GULF INTERNATIONAL BANK

Gulf International Bank (GIB) aims to be the international GCC bank with regional expertise, global outreach and innovative financial solutions, and to be a value-adding partner, leveraging cutting-edge technology and superior human capital

GIB's mission is to provide innovative, convenient and customised financial products and services and, in parallel, to build and retain a reputation for trust, quality and reliability in order to establish GIB as the partner of choice and create long-term relationships This will enable the Bank to add value for its customers, be an employer of choice and meet shareholders' objectives

The Bank was established in the Kingdom of Bahrain in 1975 It is owned by the six GCC governments, with the Public Investment Fund of Saudi Arabia holding a majority stake (97.2 per cent). GIB has branches in London, New York, Riyadh and Jeddah, and representative offices in Beirut and Abu Dhabi, in addition to its main subsidiary, Gulf International Bank (UK). Limited, and Riyadh-based GIB Financial Services.

Mr Sulaiman bin Abdullah Al-Harndan Chief Executive Officer National Air Services Kingdom of Saudi Arabia

Mr Abdulla bin Mohammed Al Zamil Chief Executive Officer Zamil Industrial Investment Company Kingdom of Saudi Arabia

Mr. Khaled bin Saleh Al-Mudalfer President and CEO Saudi Arabian Mining Company Kingdom of Saudi Arabia

On behalf of the Board of Directors, it is my privilege to present the annual report for Gulf International Bank (GIB) for the year ended 31st December 2010. I am pleased to report that this year marked the Bank's return to profitability. In addition, we started the implementation of a new strategy designed to transform GIB into a pan-GCC universal bank.

This turnaround illustrates the success of the proactive measures initiated by GIB in 2009 and further reinforced during 2010. These included deleveraging and derisking the balance sheet through a managed reduction in the loan portfolio, restructuring the loan portfolio to reduce undue concentration, eliminating lower-rated exposures, strengthening the Bank's funding position by diversifying funding sources and restructuring the asset and liability maturity profile, and aligning the organisation and infrastructure, and associated costs, to maintain an efficient cost-to-income ratio.

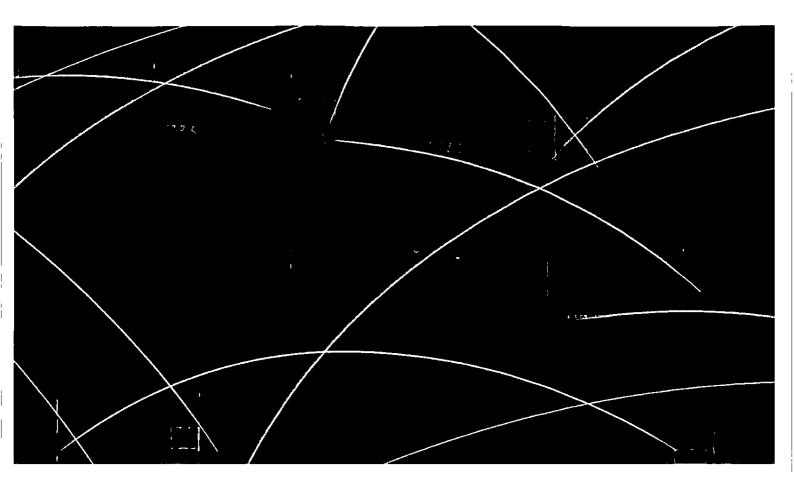

GIB reported consolidated net income after tax of US\$100.4 million, compared with a loss of US\$152.6 million for the prior year. Net interest income, which represented the Bank's principal income source, was 24 per cent down on 2009. The year-on-year decrease was attributable to the deleveraging and derisking of the balance sheet, and the prevailing historical low level of interest rates. Fee-related income at US\$42.2 million was US\$1.5 million higher than the previous year reflecting the on-going focus by GIB on enhancing fee-based revenue.

Trading profits at US\$12.7 million largely comprised

customer-related foreign exchange income, while other income of US\$12.7 million consisted principally of dividends received from listed equity investments and profits realised on investment securities Total expenses of US\$113.3 million were US\$9.5 million or 8 per cent lower than 2009, illustrating the successful implementation of proactive measures taken last year to align the cost base with the Bank's business model A net provision charge of only US\$4.0 million was recorded for 2010, reflecting the prudent and conservative provisioning actions taken by GIB in 2009

"This year marked the Bank's return to profitability. In addition, we started the implementation of a new strategy designed to transform GIB into a pan-GCC universal bank. This turnaround illustrates the success of the proactive measures initiated by GIB in 2009 and further reinforced during 2010."

Consolidated total assets at the year-end stood at US\$15.5 billion, with the asset profile reflecting a high level of liquidity that is being maintained as a precautionary measure in the prevailing challenging

market environment. Cash and other liquid assets, and placements, totalled US\$4.6 billion, representing a high 30 per cent of total assets Investment securities, which principally comprise highly-rated and liquid debt securities Issued by major financial institutions and regional government-related entities, amounted to US\$3.1 billion Following the actions taken to derisk the balance sheet and eliminate vulnerability to external shocks, GIB has no exposure to EU government debt, and accordingly has not been affected by the recent turmoil in the European government debt markets

Loans and advances amounted to US\$7.5 billion, being US\$1.8 billion down on the 2009 year-end level. As a result, the loan to equity ratio was a conservative 4 times, while the ratio of loans to deposits and term finance was a prudent 61 per cent. During 2010, GIB continued to adopt a cautious approach to its lending activities due to unpredictable market conditions.

During 2010, GIB's funding profile was significantly strengthened by the successful closing of a SAR 3.5 billion (US\$933 million) 5-year bond issue Originally targeted for SAR 3 billion, the final issue was Increased to satisfy substantial demand from Investors, with orders totalling SAR 6.3 billion in November 2009, GIB successfully completed a SAR 2 billion 3-year bond in Saudi Arabia, which was oversubscribed three times Such demand from a diverse group of highly respected institutional investors reflected the strong market confidence in GIB Through these recent bond issues, GIB has successfully reduced its previous reliance on short-term wholesale deposits, thereby more closely

aligning the maturity profile of the Bank's assets and liabilities. Total term finance at the end of the year totalled US\$3.7 billion, up by US\$0.2 billion on 2009, GIB has no material term finance maturities until 2012.

"GIB has successfully reduced its previous reliance on short-term wholesale deposits, thereby more closely aligning the maturity profile of the Bank's assets and liabilities."

GIB's Basel 2 total and tier I capital adequacy ratios at the end of the year were an exceptionally strong 24 per cent and 19 per cent respectively. These significantly exceed CBB minimum ratios, and are also high by international comparison. The results of a quantitative impact study of the effect of the new Basel 3 guidelines confirmed that GIB is already fully compliant with the new capital and leverage ratios that are to be implemented on a progressive basis through to 2019.

The Bank continued during 2010 to strengthen its corporate governance and risk management framework A comprehensive review was conducted to ensure GIB's compliance with the new Code of Corporate Governance for the Kingdom of Bahrain Issued by the Ministry of Industry & Commerce, together with additional requirements of the Central Bank of Bahrain

CHAIRMAN'S STATEMENT (CONTINUED)

Underscoring GIB's financial performance was the reaffirmation of the Bank's long-term issuer ratings by Fitch, Moody's and Standard & Poor's Such recognition constitutes a positive independent endorsement of the proactive and conclusive actions taken by GIB and its shareholders to address the challenges created by the global financial crisis

The financial performance of GIB during 2010 was achieved against a backdrop of continued global economic volatility and challenging regional market conditions. A number of important initiatives and developments contributed to a mild revival in the worldwide macroeconomic environment, and a moderate improvement in global business sentiment and investor confidence These included the passing of an act in the United States that represented the most sweeping overhaul of banking regulations since the 1930s, the positive results of stress tests by a number of EU banks, the introduction of Basel 3, the latest round of quantitative easing by the Federal Reserve, and the stabilisation of oscillating oil prices However, these events were offset, to some degree, by concerns regarding the continued pressure on the US dollar, the contagion of EU sovereign debt, increasing global currency tensions, the threat of rising inflation, and the possibility of a double-dip recession in some countries

"The Bank continued during 2010 to strengthen its corporate governance and risk management framework."

The stabilisation of oil prices, which averaged US\$79 per barrel in 2010, helped to alleviate concerns across the GCC about the lack of liquidity, stresses in the banking sector and subdued credit activity Regional economies exhibited reasonably stable growth rates during 2010, in line with IMF forecasts, and higher than the global average growth rate Government budgets were not severely affected by the crisis, and the economic outlook for the region remains positive, both in the medium and long term

The GCC states continue to benefit from the buffer of substantial financial reserves built over the years of strong oil prices Their underlying macroeconomic fundamentals remain sound, and the IMF is forecasting GDP growth of over 6 per cent in 2011 Oil prices are expected to remain stable, and the International Energy Agency predicts global oil demand to rise by around 2 per cent in 2011 The decision by the Federal

"The financial performance of GIB during 2010 was achieved against a backdrop of continued global economic volatility and challenging regional market conditions."

Reserve in November to purchase US\$600 billion of US government bonds is expected to assist the American economy in this latest round of quantitative easing, with a consequential increase in global liquidity In turn, this should benefit the GCC through increased capital flows via bond investments

The ability of GIB to take advantage of this positive outlook for the region will undoubtedly be enhanced by the Board's approval in 2010 of the Bank's new strategy This entails the transformation of GIB into a pan-GCC universal bank, based on four main pillars of corporate banking, investment banking, asset management and retail banking. The new institution will benefit from more diversified and stable funding, and additional revenue streams, thus reducing volatility and minimising the effects of external shocks. The focus of GIB's existing commercial banking activities will shift from transactional lending to relationship management, supported by a new suite of products and services. These will be aimed at specific segments in different GCC markets, commencing with Saudi Arabia.

A key objective of the new business model and strategy is to provide shareholders by 2015 with an enhanced return on equity that will be competitive with the Bank's peers. The Board has appointed advisors and consultants to assist management with the efficient implementation of the new strategy, with the initial phase targeted for completion by the end of 2011. The Board is confident that the new strategy will enable GIB.

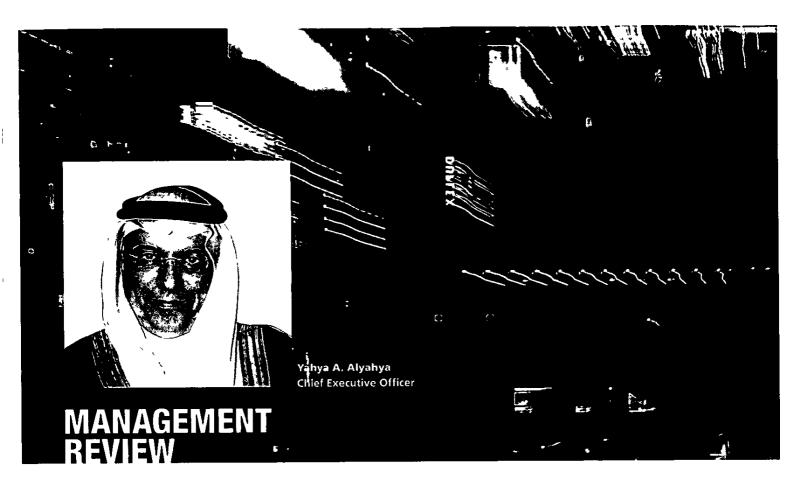

"The Bank's new strategy entails the transformation of GIB into a pan-GCC universal bank, based on four main pillars of corporate banking, investment banking, asset management and retail banking."

to take advantage of emerging business opportunities, continue its key role in Saudi Arabia and the region as a leading financial institution, and ensure greater prosperity for our stakeholders

On behalf of the Board of Directors, I would like to express my sincere appreciation for the financial support and guidance of our shareholders, the trust and loyalty of our clients, the positive collaboration of our business partners, and the constructive cooperation of the regulatory and supervisory authorities in the various jurisdictions where GIB operates

Finally, I would like to pay tribute to the professionalism and dedication of the Bank's management and staff during 2010, and thank them for their positive attitude towards the cultural change that is crucial to the successful implementation of GIB's new strategy

Jammaz bin Abdullah Al-Suhalmi Chairman

As a result of the proactive measures to stabilise the Bank that were initiated during the previous year, GiB entered 2010 on a cautiously optimistic note, in view of the challenges posed by the ongoing impact of the global financial crisis and continued challenging market conditions in the region With an improved balance sheet structure, GiB was in a stronger position at the beginning of the year to take advantage of new business opportunities arising from the global and regional economic and market recovery, and to address the challenges of a return to profitability and the Bank's future strategic direction

During the year, GIB continued to deleverage and derisk the balance sheet through a managed reduction in the loan portfolio, align the cost base with the Bank's business model, and strengthen the Bank's funding position by diversifying funding sources and reducing the asset and liability mismatch. These measures proved to be successful through the continued adoption of a cautious approach to new lending, the loan portfolio had reduced to US\$7.5 billion at the end of the year, compared with US\$9.3 billion at the end of 2009, while total expenses at US\$1133 million were 8 per cent lower than the previous year The Bank further strengthened its funding base through the closing of a SAR 3.5 billion (US\$933 million) 5-year bond Issue in 2010 Although the issue was originally targeted for SAR 3 billion, the final issue was increased to satisfy substantial demand from investors, with orders totalling SAR 6 3 billion GIB also met its objective of returning to profitability net income after tax was US\$100.4 million, compared with a loss of US\$152.6 million for 2009

"As a result of the proactive measures to stabilise the Bank that were initiated during the previous year, GIB entered 2010 on a cautiously optimistic note, in view of the challenges posed by the ongoing impact of the global financial crisis and continued challenging market conditions in the region."

The successful achievement of these measures during the year was underscored by the affirmation of the Bank's long-term issuer ratings by Fitch (A), Moody's (A3) and Standard & Poor's (BBB+) with a Stable Outlook. The rating agencies noted GIB's strong ownership structure and capitalisation, improved liquidity, and conservative provisioning. This affirmation by the three major international rating agencies constitutes an important independent vote of confidence in the Bank. It also reflects GIB's ability to withstand the unprecedented pressures caused by the global financial crisis, and its commitment to continue its leading role in the region's financial community

BUSINESS ACHIEVEMENTS

Overall, 2010 proved to be another challenging year

for business, affected by a continued lack of fluidity and associated credit squeeze, and subdued corporate and investor confidence in response to these testing conditions across the region, GIB reorganised its wholesale banking business during the year into two main divisions — Commercial Banking and investment Banking. The Commercial Banking division — which comprises project and structured finance, syndications, and Islamic financing — was restructured to provide a more focused response to clients' needs and maximise cross-selling opportunities

GIB achieved a number of notable business successes in 2010 The Bank was mandated by Saudi Binladin Group (SBG) to arrange a SAR 6 billion (US\$1 6 billion) syndicated financing facility to finance the first phase of the expansion of King Abdulaziz International Airport In Jeddah, Saudi Arabia As the Coordinating Arranger, GIB will structure a syndicated facility with a consortium of regional and international banks for the issuance of performance bonds, advance payment guarantees, and letters of credit on behalf of SBG, as well as a shortterm Murabaha financing for working capital The facility, the largest of its kind to be arranged in the Kingdom in recent years, is expected to be completed in early 2011 GIB has already facilitated the issuance of the necessary performance bonds and advance payment guarantees for the project under a syndicated SAR 4 billion bridging facility, signed in October 2010

During the year, GIB received approval from Saudi Arabian Monetary Agency (SAMA) to establish a new branch in Al Khobar, Saudi Arabia, which is planned to be operational in 2011 The new branch will enable the Bank to expand its operations in the Eastern Province of the Saudi Arabia, build stronger relationships with customers, and achieve greater market penetration in the region's largest economy it will also provide centralised back office operational support for the Bank's other branch offices in Riyadh and Jeddah

"Affirmation by the three major international rating agencies constitutes an important independent vote of confidence in the Bank. It also reflects GIB's ability to withstand the unprecedented pressures caused by the global financial crisis, and its commitment to continue its leading role in the region's financial community"

GIB maintains a presence outside the GCC region through branches in London and New York and a representative office in Beirut. Based on significant trade flows and long-term relationships with the GCC, the Bank's international trade finance and institutional lending is mainly conducted in the MENA region in 2010, the Bank continued to support international

MANAGEMENT REVIEW (CONTINUED)

contractors and sponsors involved in projects across the region with their banking requirements

In 2010, GIB's Treasury adopted a proactive approach to tackle funding challenges, given the persisting deterioration in global and regional liquidity and the associated credit squeeze While continuing to leverage its long-standing relationships with key depositors, the Treasury team worked closely with the wholesale banking relationship managers to generate new deposits, with a focus on reducing depositor concentration and extending the tenor of liabilities

Client business in foreign exchange remained strong during 2010, and GIB continued to meet growing demand for innovative products to hedge interest rate and currency risks against high market volatility

Despite challenging market conditions, GIB was successful in further developing its Investment Banking franchise through several important advisory mandates The Bank's Saudi-based subsidiary, GIB Financial Services LLC (GIBFS), was financial advisor, lead manager and co-underwriter for the US\$231 million initial public offering by Abdullah A.M Al-Khodari Sons Company, the largest premium IPO in Saudi Arabia during 2010 In Bahrain, GIB acted as regional lead manager for the US\$163 million IPO of Alumınlum Bahrain (Alba) This involved the sale by Bahrain's sovereign wealth fund, Mumtalakat, of an 12 per cent stake in Alba. GIBFS was also joint book runner and joint lead manager on the debut bond issuance by Arab Petroleum Investments Corporation (APICORP) The SAR 35 billion 5-year floating rate note, rated A1 by Moody's, was oversubscribed three times, with an aggregate book size of SAR 6 billion It is the first callable bond to be issued in the Saudi capital market.

"GIB achieved a number of notable business successes in 2010."

GIB's achievements in the regional debt capital markets were recognised by receipt of the 'Best GCC Bonds Issuer in 2010' award by the UK-based World Finance magazine. The judging panel evaluated originality and innovation, market leadership, transparency, good governance and continued progress. This independent recognition underlines GIB's position as one of the most active financial institutions in the issuance of debt capital market instruments in the region during 2010 GIB will build upon its established capabilities to play a leading role in the development of the region's debt capital markets.

"Despite challenging market conditions, GIB was successful in further developing its Investment Banking franchise through several important advisory mandates."

During the year, the Bank finalised plans for the launch of a new private equity fund focused on the manufacturing sector in Saudi Arabia. The fund will seek to Invest in greenfield and growth capital investment opportunities in the small and medium enterprises (SME) sector in the Kingdom. In line with GIB's new asset management strategy, the Bank's London-based subsidiary, GIBUK, launched the Emerging Markets Opportunities Fund (EMOF) in 2010. With initial assets of more than US\$100 million, EMOF is a multi-strategy, absolute return product, investing across emerging markets, focusing on fixed income credit. It is considered to be one of the largest emerging market fund launches in the world by a single management by GIB stood at US\$18.2 billion.

