Strategic report for the year ended 30 September 2013

The directors present their strategic report on the company for the year ended 30 September 2013.

Principal activities

Almac Sciences Limited is a private limited company incorporated and domiciled in Northern Ireland. The registered address is detailed on page 1.

The company continued to be engaged in the provision of custom chemical synthesis services.

Review of business and future developments

Trading during the year was difficult as a result of global economic conditions. The directors are reviewing the operations of the business and are confident of reducing the level of losses during the next financial year.

Principal risks and uncertainties

The management of the business and the execution of the company's strategy are subject to a number of risks including the competitive market conditions. Further discussion of these risks and uncertainties, in the context of the group as a whole, is provided in the annual report of the parent undertaking, Almac Group Limited.

Key performance indicators

The directors manage the company's operations on a divisional basis. For this reason, the company's directors believe that analysis using key performance indicators is not necessary for an understanding of the development, performance or position of the business of the company. Commentary on the group's performance is provided in the financial statements of Almac Group Limited.

Environment

The company recognises its corporate responsibility to carry out its operations whilst minimising environmental impacts. The directors' continued aim is to comply with all applicable environmental legislation, prevent pollution and reduce waste wherever possible.

Health and safety

The company is committed to achieving the highest practicable standards in health and safety management and strives to make all sites and offices safe environments for employees and customers alike.

Human resources

People are the company's most important resource. Retention of key staff is critical and the company has invested in employment training and development.

Performance and position

The loss after income tax for the financial year is £1,458,373 (2012: £2,791,197) and its net assets are £19,051,539 (2012: £16,385,013).

Strategic report for the year ended 30 September 2013

Going concern

The directors have prepared cash flow forecasts for a period of at least twelve months from the date of signing of this report and confirm that adequate banking facilities are in place to support the company's operations and planned growth over this period. Consequently, the directors have prepared these financial statements on a going concern basis.

Directors' report for the year ended 30 September 2013

The directors present their annual report and the audited financial statements of the company for the year ended 30 September 2013.

Future developments

The section on future developments, which is detailed in the strategic report, is included in this report by cross reference.

Financial risk management

The company operates within the competitive conditions of its market place. Regarding credit risk, it is standard company policy to perform appropriate credit checks on all potential customers before contracts are entered into. Further commentary is provided in note 3.

Dividends

The directors do not recommend payment of a dividend (2012: £nil).

Research and development activities

The company is committed to research and development in the area of drug discovery. Research in the year totalled £nil (2012: £69,751) and was expensed as incurred. No development expenditure was incurred in the year (2012: £nil).

Directors

The directors who served during the year and up to the date of approval of the financial statements are shown on page 1.

Political donations

No donations for political purposes were made during the year (2012: £nil).

Employees

The company systematically provides employees with all information on matters of concern to them, consulting them or their representatives regularly, so that their views can be taken into account when making decisions that are likely to affect their interests. Employee involvement in the company is encouraged, as achieving a common awareness on the part of all employees of the financial and economic factors affecting the company plays a major role in objectives.

The company is committed to employment policies, which follow best practice based on equal opportunities for all employees, irrespective of sex, race, colour, disability or marital status. The company gives full and fair considerations to applications for employment from disabled persons, having regard to their particular aptitudes and abilities. Appropriate arrangements are made for the continued employment and training, career development and promotion of disabled persons employed by the company. If members of staff become disabled the company continues employment, either in the same or an alternative position with appropriate retraining being given if necessary.

Statement of disclosure of information to auditors

So far as each of the directors in office at the date of approval of these financial statements is aware:

- there is no relevant audit information of which the company's auditors are unaware; and
- they have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of that information.

Directors' report for the year ended 30 September 2013 (continued)

Independent auditors

The independent auditors, PricewaterhouseCoopers LLP, have indicated their willingness to continue in office, and a resolution concerning their re-appointment will be proposed at the Annual General Meeting.

