The financial statements have been prepared under the historical cost convention.

Significant judgements and estimates

In preparing these financial statements the director has made the following judgements:

Consider the recoverability of trade debtors and work in progress and the need for impairment provisions. These considerations are undertaken regularly by the director, and especially at the year end date. Factors taken into account include historical experience, current market conditions and knowledge of the sector. Amounts identified as irrecoverable will be provided against in the relevant period.

Consider the depreciation rates on an annual basis to ensure there is sufficient evidence to support these and that the estimates remains reasonable.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes.

Turnover represents the provision of services net of value added tax.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the statement of financial position date.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the statement of financial position date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.