NEW STRATEGY IMPLEMENTATION

In late 2009, GIB embarked upon the development of a new strategy and appropriate business model to ensure the ongoing growth and viability of the Bank. The new strategy was approved by the Board in July 2010; it involves the transformation of GIB from a wholesale bank into a pan-GCC universal bank, with a business model comprising retail banking, corporate banking, investment banking and asset management. This will provide more diversified and stable sources of funding and additional revenue streams, reduce the Bank's vulnerability to external shocks, and provide shareholders with an enhanced return on equity that will be competitive with GIB's peers The new retail banking business will be based on the 'light retail' concept that has proved to be successful in Europe and Asia. It will be introduced first in Saudi Arabia, and then rolled out across the GCC The Bank's existing commercial banking activities will shift from transactional lending to a relationship management approach, with a sectoral rather than country focus

Importantly, the new strategy will build on a number of GIB's inherent strengths and unique competitive advantages. These include the Bank's excellent regional relationships, franchises and footprint, as well as its global outreach and relationships with international

institutions In addition, GIB has a strong leadership position in certain niche areas such as project finance, syndications, and equity capital markets, and a highly experienced and dedicated team

In August 2010, GIB management put into action an ambitious strategy implementation programme, with project management officers being assisted by external consultants and advisors. The successful implementation of GIB's new strategy will require a significant cultural change, with a greater focus on relationship management and cross-selling in order to maximise business opportunities, enhance revenue generation, and thereby boost profitability

"Without doubt, the proactive measures taken during 2010 have strengthened GIB's ability and readiness to take advantage of the positive economic outlook for the GCC region"

To support this, a number of change management initiatives were launched during the year. These included workshops to introduce GiB's new strategy, business model, and vision, mission and values, and a corporate culture survey to measure strategic clarity, customer orientation and commitment to change by staff in addition, human resources policies and procedures are being reviewed to ensure that they address the changing needs of the business. These embrace the development and retention of young talented individuals who have the ability to take on more challenging roles in the future; new assessment tools and procedures for recruitment; and ensuring that our performance management measures and supports our new strategy and business model.

At the same time, GIB maintained its focus on maintaining the highest levels of operational excellence to support the business divisions in the delivery of a diversified range of financial services to clients. The Bank continued to streamline and re-engineer back office processes and IT systems and strengthen the professional standards of operational staff, to provide a strong base for the implementation of the new strategy

LOOKING AHEAD

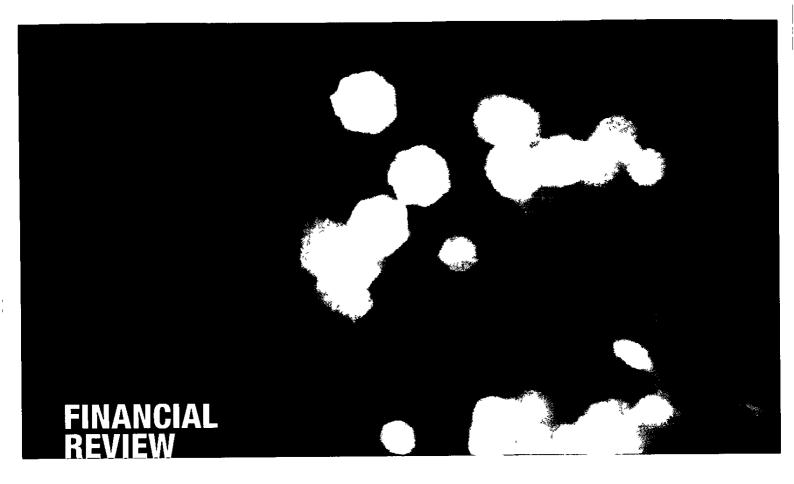

During 2010, the GCC again demonstrated its resilience to withstand the worst effects of the global financial crisis. From an economic and business perspective,

the future outdook for the GCC remains positive, led by a continued revival in global economic growth, higher oil prices, and expansionary budgets by regional governments. Having stabilised in 2010, oil prices are expected to rise to remain stable on the back of increased global demand. As a result, the GCC economy is forecast to grow by over 6 per cent next year and continue to outstrip the global average growth rate. Projects in the GCC, both underway and planned, have an estimated value of over US\$2 trillion, while IPOs in the region, which numbered only 13 in 2010, are expected to increase in 2011.

A positive underlying factor, in the short to medium term, continues to be the liquidity that was accumulated during the growth years of record oil prices This will allow governments to continue funding infrastructure projects, and will provide fiscal breathing space to support the ongoing recovery and eventual expansion of the regional economy Additionally, as global growth picks up, there will be greater demand for oil and gas, and by-products such as petrochemicals, which will help accelerate and sustain economic growth

Without doubt, the proactive measures taken during 2010 have strengthened GiB's ability and readiness to take advantage of the positive economic outlook for the GCC region The Bank is well positioned to capitalise on emerging business opportunities resulting from the ongoing recovery in market conditions, and to continue to play a leading role in the development of the region's financial sector

Yahya A. Alyahya Chief Executive Officer

GIB recorded consolidated net income after tax of US\$100 4 million, compared with a loss of US\$152 6 million in the prior year

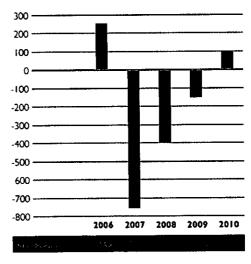

Net interest Income, which at US\$1562 million represented the Bank's principal income source, was 24 per cent down on 2009 The year-on-year decrease was attributable to the deleveraging and derisking of the balance sheet, and the prevailing historical low level of interest rates Fee-related income at US\$42.2 million was US\$1.5 million higher than the previous year reflecting the on-going focus by GIB on enhancing fee-based revenue Trading profits at US\$12.7 million largely comprised customer-related foreign exchange income, while other income of US\$12.7 million consisted principally of dividends received from listed equity investments and profits realised on investment securities Total expenses of US\$113.3 million were US\$9 5 million or 8 per cent lower than 2009, illustrating the successful implementation of proactive measures taken in the previous year to align the cost base with the Bank's business model A net provision charge of only US\$40 million was recorded for 2010, reflecting the prudent and conservative provisioning actions taken by the Bank in 2009

NET INTEREST INCOME

Net interest income at US\$156.2 million was US\$50.3 million or 24 per cent lower than in the prior year. Net interest income is principally derived from the following sources -

margin income on the wholesale lending portfolio,

Net income development (US\$ millions)

- margin income on the investment securities portfolio,
- · money book activities, and
- earnings on the investment of the Group's net free capital

Net interest income also incorporates the cost of term finance

The year-on-year decrease in net interest income was largely attributable to (i) lower interest earnings derived

from the wholesale lending portfolio as a result of a managed decrease in loan volumes being partly offset by higher lending margins, (ii) lower interest earnings on the investment of the net free capital attributable to the reduction in US interest rates to historically low levels, and (iii) a higher cost of term finance as a result of new term finance raised during 2009 and 2010

Interest earnings on the wholesale lending portfolio accounted for two thirds of the Group's net interest income. The interest earnings derived from wholesale lending were 26 per cent lower than in the prior year due to the managed reduction in the loan portfolio during 2009 and 2010 as part of the initiative to delever and densk the balance sheet. The impact of the reduction in the loan volume was partly offset by an increase in loan margins.

Margin income on the investment securities portfolio accounted for 6 per cent of net interest income in 2010. The investment securities portfolio is primarily maintained as a liquidity reserve. The key factors underpinning the portfolio are therefore liquidity and quality rather than its income generating characteristics.

Money book earnings represent the differential between the funding cost of interest-bearing assets based on internal transfer pricing methodologies and the actual funding cost incurred by the Bank. This includes benefits derived from the mismatch of the repricing profile of the Group's interest-bearing assets and liabilities. Money book earnings in 2010 were 15 per cent lower than "GIB recorded consolidated net income after tax of US\$100.4 million, compared with a loss of US\$1526 million in the prior year."

in the prior year reflecting the flat interest rate curve prevailing during the year and the resultant challenge in generating interest earnings from repricing mismatches. The money book nevertheless generated more than 10 per cent of the Group's net interest income. As a result of the focus on deposits from counterparties in the GCC and wider Middle East, the increase in costs in the international interbank market during 2010 associated with the eurozone crisis had little impact on the Bank's interest earnings.

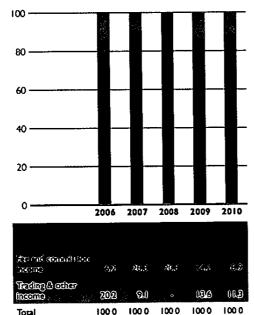

Earnings on the investment of the Group's net free capital were 26 per cent lower than in the prior year although nevertheless accounted for almost one fifth of net interest income The net free capital was largely uninvested during the earlier part of the year with the uninvested funds placed on a short term basis in the money market. This strategy was adopted to protect the Bank from potential capital losses resulting from any unanticipated increase in bond yields as a result of market expectations of a rising interest rate environment. Investment in shorter 2 and 3 year duration bonds was increased during the third quarter

FINANCIAL REVIEW (CONTINUED)

of the year as it became evident that the economic conditions in the United States were not conducive to a rise in US interest rates in the short term. At the end of 2010, circa half of the Bank's net free capital was invested in shorter duration fixed rate instruments, generating an enhanced return over short term interest rates. Earnings on the net free capital in 2010 were negatively impacted by the historically low short term. US interest rates prevailing throughout the year.

The cost of term finance increased in 2010 as a result of new term finance raised during 2009 and 2010, thereby contributing to the year-on-year decrease in net interest income The new term finance was raised to reduce the mismatch between the maturities of the Bank's assets and fiabilities and accordingly reduce the Group's exposure to liquidity risk. The Group's historical reliance on funding longer tenor assets with short term deposits and the associated liquidity and refinancing risk were recognised in 2009, and proactive actions were taken to raise new term finance to minimise this undue risk. As a result, almost US\$2.0 billion of new term finance was raised during 2009 and 2010. This effectively addresses one of the key focuses of the new Basel I regulatory guidelines whereby banks will have less ability to fund longer tenor assets with shorter tenor wholesale deposits. The initizatives to reduce the Group's exposure to liquidity risk resulted in a US\$24.2 million or 12 per cent year-on-year reduction in the Group's net Interest Income.

Gross income composition (%)

"As a result of the focus on deposits from counterparties in the GCC and wider Middle East, the increase in costs in the international interbank market during 2010 associated with the eurozone crisis had little impact on the Bank's interest earnings."

NON-INTEREST INCOME

Non-interest income comprises fee and commission income, trading income, and other income

Fee and commission income at US\$42.2 million was US\$1.5 million higher than in the prior year Fee and commission income was also more than double the level when the GCC-focused merchant banking strategy was adopted in 2002. An analysis of fee and commission income with prior year comparatives is set out in note 21 to the consolidated financial statements investment banking and management fees were US\$24.4 million for the year, thereby representing 58 per cent of fee and commission income This income category comprises fees generated by the Group's asset management, fund management, corporate advisory and underwriting activities. Investment banking and management fees were at a similar level to the prior year and incorporated fees derived from a number of significant debt and equity capital market mandates during the year, as commented on in more detail in the Management Review section of the Annual Report. As referred to in note 34 to the consolidated financial statements, assets held in a fiduciary capacity amounted to US\$182 billion at 31st December 2010 being 10 per cent up on the 2009 year end level GIB therefore continues to be the largest Arab-owned commercial asset manager Commissions on letters of credit and guarantee at US\$160 million were the second largest source of fee-based income and continued to make an Important contribution to fee and commission income A 9 per cent year-on-year increase in commissions on letters of credit and guarantee reflected an enhanced focus on supporting customers' commercial and trade finance requirements.

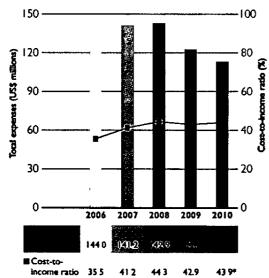

The Group's various trading activities recorded a US\$12.7 million profit compared to a US\$28.2 million profit in the previous year Trading income is reported inclusive of all related income, including interest income,

gains and losses arising on the purchase and sale, and from changes in the fair value of trading securities, dividend income, and interest expense, including all related funding costs. An analysis of trading income is set out in note 22 to the consolidated financial statements Trading income in 2010 principally comprised an US\$8.7 million profit arising on customer-related foreign exchange business All proprietary trading activities were terminated in early 2009 as part of the Bank's derisking initiatives A US\$3.5 million profit arose on externally managed hedge funds compared to US\$13.0 million in the prior year The externally managed hedge funds were the largest contributor to trading income in 2009 During 2010, the Bank continued to actively reduce its exposure to hedge funds The Group's hedge funds classified as held-for-trading were reduced from US\$50.2 million at the end of 2009 to only US\$5.6 million at 31st December 2010 The Bank is continuing to exit its remaining investments in hedge funds

Other Income of US\$12.7 million principally comprised dividends on equity investments classified as available-for-sale and profits realised on the sale of investment securities for credit reasons. Prior year other income of US\$10.6 million included profits of US\$8.3 million arising on the repurchase of the Group's own subordinated debt. The Group repurchased US\$39.0 million of a subordinated floating rate note maturing in 2015 at a discount. This profit was exceptional in nature

OPERATING EXPENSES

Expenses development (US\$ millions)

* Excludes US\$15 million of non-recurring strategy-related costs

Operating expenses at US\$1133 million were US\$95 million or 8 per cent down on the prior year However, 2010 expenses included US\$15 0 million of non-recurring costs associated with the Implementation of the Group's new universal bank business strategy Excluding these exceptional, non-recurring costs, operating expenses were US\$245 million or 20 per cent lower than the prior year 2009 expenses were also US\$20 I million or 14 per cent down on 2008. Thus, the Group's operating expenses have reduced by US\$44.6 million or 31 per cent during 2009 and 2010 This reflects the significant beneficial impact on operating expenses derived from a cost realignment programme implemented in 2009 The programme included a reduction in staffing levels in line with the Bank's operating model, a migration to uniform IT platforms, and associated operational efficiencies. The full extent of the cost savings was evident in 2010 as the cost realignment programme was implemented in stages during 2009

The Group's cost-to-Income ratio, excluding the exceptional strategy-related expenses, was 44 per cent in 2010, a highly efficient ratio in comparison with peer banks

Staff expenses, which accounted for almost two thirds of total normalised operating expenses, were US\$15.8 million or 20 per cent down on the prior year. The significant year-on-year decrease was attributable to a reduction in headcount initiated in 2009. The Group's total headcount at 31st December 2010 of 440 staff was 121 or 22 per cent lower than at the end of 2008. The headcount reduction took place at both Head Office in Bahrain and in GIBUK.

Premises expenses at US\$10.0 million were US\$2.3 million or 19 per cent down on the prior year. The year-on-year decrease was attributable to a lower rent expense in the Group's London-based subsidiary, GIBUK, as a result of reduced space requirements following the restructuring of GIBUK's business activities in 2009.

Other operating expenses, excluding the US\$15.0 million exceptional strategy-related costs, were US\$6.4 million or 19 per cent down on the prior year Reductions were recorded in most expense categories as a result of ongoing cost saving initiatives, although most notably in IT-related expenses as a result of the migration of GIBUK to the Head Office core banking system in 2009

PROVISIONS

Following prudent provisioning actions in 2008 and 2009 in anticipation of a higher level of corporate defaults in the weakening economic environment at that time, provisioning requirements in 2010 were limited

FINANCIAL REVIEW (CONTINUED)

In 2010, there was a US\$5 0 million release of investment security provisions and a US\$9 0 million provision charge for loans and advances

The investment security provision release was principally attributable to the release of surplus provisions arising on the closure of non-core impaired exposures. The exposures were closed out at values higher than the provisioned net book values. The resultant unrequired surplus provisions were accordingly released to income All investment security specific provisions, amounting to US\$44.2 million, related to impaired equity investments. The specific provisions represented 77 per cent of the gross value of the impaired investments.

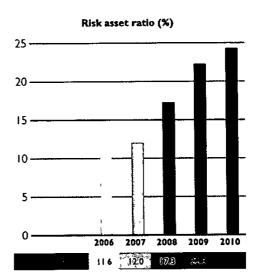

The US\$9.0 million loan provision charge comprised specific provisions of US\$4.0 million and an increase in the non-specific loan provision of US\$5.0 million. The specific provision charge entirely related to increases in specific provisions for exposures that were already specifically provisioned. No specific provisions were established in 2010 for loan exposures that were not previously provisioned.

CAPITAL STRENGTH

Total equity amounted to US\$1,9180 million at 31st December 2010. At the 2010 year end, the ratio of equity and Tier 1 capital to total assets were 12.3 per cent and 12.4 per cent respectively, ratios that are high by international comparison. The average Tier 1 capital to total assets ratio of the top 1,000 world banks was 5.2 per cent according to a survey published in The Banker magazine in July 2010.

A US\$138 6 million increase in total equity during 2010 comprised the US\$100 4 million profit for the year, and a US\$38 2 million net increase in the fair value of available-for-sale securities and derivative cash flow hedges. In

"With a total regulatory capital base of US\$2,508.8 million and total risk-weighted exposure of US\$10,321.7 million, the risk asset ratio calculated in accordance with the Central Bank of Bahrain's Basel 2 guidelines was 24 3 per cent while the Tier 1 ratio was a particularly strong 18.7 per cent"

accordance with IAS 39, changes in the fair values of securities classified as available-for-sale, and derivative cash flow hedges are accounted for in equity through the comprehensive statement of income The net increase in the fair value of available-for-sale securities reflected the ongoing improvement in the market environment and a contraction in credit spreads resulting in an improvement in the fair value of the investment securities portfolio. The unrealised revaluation loss on investment securities at the 2010 year end was only US\$215 million compared to US\$645 million at the end of 2009 This represented only 0.7 per cent of the total fair value of the available-for-sale securities portfolio. The relatively small unrealised revaluation loss reflected the high quality of the investment securities portfolio Investment securities principally comprise investment grade-rated debt securities issued by major international and regional financial institutions and government-related entities

With a total regulatory capital base of US\$1,508.8 million and total risk-weighted exposure of US\$10,321.7 million, the risk asset ratio calculated in accordance with the Central Bank of Bahrain's Basel 2 guidelines was 24.3 per cent while the Tier. I ratio was a particularly strong 18.7 per cent. In accordance with international regulatory guidelines, the fair value adjustments to equity arising under IAS. 39 in relation to available-for-sale securities and derivative cash flow hedges are excluded from the regulatory capital base, with the exception of unrealised gains and losses on equity investments. As a result, at the 2010 year end net fair value losses of US\$12.0 million were added back to equity to derive the regulatory capital base for capital adequacy purposes. The Bank's

"Subsequent to the 2010 year end, the Bank received formal approval from the Central Bank of Bahrain to adopt the standardised approach for operational risk."

regulatory capital base is enhanced by subordinated term financing facilities. The amount included in Tier 2 capital in respect of subordinated term finance at 31st December 2010 was US\$438.8 million. This was net of a discount of US\$72.2 million for subordinated term finance that is within five years of its final contractual maturity date. The subordinated term financing facilities are approved for inclusion in Tier 2 capital for capital adequacy purposes by the Bank's regulator, the Central Bank of Bahrain (CBB)

At 31st December 2010, the regulatory capital base, excluding subordinated term financing, amounted to US\$2,070 0 million This level of regulatory capital would support an additional US\$3.5 billion of 100 per cent risk-weighted assets while still maintaining the Group's target minimum risk asset ratio of 15 per cent. The Group therefore has more than sufficient regulatory capital to support future growth plans

The risk asset ratio incorporates both market and operational risk-weighted exposures The Basel 2 Pillar 3 report, set out in a later section of the Annual Report, provides further details on capital adequacy and the Bank's capital management framework. The Group's policies in relation to capital management are set out in note 26 to the consolidated financial statements. As described in more detail in the note, the Group's policy is to maintain a strong capital base so as to maintain investor, counterparty and market confidence and to sustain the future development of the Group's business

Subsequent to the 2010 year end, the Bank received formal approval from the Central Bank of Bahrain to adopt the standardised approach for operational risk. This demonstrates that the Bank's regulator is satisfied that the Bank's operational risk framework meets the guidelines prescribed by both the Central Bank of Bahrain and the Basel Committee for Banking Supervision

ASSET QUALITY

The geographical distribution of risk assets is set out in note 27 to the consolidated financial statements The

credit risk profile of financial assets, based on internal credit ratings, is set out in note 26(a) to the consolidated financial statements. This note demonstrates that 78 per cent of all financial assets, comprising placements, securities and loans, were rated 4- or above, i.e. the equivalent of investment grade-rated

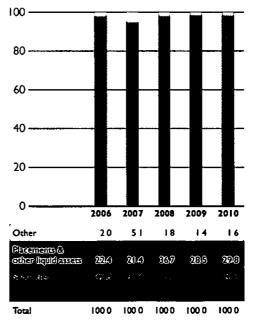

Further assessment of asset quality can be facilitated by reference to note 36 to the consolidated financial statements on the fair value of financial instruments. Based on the valuation methodologies set out in that note, the net fair values of all on- and off-balance sheet financial instruments at 31st. December 2010 were not significantly different to their carrying amounts. All non-trading securities are classified as available-forsale and measured at fair value investment securities are accordingly stated at fair value in the consolidated balance sheet.

