The directors have reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The directors have reached this conclusion giving due consideration to the projected future performance of the company and any potential risk that might impact the company's ability to meet its required solvency levels. For this reason, they continue to adopt the going concern basis in preparing the financial statements.

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Statement of Income and Retained Earnings, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.
