Notes

forming part of the abbreviated financial statements

1 Principal accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements.

(i) **Basis of accounting**

The financial statements have been prepared under the historical cost accounting convention and in accordance with applicable accounting standards.

(ii) **Taxation**

Corporation tax is calculated at current rates on the results of the year.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions:

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold;

Provision is made for deferred tax that would arise on remittance of the retained earnings of overseas subsidiaries, associates and joint ventures only to the extent that, at the balance sheet date, dividends have been accrued as receivable;

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

(iii) **Depreciation**

Depreciation is calculated to write off the original cost less the expected residual value of the tangible fixed assets by equal annual instalments over their estimated useful lives as follows:

Fixtures and fittings	20% straight line
Alterations to premises	10% straight line

(iv) **Amortisation of goodwill**

Goodwill is amortised on a systematic basis over its useful economic life of 10 years.

(v) **Stocks**

Stocks are valued at the lower of cost and net realisable value.