At the 2010 year end, placements and Investment securities accounted for 30 per cent and 20 per cent of total assets respectively while loans and advances represented 48 per cent.

Investment Securities

Investment securities totalled US\$3,067.8 million at 31st December 2010 The investment securities portfolio, which is entirely classified as available-for-sale, primarily represents the Group's liquidity reserve and

Asset mix by category (%)

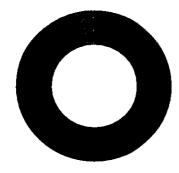

FINANCIAL REVIEW (CONTINUED)

accordingly, principally comprises investment graderated debt securities issued by major international and regional financial institutions and government-related entities

An analysis of the basis used for determining the fair values of investment securities is set out in note 36 to the consolidated financial statements. At 31st December 2010, US\$2,933.8 million or 99 per cent of investment securities that were valued at fair value, were valued based on quoted prices while an additional US\$106.9 million was valued based on cost less provisions for impairment. Only US\$27.1 million was based on other valuation techniques. This represented private equity fund investments for which the fair values were based on the net asset values of the funds. No fair values of available-for-sale securities were derived from modelled-based valuation methodologies.

Investment securities comprise two types of debt security portfolios and a limited investment in equities and equity funds. The larger debt security portfolio comprises floating rate securities or fixed rate securities that have been swapped to yield constant spreads over LIBOR. These accounted for 63 per cent of the total investment debt securities at the 2010 year end The smaller debt securities at the 2010 year end The smaller debt security portfolio represents the investment of the Group's net free capital in fixed rate securities This portfolio amounted to US\$1,004.4 million at the end of 2010 and comprised investments in OECD and GCC government-related bonds The Group had no exposure to troubled eurozone government debt, i.e. no exposure to Greek, Irish, Portuguese and Spanish government debt.

Investment debt securities rating profile

	O23 Willions	~	
3330 % 335 Br. % 2+3	2073	116	
Other debt eccentrics	90.5	30	
Total	2.724 9	1000	

Equity investments at the end of 2010 amounted to US\$342.9 million Equity investments at 31st December 2010 included listed equities amounting to US\$190.0 million received in settlement of a secured past due loan. The remaining equity investments largely comprised private equity-related investments.

An analysis of the investment securities portfolio by rating category is set out in note 8(a) to the consolidated financial statements US\$2,435.8 million or 89 per cent of the debt securities at the 2010 year end were rated A- or above Based on the rating of the issuer, a further US\$207.6 million or 8 per cent of the debt securities represented other investment grade-rated securities. Thus 97 per cent of the total debt securities comprised investment grade-rated securities.

Other debt securities, the issuers of which are rated below BBB-/Baa3 or are unrated, amounted to US\$81.5 million at the end of 2010, thus comprising only 3 per cent of the total investment debt securities portfolio. These largely comprised securities issued by unrated GCC entities.

There were no past due securities at 31st December 2010

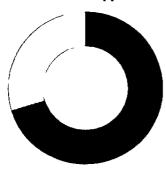

Impaired investment securities, representing securities against which a specific provision is maintained, amounted to only US\$57.7 million at 31st December 2010. They comprised investments in managed funds that are closed to redemption for the foreseeable future, and private equity investments. The total specific provisions for impairment at 31st December 2010, amounting to US\$44.2 million, represented 77 per cent of the gross impaired investment securities. The Group also held non-specific portfolio provisions of US\$23.6 million at the 2010 year end.

Loans and Advances

Loans and advances amounted to US\$7,510.1 million at the 2010 year end This represented a US\$1,788.0 million or 19 per cent decrease compared to the 2009 year end 95 per cent of the loan portfolio at the 2010 year end represented lending within GIB's core market in the GCC states

Based on contractual maturities at the balance sheet date, 34 per cent of the loan portfolio was due to mature within one year while 58 per cent was due to mature within three years Only 30 per cent of loans were due to mature beyond five years Details of the classification of loans and advances by industry are set out in note 9(a) to the consolidated financial statements while the geographical distribution of loans and advances is contained in note 27. At 31st December 2010, 40

Loan maturity profile

US\$ millions		
y 1/	K. Si	
9390	28	
2,231 3	29 7	
75101	1000	
	93920 2,231 3	

per cent of the loan portfolio comprised exposure to the energy, oil and petrochemical sector This reflects the Group's strategic focus on project finance and syndicated lending in the GCC states

The credit risk profile of loans and advances, based on Internal credit ratings, is set out in note 26(a) to the consolidated financial statements US\$4,668 3 million or 62 per cent of total loans were rated 4- or above, le the equivalent of Investment grade-rated Only US\$326 3 million or 4 per cent of loans and advances were classified as individually impaired Individually impaired loans represent loans for which there is objective evidence that the Group will not collect all amounts due in accordance with the contractual terms of the obligation Therefore, 96 per cent of loans and advances were not individually impaired

Total loan loss provisions at 31st December 2010 amounted to US\$642.3 million Counterparty specific provisions amounted to US\$397.3 million while non-specific provisions were US\$245.0 million Total provisions of US\$642.3 million represented 80 per cent of the gross book value of unsecured past due loans

Specific provisions are determined based on the recoverable amount of the loan The recoverable amount is measured as the present value of the expected future cash flows discounted based on the Interest rate at the inception of the facility Non-specific provisions are determined on a portfolio basis utilising an incurred loss model The incurred loss model estimates the probable losses inherent within the portfolio at the balance sheet

date but that have not been specifically identified The model is based on applicable credit ratings and associated historical default probabilities, loss severity and rating migrations, and reflects the current macroeconomic, political and business environment and other pertinent indicators

Non-specific loan provisions at 31st December 2010 amounted to US\$245.0 million, representing 3.3 per cent of non-specifically provisioned loans. The probabilities of default applied in the calculation of the non-specific provisions at 31st December 2010 equated to a speculative-grade default rate of 13.9 per cent, exceeding the previous highest corporate default rates witnessed in July 1991. The default rates applied in the calculation of the non-specific loan provision and the resultant provisioning levels for senior, unsecured exposure by internal rating category were as follows -

internal rating grade	Probability of default (PDs)	Senior, unsecured provisioning level
ı	0 03%	•
2+	0 03%	•
2	0 03%	
2-	0 06%	-
3+	0 18%	01%
3	0 24%	01%
3-	0 36%	0 2%
4+	1 02%	0 6%
4	1 05%	0 6%
4-	! 29%	0.8%
5+	2 25%	I 4%
5	3 48%	2.1%
5-	621%	3 7%
6+	9 87%	5 9%
6	27 93%	16 8%
6-	39 45%	23 7%
7	83 61%	50 2%

The provisioning level is based on a Loss Given Default (LGD) of 60 per cent for senior, unsecured exposure

For the purpose of the calculation of the non-specific provision, the Bank only takes account of collateral held in the form of cash or exchange-traded equities While collateral in the form of securities, unlisted equities and physical assets is used for risk mitigation and protection purposes, it is not taken into account in the calculation of the non-specific provision.

FINANCIAL REVIEW (CONTINUED)

"Fee and commission income at US\$42.2 million was US\$1.5 million higher than in the prior year. Fee and commission income was also more than double the level when the GCC-focused merchant banking strategy was adopted in 2002"

The gross and net book values of unsecured past due loans at 31st December 2010 amounted to US\$8013 million and US\$446.6 million respectively The provisioning coverage for unsecured past due loans was therefore 44 per cent. Net unsecured past due loans included US\$381 6 million of loans that were subject to restructuring programmes and for which interest was current and being paid on due dates The restructurings were all at an advanced stage and expected to be finalised within the first half of 2011, following which the loans will revert to performing status The restructuring programmes are not anticipated to result in an economic loss for the Group. Excluding the past due loans that were under restructuring and current, other net unsecured past due loans were only US\$65 0 million, representing 0.9 per cent of total net loans. Past due loans are defined as those loans for which either principal or interest is over 90 days past due Under IAS 39, interest on impaired loans should be recognised in income based on the net book value of the loan and the interest rate that was used to discount the future cash flows for the purpose of measuring the recoverable amount. However, in accordance with guidelines issued by the Bank's regulator, the CBB, Interest on past due loans is only to be recognised in income on a cash basis In view of the Group's high provisioning coverage for impaired loans, the difference between the two bases of accounting is not material

Other Asset Categories

Cash and other liquid assets, amounting to US\$1,043 9 million at the 2010 year end, are analysed in note 5 to the consolidated financial statements. They principally comprised cash and balances with banks, and certificates of deposits held for liquidity management purposes

Placements totalled US\$3,576 3 million at the 2010 year end and were well diversified by geography as illustrated in note 27 to the consolidated financial statements Placements were largely with GCC and European bank

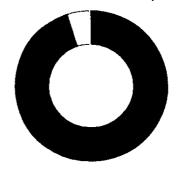

counterparties, representing the Group's two principal operating locations Placements represented 23 per cent of total assets at the 2010 year end A high level of placements was being maintained in the prevailing uncertain and volatile market environment.

Trading securities at US\$79.7 million comprised investments in managed funds, providing exposure to emerging market government-related debt and alternative investments. During 2010, the Bank's investments in hedge funds were reduced from US\$50 million at the end of 2009 to US\$5 million at the 2010 year end The Bank is continuing to reduce its investments in hedge funds with the intention of fully exiting the investments at the earliest possible opportunity

Risk Asset and Commitment Exposure

Risk asset and commitment exposure at 31st December 2010 amounted to US\$17,4277 million Risk assets and commitments comprise all assets included in the balance sheet (with the exception of other assets) and credit-related contingent items. As referred to earlier, an analysis of risk asset and commitment exposure by category and geography is contained in note 27 to the consolidated financial statements. As is evident from this note, US\$11,589.7 million or 67 per cent of total risk assets and commitments represented exposure to counterparties and entities located in the GCC states

Risk asset and commitment exposure

US\$ millions	*
1,2000	152.6
807.2	36
756 2	43
28 9	02
17,427 7	100 0
	5,9740.)2 607/2 756 2 28 9

The remaining risk asset exposure largely represented short term placements with major European banks. An analysis of derivative and foreign exchange products is set out in note 30 while a further analysis of credit-related contingent items together with their risk-weighted equivalents is contained in note 31

FUNDING

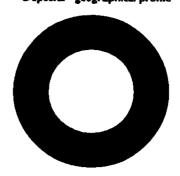

Bank and customer deposits at 31st December 2010 totalled U\$\$8,703.6 million Customer deposits amounted to U\$\$6,479.2 million at the 2010 year end, representing 74 per cent of total deposits. A lower funding requirement resulting from the deleveraging initiatives implemented during 2009 and 2010, including the sale of non-core investment securities and a reduction in the loan portfolio, as well as proactive actions to reduce undue depositor concentrations contributed to a significant reduction in the Bank's funding requirements and a resultant decrease in both customer and bank deposits. Bank deposits at 31st December 2010 amounted to U\$\$2,224.4 million, representing only 26 per cent of total deposits.

Total deposits are analysed by geography in note 12 to the consolidated financial statements US\$6,749 6 million or 78 per cent of total deposits were derived from counterparties in GCC countries. Deposits derived from non-MENA countries, principally Europe, amounted to US\$1,299 2 million or only 15 per cent of total deposits This compares to placements with non-GCC counterparties of US\$3,355 5 million The Group is therefore a net placer of funds in the international interbank market, and accordingly has no net reliance on the international interbank market.

"The Group's cost-to-income ratio, excluding the exceptional strategy-related expenses, was 44 per cent in 2010, a highly efficient ratio in comparison with peer banks."

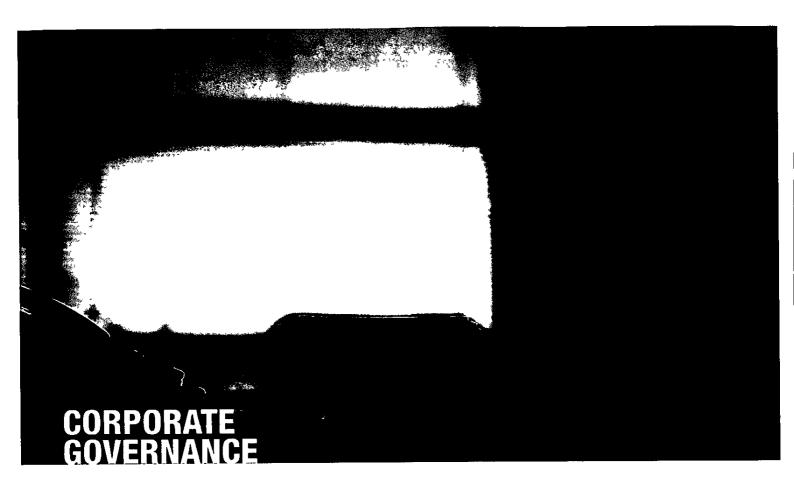

Securities sold under agreements to repurchase (repos) were US\$945.5 million at 31st December 2010. The Bank utilises its high quality and highly rated investment securities to raise funding on a collateralised basis where effective from a cost and tenor perspective, as well as constantly validates its ability to repo the securities as part of the Group's liquidity contingency plans.

Deposits - geographical profile

Senior term financing at 31st December 2010 totalled US\$3,176.6 million. New senior term finance of US\$1,033.3 million was raised during 2010, including a groundbreaking SAR 3.5 billion. 5 year bond issue. The new term finance was raised in advance of maturities in 2010, amounting in total to US\$864.6 million. US\$2,816.6 million, or well over three quarters, of the Group's senior term financing is not due to mature until 2012. Further commentary on liquidity and funding is provided in the Basel 2 Pillar 3 report.

SOUND GOVERNANCE

GIB was established in the Kingdom of Bahrain by Amiri Decree law No 30 of 1975 and pursuant to an Agreement of Establishment to which the Governments of Bahrain, Kuwart, Oman, Qatar, Saudi Arabia, and the United Arab Emirates were signatories Pursuant to GIB's Agreement of Establishment and GIB's Articles of Association (collectively, the Constitutional Documents), the Constitutional Documents shall take effect even if they conflict with the laws of the Kingdom of Bahrain

GIB has long recognised the importance of sound corporate governance as a critical factor in attaining fairness for all stakeholders, and achieving organisational integrity and efficiency Since 2003, GIB has published a statement on corporate governance in its Annual Report. The Board of Directors and management are fully committed to complying with established corporate governance and compliance global best practice, to ensuring that GIB remains at the forefront of corporate governance in the Kingdom of Bahrain and wherever it operates, and to formally entrenching a culture of professional corporate governance in the framework of the organisation.

As an international financial institution, GiB also complies with the requirements of the regulatory and supervisory authorities in the various jurisdictions where it operates

During 2010, GiB continued to strengthen its corporate governance framework with particular emphasis on increasing the awareness and understanding of directors,

management and staff on this important topic

This reflects the Bank's commitment to enhancing corporate governance, financial transparency and fairness in the disclosure of financial information for the benefit of all users of that information, including regulators, customers, counterparties, rating agencies and other stakeholders

"The Bank's website also provides access to GIB's Annual Reports, and all the information contained in these reports is therefore accessible globally That information includes management discussion on the business activities of the Bank, as well as discussion and analysis of the financial statements and risk management."

DEVELOPMENTS IN 2010

In 2010, GIB undertook the following measures to enhance its Corporate Governance practices

The new Corporate Governance Code of the Kingdom of Bahrain, issued by the Ministry of Industry and

Commerce in March 2010, was reviewed in order to determine its impact on GIB.

In October 2010, when the CBB Integrated these new requirements within its Rulebook, GIB undertook a major review of the new requirements to assess the impact on GIB's existing practices

In November 2010, GIB undertook a detailed review of the Bank's corporate documents (including Mandates of the Board of Directors and Board Committees) in order to align them with the new Corporate Governance requirements to the extent the new requirements do not conflict with GIB's Constitutional Documents

In December 2010, GIB submitted its Assessment & Action Plan in relation to the new Corporate Governance requirements to the CBB

SHAREHOLDERS

The current shareholding structure of GIB is as follows

Public linvestinent Fund; Saudi Arábia	97 226%
Kuwait Investment Authority Kuwait	0 730%
Qatar Hölding Company Qatar	0 730%
Bahrain Mumtalakat Holding Gompany	
Bahrain	0 438%
Ministry of Finance Oman	0 438%
Emilitações Investrinent Authority, UAE	0 438%

ORGANISATION

The Bank has a corporate governance structure in place that segregates functions and responsibilities, reflecting the necessary division of roles and responsibilities between the Board of Directors and management.

- There is an effective and appropriately constituted Board of Directors responsible for the stewardship of the Bank and the supervision of the Bank's business, which receives from management such information as is required to properly fulfill its duties and the duties of the committees that assist it, and which delegates to management the authority and responsibility for managing the day-to-day business of the Bank.
- There is an effective and appropriately organised management structure responsible for the day-today management of the Bank and the implementation of Board-approved strategy, policies and internal controls
- There is a clear division of roles and responsibilities between the Board of Directors and management, and between the Chairman and the Chief Executive Officer (CEO)
- There are defined and documented mandates and responsibilities (as well as delegated authorities, where applicable) for
 - The Board of Directors
 - . The Chairman of the Board
 - The Board Committees

CORPORATE GOVERNANCE (CONTINUED)

- The CEO
- The Management Committees

The Bank's corporate governance structure and organisation chart is set out on page 114 of this Annual Report.

