NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 JULY 2015

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements.

1.1 Basis of preparation

The financial statements have been prepared in accordance with United Kingdom generally accepted accounting practice and statute comprising the Companies Act 2006 and the Financial Reporting Standard for Smaller Entities (effective April 2008).

1.2 Cash flow

The financial statements do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under Financial Reporting Standard for Smaller Entities (effective April 2008).

1.3 Turnover

Turnover represents the total invoice value, excluding value added tax and trade discounts, of goods sold and services rendered during the year.

1.4 Tangible fixed assets and depreciation

The cost of fixed assets is their purchase cost, together with any incidental costs of acquisition. Depreciation is calculated in order to write off the cost of tangible fixed assets less their estimated residual values on a straight line basis over the expected useful lives of the assets concerned. The principal annual rates used for this purpose are:

Structural alterations	5% straight line
Office equipment	25% reducing balance
Fixtures & fittings	20% reducing balance

1.5 Asset finance commitments

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible assets and depreciated over the shorter of the lease term and their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account as paid.

1.6 Stock

Stocks are stated at the lower of cost and net realisable value. Net realisable value is based on estimated selling price less further costs to completion and disposal.

1.7 Deferred taxation

Full provision for deferred tax assets and liabilities is provided at current tax rates on differences that arise between the recognition of gains and losses in the financial statements and their recognition in the tax computation, except for differences arising on the revaluation of fixed assets (if no commitment to sell), or gains on any asset sold that will benefit from rollover relief.

1.8 Capital instruments

Shares are included in shareholders funds. Other instruments are classified as liabilities if not included in shareholders funds and if they contain an obligation to transfer economic benefits. The finance cost recognised in the profit and loss account in respect of capital instruments other than equity shares is allocated to periods over the term of the instrument at a constant rate on the carrying amount.
