NOTES TO THE ACCOUNTS

Year ended 30 April 2007

1. ACCOUNTING POLICIES

The principal accounting policies which the directors have adopted are set out below.

Convention

The financial statements are prepared under the historical cost convention.

Taxation

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Entitlement to ground rent

Ground rent entitlements represent the cost of land from which the ground rental derives. These entitlements are in perpetuity and consequently no amortisation of the asset is required.

Stocks

Stocks are stated at the lower of cost and net realisable value. Cost includes direct expenditure on site acquisition and subsequent development.

2. SECURED BORROWINGS

Bank borrowings of £10,000 (2006: £86,250) are secured by deposits of title deeds in respect of specified property development sites together with an all monies debenture over debtors and stock together with a fixed charge over the development sites.