BOARD OF DIRECTORS

In accordance with the Bank's Articles of Association, directors are appointed by the Bank's shareholders

The Board comprises seven non-executive directors, including the Chairman and Vice-Chairman, who together bring a wide range of skills and experience to the Board Their biographies are set out on page 115 of this Annual Report.

Independence of Directors

The Bank has in place Board-approved detailed criteria to determine whether a director should be classified as independent or non-independent. Such criteria set out a number of factors which would prevent a director from being classified as independent. Directors prevented from being classified as independent by the criteria are automatically classified as being non-independent, and all other directors are automatically classified as being independent. As at 31st December 2010, only two directors of the Bank are classified as non-independent in accordance with the approved criteria, and all the other directors of the Bank are classified as independent (see table on page 25)

"As an international financial institution, GIB also complies with the requirements of the regulatory and supervisory authorities in the various jurisdictions where it operates."

Board Responsibilities

The Board is responsible for the strategic direction of the Bank, maintaining an appropriate organisation structure, approving major policies, monitoring business performance, operations and the integrity of internal controls, nurturing proper and ethical behaviour, providing appropriate oversight, and conducting corporate governance in a transparent manner

The Board performs its responsibilities as a supervisory board while delegating to the Bank's management the

responsibility for the day-to-day management of the Bank within policies, guidelines and parameters set by the Board

"A proactive structure of officers is in place to ensure group-wide compliance with AML/CFT procedures, and the timely update of the same to reflect the changes in regulatory requirements"

In fulfillment of the requirements of the corporate governance rules of the CBB, letters of appointment are issued to newly-elected directors

- First, reminding them that directors are responsible for contributing to the oversight of the Bank's affairs with professionalism and integrity, with the aim of achieving the strategic and financial objectives adopted by the Board,
- Second, pointing out that a key responsibility of the Board is to fill the gap between stakeholders (shareholders, creditors, employees, depositors, investment account holders, etc.) to whom the Board owes a duty of care, and executive management, by monitoring management closely on behalf of stakeholders, and
- Third, drawing attention to the fact that a detailed description of directors' responsibilities is outlined in the Mandate of the Board and in the Mandate of Directors, as adopted by the Board, and that these responsibilities are to be carried out in line with the standards of the Code of Conduct adopted by the Board

In preparation for Board and committee meetings, the directors receive in a timely manner regular reports and all other information required for such meetings, supplemented by any additional information specifically requested by the directors from time to time. The directors also receive monthly financial reports and other regular management reports that enable them to evaluate the Bank's and management's performance against agreed objectives. As prescribed in the Bank's Articles of Association, the Board plans at least four meetings per year, with further meetings to occur at the discretion of the Board.

The details of Board membership and directors' attendance during 2010 are set out in the following table

DIRECTORS' ATTENDANCE JANUARY TO DECEMBER 2010

Board Members	Board Meetings	Executive Committee Meetings	Audit Committee Meetings	HR & Compensation Committee Meetings	Risk Policy Committee Meetings	Executive/ Non- Executive	dindependent/ Non- dridependent	
H E Mr jammaz Abdullah Al-Suhaimi Chairman	l (6)	l (6)*				Non- Executive	Independent

CORPORATE GOVERNANCE (CONTINUED)

Executive Committee

The mandate of the Executive Committee requires it, among other things, to

- Assist the Board in formulating the executive policy of the Bank and controlling its implementation
- Assist the Board by reviewing, evaluating, and making recommendations to the Board with regards to key strategic issues such as mergers, acquisitions, privatisation, or material changes key strategic objectives or direction.
- Approve credit limits that exceed the authority of the CEO subject to the limits approved by the Board
- Carry out additional responsibilities specifically mandated to the committee by the Board
- Exercise, In circumstances in which it is impossible
 or impractical to convene a meeting of the Board
 and subject to applicable law and the Constitutional
 Documents, the powers of the Board on matters for
 which the Board has not otherwise given specific
 direction The Board may, acting unanimously, modify
 or amend any decision of the committee

In all cases, the members of the committee must exercise their business judgement to act in what they reasonably believe to be in the best interests of the Bank and its shareholders

Audit Committee

The mandate of the Audit Committee requires it, among other things, to

- Assist the Board in fulfilling its statutory and fiduciary responsibilities with respect to Internal controls, accounting policies, auditing and financial reporting practices
- Assist the Board In its oversight of (i) the integrity and reporting of the Bank's quarterly and annual financial statements, (ii) compliance with legal and regulatory requirements, and (iii) the independence and performance of the Bank's internal and external auditors.
- Review the activities and performance of the internal audit function.

The mandate of the Audit Committee provides further particulars on financial reporting processes, process improvements, as well as additional ethical and legal compliance overview responsibilities The Group Chief Auditor reports functionally to the Audit Committee,

and administratively to the CEO

"The Board has adopted a compliance framework that reflects the principles for promoting sound compliance practices at GIB, which demonstrates the Bank's adherence to applicable legal and regulatory requirements and to high professional standards"

Human Resources & Compensation Committee
The mandate of the Human Resources & Compensation
Committee requires it, among other things, to

- Assist the Board in fulfilling its responsibilities for the Bank's human resources and remuneration policies.
- Review the Bank's human resources and compensation policy proposals, and makes the necessary recommendations in that regard for approval by the Board
- Ensure that the Bank's remuneration levels remain competitive for the Bank to continue to attract, retain and motivate competent staff to achieve the strategy and objectives of the Bank.
- Review the Bank's succession plan report for submission to the regulators

Risk Policy Committee

The mandate of the Risk Policy Committee requires it, among other things, to

- Assist the Board in fulfilling its oversight responsibilities with respect to setting the Bank's overall risk appetite, parameters and limits within which it conducts its activities
- Ensure that the Bank has an effective risk management framework in place and that all risk controls operating throughout the Bank are in accordance with regulatory requirements and best practice standards for management of risks in banks
- Ensure that realistic policies in respect of management of all significant risks are drafted and approved appropriately

- Review the Bank's risk profile and significant risk positions
- Approve with management the overall credit risk policy limits
- Receive, review, challenge and recommend for approval, by the full Board, any proposed amendments to the overall risk appetite for the Bank.
- Ensure that roles and responsibilities for risk management are clearly defined, and that they remain independent of business development.
- Ensure that, on a timely basis, management informs the committee of all significant risk arising and that it is comfortable with management's responses and action taken to address such findings
- Ensure that management reports significant excesses and exceptions, as and when they arise, to the committee for information and review
- Monitor whether management maintains a culture that rewards the recognition, communication and management of risks

"The Bank has a corporate governance structure in place that segregates functions and responsibilities, reflecting the necessary division of roles and responsibilities between the Board of Directors and management"

MANAGEMENT

The senior management team, which is responsible for the day-to-day management of the Bank entrusted to it by the Board, is headed by the CEO, who is assisted by the Managing Director-Chief Financial Officer, the Head of Treasury, the Managing Director-Chief Risk Officer, the Managing Director-Merchant Banking, the Chief Human Resources Officer, and the Chief Operations Officer The biographies of the Managing Directors are set out on page 116 of this Annual Report.

Seven committees assist the CEO in the management of the Bank.

- Management Committee
- Group Risk Committee

- Assets and Liabilities Committee (ALCO)
- Human Resources Committee
- Information Technology Steering Committee
- Information Security Management Committee
- Operational Risk Committee

"In December 2010, GIB submitted its Assessment & Action Plan in relation to the new Corporate Governance requirements to the CBB."

These committees derive their authorities from the CEO, based on the authorities and limits delegated by the Board of Directors

In fulfilling its principal responsibility for the day-to-day management of the Bank, the senior management team is required to implement Board-approved policies and effective controls, within the strategy and objectives set by the Board

Letters of appointment are issued to members of the senior management team setting out their specific responsibilities and accountabilities that include assisting with and contributing to the following:

- Formulation of the Bank's strategic objectives and direction
- Formulation of the Bank's annual budget and business plan
- Ensuring that high-level policies are in place for all areas and that such policies are fully applied
- Setting and managing of risk/return targets in line with the Bank's overall risk appetite
- Determining the Bank's overall risk based performance measurement standards
- Reviewing business units' performance and initiating appropriate action
- Ensuring that the Bank operates to the highest ethical standards, and complies with both the letter and spirit of the law, applicable regulations and codes of conduct.
- Ensuring that the Bank is an exemplar of good business practice and customer service

CORPORATE GOVERNANCE (CONTINUED)

Their attention is also drawn to the fact that these obligations are in addition to their specific functional responsibilities and objectives, and those set out in the Bank's Corporate Policy Manual

STAFF COMPENSATION

In line with industry best practice, and in consultation with external independent remuneration consultants, GIB has established a comprehensive staff compensation policy based on total compensation

The scheme consists of the following for all staff except the CEO:

- A fixed component representing basic pay, allowances and benefits, which are reviewed and compared annually with market levels, based on an independent market survey and adjusted as appropriate
- A variable component representing a performancerelated award linked to the performance of the Bank, the contribution of the relevant unit and the individual's personal performance. The scheme is based on defined quantitative as well as qualitative measures.
- Based on established criteria, the performance bonus of the Managing Directors is recommended by the CEO for review and endorsement by the Board's Human Resources & Compensation Committee, subject to Board approval

"In October 2010, when the CBB integrated these new requirements within its Rulebook, GIB undertook a major review of the new requirements to assess the impact on GIB's existing practices."

CEO COMPENSATION

- The CEO is appointed by the Board of Directors for a term of three years Renewal is considered prior to the expiration of each term
- The fixed compensation components are negotiated and determined at time of renewal, with assistance and input from independent external compensation evaluation experts
- The performance bonus of the CEO is recommended

by the Board's Human Resources & Compensation Committee, and approved by the Board based on the established scheme mechanism approved by the Board

BOARD OF DIRECTORS COMPENSATION

To assist with establishing the appropriate structure and level of compensation, independent external consultants are involved to advise on market practice and provide suggestions. Generally, the compensation is linked to actual attendance of meetings

The structure and level of the compensation for the members of the Board of Directors are approved by the AGM and consist of the following:

- Attendance fees payable to members attending different Board-related committees meetings
- Allowance to cover travelling, accommodation and subsistence, while attending Board and related committees meetings.
- A pre-defined fixed amount representing an annual remuneration fee

STRATEGY & OBJECTIVES

Given the impact of the global financial crisis and economic downturn during 2009, the Board appointed the Boston Consulting Group to assist the Board and management in developing a new appropriate business model and a strategy to achieve it. This was approved by the Board of Directors on 23rd July 2010. The new strategy entails the transformation of GIB into a pan-GCC universal bank, based on four main pillars of corporate banking, investment banking, asset management and retail banking. The new institution will benefit from more diversified and stable funding, and additional revenue streams, thus reducing volatility and minimising the effects of external shocks.

A key objective of the Bank's new business model and strategy is to provide shareholders by 2015 with an enhanced return on equity that will be competitive with the Bank's peers. On 21st August 2010, the Executive Committee appointed Roland Berger Strategy Consultants to assist management with the implementation of the new strategy; the initial phase is targeted for completion by the end of 2011.

COMPLIANCE

The Board has adopted a compliance framework that reflects the principles for promoting sound compliance practices at GIB, which demonstrates the Bank's adherence to applicable legal and regulatory

requirements and to high professional standards The role of the compliance function is to assist senior management to ensure that the activities of GIB and its staff are conducted in conformity with applicable laws and regulations, and generally with sound practices pertinent to those activities The Head of Compliance (Bahrain), who reports directly to the CEO, also has access to the Board of Directors through the Audit Committee, if required

In ensuring that the tone emanates from the top, the CEO issues a yearly message to all of GIB reminding everyone of the importance of complying with all laws and regulations applicable to GIB's operations, good compliance behaviour is rewarded by making it a mandatory measurement item in staff evaluations

"GIB is committed to enhancing corporate governance, financial transparency and fairness in the disclosure of financial information for the benefit of all users of that information, including regulators, customers, counterparties, rating agencies and other stakeholders."

ANTI-MONEY LAUNDERING

The Bank's current anti-money laundering and combating the financing of terrorism (AML/CFT) procedures and guidelines in place at GIB conform to the legal and regulatory requirements of the Kingdom of Bahrain These legal and regulatory requirements largely reflect the FATF recommendations on Money Laundering and special recommendations on Terrorist Financing

The GIB AML/CFT procedures and guidelines apply to all of the Bank's offices, branches and subsidiaries, wherever located. In addition, the GIB entities located outside Bahrain are subject to the laws and requirements of the jurisdictions where they operate, and if local standards differ, the higher standards apply

Systems are in place to ensure that business relationships are commenced with clients whose identity and activities can reasonably be established to be legitimate, to collect and record all relevant client information, to monitor and report suspicious transactions, to provide periodic AML/CFT training to employees, and to review

with external auditors the effectiveness of the AMU/CFT procedures and controls. The GIB AMU/CFT procedures prohibit dealing with shell banks.

A proactive structure of officers is in place to ensure group-wide compliance with AML/CFT procedures, and the timely update of the same to reflect the changes in regulatory requirements. This structure consists of the Head of Compliance (Bahrain) and Group Money Laundering Reporting Officer, MLROs, and Deputy MLROs.

CORPORATE COMMUNICATIONS

The Bank has in place a Corporate Communications policy in line with the requirements of the Central Bank of Bahrain, to ensure that the disclosures made by the Bank are fair, transparent, comprehensive and timely, and reflect the character of the Bank and the nature, complexity and risks inherent in its business activities. Main communications channels include an Annual Report, corporate brochure, newsletter, and announcements in the appropriate media.

This transparency is also reflected in the Bank's website (www.gibonline.com) that provides substantial information on the Bank, including its profile and milestones, vision, mission, strategy and objectives, its Code of Conduct; its financial statements, and its press releases.

DISCLOSURES

The Bank's website also provides access to GIB's Annual Reports, and all the information contained in these reports is therefore accessible globally That information includes management discussion on the business activities of the Bank, as well as discussion and analysis of the financial statements and risk management. The financial information reflects the latest international accounting standards requirements, including the increased level of disclosure resulting from the adoption of International Financial Reporting Standard No 7 – Financial Instruments Disclosures, such as the disclosures on related party transactions in note 35 to the consolidated financial statements

The Board-approved Disclosure Policy is in accordance with the requirements of Basel 2 Pillar 3, in compliance with CBB rules. The objective of this policy is to ensure transparency in the disclosure of the financial and risk profiles of the Bank to all Interested parties.

CODE OF CONDUCT

The Bank's website also contains the Board-approved Code of Conduct that contains rules on conduct, ethics and on avoiding conflicts of interest, applicable to all the employees and directors of the Bank.

CORPORATE GOVERNANCE (CONTINUED)

The Code of Conduct is designed to guide all employees and directors through best practices to fulfill their responsibilities and obligations towards the Bank's stakeholders (shareholders, clients, staff, regulators, suppliers, the public, the host countries in which the Bank conducts business, etc.), in compliance with all applicable laws and regulations

"The Code of Conduct is designed to guide all employees and directors through best practices to fulfill their responsibilities and obligations towards the Bank's stakeholders (shareholders, clients, staff, regulators, suppliers, the public, the host countries in which the Bank conducts business, etc.), in compliance with all applicable laws and regulations."

The Code addresses such issues as upholding the law and following best practices, acting responsibly, honestly, fairly and ethically; avoiding conflicts of interest; protecting Bank property and data, protecting dient confidential information and safeguarding the information of others, complying with inside information rules and with the prohibition on insider trading; preventing money laundering and terrorism financing; rejecting bribery and corruption, avoiding compromising gifts, as well as speaking up and 'whistle-blowing'

Members of staff can also access the Code of Conduct on the GIB intranet, where it is available both in English and Arabic

POLICY ON CONNECTED COUNTERPARTIES

The Board-approved Policy on Connected Counterparties governs GiB's dealings with such parties. The Policy defines which parties are considered to be connected with GiB within the criteria set by the CBB, and imposes not only the limitations placed by the CBB but also additional criteria imposed by GiB. The policy sets out the internal responsibilities for reporting GiB's connected counterparties exposures to the CBB, and the disclosures to be made in GiB's financial statements and Annual Reports, in line with applicable disclosure requirements.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS

Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of Gulf International Bank BSC ("the Bank") and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31st December 2010, and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes comprising a summary of significant accounting policies and other explanatory information

Responsibility of the board of directors for the consolidated financial statements

The Board of Directors of the Bank is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with international Financial Reporting Standards, and for such internal control as the board of directors determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31st December 2010, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards

Report on other regulatory requirements

As required by the Bahrain Commercial Companies Law and the Central Bank of Bahrain Law, we report that the Bank has maintained proper accounting records and the consolidated financial statements are in agreement therewith, the financial information contained in the chairman's statement is consistent with the consolidated financial statements, we are not aware of any violations of the Bahrain Commercial Companies Law, the Central Bank of Bahrain Law, the terms of the Bank's license or the terms of the Bank's memorandum and articles of association having occurred during the year that might have had a material adverse effect on the business of the Bank or on its financial position, and satisfactory explanations and information have been provided to us by the management in response to all our requests

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st December 2010

I INCORPORATION AND REGISTRATION

The parent company of the Group (the Group), Gulf International Bank B.S.C (the Bank), is a Bahraini Shareholding Company incorporated in the Kingdom of Bahrain by Amiri Decree Law No 30 dated 24th November 1975 and is registered as a conventional wholesale bank with the Central Bank of Bahrain The registered office of the Bank is located at Al-Dowali Building, 3 Palace Avenue, Manama, Kingdom of Bahrain

The Group is principally engaged in the provision of wholesale commercial and investment banking services. The Group operates through subsidiaries, branch offices and representative offices located in six countries worldwide. The total number of staff employed by the Group at the end of the financial year was 440.

2 ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the consolidated financial statements are set out below-

2 I Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards and in conformity with the Bahrain Commercial Companies Law and the Central Bank of Bahrain and Financial Institutions Law The consolidated financial statements have been prepared under the historical cost convention as modified by the revaluation of trading securities, available-for-sale securities and derivative financial instruments as explained in more detail in the following accounting policies Recognised assets and liabilities that are hedged by derivative financial instruments are also stated at fair value in respect of the risk that is being hedged The accounting policies have been consistently applied by the Bank and its subsidiaries and are consistent with those of the previous year

2 2 Consolidation principles

The consolidated financial statements include the accounts of Gulf International Bank B S C and its subsidiaries Subsidiary undertakings are companies and other entities, including special purpose entities, in which the Bank holds, directly or indirectly, more than one half of the voting rights, or otherwise has the power to exercise effective control over the financial and operating policies of the entity All intercompany balances and transactions, including unrealised gains and losses on transactions between Group companies, have been eliminated

23 Foreign currencies

Items included in the consolidated financial statements of the Bank and its principal subsidiaries are measured based on the currency of the primary environment in which the entity operates (the functional currency) The consolidated financial statements are presented in US Dollars, representing the Bank's functional and presentation currency Transactions in foreign currencies are converted to US Dollars at the rate of exchange prevailing at the date of the transaction Monetary assets and liabilities denominated in foreign currencies are translated into US Dollars at market rates of exchange prevailing at the balance sheet date Realised and unrealised foreign exchange gains and losses are included in trading income

2 4 Financial assets and liabilities

Financial assets and liabilities comprise all assets and liabilities reflected in the statement of financial position, although excluding investments in subsidiaries, associated companies and joint ventures, employee benefit plans, property and equipment, deferred taxation and taxation payable

a) Initial recognition and measurement

Financial assets are classified at inception into one of the following three categories -

- held-for-trading
- loans and receivables
- available-for-sale financial assets

Financial assets, other than those held-for-trading, are initially recognised at fair value, including transaction costs that are directly attributable to the acquisition of the financial asset.

