Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below and are in accordance with applicable accounting standards in the Netherlands. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards and IFRIC interpretations endorsed by the European Union (EU). The financial statements have been prepared under the historical cost convention. A summary of the more important group accounting policies is set out below, together with an explanation of where changes have been made to previous policies on the adoption of new accounting standards in the year.

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The company's operating role is historically within the Netherlands where the Euro is the currency of the economic environment. Therefore the functional currency of the company is the Euro.

Other receivables

Other receivables are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable balances.

Share capital