On behalf of the Board

A handwritten signature in black ink, appearing to read 'K Stephens', is written over the printed name.

Statement of directors' responsibilities

The directors are responsible for preparing the Strategic report, Directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis, unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent auditors' report to the members of Almac Sciences Limited

We have audited the financial statements of Almac Sciences Limited for the year ended 30 September 2013 which comprise the Income statement, Statement of comprehensive income, Statement of changes in equity, Balance sheet, Cash flow statement and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

Respective responsibilities of directors and auditors

As explained more fully in the Statement of directors' responsibilities set out on page 6, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Annual report and financial statements to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 30 September 2013 and of its loss and cash flows for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Strategic report and Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Notes to the financial statements for the year ended 30 September 2013**1 Accounting policies****General information**

The company's principal activity during the year was as described in the Directors' report. The financial statements are presented in UK pound sterling. Almac Sciences Limited is a private limited company incorporated and domiciled in Northern Ireland. The company's registered address is detailed on page 1.

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

The financial statements of Almac Sciences Limited have been prepared on the going concern basis and in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU), the Companies Act 2006 applicable to companies reporting under IFRS, and IFRIC interpretations. The financial statements have been prepared under the historical cost convention.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the company's accounting policies. Management has concluded that there are no critical assumptions, estimates or judgements involving a high degree of judgment or complexity which require further disclosure. The company's accounting policies and estimates are detailed below.

New standards, amendments and interpretations effective in the year to 30 September 2013

The accounting policies set out below are those that the group has adopted under International Financial Reporting Standards as adopted by the European Union for the year ended 30 September 2013.

The following standards have been adopted by the group for the first time for the financial year beginning on or after 1 October 2012 and have a material impact on the group:

Amendment to IAS 1, 'Financial statement presentation' regarding other comprehensive income. The main change resulting from these amendments is a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments).

Notes to the financial statements for the year ended 30 September 2013

1 Accounting policies (continued)

Standards, amendments and interpretations that are not yet effective and have not been adopted early by the company

During the year, the IASB and IFRIC have issued the following accounting standards and interpretations with an effective date after the date of these financial statements (i.e. applicable to accounting periods beginning on or after the effective date):

The following new standards, new interpretations, and amendments to standards and interpretations that are not yet effective and have not been adopted early by the group:

- IAS 19 (revised 2011) 'Employee benefits' ;
- IAS 28 (revised 2011) 'Associates and joint ventures';
- IFRS 9, 'Financial instruments';
- IFRS 10, 'Consolidated financial statements';
- IFRS 11, 'Joint arrangements';
- IFRS 12, 'Disclosures of interests in other entities';
- IFRS 13, 'Fair value measurement';
- IFRIC 20, 'Stripping costs in the production phase of a surface mine'
- Amendment to IAS 12, 'Income taxes' on deferred tax';
- Amendment to IAS 32 Financial instruments: Presentation on offsetting financial assets and financial liabilities; and
- Amendment to IFRS 1 on hyperinflation and fixed dates;

The introduction of these new standards, interpretations and amendments is not expected to have a material impact on the group or company.

Basis of consolidation

The company has taken advantage of the exemption conferred under Companies Act 2006 Section 400 from preparing group financial statements. The financial statements therefore present information about the company as an individual undertaking and not about its group.

Intangible assets

Computer software

The costs of acquiring and bringing computer software in to use are capitalised and amortised on a straight-line basis over the estimated useful economic life of the software which is between three to five years.