Financial liabilities are initially recognised at fair value, representing the proceeds received net of premiums, discounts and transaction costs that are directly attributable to the financial liability

ACCOUNTING POLICIES (continued)

2.4 Financial assets and liabilities (continued)

a) Initial recognition and measurement (continued)

All regular way purchases and sales of financial assets and liabilities held-for-trading are recognised on the trade date, i.e. the date on which the Group commits to purchase or self the financial asset or liability. All regular way purchases and sales of other financial assets and liabilities are recognised on the settlement date, i.e. the date on which the asset or liability is received from or delivered to the counterparty Regular way purchases or sales are purchases or sales of financial assets that require delivery within the time frame generally established by regulation or convention in the market place.

b) Subsequent measurement

Subsequent to Initial measurement, financial assets and liabilities are measured at either fair value or amortised cost, depending on their classification -

Held-for-trading

Held-for-trading financial assets and liabilities are assets or liabilities acquired or incurred for the purpose of generating a profit from short-term fluctuations in price or are included in a portfolio in which a pattern of short-term profit taking exists

Held-for-trading financial assets and liabilities are measured at fair value The fair value for financial assets and liabilities traded in active markets is based on quoted prices, including quotations obtained from lead managers, brokers and dealers. The bid price is used to measure financial assets and the offer price is used to measure financial liabilities. Mid-market prices are used to measure fair value only to the extent that the Group has financial assets and liabilities with offsetting risk positions.

Realised and unrealised gains and losses, interest earned or incurred, and dividends received on held-for-trading financial assets and liabilities are included in trading income

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those classified as held-for-trading. The majority of the Group's loans and receivables are included in the loans and advances category

Financial assets classified as loans and receivables are stated at amortised cost using the effective interest rate method as described in note 2.7(a), less provision for impairment, with interest revenue recognised in the consolidated statement of Income

Available-for-sale financial assets

Available-for-sale financial assets are assets which are intended to be held for an indefinite period of time and may be sold in response to needs for liquidity, changes in interest rates, or concerns with respect to credit deterioration. Available-for-sale financial assets are measured at fair value. The fair value for available-for-sale financial assets in active markets is based on quoted prices, including quotations obtained from lead managers, brokers and dealers. The fair value for available-for-sale financial assets in inactive markets is determined using appropriate valuation techniques Valuation techniques include comparison to similar instruments for which there are observable prices, and discounted cash flow techniques. Unquoted and illiquid equity investments for which fair values cannot be reliably measured are stated at cost less provision for impairment.

Unrealised gains and losses arising from changes in the fair values of available-for-sale financial assets are recognised in other comprehensive income. The cumulative fair value adjustments on available-for-sale financial assets which are sold or otherwise disposed or become impaired, and which had previously been recognised in other comprehensive income are transferred to the consolidated statement of income.

Non-trading financial liabilities

All financial liabilities, other than those designated as held-for-trading, are classified as non-trading financial liabilities and are measured at amortised cost using the effective interest rate method as described in note 2.7(a)

c) Derecognition of financial assets and liabilities

Financial assets are derecognised and removed from the consolidated statement of financial position when the right to receive cash flows from the assets has expired, the Group has transferred its contractual right to receive the cash flows from the assets, and substantially all the risks and rewards of ownership, or where control is not retained Financial liabilities are derecognised and removed from the consolidated statement of financial position when the obligation is discharged, cancelled, or expires

for the year ended 31st December 2010

2 ACCOUNTING POLICIES (continued)

25 Impairment of financial assets

A provision for impairment is established where there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the credit facility Objective evidence that a financial asset is impaired may include a breach of contract, such as default or delinquency in interest or principal payments, the granting of a concession that, for economic or legal reasons relating to the borrower's financial difficulties, that would not otherwise be considered, indications that it is probable that the borrower will enter bankruptcy or other financial reorganisation, the disappearance of an active market, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group. For equity securities classified as available-for-sale, a significant or prolonged decline in fair value below cost is considered in determining whether a security is impaired Where such evidence exists, the cumulative net loss that has been previously recognised in other comprehensive income is transferred to the consolidated statement of income The amount of the cumulative loss that is removed from other comprehensive income and recognised in the consolidated statement of income is the difference between the acquisition cost and current fair value, less any impairment loss on that security previously recognised in the consolidated statement of income

With the exception of provisions for the impairment of available-for-sale financial assets, provisions for impairment are determined based on the difference between the net carrying amount and the recoverable amount of the financial asset. The recoverable amount is measured as the present value of expected future cash flows, including amounts recoverable from guarantees and collateral, discounted based on the interest rate at the inception of the credit facility or, for debt instruments remeasured to fair value, at the current market rate of interest for a similar financial asset. Provisions for the impairment of available-for-sale financial assets are determined based on the difference between the acquisition cost, net of principal repayments and amortisation adjustments, and the fair value of the financial asset, less any impairment loss previously recognised in the consolidated statement of income. Cumulative losses previously recognised in other comprehensive income, are reclassified from the available-for-sale securities revaluation reserve in equity to the consolidated statement of income.

Provisions for impairment are also measured and recognised on a collective basis in respect of impairments that exist at the balance sheet date but which will only be individually identified in the future Future cash flows for financial assets that are collectively assessed for impairment are estimated based on contractual cash flows and historical loss experiences for assets with similar credit risk characteristics. Historical loss experience is adjusted, based on current observable data, to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based.

Provisions for impairment are recognised in the consolidated statement of income and are reflected in an allowance account against loans and advances and investment securities

Financial assets are written off after all restructuring and collection activities have taken place and the possibility of further recovery is considered to be remote. Subsequent recoveries are included in other income.

With the exception of provisions for the impairment of available-for-sale equity investments, provisions for impairment are released and transferred to the consolidated statement of income where a subsequent increase in the recoverable amount is related objectively to an event occurring after the provision for impairment was established impairment provisions for available-for-sale equity investments are only released and transferred to the consolidated statement of income on the redemption or sale of the investment.

Financial assets which have been renegotiated are no longer considered to be past due and are replaced on performing status when all principal and interest payments are up to date and future payments are reasonably assured. Financial assets subject to individual impairment assessment and whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired or should be considered past due.

2.6 Offsetting financial assets and liabilities

Financial assets and financial liabilities are only offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously

ACCOUNTING POLICIES (continued)

2.7 Revenue recognition

a) Interest income and interest expense

Interest income and interest expense for all interest-bearing financial assets and liabilities except those classified as held-for-trading are recognised using the effective interest rate method. The effective interest rate method is a method of calculating the amortised cost of a financial asset or liability and of allocating the interest income or interest expense over the expected life of the asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected life of the financial asset or liability or, where appropriate a shorter period, to the net carrying amount of the financial asset or liability. The application of the effective interest rate method has the effect of recognising interest income and interest expense evenly in proportion to the amount outstanding over the period to maturity or repayment. In calculating the effective interest rate, cash flows are estimated taking into consideration all contractual terms of the financial asset or liability but excluding future credit losses. Fees, including loan origination fees and early redemption fees, are included in the calculation of the effective interest rate to the extent that they are considered to be an integral part of the effective interest rate.

Interest income is suspended when either interest or principal on a credit facility is overdue by more than 90 days whereupon all unpaid and accrued interest is reversed from income interest on non-accrual facilities is included in income only when received Credit facilities are restored to accrual status only after all delinquent interest and principal payments have been brought current and future payments are reasonably assured

b) Fees and commissions

Fees and commissions that are integral to the effective interest rate of a financial asset or liability are included in the calculation of the effective interest rate

Other fees and commissions are recognised as the related services are performed or received, and are included in fee and commission income

c) Net trading income

Trading income arises from earnings generated from customer business and market making, and from changes in fair value resulting from movements in interest and exchange rates, equity prices and other market variables. Changes in fair value and gains and losses arising on the purchase and sale of net trading instruments are included in net trading income, together with the related interest income, interest expense and dividend income.

d) Dividend income

Dividend income is recognised as follows -

- dividends from equity instruments classified as held-for-trading are recognised when the right to receive the dividend is established and are included in net trading income
- dividends from equity instruments classified as available-for-sale are recognised when the right to receive the dividend is established and are included in other income
- in the separate financial statements of the Bank, dividends from subsidiaries are recognised when received

28 Securitles financing arrangements

Securities purchased under agreements to resell (reverse repurchase agreements) and securities sold under agreements to repurchase (repurchase agreements) are treated as collateralised lending and borrowing transactions and are recorded in the consolidated statement of financial position at the amounts the securities were initially acquired or sold. Interest earned on reverse repurchase agreements and interest incurred on repurchase agreements are included in interest income and interest expense respectively. Securities purchased under agreements to resell are included in cash and other liquid assets.

2.9 Premises and equipment

Land is stated at cost. Other premises and equipment are stated at cost less accumulated depreciation. The residual values and useful lives of premises and equipment are reviewed at each balance sheet date, and adjusted where appropriate. Where the carrying amount of premises or equipment is greater than the estimated recoverable amount, the carrying amount is reduced to the recoverable amount.

Generally, costs associated with the maintenance of existing computer software are recognised as an expense when incurred However, expenditure that enhances and extends the benefits of computer software programs beyond their original specifications and lives is recognised as a capital improvement and capitalised as part of the original cost of the software

for the year ended 31st December 2010

2 ACCOUNTING POLICIES (continued)

2 10 Other provisions

Other provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation

2 11 Derivative financial instruments and hedge accounting

Derivative financial instruments are contracts, the value of which is derived from one or more underlying financial instruments or indices and include futures, forwards, swaps and options in the interest rate, foreign exchange, equity and credit markets

Derivative financial instruments are recognised in the consolidated statement of financial position at fair value. Fair values are derived from prevailing market prices, discounted cash flow models or option pricing models as appropriate in the consolidated statement of financial position, derivative financial instruments with positive fair values (unrealised gains) are included in other assets and derivative financial instruments with negative fair values (unrealised losses) are included in other liabilities.

The changes in the fair values of derivative financial instruments entered into for trading purposes or to hedge other trading positions are included in net trading income

The recognition of changes in the fair values of derivative financial instruments entered into for hedging purposes is determined by the nature of the hedging relationship. For the purposes of hedge accounting, derivative financial instruments are designated as a hedge of either (i) the fair value of a recognised asset or liability (fair value hedge), or (ii) the future cash flows attributable to a recognised asset or liability or a firm commitment (cash flow hedge)

The Group's criteria for a derivative financial instrument to be accounted for as a hedge include -

- the hedging instrument, the related hedged item, the nature of the risk being hedged, and the risk management objective and strategy must be formally documented at the inception of the hedge.
- it must be clearly demonstrated that the hedge is expected to be highly effective in offsetting the changes in fair values or cash flows attributable to the hedged risk in the hedged item,
- the effectiveness of the hedge must be capable of being reliably measured, and
- the hedge must be assessed on an ongoing basis and determined to have actually been highly effective throughout the financial reporting period

Changes in the fair values of derivative financial instruments that are designated, and qualify, as fair value hedges and that prove to be highly effective in relation to the hedged risk, are included in net trading income together with the corresponding change in the fair value of the hedged asset or liability that is attributable to the risk that is being hedged. Unrealised gains and losses arising on hedged assets or liabilities which are attributable to the hedged risk are adjusted against the carrying amounts of the hedged assets or liabilities in the consolidated statement of financial position. If the hedge no longer meets the criteria for hedge accounting, any adjustment to the carrying amount of a hedged interest-bearing financial instrument is amortised to income over the remaining period to maturity

Changes in the fair values of derivative financial instruments that are designated, and qualify, as cash flow hedges and that prove to be highly effective in relation to the hedged risk, are recognised in other comprehensive income. Unrealised gains or losses recognised in other comprehensive income are transferred to the consolidated statement of income at the same time that the income or expense of the corresponding hedged item is recognised in the consolidated statement of income and are included in the same income or expense category as the hedged item. Unrealised gains or losses on any ineffective portion of cash flow hedging transactions are included in net trading income.

The interest component of derivatives that are designated, and qualify, as fair value or cash flow hedges is included in interest income or interest expense relating to the hedged item over the life of the derivative instrument.

Hedge accounting is discontinued when the derivative hedging instrument either expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting Gains and losses arising on the termination of derivatives designated as cash flow hedges are recognised in interest income or interest expense over the original tenor of the terminated hedge transaction

2 ACCOUNTING POLICIES (continued)

2 11 Derivative financial instruments and hedge accounting (continued)

Some hybrid instruments contain both a derivative and non-derivative component. In such cases, the derivative is categorised as an embedded derivative if the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract, and the overall contract itself is not carried at fair value, the embedded derivative is bifurcated and measured at fair value if it is not practically possible to bifurcate the embedded derivative, the entire hybrid instrument is categorised as held-for-trading and measured at fair value. Changes in fair value are included in net trading income

2 12 Financial guarantees

Financial guarantees are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specific debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantees are issued to financial institutions and other counterparties on behalf of customers to secure loans, overdrafts and other banking facilities, and to other parties in relation to the performance of customers under obligations related to contracts, advance payments made by other parties, tenders and retentions

Financial guarantees are initially recognised at fair value on the date the guarantee is issued. The guarantee liability is subsequently measured at the higher of the initial measurement, less amortisation to recognise the fee income earned over the period, and the present value of any expected financial obligation arising as a result of an anticipated non-recoverable payment under a guarantee. Any increase in a liability relating to guarantees is recognised in the consolidated statement of financial position, financial guarantees are included in other liabilities.

2 13 Post retirement benefits

The majority of the Group's employees are eligible for post retirement benefits under either defined benefit or defined contribution pension plans which are provided through separate trustee-administered funds or insurance plans. The Group also pays contributions to Government defined contribution pension plans in accordance with the legal requirements in each location.

The Group's contributions to defined contribution pension plans are expensed in the year to which they relate

The pension costs for defined benefit pension plans are assessed using the projected unit credit method The cost of providing pensions is charged to income so as to spread the regular cost of pensions over the service lives of the employees, in accordance with the advice of an independent qualified actuary who conducts a full valuation of the plan every three years. The pension obligation is measured as the present value of the estimated future cash flows using interest rates of government securities which have terms to maturity approximating the terms of the related liability.

Actuarial gains and losses are recognised in income when the net cumulative unrecognised actuarial gain or loss at the end of the previous financial year exceeds 10 per cent of the higher of (i) the fair value of the plan assets, and (ii) the present value of the fund obligations That portion of the net cumulative unrecognised actuarial gain or loss is recognised in income over the expected average remaining working lives of the employees participating in the plan Otherwise, the actuarial gain or loss is not recognised

2 14 Taxation

a) Current tax

Current taxation is the expected tax payable on the taxable income for the year, using tax rates enacted at the balance sheet date, and includes any adjustments to tax payable in respect of previous years

b) Deferred tax

Deferred tax is provided, using the liability method, for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. A deferred tax asset is recognised only to the extent that it is probable that future taxable income will be available against which the unutilised tax losses and credits can be utilised. Currently enacted tax rates are used to determine deferred taxes.

2 15 Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents comprise cash and other liquid assets

for the year ended 31st December 2010

2 ACCOUNTING POLICIES (continued)

2 16 Segment reporting

An operating segment is a distinguishable component of the Group that is engaged in business activities from which revenues are earned and expenses are incurred, including revenues and expenses that relate to transactions with any of the Group's other operating segments. All segments have discrete financial information which is regularly reviewed by the Group's Management Committee, being the Group's chief operating decision maker, to make decisions about resources allocated to the segment and to assess its performance

2 17 Fiduciary activities

The Group administers and manages assets owned by clients which are not reflected in the consolidated financial statements. Asset management fees are earned for providing investment management services and for managing mutual fund products. Asset administration fees are earned for providing custodial services. Fees are recognised as the services are provided and are included in fee and commission income.

2 18 Dividends

Dividends on issued shares are recognised as a liability and deducted from equity when they are approved by the Bank's shareholders

2 19 Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year

2 20 Future accounting developments

The International Accounting Standards Board (IASB) have issued a number of new standards, amendments to standards, and interpretations that are not yet effective and have not been applied in the preparation of the consolidated financial statements for the year ended 31st December 2010 The relevant new standards, amendments to standards, and interpretations, are as follows -

- IFRS 9 - Financial instruments The new standard is effective for financial years beginning on or after 1st January 2013 The standard amends the measurement categories currently defined under IAS 39, specifically, held-to-maturity, loans and receivables and available-for-sale categories are eliminated The standard also amends the accounting for embedded derivatives and the rules regarding derecognition of financial assets and liabilities The Group is currently evaluating the potential effect of this standard which is expected to require certain valuation and associated presentational changes

3 ACCOUNTING ESTIMATES AND ASSUMPTIONS

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of certain financial assets, liabilities, income and expenses

The use of estimates and assumptions is principally limited to the determination of provisions for impairment, the valuation of financial instruments, and the valuation of the Group's defined benefit pension plan as explained in more detail below-

Provisions for Impairment

Financial assets are evaluated for impairment on the basis set out in note 2.5

In determining provisions for impairment, judgement is required in the estimation of the amount and timing of future cash flows

In addition to provisions for impairment against specific assets, the Group also maintains provisions that are measured and recognised on a collective basis. Key assumptions included in the measurement of the portfolio provisions include data on the probability of default and the eventual recovery amount in the event of a forced sale or write off These assumptions are based on observed historical data and updated as considered appropriate to reflect current conditions. The accuracy of the portfolio provisions would therefore be affected by unexpected changes in these assumptions

Equity securities classified as available-for-sale are considered to be impaired when there has been a significant or prolonged decline in fair value below cost. The determination of significant or prolonged requires judgement. In making the judgement, a number of factors are taken into account including the normal volatility in valuation, evidence of a deterioration in the financial condition of the investee, industry and sector performance and operational and financing cash flows

Fair value of financial assets and liabilities

Where the fair value of financial assets and liabilities cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is derived from observable markets where available, but where this is not feasible, a degree of judgement is required in determining assumptions used in the models. Changes in assumptions used in the models could affect the reported fair value of financial assets and liabilities.

Retirement benefit obligations

Management, in coordination with an independent qualified actuary, are required to make assumptions regarding the defined benefit pension plan, changes in which could affect the reported liability, service cost and expected return on pension plan assets. The principal actuarial assumptions for the defined benefit pension plan are set out in note 11 and include assumptions on the discount rate, expected return on pension plan assets, mortality, future salary increases, and inflation Changes in the assumptions could affect the reported asset, service cost and expected return on pension plan assets

for the year ended 31st December 2010

4 CLASSIFICATION OF ASSETS & LIABILITIES

The classification of assets and liabilities by accounting categorisation was as follows -

					Financial	Non-	
					liabilities	financial

	1,043 9	508 2

6 PLACEMENTS

Placements at 31st December 2010 included placements with central banks amounting to US\$633.5 million (2009 US\$1,251.2 million). The placements with central banks represented the placement of surplus liquid funds.

