financial statements 2019

Report of the Statutory Auditor
to the General Meeting of
Ansaldo Energia Switzerland AG
Haselstrasse 18
5400 Baden

Aarau, May 20, 2020

Report of the Statutory Auditor on the Financial Statements

As statutory auditors, we have audited the accompanying financial statements of **Ansaldo Energia Switzerland AG**, which comprise the balance sheet as at December 31, 2019, the income statement and notes for the year then ended.

Board of Directors' Responsibility

The Board of Directors is responsible for the preparation of these financial statements in accordance with the requirements of Swiss law and the company's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended December 31, 2019 comply with Swiss law and the company's articles of incorporation.

Report on Other Legal Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 Code of Obligations (CO)) and that there are no circumstances incompatible with our independence.

In accordance with article 728a para. 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the company's articles of incorporation.

We recommend that the financial statements submitted to you be approved.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED December 31, 2019 AND December 31, 2018

NOTE 1 – BASIS OF PREPARATION OF THE STATUTORY FINANCIAL STATEMENTS

The company is controlled by Ansaldo Energia S.p.A. whose consolidated financial statements for the period ended December 31, 2019 have been prepared in accordance with the International Financial Reporting Standards (IFRS) published by the International Accounting Standards Board (IASB) and endorsed by the European Union (EU), applicable as of December 31, 2019. As the differences between IFRS by the IASB and the IFRS endorsed by the EU are seen as not essential the management decided to apply Art. 961d, Swiss code of obligations (CO). The most recent group annual report is available on the group's website: www.ansaldoenergia.com.

The company's statutory financial statements for the period ended December 31, 2019 are prepared on a going concern basis and are in accordance with the revised CO. The balance sheet and the income statement are prepared in both, EUR and CHF (refer to note 2.1). Currency translation is performed in a way as if books were kept in CHF. CHF figures represent the entity's statutory accounts according to the revised CO, whereas EUR figures determine the entity's tax base.

NOTE 2 – ACCOUNTING POLICIES

With the implementation of IFRS 16 as of January 1st, 2019 the company is required to recognize all leases (non-cancelable within 12 months) on the balance sheet for its group IFRS financial statement. This has led the company to evaluate those leases as well for its statutory accounts under Swiss CO.

From an economic point of view the leases which are non-cancelable within 12 months are recognized in the balance sheet. The right of use is capitalized based on the contract value at inception and depreciated over the fixed contract period length and an eventual extension option. The lease liability is the net present value of future lease payments discounted at an implicit rate of average 3.7% and reduced by future payments to the lessor.

The Company has opted to apply the new standard using the modified retrospective method as of January 1st, 2019. Therefore no restatement of comparative information is required. Note 6 with the disclosure of non-cancelable lease commitments is therefore no longer required. At January 1st, 2019 the Company has recognized long term leased tangible assets and non-current lease liabilities of 33.5m EUR.

There were no other changes in accounting policies in the current financial year.

2.1 Currency translation

Accounts are kept in EUR. The entity translates the balance sheet and income statement items from EUR to CHF according to the closing rate method (STKM):

- Balance sheet items (excluding equity) are translated using the closing rate
- Equity is translated using historical rates
- The income statement is translated using an average rate for the fiscal year

The resulting currency translation difference is recorded based on the imparity principle and as required by the Swiss CO as follows:

- Unrealized gain is deferred and shown as an unrealized currency translation provision in the Balance Sheet
- Unrealized loss is immediately recognized in the Income Statement as currency translation differences

2.2 Revenue and margin recognition on construction and long-term service contracts resp. related provisions

The entity recognises revenue and gross margin on construction and long-term service contracts using the percentage of completion method based on actual cost incurred. In addition, when a project review indicates a negative gross margin, the estimated loss at completion is immediately recognised.