Capitalised software development costs include external direct costs of material and services together with direct labour costs relating to software development. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the company are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software product so that it will be available for use;
- management intends to complete the software product and use or sell it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Notes to the financial statements for the year ended 30 September 2013

1 Accounting policies (continued)

Intangible assets (continued)

Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the company's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill on acquisitions of subsidiaries is included in 'intangible assets'. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purposes of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

For all assets depreciation is calculated so as to write off the cost less their estimated residual values, on a straight line basis over the expected useful economic lives of the assets concerned, or over the life of project, whichever is earlier. The principal annual rates used are as follows:

| | % |
|-----------------------|------|
| Freehold buildings | - 2 |
| Plant and machinery | - 10 |
| Fixtures and fittings | - 10 |
| Computers | - 20 |
| Motor vehicles | - 25 |

No depreciation is charged on freehold land or assets in the course of construction. The assets' residual values and useful economic lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposal are determined by comparing the proceeds with the carrying amount and are included within administrative expenses in the income statement.

Investment in subsidiaries

Investments in subsidiaries are held as non-current assets and are recorded at cost, which is the fair value of the consideration paid, less any provision for impairment. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Financial assets

The company classifies all its financial assets as loans and receivables.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. The company's loans and receivables comprise 'trade and other receivables' and 'cash and cash equivalents' in the balance sheet.

Notes to the financial statements for the year ended 30 September 2013**1 Accounting policies (continued)****Impairment of financial assets**

The company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced and the amount of the loss is recognised in the income statement.

Impairment of non-financial assets

Assets that have an indefinite useful economic life, for example goodwill, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell, and value in use. For the purposes of assessing impairment, assets are grouped by cash generating unit. Non-financial assets other than goodwill that have suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Trade and other receivables

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Cash and cash equivalents

In the cash flow statement cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Notes to the financial statements for the year ended 30 September 2013

1 Accounting policies (continued)

Borrowings

Borrowings are recognised initially at fair value, net of direct issue costs and subsequently measured at amortised cost. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on an accruals basis to the income statement using the effective interest rate method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least twelve months after the balance sheet date.

Leased assets

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

The company leases certain property, plant and equipment. Leases of property, plant and equipment where the company has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the useful economic life of the asset and the lease term.

Current and deferred income tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the country where the company operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Amounts paid by, or amounts received by, the company in respect of group relief that represent the tax benefit surrendered/received are recorded as an income tax expense/credit in the statement of comprehensive income. Where the amounts paid by, or amounts received by, the company exceed the tax benefit surrendered/received, the excess is recorded directly in equity as a movement in other comprehensive income.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising, except where the timing of the reversal of the temporary difference is controlled by the company and it is probable that the temporary difference will not reverse in the foreseeable future.

Notes to the financial statements for the year ended 30 September 2013**1 Accounting policies (continued)****Current and deferred income tax (continued)**

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Grants

Grants are recognised at their fair value where there is a reasonable assurance that the grant will be received and the company will comply with all attached conditions. Grants relating to costs are deferred and recognised in the income statement over the period necessary to match them with the costs that they are intended to compensate. Grants relating to property, plant and equipment are included in non-current liabilities as deferred income and are credited to the income statement on a straight-line basis over the expected useful economic lives of the related assets.

Research and development

Expenditure on research is written off in the year in which it is incurred. Development expenditure is capitalised when the criteria for recognising an asset, as described above, are met.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the company's activities. Revenue is shown, net of sales taxes, returns, rebates and discounts.

The company recognises revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the entity. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The company considers this to be upon customer receipt of products, which is when title to the product is transferred to the customer or upon completion of services when results of testing have been delivered to the customer or logistics operations have been performed. The company uses the percentage-of-completion method in accounting for its fixed price contracts to deliver services. Use of the percentage-of-completion method requires the company to estimate the services performed to date as a proportion of the total services to be performed.

Foreign currency translation

Items included in the financial statements of each of the company's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in UK pound sterling, which is the company's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within 'finance income or cost'. All other foreign exchange gains and losses are presented in the income statement within administrative expenses.