7 TRADING SECURITIES

	31 12 10	31 12.09
	US\$ millions	US\$ millions
Debt securities	50 0	•
Managed funds	29 4	50 2
Listed equities	0.3	•
	79.7	50 2

Debt securities comprise investments in debt securities issued by governments, quasi-government entities, and government-owned entities. Managed funds comprise funds placed for investment with specialist managers

8 INVESTMENT SECURITIES

a) Composition

The credit rating profile of investment securities, based on the lowest rating assigned by the major International rating agencies, was as follows -

	31.12 10		31 12.09	31 12.09	
	US\$ millions	*	US\$ millions	*	
AAA to A- / Aza to A3	2,435 8	89 4	1,404 8	76 1	
BBB+ to BBB- / Baal to Baa3	207.6	7.6	365 I	198	
Other debt securities	81 5	3 0	76 6	41	
Total debt securities	2,724 9	100.0	1,846.5	100 0	
Equity investments	342.9		171 6		
	3,067.8		2,0181		

Investment securities principally comprise investment-grade rated debt securities issued by major international financial institutions and government-related entities.

At 31st December 2010, 89 4 per cent of debt securities were rated A- /A3 or above (2009 76 I per cent)

Equity investments at 31st December 2010 included listed equities amounting to US\$190.0 million received in settlement of a secured past due loan.

for the year ended 31st December 2010

8 INVESTMENT SECURITIES (continued)

b) Provisions for impairment

The movements in the provisions for the impairment of investment securities were as follows -

	2010	2009
	US\$ millions	US\$ millions
At 1st January	97 5	776 5
Exchange rate movements	(0 5)	(0 8)
Amounts utilised	(24 2)	(630 2)
Release for the year	(5 0)	(48 0)
At 31st December	67 8	97 5

The amounts utilised during the year ended 31st December 2010 principally comprised amounts written off on the redemption of externally managed funds. The redemptions resulted in the release of unutilised provisions for impairment and no incremental losses arose as a result of the redemptions.

The amounts utilised during the year ended 31st December 2009 principally comprised US\$563.5 million on the write off of the Group's investments in structured investment vehicles (SIVs), and write offs of US\$49.5 million on the settlement of credit default swaps. The write offs on the SIVs and credit default swaps were fully covered by specific provisions for impairment. No incremental losses arose as a result of the write offs.

c) Impaired securities

Impaired securities represent securities for which there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the security

Impaired investment securities and the related specific provisions for impairment were as follows -

	31 12 10			31 12.09		
	Gross US\$ millions	•		Gross US\$ millions	Impairment provisions US\$ millions	Carrying amount US\$ millions
Equity investments	57.7	44.2	13.5	84 I	67 2	169
Non-specific / portfolio provisions	- · · · · · · · · · · · · · · · · · · ·	23 6			30 3	•
Total provisions for impairment		67.8	_ - -		975	

Total specific provisions for impairment at 31st December 2010 represented 76 6 per cent of gross impaired investment securities (2009 79 9 per cent)

There were no past due debt securities at 31st December 2010 or 31st December 2009

d) Unquoted equity investments

Investment securities at 31st December 2010 included US\$106.9 million (2009- US\$125.2 million) of unquoted equity investments for which fair values cannot be reliably measured. These investments are stated at cost less provision for impairment. They principally represent private equity investments and investments in managed entities, the underlying investments of which are primarily of either a corporate debt or private equity nature, managed by external specialist managers and international investment banks. There are no active markets or other appropriate methods from which to derive reliable fair values for these investments. The Group intends to exit these investments principally by means of IPOs or private placements.

8 INVESTMENT SECURITIES (continued)

e) Reclassified securities

At 1st October 2008, and in accordance with the amendments to IAS 39 - Financial Instruments Recognition and Measurement, a number of externally managed funds that were no longer held for the purpose of sale in the short term were reclassified from held-for-trading to available-for-sale. Due to the adverse impact of the severe market conditions prevailing at the time, which was considered to meet the IAS 39 amendment definition of a rare event, the managed funds are closed to redemptions for the foreseeable future. The funds were reclassified at their net asset values on the date of transfer on 1st October 2008. The movements in the carrying amount of the reclassified funds were as follows -

	Carrying
	amount
	US\$ millions
At 1st October 2008 ,	60.8
Provisions for impairment	(37.7)
Net movement	42
At 31st December 2008	27.3
Net movement	(8 3)
At 31st December 2009	19.0
Net movement	(2 1)
At 31st December 2010	16.9

During 2008, subsequent to the date of transfer, no amounts were recognised in income other than provisions for impairment. During 2010, realised gains of US\$0.7 million (2009 US\$0.5 million) were recognised as realised profits on investment securities in other income in the consolidated statement of income These profits would have been recognised as trading income had the assets not been reclassified

9 LOANS AND ADVANCES

31 12.10	31 12.09
US\$ millions	US\$ millions
8,152.4	9,932.2
(642 3)	(634 I)
7,510 I	9,298 1
	US\$ millions 8,152.4 (642 3)

for the year ended 31st December 2010

9 LOANS AND ADVANCES (continued)

a) Industrial classification

The classification of loans and advances by industry was as follows -

	31.12.10	31 12.09
	US\$ millions	US\$ millions
Energy, oil and petrochemical	3,010 8	3,135 5
Trading and services	1,192 5	1,349 6
Financial	1,103.7	1,620 4
Transportation	812.9	827 8
Manufacturing	595 7	691 9
Construction	533 3	6410
Real estate	361.5	768 0
Communication	266.8	446 4
Government	185 9	320 1
Other	89 3	1315
	8,152.4	9,932 2
Provisions for impairment	(642.3)	(634 I)
	7,510	9,298 1

The classification of loans and advances by industry reflects the Group's historical strategic focus on project and structured finance in the Gulf Cooperation Council (GCC) states.

Gross loans at 31st December 2010 included Islamic-related transactions amounting to US\$1,582.4 million (2009 US\$2,043.4 million).

b) Provisions for impairment

The movements in the provisions for the impairment of loans and advances were as follows -

		2010			2009		
	Non-		Non-			Non-	
	Specific US\$ millions	Specific US\$ millions	Total US\$ millions	Specific US\$ millions	Specific US\$ millions	Total US\$ millions	
At 1st January	394 1	240 0	634 I	94 2	180 0	2742	
Amounts utilised	(0 8)	•	(0 8)	(18)	-	(8.1)	
Charge for the year	4.0	5 0	90	3017	60 0	361 7	
At 31st December	397 3	245 0	642 3	394 I	240 0	634 1	

The level of non-specific loan provisions reflect the application of higher probabilities of default in the calculation of provisions for impairment measured on a collective basis. Higher probabilities of default are anticipated to result from the impact of the global recession on the regional economic environment. The probabilities of default applied in the calculation of the collective provisions of impairment equate to a speculative-grade mean default rate of 13.9 per cent, exceeding the previous historical high corporate default levels witnessed in July 1991.

Non-specific provisions at 31st December 2010 represented 3 3% of non-specifically provisioned loans (2009 2.6%)

Amounts utilised during the years ended 31st December 2010 and 31st December 2009 represented provisions utilised on the settlement of the related loans

9 LOANS AND ADVANCES (continued)

c) Past due loans

The gross and carrying amounts of loans for which either principal or interest was over 90 days past due were as follows -

		31 (2.10			31 1	2.09	
	Gr	TOSS	Carrying	amount	Gr	70\$S	Carrying	zmount
	Corporates US\$ millions		Corporates US\$ millions		Corporates US\$ millions	Financial Institutions US\$ millions	Corporates US\$ millions	Financial Institutions US\$ millions
Secured	84.3	-	84.3	-	198 1	•	198 1	•
Unsecured Under restructuring		<u>- ' </u>						
and current	477 2	•	381 6	-	610		30 5	-
Other	154.7	169.4	41.3	23 7	147 8	155 4	35 3	25 4
Total Unsecured	631.9	169.4	422.9	23.7	208.8	155 4	65 8	25 4

Corporates include loans extended for investment purposes

Net unsecured past due loans of US\$446 6 million included US\$381 6 million of loans that are subject to restructuring programmes and for which interest is current and being paid on due dates. The restructurings are expected to be finalised within the six months ended 30th June 2011, following which the loans will revert to performing status. The restructuring programmes are not anticipated to result in an economic loss for the Group.

The overdue status of past due but not impaired loans based on original contractual maturities was as follows -

	31.12 10	31 12.09
	US\$ millions	US\$ millions
Less than I year	235 7	-
Years 2 to 5	26 7	198 1
	262 4	198 1

At 31st December 2010 interest-in-suspense on past due loans amounted to US\$59.5 million (2009 US\$25.4 million)

d) Renegotiated loans

There were no renegotiated loans during either the year ended 31st December 2010 or 31st December 2009 Renegotiated loans are loans that have been restructured due to a deterioration in the borrower's financial position and where the Group has made concessions that it would not have otherwise considered

e) Collateral

During the year ended 31st December 2010, the Group took possession of listed equities received in settlement of a secured past due loan. The equities are classified as investment securities. The carrying amount of the equities at 31st December 2010 is set out in note 8(a).

for the year ended 31st December 2010

10 OTHERASSETS

	31 12.10	31 12.09
	US\$ millions	US\$ millions
Accrued interest, fees and commissions	77.1	57 8
Derivative financial instruments	67.1	60 6

Other, including accounts receivable	39 3	41 6
-	249.9	232 0

Derivative financial instruments represent the positive fair values of derivative financial instruments entered into for trading purposes, or designated as fair value or cash flow hedges. An analysis of the fair value of derivative financial instruments is set out in note 30 (d)

An analysis of the prepaid pension cost is set out in note 11

11 POST RETIREMENT BENEFITS

The Group contributes to defined benefit and defined contribution pension plans which cover substantially all of its employees.

The Bank maintains defined contribution pension plans for the majority of its employees Contributions are based on a percentage of salary. The amounts to be paid as retirement benefits are determined by reference to the amounts of the contributions and investment earnings thereon. The total cost of contributions to defined contribution pension plans for the year ended 31st December 2010 amounted to US\$5.1 million (2009 US\$5.3 million).

The Bank's principal subsidiary, Gulf International Bank (UK) Limited (GIBUK), maintains a defined benefit pension plan for a number of its employees. The assets of the plan are held independently of the subsidiary's assets in a separate trustee administered fund. The pension costs are charged to income so as to spread the regular cost of the pensions over the service lives of the employees, in accordance with the advice of an independent qualified actuary who conducts a full valuation of the plan every three years using the projected unit credit method. In the intervening years the calculation is updated based on information received from the actuary. The latest full actuarial valuation was carried out at 1st January 2008.

a) The amount recognised in the consolidated statement of financial position is analysed as follows -

-	31,12.10 US\$ millions	31 12 09 US\$ millions
Fair value of plan assets	148.0	144 8
Present value of fund obligations	152.5	149 8
Plan deficit	(4 5)	(5 0)
Unrecognised actuarial loss	21.0	22.6
Net asset in the consolidated statement of financial position	16.5	176

11 POST RETIREMENT BENEFITS (continued)

b) The movements in the fair value of plan assets were as follows -

	2010	2009
	US\$ millions	US\$ millions
At 1st January	144 8	1175
Expected return on plan assets	7.3	7 1
Contributions paid by the Group	0 8	15
Benefits paid by the plan	(3 6)	(3 1)
Actuarial gains	5 3	70
Exchange rate movements	(6.6)	148
At 31st December	148 0	144.8
		

The plan assets at 31st December 2010 comprise equity and debt securities in the ratio of 34 per cent and 66 per cent respectively (2009 30 per cent and 70 per cent respectively) Cash holdings within the plan assets are included in debt securities

The expected and actual returns on the plan assets for the year ended 31st December 2010 were US\$7.3 million and US\$12.9 million respectively (2009-US\$7.1 million and US\$10.5 million respectively). The overall expected rate of return on the plan assets is determined based on market prices, applicable to the period over which the obligation is to be settled. The expected return is determined separately for equity and debt securities.

c) The movements in the present value of fund obligations were as follows -

	2010	2009
	US\$ millions	US\$ millions
At 1st January	149.8	101 5
Current service cost	0.9	1.1
Interest cost	8 1	77
Actuarial losses	41	27 3
Benefits paid by the plan	(3 6)	(3 1)
Exchange rate movements	(6 8)	15 3
At 31st December	152 5	1498

d) The movements in the net asset recognised in the consolidated statement of financial position were as follows -

12 DEPOSITS

Deposits from customers include deposits from central banks

The geographical composition of total deposits was as follows -

	31 12 10	31 12.07
	US\$ millions	US\$ millions
GCC countries	6,749 6	6,609 1
Other Middle East and North Africa countries	654 8	2,540 5
Other countries	1,299 2	899 9
	8,703 6	10,049.5

31 12 10

31 12 09

GCC deposits comprise deposits from GCC country governments and central banks and other institutions headquartered in the GCC states.

At 31st December 2010, GCC deposits represented 77.5 per cent of total deposits (2009 65 8 per cent)

The significant decrease in deposits from Other Middle East and North Africa countries during the year ended 31st December 2010 reflected pro-active actions taken by the Group to reduce depositor concentrations as part of a programme to enhance and strengthen the Group's funding profile and liquidity management.

Total deposits at 31st December 2010 included Islamic-related transactions amounting to US\$2,022 8 million (2009-US\$1,459 2 million) Islamic-related transactions comprised murabaha contracts

13 SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

The Group enters into collateralised borrowing transactions (repurchase agreements) in the ordinary course of its financing activities Collateral is provided in the form of securities held within the investment securities portfolio. At 31st December 2010, the fair value of investment securities that had been pledged as collateral under repurchase agreements was US\$1,002.0 million (2009 US\$858.2 million). The collateralised borrowing transactions are conducted under standardised terms that are usual and customary for such transactions.

In addition to the repurchase agreements mentioned above, during the year ended 31st December 2010 a contractual standby facility was concluded providing the Group access to US\$500 0 million of collateralised funding based on pre-determined terms. The facility is available to be drawn, in full or in part, at the Group's discretion between 1st February 2011 and 31st January 2012.

14 OTHER LIABILITIES

	31 12.10 US\$ millions	31 12.09 US\$ millions
Derivative financial instruments	86 2	137 5
Deferred Items	62 1	53 2
Accrued Interest	48.4	39 6
Other, including accounts payable and accrued expenses	76 3	64 6
	273.0	294 9

Derivative financial instruments represent the negative fair values of derivative financial instruments entered into for trading purposes, or designated as fair value or cash flow hedges. An analysis of the fair value of derivative financial instruments is set out in note 30 (d)

Other fee and commission income	1.5	16
Total fee and commission income	43 I	42.4
Fee and commission expense	(0 9)	(1 7)
Net fee and commission income	42.2	40 7

Investment banking and management fees comprise fees relating to the provision of investment management and financial services, including asset and fund management, underwriting activities, and services relating to structured financing, privatisations, IPOs, and mergers and acquisitions

for the year ended 31st December 2010

21 FEE AND COMMISSION INCOME (continued)

Investment banking and management fees for the year ended 31st December 2010 included fee income relating to the Group's fiductary activities amounting to US\$15.2 million (2009 US\$17.7 million)

Fee and commission expense principally comprises security custody fees

22 NETTRADING INCOME

	2010	2009
	US\$ millions	US\$ millions
Foreign exchange	8.7	II 2
Managed funds	3 5	130
Interest rate derivatives	0 5	13
Debt securities		2.7
	127	28 2

Trading income comprises gains and losses arising both on the purchase and sale, and from changes in the fair value, of trading instruments, together with the related interest income, interest expense and dividend income Trading Income accordingly incorporates all income and expenses related to the Group's trading activities

Foreign exchange includes spot and forward foreign exchange contracts, and currency futures and options

Interest rate derivatives includes interest rate swaps, forward rate agreements, interest rate options, interest rate futures, and credit derivatives.

An analysis of the basis used for determining the fair values of held-for-trading financial assets and liabilities is set out in note 36

23 OTHER INCOME

Other income principally comprises dividends on available-for-sale equity investments and profits realised on the sale of investment securities. Other income for the year ended 31st December 2009 also included profits of US\$8.3 million arising on the repurchase of subordinated debt.

24 OTHER OPERATING EXPENSES

Other operating expenses for the year ended 31st December 2010 included US\$15.0 million of non-recurring costs associated with the implementation of the Group's new business strategy (2009 nil)

25 SEGMENTAL INFORMATION

Segmental information is presented in respect of the Group's business and geographical segments. The primary reporting format, business segments, reflects the manner in which financial information is evaluated by the Board of Directors and the Group Management Committee

a) Business Segments

For financial reporting purposes, the Group is organised into four main operating segments -

- Merchant Banking the provision of wholesale commercial financing and other credit facilities for corporate and institutional customers, and the provision of financial advisory services relating to structured financing, privatisations, IPOs and mergers and acoustitions
- Treasury: the provision of a broad range of treasury and capital market products and services to corporate and financial institution
 clients, money market, proprietary investment and trading activities and the management of the Group's balance sheet, including
 finding

25 SEGMENTAL INFORMATION (continued)

a) Business Segments (continued)

- Financial Markets the provision of asset and fund management services
- Corporate and support units income arising on the investment of the Group's net free capital funds and expenses incurred by support units

The results reported for the business segments are based on the Group's internal financial reporting systems. The accounting policies of the segments are the same as those applied in the preparation of these consolidated financial statements and are set out in note 2. Transactions between business segments are conducted on normal commercial terms and conditions. Transfer pricing between the business units is based on the market cost of funds

Segment results, assets and liabilities comprise items directly attributable to the business segments. Liabilities reported for corporate and support units comprise senior and subordinated term finance facilities and related accrued interest, the cost of which is recharged to the relevant operating business segments

The business segment analysis is as follows -

	Merchant Banking US\$ millions	Treasury US\$ millions	Financial Markets US\$ millions	Corporate and support units US\$ millions	Total US\$ millions

25 SEGMENTAL INFORMATION (continued)

b) Geographical segments

Although the Group's three main business segments are managed on a worldwide basis, they are considered to operate in two geographical markets the GCC and the rest of the world

The geographical composition of total income and total assets based on the location in which transactions are booked and income is recorded was as follows -

	20	2010		09
	Total	Total	Total	Total
	income	assets	income	assets
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Bahrain	153 4	11,238 8	195 9	10 932 4
Saudi Arabia	35.0	2,231.4	42 6	3,013 9
Total GCC	188 4	13,470 2	238 5	13 946 3
Other countries	35.4	2,057 5	47 5	2,261 4
	223 8	15,527 7	286 0	16,207 7

The geographical analyses of deposits and risk assets are set out in notes 12 and 27 respectively

26 RISK MANAGEMENT

The principal risks associated with the Group's businesses are credit risk, market risk, liquidity risk and operational risk. The Group has a comprehensive risk management framework in place for managing these risks which is constantly evolving as the business activities change in response to credit, market, product and other developments. The risk management framework is guided by a number of overriding principles including the formal definition of risk management governance, an evaluation of risk appetite expressed in terms of formal risk limits, risk oversight independent of business units, disciplined risk assessment and measurement including Value-at-Risk (VaR) methodologies and portfolio stress testing, and risk diversification The Board of Directors set the Group's overall risk parameters and risk tolerances and the significant risk management policies. A Board Risk Policy Committee reviews and reports to the Board of Directors on the Group's risk profile and risk taking activities. A Management Committee, chaired by the Group Chief Executive Officer, has the primary responsibility for sanctioning risk taking activities and risk management policies within the overall risk parameters and tolerances defined by the Board of Directors. A Group Risk Committee, under the chairmanship of the Chief Risk Officer and comprising the Group's most senior risk professionals, provides a forum for the review and approval of risk measurement methodologies, risk control processes and the approval of new products The Group Risk Committee also reviews all risk policies and limits that require the formal approval of the Management Committee The risk management control process is based on a detailed structure of policies, procedures and limits, and comprehensive risk measurement and management information systems for the control, monitoring and reporting of risks. Periodic reviews by Internal and external auditors and regulatory authorities subject the risk management processes to additional scrutiny which help to further strengthen the risk management environment.