Recognised revenue and margin are based on estimates of total expected contract revenue and cost, which are subject to revisions as the contract progresses. Total expected revenue and cost on a contract reflect management's current best estimate of the probable future benefits and obligations associated with the contract. Assumptions used to calculate present and future obligations take into account current technology as well as the commercial and contractual positions, assessed on a contract-by-contract basis. The introduction of technologically advanced products exposes the entity to risks of product failure significantly beyond the terms of standard contractual warranties applicable to suppliers of equipment only.

Obligations on contracts may result in penalties due to late completion of contractual milestones or unanticipated costs due to project modifications, suppliers or subcontractors' failure to perform or delays caused by unexpected conditions or events. Warranty obligations are affected by product failure rates, material usage and service delivery costs incurred in correcting failures.

Although the entity makes individual assessments on contracts on a regular basis, there is a risk that actual costs related to those obligations may exceed initial estimates. Estimates of contract costs and revenues at completion in case of contracts in progress and estimates of provisions in case of completed contracts may then have to be reassessed.

2.3 Presentation of construction and long-term service contracts

The balances arising from construction and long-term service contracts are shown as «amount due from/to customers» in the balance sheet, on a contract-by-contract basis. The gross amount due from customers (assets) for contract work is the net amount of:

- costs incurred plus recognised profits, less
- the sum of recognised losses and progress billings

for all contracts in progress for which costs incurred plus recognised profits (or less recognised losses, if applicable) exceed progress billings.

The gross amount due to customers (liability) is calculated similarly for all contracts in progress for which progress billings exceed costs incurred plus recognised profits (or less recognised losses, if applicable).

2.4 Cash and cash equivalents

Cash and cash equivalents consist of cash and short-term highly liquid investments that are readily convertible to known amounts of cash which are subject to an insignificant risk of change in value.

2.5 Trade accounts receivables and other short-term receivables

Trade accounts receivables and other short-term receivables are initially recognised at nominal value. If there is a subsequent indication of an impairment trigger observed, they are reviewed for impairment and a valuation adjustment is recorded.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED December 31, 2019 AND December 31, 2018

2.6 Inventory

Raw materials and supplies, work in progress and finished products are stated at the lower of cost (using the weighted average cost method) or net realisable value. Inventory costs includes direct material and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventory to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

2.7 Investments

Investments are measured and carried at acquisition cost less provisions for impairment.

2.8 Intangible Fixed Assets

Development cost that meet the recognition criteria according to IAS 36 are capitalized as intangible assets. The main intangible asset on the company's balance sheet relates to the development of a large frame gas turbine (GT36). The company has performed an impairment test, taking into account future market outlooks and time to harvest the proceeds of the intangible asset, as well as the weighed average cost of capital for the investment. The impairment test resulted in an impairment of 90m EUR as of December 31, 2019.

2.9 Cash Flow Hedges (Derivatives)

The Company has entered into Cash Flow Hedges to cover currency exposure for long-term service contracts (see note 2.2) concluded in a currency other than Euro. Any fair valuation of these Cash Flow Hedges is directly correlated with a guaranteed future cash transaction agreed in the long-term service contracts. At December 31st, 2019 the portfolio of derivatives showed a negative replacement value of EUR 11.1m (compared to EUR 6.6m at December 31st, 2018).

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED December 31, 2019 AND December 31, 2018

NOTE 8 – LIENS AND PLEDGES

Neither liens nor pledges to secure own liabilities and assets under reservation of ownership exist.

NOTE 9 – CONTINGENT LIABILITIES

The entity has entered into performance guarantee agreements towards customers of related parties.

NOTE 10 – COMMENT ON EXCEPTIONAL, NON-RECURRING OR PRIOR PERIOD ITEMS

The entity has not recorded any exceptional, non-recurring or prior period items in the current financial period.

NOTE 11 – SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

Based on the measures ordered by the Swiss Government to contain the Covid-19 pandemic the Board of Directors of the company has put in place procedures to protect the health and safety of its employees as well as the continuation of its business. As of today it is not possible to determine the financial impact of the pandemic and its consequences, it will also highly depend on the future development. The company's evaluation is that there will not be a significantly higher risk of negative economic consequences on its business.

ANSALDO Energia Switzerland AG, Baden
