#### Judgement and key sources of estimation uncertainty

Preparation of the financial statements requires management to make significant judgements and estimates, The items in the financial statement where these judgements and estimates have been made are summarised below.

#### Key accounting policies

#### **Turnover**

Turnover represents amounts receivable for goods and services net of value added taxation and trade discounts.

#### Investments

Fixed asset investments are stated at cost less provision for diminution in value.

#### Foreign currencies

Transactions denominated in foreign currency are translated into sterling at the rate of exchange ruling at the date of the transaction. Assets and liabilities denominated in foreign currencies at the Statement of financial position date are translated into sterling at the exchange rates ruling at that date. All exchange differences are taken to the Income Statement.

### Deferred taxation

Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is recognised on all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.