The principal risks associated with the Group's businesses and the related risk management processes are described in detail in the Basel 2 Pillar 3 disclosure report in the Annual Report, and are summarised below together with additional quantitative analysis -

a) Credit risk

Credit risk is the risk that counterparties will be unable to meet their obligations to the Group. Credit risk arises principally from the Group's lending and investment activities in addition to other transactions involving both on- and off-balance sheet financial instruments. Disciplined processes are in place at both the business unit and corporate level that are intended to ensure that risks are accurately assessed and properly approved and monitored Formal credit limits are applied at the individual transaction, counterparty, country and portfolio levels. Overall exposures are also evaluated to ensure a broad diversification of credit risk. The credit management process involves the monitoring of concentrations by product, industry, single obligor, risk grade and geography, and the regular appraisal of counterparty credit quality through the analysis of qualitative and quantitative information.

26 RISK MANAGEMENT (continued)

a) Credit risk (continued)

Credit risk is actively managed and rigorously monitored in accordance with well-defined credit policies and procedures Prior to the approval of a credit proposal, a detailed credit risk assessment is carried out which includes an analysis of the obligor's financial condition, market position, business environment and quality of management. The risk assessment generates an internal credit risk rating for each exposure, which affects the credit approval decision and the terms and conditions of the transaction For cross border transactions an analysis of country risk is also conducted The Group bases its credit decision for an individual counterparty on the aggregate Group exposure to that counterparty and all its related entities Groupwide credit limit setting and approval authorisation requirements are conducted within Board approved guidelines, and the measurement, monitoring and control of credit exposures are done on a Groupwide basis in a consistent manner

The Group also mitigates its credit exposures on foreign exchange and derivative financial instruments through the use of master netting agreements and collateral arrangements

Maximum exposure to credit risk

The gross maximum exposure to credit risk before applying collateral, guarantees and other credit enhancements was as follows -

31 12.10	31 12.09
US\$ millions	US\$ millions
1,043 9	508 2
3,576 3	1,101 t
79 7	50 2

11.9	95
90.1	69 0
2,251.9	2,238 9
17,606 8	18,272.4
	US\$ millions 1,043 9 3,576 3 79 7 3,067.8 7,510.1 77.1 15,354.9 2,149.9 11.9 90.1 2,251.9

Credit Risk Profile

The Group monitors, manages and controls credit risk exposures based on an internal credit rating system that rates individual obligors based on a rating scale from 1 to 10, subject to positive (+) and negative (-) modifiers for rating grades 2 to 6 The internal credit rating is a measure of the credit-worthiness of a single obligor, based on an assessment of the credit risk relating to senior unsecured, medium term, foreign currency credit exposure The primary objectives of the internal credit rating system are the maintenance of a single uniform standard for credit quality measurement, and to serve as the primary basis for Board-approved risk parameters and delegated credit authority limits The Internal credit rating system also serves as a key input into the Group's risk-adjusted return on capital (RAROC) performance measurement system Ratings are assigned to obligors, rather than facilities, and reflect a medium term time horizon, thereby rating through an economic cycle The internal ratings map directly to the rating grades used by the international credit rating agencies as follows -

for the year ended 31st December 2010

- 26 RISK MANAGEMENT (continued)
- a) Credit risk (continued)

Cicale iisk (continues)						
			External Rating			
	Internal	Historical default	Fitch and			
Internal rating grade	classification	rate range	Standard & Poor's	Moody's		
	-	%				
Investment grade						
Rating grade I	Standard	0 00 - 0 00	AAA	Aaa

Individually impaired financial assets represent assets for which there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the obligation

for the year ended 31st December 2010

26 RISK MANAGEMENT (continued)

a) Credit risk (continued)

The Group holds collateral against loans and advances in the form of physical assets, cash deposits, securities and guarantees The amount and type of collateral is dependent upon the assessment of the credit risk of the counterparty The market / fair value of the collateral is actively monitored on a regular basis and requests are made for additional collateral in accordance with the terms of the underlying agreements. Collateral is not usually held against securities or placements and no such collateral was held at either 31st December 2010 or 31st December 2009.

An analysis of the credit risk in respect of foreign exchange and derivative financial instruments is set out in note 30 while the notional and risk-weighted exposures for off-balance sheet credit-related financial instruments are set out in note 31

Credit risk concentration

The Group monitors concentrations of credit risk by sector and by geographic location The industrial classification of loans and advances is set out in note 9. The geographical distribution of risk assets is set out in note 27. An analysis of the credit risk in respect of foreign exchange and derivative financial instruments is set out in note 30.

Settlement risk

Settlement risk is the risk of loss due to the failure of a counterparty to honour its obligations to deliver cash, securities, or other assets as contractually agreed

For certain types of transactions, the Group mitigates this risk by conducting settlements through a settlement or clearing agent to ensure that a trade is settled only when both parties have fulfilled their contractual settlement obligations. Settlement limits form part of the credit approval and limit monitoring process.

b) Market risk

Market risk is the risk of loss due to adverse changes in Interest rates, foreign exchange rates, equity prices and market conditions such as liquidity The principal market risks to which the Group is exposed are interest rate risk, foreign exchange risk and equity price risk associated with its trading, investment and asset and liability management activities The portfolio effects of holding a diversified range of instruments across a variety of businesses and geographic areas contribute to a reduction in the potential negative impact on earnings from market risk factors

Trading market risk: The Group's trading activities principally comprise trading in debt and equity securities, foreign exchange and derivative financial instruments. Derivative financial instruments include futures, forwards, swaps and options in the interest rate, foreign exchange, equity, credit and commodity markets. The Group manages and controls the market risk within its trading portfolios through limit structures of both a VaR and non-VaR nature. Non-VaR based constraints relate, inter alia, to positions, volumes, concentrations, allowable losses and maturities VaR is a risk measurement concept which uses statistical models to estimate, within a given level of confidence, the maximum potential negative change in the market value of a portfolio over a specified time horizon resulting from an adverse movement in rates and prices it is recognised that there are limitations to the VaR methodology These limitations include the fact that the historical data may not be the best proxy for future price movements The Group performs regular back testing exercises to compare actual profits and losses with the VaR estimates to monitor the statistical validity of the VaR model VaR is calculated based on the Group's market risk exposures at the close of the business each day intra-day risk levels may vary from those reported at the end of the day in addition, losses beyond the specified confidence level are not captured by the VaR methodology VaR is not a measure of the absolute limit of market risk and losses in excess of the VaR amounts will, on occasion, arise To manage the risk associated with extreme market movements, the Group conducts stress testing which measures the impact of simulated abnormal changes in market rates and prices on the market values of the portfolios The composition of the debt and equity trading securities is set out in note 7. An analysis of derivative financial instruments, including the VaR of foreign exchange and derivative trading contracts, is set out in note 30

26 RISK MANAGEMENT (continued)

b) Market risk (continued)

The VaR by risk class for the Group's trading positions, as calculated in accordance with the basis set out in note 33, was as follows -

	2010				2009			
	31 12.10 US\$ millions	_	High US\$ millions	Low US\$ millions	31 12.09 US\$ millions	Average US\$ millions	High US\$ millions	Low US\$ millions
Interest rate risk	1 3	0 2	1.3	0.1	01	04	14	01
Foreign exchange risk	0 1	0 1	0 2	-	-	0 1	02	-
Equity risk	0 1	0 3	0 7	0.1	06	23	40	06
Total diversified risk	13	0.5	1.4	0.2	0.6	2.5	49	06

- Non-trading market risk: Structural Interest rate risk arises in the Group's core balance sheet as a result of mismatches in the repricing of interest rate sensitive financial assets and liabilities. The associated interest rate risk is managed within VaR limits and through the use of models to evaluate the sensitivity of earnings to movements in interest rates. The repricing profile and related interest rate sensitivity of the Group's financial assets and liabilities are set out in note 29. The Group is exposed to the impact of changes in credit spreads on the fair value of available-for-sale debt securities. Movements in the fair value of available-for-sale securities are accounted for in equity. Credit spread risk is managed within VaR limits and through the use of models to evaluate the sensitivity of changes in equity to movements in credit spreads. Based on the available-for-sale debt securities held at 3 lst. December 2010 a 1 b p. increase in credit spreads would result in a US\$0.8 million decrease in fair value (2009 US\$0.5 million). The Group does not maintain material foreign currency exposures in general, the Group's policy is to match financial assets and liabilities in the same currency or to mitigate currency risk through the use of currency swaps. Details of significant foreign currency net open positions are set out in note 30(e)

The more significant market risk-related activities of a non-trading nature undertaken by the Group, the related risks associated with those activities, and the types of derivative financial instruments used to manage and mitigate such risks are summarised as follows -

Activity	Risk	Risk Mitigant		
Management of the return on variable rate assets funded by shareholders' funds	Reduced profitability due to a fall in short term interest rates	Receive fixed interest rate swaps		
Fixed rate assets funded by floating rate liabilities	Sensitivity to increases in short term interest rates	Pay fixed interest rate swaps		
Investment in foreign currency assets	Sensitivity to strengthening of US\$ against other currencies	Currency swaps		
Profits generated in foreign currencies	Sensitivity to strengthening of US\$ against other currencies	Forward foreign exchange contracts and purchased currency options		

for the year ended 31st December 2010

26 RISK MANAGEMENT (continued)

c) Liquidity risk

Liquidity risk is the risk that sufficient funds are not available to meet the Group's financial obligations on a punctual basis as they fall due

Equidity management policies are designed to ensure that funds are available at all times to meet the funding requirements of the Group, even in adverse conditions. In normal conditions the objective is to ensure that there are sufficient funds available not only to meet current financial commitments but also to facilitate business expansion. These objectives are met through the application of prudent liquidity controls. These controls provide security of access to funds without undue exposure to increased costs from the liquidation of assets or the aggressive bidding for deposits. The Group's liquidity controls ensure that, over the short term, the future profile of cash flows from maturing assets is adequately matched to the maturity of liabilities. Liquidity controls also provide for the maintenance of a stock of liquid and readily realisable assets and a diversified deposit base in terms of both maturities and range of depositors.

The management of liquidity and funding is primarily conducted in the Group's individual geographic entities within limits set and approved by the Board of Directors The limits take account of the depth and liquidity of the market in which the entity operates it is the Group's general policy that each geographic entity should be self-sufficient in relation to funding its own operations.

The Group's figuidity management policies include the following:-

- the monitoring of (i) future contractual cash flows against approved limits, and (ii) the level of liquid assets available in the event of a stress event
- the monitoring of balance sheet liquidity ratios
- the monitoring of the sources of funding in order to ensure that funding is derived from a diversified range of sources
- the monitoring of depositor concentrations in order to avoid undue reliance on individual depositors
- the maintenance of a satisfactory level of term financing; and
- the maintenance of liquidity and funding contingency plans These plans identify early indicators of stress conditions and prescribe the
 actions to be taken in the event of systemic or other crisis, while minimising adverse long term implications for the Group's business
 activities

The Group has established limits which restrict the volume of liabilities maturing in the short term. An independent risk management function monitors the future cash flow maturity profile against approved limits on a daily basis. The cash flows are monitored against limits applying to both daily and cumulative cash flows occurring over a 30 day period. The cash flow analysis is also monitored on a weekly basis by the Assets and Liabilities Committee (ALCO).

Customer deposits form a significant part of the Group's funding The Group places considerable importance on maintaining the stability of both its customer and interbank deposits The stability of deposits depends on maintaining confidence in the Group's financial strength and financial transparency

The maturity profile of assets and liabilities is set out in note 28. An analysis of debt investment securities by rating classification is set out in note 26(a)

d) Operational risk

Operational risk is the risk of unexpected losses resulting from inadequate or failed internal controls or procedures, systems failures, fraud, business interruption, compliance breaches, human error, management failure or inadequate staffing.

A framework and methodology has been developed to identify and control the various operational risks While operational risk cannot be entirely eliminated, it is managed and mitigated by ensuring that the appropriate infrastructure, controls, systems, procedures, and trained and competent people are in place throughout the Group. A strong internal audit function makes regular, independent appraisals of the control environment in all identified risk areas. Adequately tested contingency arrangements are also in place to support operations in the event of a range of possible disaster scenarios.

26 RISK MANAGEMENT (continued)

e) Capital management

The Group's lead regulator, the Central Bank of Bahrain (CBB) sets and monitors capital requirements for the Group as a whole The parent company and individual banking operations are directly supervised by their local regulators

As referred to in more detail in note 33, the Group adopted the Basel 2 capital adequacy framework with effect from 1st january 2008.

In applying current capital requirements, the CBB requires the Group to maintain a prescribed minimum ratio of total regulatory capital to total risk-weighted assets The CBB's minimum risk asset ratio is 12 per cent compared to a minimum ratio of 8 per cent prescribed by the Basel Committee on Banking Supervision The Group calculates regulatory capital requirements for general market risk in its trading portfolios using a Value-at-Risk model and uses the CBB's prescribed risk weightings under the standardised approach to determine the risk-weighted amounts for credit risk and specific market risk. Operational risk is calculated by applying the CBB's prescribed alpha co-efficient to the Group's average gross income for the preceding three financial years

The Group's regulatory capital is analysed into two tiers -

- Tier I capital, comprising issued share capital, share premium, retained earnings and reserves, adjusted to exclude revaluation gains and losses arising on the remeasurement to fair value of available-for-sale securities and derivative cash flow hedging transactions with the exception of unrealised losses arising on the remeasurement to fair value of equity securities classified as available-for-sale securities
- Tier 2 capital, comprising qualifying subordinated term finance, collective impairment provisions and 45 per cent of unrealised gains arising on the remeasurement to fair value of equity securities classified as available-for-sale securities

The CBB applies various limits to elements of the capital base The amount of innovative tier 1 securities cannot exceed 15 per cent of total tier 1 capital, qualifying tier 2 capital cannot exceed tier 1 capital, and qualifying subordinated term finance cannot exceed 50 per cent of tier 1 capital. There are also restrictions on the amount of collective impairment provisions that may be included as part of tier 2 capital. Collective impairment provisions cannot exceed 1.25 per cent of total risk-weighted assets

The Group's risk exposures are categorised as either trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures.

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain the future development of the business. The impact of the level of capital on shareholders' return is also recognised as well as the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position. The Group manages its capital structure and makes adjustments to the structure taking account of changes in economic conditions and strategic business plans. The capital structure may be adjusted through the dividend payout, the issue of new shares and through subordinated term finance arrangements.

The Group and its individually regulated operations complied with all externally imposed capital requirements throughout the years ended 31st December 2010 and 31st December 2009

There have been no material changes in the Group's management of capital during the years ended 31st December 2010 and 31st December 2009

The capital adequacy ratio calculation is set out in note 33

for the year ended 31st December 2010

27 GEOGRAPHICAL DISTRIBUTION OF RISK ASSETS

			31 12 10			31 12 09
	Placements & other liquid assets US\$ millions	Securities US\$ millions	Loans and advances US\$ millions	Credit-related contingent items US\$ millions	Total US\$ millions	Total US\$ millions

Total liabilities & equity	9,564 4	2,140 3	2,184 2	95	2,309 3	16,207 7

28 MATURITIES OF ASSETS AND LIABILITIES (continued)

The asset and liability maturities presented in the table above are based on contractual repayment arrangements and as such do not take account of the effective maturities of deposits as indicated by the Group's deposit retention records Formal liquidity controls are nevertheless based on contractual asset and liability maturities

The gross cash flows payable by the Group under financial liabilities, based on contractual maturity dates, was as follows -

	Within 3 months US\$ millions	4 months to I year US\$ millions	Years 2 and 3 US\$ millions	Years 4 and 5 US\$ millions	Over 5 years US\$ millions
At 31st December 2010					
Deposits	6,728.0	1,994.9	9.6	•	•
Securities sold under agreements to repurchase	779 1	169.4	-	-	•
Term financing	2 1	401.5	1,991.2	1,401 9	157.0
Derivative financial instruments					
- contractual amounts payable	35 4	94 8	203.8	169.1	112.8
- contractual amounts receivable	(15 1)	(63 3)	(167 9)	(142.9)	(100.9)
Total undiscounted financial liabilities	7,529 5	2,597 3	2,036.7	1,428 1	168 9
At 31st December 2009					
Deposits	8,854 1	1,2362	92	-	•
Securities sold under agreements to repurchase	573 5	_	•	-	-
Term financing	216	886 3	2,256 0	55 0	544 7
Derivative financial instruments					
- contractual amounts payable	66 I	88 4	189 5	145 6	2104
- contractual amounts receivable	(10.5)	(57 6)	(167 9)	(146 B)	(212.8)
Total undiscounted financial liabilities	9,504 8	2,153 3	2,286 8	53 8	542 3

Information on the contractual terms for the drawdown of gross loan commitments is set out in note 31

The figures in the table above do not agree directly to the carrying amounts in the consolidated statement of financial position as they incorporate all cash flows, on an undiscounted basis, related to both principal as well as those associated with future coupon and interest payments. Coupons and interest payments for periods for which the interest rate has not yet been determined have been calculated based on the relevant forward rates of interest prevailing at the balance sheet date.

A maturity analysis of derivative and foreign exchange instruments based on notional amounts is set out in note 30(c)

for the year ended 31st December 2010

29 INTEREST RATE RISK

The repricing profile of assets and liabilities categories were as follows -

					Non-interest	
	Within	Months	Months	Over	bearing

Nau Intonot

The repricing profile is based on the remaining period to the next interest repricing date. The repricing profile of placements incorporates the effect of interest rate swaps used to lock-in a return on the Group's net free capital funds. Derivative financial instruments that have been used for asset and liability management purposes to hedge exposure to interest rate risk are incorporated in the repricing profiles of the related hedged assets and liabilities. The non-specific loan provision is deducted from non-interest bearing assets.

