Notes to the Accounts
for the year ended 31 March 2017

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention, modified to include the revaluation of certain assets, and in accordance with FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland (as applied to small entities by section 1A of the standard). There were no material departures from that Standard.

Turnover

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes.

Turnover from the rendering of services is recognised by reference to the stage of completion of the contract. The stage of completion of a contract is measured by comparing the costs incurred for work performed to date to the total estimated contract costs. Where the outcome cannot be measured reliably, turnover is recognised only to the extent of the expenses recognised that are recoverable.

Interest and dividends receivable

Interest income is recognised on receivable basis.

Investments

Unlisted investments are measured at fair value unless the value cannot be measured reliably, in which case they are measured at cost less any accumulated impairment losses. Changes in fair value are included in the profit and loss account.

Debtors and creditors receivable or payable within one year

Debtors and creditors with no stated interest rate and receivable or payable within one year are recorded at transaction price. Any losses arising from impairment are recognised in the profit and loss account in other administrative expenses.

Impairment

Assets not measured at fair value are reviewed for any indication that the asset may be impaired at each balance sheet date. If such indication exists, the recoverable amount of the asset, or the asset's cash generating unit, is estimated and compared to the carrying amount. Where the carrying amount exceeds its recoverable amount, an impairment loss is recognised in the profit or loss unless the asset is carried at a revalued amount where the impairment loss is a revaluation decrease.

Taxation

Current tax represents the amount of tax payable or receivable in respect of the taxable profit (or loss) for the current or past reporting periods. It is measured at the amount expected to be paid or recovered using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Provisions

Provisions (i.e. liabilities of uncertain timing or amount) are recognised when there is an obligation at the reporting date as a result of a past event and, it is probable that economic benefit will be transferred to settle the obligation and the amount of the obligation can be estimated reliably.

1 Accounting policies (continued)

Foreign currency translation

Transactions in foreign currencies are initially recognised at the rate of exchange ruling at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated at the closing rate of exchange. Non-monetary items that are measured at historical cost are translated at the rate ruling at the date of the transaction. All differences are charged to the profit or loss.

3 Investments

	Other investments £

Additions	59,657
At 31 March 2017	<u>59,657</u>

Other investments are measured at cost less impairment on the basis as they represent shares in entities that are not publicly traded and the fair value cannot otherwise be measured reliably without undue costs.
