Notes to the Return

EULER International Limited

Financial period ended 31st December 1999

1001 Reconciliation of net assets to the accounts

The Unearned Reinsurance Commission of £642,000 which is included in the liabilities in the Shareholder Accounts, has been netted against the Deferred Acquisition costs of £212,000 and Brokerage UPR of £236,000 in this return. This results in Deferred Acquisition costs shown on Line 85 of Form 13 of (£194,000). Although there is no net impact, it has resulted in gross valuation differences for the total admissible assets and total liabilities between this return and the Shareholder Accounts.

1002 Net Assets/other movements (F10L65)

The balance consists of £642,000 which arises from the difference in the value of the Unearned Reinsurance Commission transferred from Liabilities to Assets in the Calendar year 1999. The Unearned Reinsurance Commission is transferred to Assets so that it can be netted off against the Deferred Acquisition Costs. The difference of £642,000 is included in line 63 (which agrees to the movement in form 13 line 92 and line 94) and is also taken account of in line 62. To avoid double counting £642,000 is reversed out in line 65.

1305 Maximum Counterparty limit

The maximum counterparty limit permitted by the company's investment guidelines is £3,000,000. No breaches occurred during the year.

KFW International Finance	0.59

These exposures represent funds held on short term deposit with A1/P1 rated banking institutions. The deposits will mature during 2000.

2102 Provision for unearned Premium Calculation Class 8 business

The calculation of unearned premium for Class 8 business is based on a time apportionment basis. All policies are issued for a period of twelve months and usually go on risk on the first day of the month of renewal. Premium written is a function of policyholders turnover which, given the diversity of the insured base across industries and trades, accrues evenly over the year.

The company pro-rates the premium on a 12ths basis as it is considered that this mirrors the premium earning profile.

2202 Claims Management Expenses

A separate claims management unit has not yet been established due to the small amount of premium written in 1999.

All management expenses are identified at source and allocated to separately identified business units.

Claims management costs are carried forward to match the cost of handling claims arising in later years. The proportion carried forward is calculated with reference to the provision for claims outstanding at the end of the year.

2204 Acquisition Expenses.

Acquisition expenses are those costs arising from the conclusion of insurance contracts. Costs include costs directly attributable to the business unit together with indirect costs. The costs of advertising, commissions and administrative expenses associated with the processing of proposals are included.

Acquisition expenses are carried forward to future years in the proportion of premium written to earned and therefore match the revenue stream resulting from the activity.

Period ended 31st December 1999