The substantial majority of assets and liabilities reprice within one year. Accordingly there is limited exposure to interest rate risk. The principal interest rate risk beyond one year as set out in the asset and liability repricing profile, represents the investment of the Group's net free capital in fixed rate government securities. At 31st December 2010 the modified duration of these fixed rate securities was 2.44. Modified duration represents the approximate percentage change in the portfolio value resulting from a 100 basis point change in yield. More precisely in dollar terms, the price value of a basis point of the fixed rate securities was US\$197,000.

Based on the repricing profile at 31st December 2010, and assuming that the financial assets and liabilities were to remain until maturity or settlement with no action taken by the Group to alter the interest rate risk exposure, an immediate and sustained one per cent increase in interest rates across all maturities would result in a reduction in net income before tax for the following year and in the Group's equity by approximately US\$11 I million and US\$32.2 million respectively (2009 US\$5 6 million and US\$10.9 million respectively). The impact on the Group's equity represents the cumulative effect of the increase in interest rates over the entire duration of the mismatches in the repricing profile of the interest rate sensitive financial assets and liabilities.

29 INTEREST RATE RISK (continued)

The Value-at-Risk by risk class for the Group's trading positions is set out in note 26 The market risk relating to foreign exchange and derivative trading instruments is set out in note 30

30 DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS

The Group utilises derivative and foreign exchange instruments to meet the needs of its customers, to generate trading revenues and as part of its asset and liability management (ALM) activity to hedge its own exposure to market risk. Derivative instruments are contracts whose value is derived from one or more financial instruments or indices. They include futures, forwards, swaps and options in the interest rate, foreign exchange, equity, credit and commodity markets. Derivatives and foreign exchange are subject to the same types of credit and market risk as other financial instruments. The Group has appropriate and comprehensive Board-approved policies and procedures for the control of exposure to both market and credit risk from its derivative and foreign exchange activities.

In the case of derivative transactions, the notional principal typically does not change hands it is simply a quantity which is used to calculate payments. While notional principal is a volume measure used in the derivative and foreign exchange markets, it is neither a measure of market nor credit risk. The Group's measure of credit exposure is the cost of replacing contracts at current market rates should the counterparty default prior to the settlement date. Credit risk amounts represent the gross unrealised gains on non-margined transactions before taking account of any collateral held or any master netting agreements in place.

The Group participates in both exchange traded and over-the-counter (OTC) derivative markets. Exchange traded instruments are executed through a recognised exchange as standardised contracts and primarily comprise futures and options. OTC contracts are executed between two counterparties who negotiate specific agreement terms, including the underlying instrument, notional amount, maturity and, where appropriate, exercise price in general, the terms and conditions of these transactions are tailored to the requirements of the Group's customers although conform to normal market practice industry standard documentation is used, most commonly in the form of a master agreement. The existence of a master netting agreement is intended to provide protection to the Group in the event of a counterparty default.

The Group's principal foreign exchange transactions are forward foreign exchange contracts, currency swaps and currency options Forward foreign exchange contracts are agreements to buy or sell a specified quantity of foreign exchange on a specific future date at an agreed rate. A currency swap involves the exchange, or notional exchange, of equivalent amounts of two currencies and a commitment to exchange interest periodically until the principal amounts are re-exchanged on a specified future date. Currency options provide the buyer with the right, but not the obligation either to purchase or sell a fixed amount of a currency at a specified exchange rate on or before a specified future date. As compensation for assuming the option risk, the option seller (or writer) receives a premium at the start of the option period.

The Group's principal interest rate-related derivative transactions are interest rate swaps, forward rate agreements, futures and options. An interest rate swap is an agreement between two parties to exchange fixed rate and floating rate interest by means of periodic payments based upon a notional principal amount and the interest rates defined in the contract. Certain agreements combine interest rate and foreign currency swap transactions, which may or may not include the exchange of principal amounts in a forward rate agreement, two parties agree a future settlement of the difference between an agreed rate and a future interest rate, applied to a notional principal amount for an agreed period. The settlement, which generally occurs at the start of the contract period, is the discounted present value of the payment that would otherwise be made at the end of that period. An interest rate future is an exchange traded contract for the delivery of a standardised amount of a fixed income security or time deposit at a future specified date interest rate options, including caps, floors and collars, provide the buyer with the right, but not the obligation, either to purchase or sell an interest rate financial instrument at a specified price or rate on or before a specified future date

The Group's principal equity-related derivative transactions are equity and stock index options. An equity option provides the buyer with the right, but not the obligation, either to purchase or sell a specified stock or index at a specified price or level on or before a specified future date.

The Group buys and sells credit protection through credit default swaps. Credit default swaps provide protection against the decline in value of a referenced asset as a result of credit events such as default or bankruptcy. It is similar in structure to an option whereby the purchaser pays a premium to the seller of the credit default swap in return for payment related to the deterioration in value of the referenced asset. Credit default swaps purchased and sold by the Group are classified as derivative financial instruments.

for the year ended 31st December 2010

30 DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS (continued)

a) Product analysis

The table below summarises the aggregate notional and credit risk amounts of foreign exchange, interest rate, credit and equity-related derivative contracts

	N	Credit risk		
	Trading US\$ millions	Hedging US\$ millions		amounts US\$ millions
At 31st December 2010				
Foreign exchange contracts -				
Unmatured spot, forward and futures contracts	397 9	2,095 I	2,493 0	11.9
Interest rate contracts				
Interest rate swaps	1,937 8	5,073 1	7,010.9	89 9
Cross currency swaps	•	400 0	400 0	•
Options, caps and floors purchased	24 3	-	24 3	0.2
Options, caps and floors written	24.3		24 3	-
	1,986 4	5,473	7,459 5	90.1
Credit contracts -				
Protection sold	25 0		25 0	
Total	2,409.3	7,568 2	9,977.5	102 0
At 31st December 2009				
Total	3,0122	4,204 0	7,2162	78 \$

There is no credit risk in respect of options, caps and floors written, and protection sold on credit contracts as they represent obligations of the Group.

At 31st December 2010 the Value-at-Risk of the foreign exchange interest rate and credit derivative trading contracts analysed in the table above, as calculated in accordance with the basis set out in note 33, was US\$0.1 million, US\$0.1 million and nil respectively (2009 nil, US\$0.1 million and nil) Value-at-Risk is a measure of market risk exposure and is accordingly separate and in addition to the credit risk exposure represented by the credit risk amounts in the table above

b) Counterparty analysis

	31 12 10			31 12.09
	Banks US\$ millions	Corporates US\$ millions	Total US\$ millions	Total US\$ millions
Credit risk amounts				
OECD countries	34 6	•	34 6	189
GCC countries	03	54 0	54.3	49 6
Other countries	•	13 1	13 1	100
	34 9	67 I	102 0	78 5

Credit risk is concentrated on major OECD-based banks and GCC-related customers

30 DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS (continued)

c) Maturity analysis

		Years	Years	Over	
	Year I	2 & 3	4 & 5	5 years	Total
	US\$ millions				
At 31st December 2010					
Foreign exchange contracts	2,493.0	•	-	•	2,493 0
Interest rate contracts	4,218.0	956 7	1,140.6	1,144 2	7,459.5
Credit contracts		25.0		-	25 0
Total	6,711 0	9817	1,140.6	1,144 2	9,977 5
At 31st December 2009					
Total	4,135 0	1,424 1	368 1	1,289 0	7,2162

The Group's derivative and foreign exchange activities are predominantly short-term in nature Transactions with maturities over one year principally represent either fully offset trading transactions or transactions that are designated, and qualify, as fair value and cash flow hedges

d) Fair value analysis

	31 12 10		31 12.09	
	Positive fair value US\$ millions	Negative fair value US\$ millions	Positive fair value US\$ millions	Negative fair value US\$ millions
Derivatives held for trading-				
Forward foreign exchange contracts	2.2	(2 1)	22	(44.7)
Interest rate swaps and swaptions	64 9	(61.4)	58 3	(53 7)
	67 1	(63 5)	60 5	(98 4)
Derivatives held as cash flow hedges -			•

Derivatives held as fair value hedges -				
Interest rate swaps		(22 7)	-	(39 1)
Amount included in other assets / (other liabilities)	67.1	(86 2)	60 6	(137 5)

e) Significant net open positions

There were no significant derivative trading or foreign currency net open positions at either 31st December 2010 or at 31st December 2010

f) Hedge effectiveness

Gains and losses recognised in the consolidated statement of income relating to fair value hedging relationships were as follows -

	2010	2009	
	US\$ millions	US\$ millions	
Net gains on derivative fair value hedging instruments	28 9	27 4	
Net losses on hedged items attributable to the hedged risk	28.9	27 4	

There were no ineffective portions of derivative fair value or cash flow hedging transactions recognised in the consolidated statement of income in either the year ended 31st December 2010 or 31st December 2009

Certain derivative cash flow hedging transactions were unwound during the year ended 31st December 2009. The resultant realised profits are being recognised in the consolidated statement of income over the respective tenors of the original transactions for periods to 2014.

for the year ended 31st December 2010

31 CREDIT-RELATED FINANCIAL INSTRUMENTS

Credit-related financial instruments include commitments to extend credit, standby letters of credit and guarantees which are designed to meet the financing requirements of customers. The credit risk on these transactions is generally less than the contractual amount. The table below sets out the notional principal amounts of outstanding credit-related contingent items and the risk-weighted exposures calculated in accordance with the capital adequacy guidelines of the Basel Committee on Banking Supervision.

	31 12 10		31 12.09	
	Notional principal amount US\$ millions	Risk- weighted exposure US\$ millions	Notional principal amount US\$ millions	Risk- weighted exposure US\$ millions
Direct credit substitutes	1640	147.6	171 6	161 4
Transaction-related contingent items	1,237 2	474.3	808.7	322.4
Short-term self-liquidating trade-related contingent items	209 2	42 9	234 3	48 3
Commitments, including undrawn loan commitments and underwriting commitments under note issuance and revolving facilities	539 5	224 8	945 8	450 2
-	2,149 9	889 6	2,160.4	982.3

Commitments may be drawndown on demand

Direct credit substitutes at 31st December 2010 included financial guarantees amounting to US\$101.8 million (2009: US\$138.5 million) Financial guarantees may be called on demand

Credit-related financial instruments are reported gross before applying credit risk mitigants such as cash collateral, guarantees and counter-indemnities. At 31st December 2010 the Group held cash collateral, guarantees, counter-indemnities or other high quality collateral in relation to credit-related financial instruments amounting to US\$178.7 million (2009- US\$115.1 million)

32 CONTINGENT LIABILITIES

Litigation

The Bank and its subsidiaries are engaged in litigation in various jurisdictions. The litigation involves claims by and against Group companies which have arisen in the ordinary course of business. The directors of the Bank, after reviewing the claims pending against Group companies and based on the advice of relevant professional legal advisors, are satisfied that the outcome of these claims will not have a material adverse effect on the financial position of the Group.

33 CAPITAL ADEQUACY

The CBB's Basel 2 guidelines became effective on 1st January 2008 as the common framework for the implementation of the Basel Committee on Banking Supervision's (Basel Committee) Basel 2 capital adequacy framework for banks incorporated in the Kingdom of Bahrain

The risk asset ratio calculated in accordance with the CBBs Basel 2 guidelines was as follows -

33 CAPITAL ADEQUACY (continued)

	31.12.10	31 12 09

Tier I risk asset ratio		18.7%		16 4%
Total risk asset ratio		24.3%		22 3%

for the year ended 31st December 2010

33 CAPITAL ADEQUACY (continued)

For regulatory Basel 2 purposes, the Group has initially adopted the standardised approach for credit risk. In time and subject to approval by the CBB, the Group plans to adopt the foundation internal ratings-based (FIRB) approach for credit risk as it is more closely aligned to the Group's internal risk and capital management methodologies For market risk, the Group uses the internal models approach GIB has initially adopted the basic indicator approach for determining the capital requirement for operational risk, although is planning to adopt the standardised approach for operational risk subject to approval by the CBB

In accordance with the capital adequacy guidelines of the CBB, revaluation gains and losses arising on the remeasurement to fair value of available-for-sale securities and derivative cash flow hedging transactions are excluded from tier. I capital with the exception of losses arising on the remeasurement to fair value of equity securities classified as available-for-sale. In accordance with the CBB's guidelines, gains arising on the remeasurement to fair value of equity securities classified as available-for-sale are included in tier. 2 capital, although limited to 45 per cent of the unrealised revaluation gain.

The Group's subordinated term financing facilities have been approved for inclusion in tier 2 capital by the CBB. During the last five years before maturity, a cumulative amortisation (discount) factor of 20 per cent per year is to be applied to the facilities. As at 31st December 2010 the amortisation amount excluded from tier 2 capital amounted to US\$72.2 million (2009 nil)

The Group calculates the regulatory capital requirement for general market risk using a Value-at-Risk model The use of the internal model approach for the calculation of the capital requirement for general market risk has been approved by the Bank's regulator, the CBB The multiplication factor to be applied to the Value-at-Risk calculated by the internal model has been set at 3 5 (2009 3 5) by the CBB

Value-at-Risk is calculated based on a 99 per cent confidence level, a ten-day holding period and a twelve-month historical observation period of unweighted data from the DataMetrics regulatory data set. Correlations across broad risk categories are excluded Prescribed additions in respect of specific risk are made to the general market risk. The resultant measure of market risk is multiplied by 12.5, the reciprocal of the 8 per cent international minimum capital ratio, to give market risk-weighted exposure on a basis consistent with credit risk-weighted exposure.

The Group calculates the regulatory capital requirement for operational risk by applying an alpha co-efficient of 15 per cent to the average gross income for the preceding three financial years

34 FIDUCIARY ACTIVITIES

The Group conducts investment management and other fiduciary activities on behalf of clients. Assets held in trust or in a fiduciary capacity are not assets of the Group and accordingly have not been included in the consolidated financial statements. The aggregate amount of the funds concerned at 31st December 2010 was US\$18,206.5 million (2009 US\$16,638.7 million)

35 RELATED PARTY TRANSACTIONS

The Group's related party transactions are limited to the compensation of its directors and executive officers

The compensation of key management personnel was as follows -

	2010	2009
	US\$ millions	US\$ millions
Short term employee benefits	5.4	5 9
Post-employment benefits	0.4	0.5
	5 8	64

Key management personnel comprise members of the Board of Directors, the Group Chief Executive Officer and the Managing Directors of the Group.

Post-employment benefits principally comprise compensation paid to personnel on retirement or resignation from the services of the Group.

There were no other related party transactions

36 FAIR VALUE OF FINANCIAL INSTRUMENTS

The Group's financial instruments are accounted for under the historical cost method with the exception of trading securities, available-for-sale securities and derivative financial instruments. By contrast the fair value represents the amount at which an asset could be exchanged, or a liability settled, in a transaction between knowledgeable, willing parties in an arm's length transaction. Differences therefore can arise between book values under the historical cost method and fair value estimates. Underlying the definition of fair value is the presumption that the Group is a going concern without any intention or requirement to curtail materially the scale of its operation or to undertake a transaction on adverse terms. Generally accepted methods of determining fair value include reference to quoted prices or to the pricing prevailing for similar financial instruments and the use of estimation techniques such as discounted cash flow analysis.

Based on the valuation methodologies outlined below, the fair values of all on- and off-balance sheet financial instruments were not significantly different to their carrying amounts

a) Trading & investment securities

The fair values of securities are based on quoted prices or valuation techniques with the exception of investments in unquoted equity investments for which fair values cannot be reliably measured, the fair values of which are based on their carrying amount.

b) Loans and advances

The fair values of loans held for trading are based on quoted market prices. The fair values of other loans on a floating interest rate basis are principally estimated at book value less provisions for impairment. The fair values of troubled sovereign debt are based on market bid prices. The fair values of impaired loans are estimated at the recoverable amount, measured as the present value of expected future cash flows discounted based on the interest rate at the inception of the loan. The fair values of fixed rate loans are estimated on a discounted cash flow basis utilising discount rates equal to prevailing market rates of interest in the respective currencies for loans of similar residual maturity and credit quality.

c) Term financing

The fair value of term financing is based on observable market data, including quoted market prices for debt instruments issued by similarly rated financial institutions and with similar maturities, or estimated on a discounted cash flow basis utilising currently prevailing spreads for borrowings with similar maturities. The fair values of senior term financing and subordinated term financing at 31st December 2010 were US\$3,163 I million and US\$446.6 million respectively (2009 US\$2,958.2 million and US\$461.7 million respectively)

d) Other on-balance sheet items

The fair values of foreign exchange and derivative financial instruments are based on market prices, discounted cash flow techniques or option pricing models as appropriate The fair values of all other on-balance sheet financial assets and liabilities approximate their respective book values due to their short term nature

e) Credit-related contingent items

There was no material fair value excess or shortfall in respect of credit-related off-balance sheet financial instruments, which include commitments to extend credit, standby letters of credit and guarantees, as the related future income streams reflected contractual fees and commissions actually charged at the balance sheet date for agreements of similar credit standing and maturity. Specific provisions made in respect of individual transactions where a potential for loss has been identified are included in provisions for the impairment of loans and advances.

for the year ended 31st December 2010

36 FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

c) Credit-related contingent items (continued) The valuation basis for financial assets and financial liabilities carried at fair value was as follows -

	Quoted prices (level I) US\$ millions	Valuation based on observable market data (level 2) US\$ millions	Other valuation techniques (level 3) US\$ millions
At 31st December 2010			
Financial assets			
Trading securities	79.7	•	-
Investment securities	2,933 8	•	27.1
Derivative financial instruments	•	67.1	•
Financial liabilities			
Derivative financial instruments	•	86 2	•
At 31st December 2009			
Financial assets			
Trading securities	50 2	•	•
Investment securities	0 888,1	•	24 9
Derivative financial instruments	-	60 6	-
Financial liabilities.			
Derivative financial instruments	•	137 5	•

Quoted prices include prices obtained from lead managers, brokers and dealers investment securities valued based on other valuation techniques comprise private equity investments that have been valued based on price / earnings ratios for similar entities. The majority of the Group's financial assets and liabilities that are carried at fair value are valued based on quoted market prices. At 31st December 2010, 97.0 per cent of financial assets carried at fair value were valued based on quoted prices (2009. 95.7 per cent)

During the year ended 31st December 2010 the value of investment securities whose measurement was determined by other valuation techniques (level 3 measurement) increased by US\$2.2 million. The increase entirely comprised changes in assigned valuations, as recognised in other comprehensive income. No transfers out of, or into, the level 3 measurement classification occurred during the year ended 31st December 2010.

37 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net income / (loss) attributable to the shareholders by the weighted average number of shares in issue during the year

Basic earnings per share	US\$0 04	(US\$0 06)
Weighted average number of shares in issue (millions)	2,500	2,500
Net Income / (loss) after tax (US\$ millions)	100 4	(152.6)
	2010	2009

The diluted earnings per share is equivalent to the basic earnings per share set out above

38 PRINCIPAL SUBSIDIARIES

The principal subsidiary companies were as follows -

	Country of	Ownership interest	
	Incorporation	31 12 10	31 12 09
Gulf International Bank (UK) Limited	United Kingdom	100%	100%
GIB Financial Services LLC	Kingdom of Saudi Arabia	100%	100%