1 Accounting policies (continued)

Pension obligations

The company operates a defined contribution plan for employees whereby the company pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The company has no further payment obligations once the contributions have been paid. The contributions are recognised as an employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Share-based payments

The company issues cash-settled phantom share-based payments to certain employees of the company for their services to the company. The company accounts for these phantom share based payments as cash-settled phantom share-based payments which are measured at fair value and recognised as an expense in the income statement with a corresponding increase in liabilities. The fair values of these payments are measured at each reporting date using professional external valuers, in line with the terms and conditions upon which the awards are granted. The fair value is recognised over the period during which employees become unconditionally entitled to the awards, subject to the company's estimate of the number of awards which will lapse due to employees leaving the company prior to vesting. The total amount recognised in the income statement as an expense is adjusted to reflect the actual amount of awards that are expected to vest, except where forfeiture is due to employee's termination of contract.

2 Revenue

Revenue is attributable to the company's principal activities carried out in the United Kingdom.

3 Financial risk management

Financial risk factors

The company's operations expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The company has in place a risk management programme that seeks to limit the adverse effects on the financial performance of the company by monitoring the foregoing risks.

(a) Market risk

(i) Foreign exchange risk

While the greater part of the company's revenues and expenses are denominated in UK pound sterling, the company is exposed to foreign exchange risk in the normal course of business. While the company has not used financial instruments to date to hedge foreign exchange exposure, this position is kept constantly under review.

If the US dollar had weakened/strengthened by 10% against the UK pound sterling spot rate on 30 September with all other variables held constant, the financial statements would have been impacted as follows:

| | 2013 | | 2012 | |
|---|---------------------------------------|------------------------------|--|------------------------------|
| | Impact on post-tax losses £'000 | Impact on equity £'000 | Impact on post-tax losses £'000 | Impact on equity £'000 |

| US dollar strengthens by 10% against UK pound | 69 | 69 | 83 | 83 |

Notes to the financial statements for the year ended 30 September 2013

3 Financial risk management (continued)

(ii) Interest rate risk

The company's interest rate risk arises from borrowings, which are a combination of group facility overdrafts and term loans. The company manages this risk by a mixture of variable interest rates on overdrafts, fixed rate interest on part of the term loan facilities and interest free advances from group companies. The interest rate is monitored on a regular basis with reference to movements in global interest rates and the potential impact upon the company's cost of borrowing. If average interest rates over the year had increased/decreased by 1% with all other variables held constant, the financial statements would have been impacted as follows:

| | 2013 | | 2012 | |
|-------------------------------|---------------------------------------|------------------------------|--|------------------------------|
| | Impact on post-tax losses £'000 | Impact on equity £'000 | Impact on post-tax losses £'000 | Impact on equity £'000 |
| Interest rates increase by 1% | (294) | (294) | (272) | (272) |
| Interest rates decrease by 1% | 294 | 294 | 272 | 272 |

(b) Credit risk

The company has implemented policies that require appropriate credit checks on potential customers before sales are made. Credit control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The amount of exposure to individual customers is subject to limits, which are reassessed regularly. Credit risk also arises from cash and cash equivalents with banks and financial institutions. Banking arrangements are reviewed and regularly reassessed by the board.

(c) Liquidity risk

The company projects cash flow requirements as part of its annual budget setting process. Cash requirements are monitored dynamically by the company's ultimate parent undertaking, with resources deployed to the company as required. As a result of its activities, the company is a net consumer of cash and combines intergroup funding with external sources to ensure that sufficient liquidity is maintained to allow continued operation.

4 Capital risk management

The company is a subsidiary of Almac Group Limited whose objectives when managing capital are to safeguard the group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. For further details, refer to the report and financial statements for Almac Group Limited.

| Income tax credit | 1,361,903 | 1,548,819 |

The standard rate of corporation tax in the UK changed from 24% to 23% with effect from 1 April 2013. Accordingly, the company's losses in this accounting year are taxed at an effective rate of 23.5%.

The tax on the company's loss before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to the loss of the company as follows:

| | 2013 £ | 2012 £ |
|---|--------------------|--------------------|
| Loss before income tax | (2,820,276) | (4,340,016) |
| Loss before income tax at the UK standard rate of 23.5% (2012: 25%) | (662,765) | (1,085,004) |

| Adjustments in respect of previous period | (122,610) | - |
| Capital grants not taxable | (129,054) | (223,054) |
| Changes in tax laws and rates | (109,559) | (70,316) |
| Income tax credit | (1,361,903) | (1,548,819) |

Factors affecting future tax charges:

During the year, changes to the UK main corporation tax rate, were substantively enacted on 3 July 2013. A rate of 21% is effective from 1 April 2014 and 20% from 1 April 2015, the relevant deferred tax balances have been re-measured.

| | 17,202,472 | 19,419,114 |

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable above.

Trade receivables impaired and the amount of the impairment provision at 30 September 2013 was £85,079 (2012: £58,065). The individually impaired receivables mainly relate to invoices for which there is uncertainty over recoverability. It was assessed that a portion of the receivables is expected to be recovered. The trade receivables that were impaired were all overdue by more than two months.

Movements on the provision for impairment of trade receivables are as follows:

12 Trade and other receivables (continued)

As of 30 September 2013, trade receivables of £526,702 (2012: £383,041) were past due but not impaired. These and the other trade receivables relate to a number of large multinational corporations for whom there is little risk of default. The aged analysis of these trade receivables is as follows:

| | 2013 £ | 2012 £ |
|----------------------------|----------------|----------------|
| Up to 2 months overdue | 522,770 | 365,205 |
| More than 2 months overdue | 3,932 | 17,836 |
| | 526,702 | 383,041 |

None of these trade receivables have had their terms renegotiated.

The creation and release of provision for impaired receivables have been included in administration expenses in the income statement.

The other classes within trade and other receivables do not contain impaired assets.

24 Contingent liabilities

There exists a contingent liability to repay certain capital and revenue grants received from Invest Northern Ireland if future employment levels fall below specified levels. The directors do not anticipate any repayment falling due under the terms on which the grants were received.

The company is party to an unlimited intercompany cross guarantee in relation to group banking facilities in the United Kingdom.

25 Share based payments

The company operates a phantom share scheme whereby share awards are granted to directors and senior management employees. The share award is granted for £nil consideration, and is conditional on the director or employee continuing in employment for a period of three years from the date the share award is made, which is the first of January following the financial year end. The company accounts for these share awards as cash-settled share-based payments which are measured at fair value and recognised as an expense in the income statement with a corresponding increase in liabilities. The fair values of these payments are measured at each reporting date using professional external valuers, in line with the terms and conditions upon which the awards are granted. The fair value is recognised over the period during which employees become unconditionally entitled to the awards, subject to the company's estimate of the number of awards which will lapse due to employees leaving the company prior to vesting. The total amount recognised in the income statement as an expense is adjusted to reflect the actual amount of awards that are expected to vest, except where forfeiture is due to employee's termination of contract.

Share awards are exercisable from the first of January, three years following the award date. The share award is exercisable at the share price as determined by professional qualified valuers at the end of financial year when the share is exercisable and all share awards are cash settled.

The fair value of each share award granted and the assumptions used in the calculation are as follows:

| Grant date | 30 September 2013 | 30 September 2012 |
|------------------------------|-------------------|-------------------|
| Share price at grant date | £0.551 | £0.606 |
| Exercise price at grant date | - | - |
| Number of employees | 14 | 16 |
| Share awards | 269,496 | 327,711 |
| Vesting period (years) | 4 | 4 |
| Option life (years) | 4 | 4 |
| Expected life (years) | 4 | 4 |
| Dividend yield | Nil | Nil |
| Risk free interest rate | 5.0% | 5.0% |
| Fair value | £0.551 | £0.606 |

The weighted average fair value of share awards granted during the year determined using the Black-Scholes valuation model was £0.551 (2012: £0.606). The significant inputs into the model were the share price at grant date, exercise price, dividend yield, risk free interest rate and expected option life as shown above.
